Preface

This publication was prepared by the Highway Statistics Division, Office of Highway Planning, Federal Highway Administration. The 31st of an annual series, it presents the 1976 analyzed statistics of general interest on motor fuel, motor vehicles, driver licensing, highway-user taxation, State highway finance, highway mileage, and Federal aid for highways; and 1975 highway finance data for municipalities, counties, townships, and other units of local government. A listing of the data is given in the table of contents and a brief description is given in the text accompanying each section.

The Highway Statistics series has been published annually beginning with the year 1945. Most of the earlier editions are now out of print except for the following, which may be purchased from the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402:

INTRODUCTION

This publication brings together annual series of selected statistical tabulations relating to highway transportation in three major areas: (1) Highway use—the ownership and operation of motor vehicles; (2) highway finance—the receipts and expenditures for highways by public agencies; and (3) the highway plant—the extent and changing characteristics of the mileage of public highways, roads, and streets in the Nation.

The arrangement of contents follows this general order, with the first three sections devoted to motor-fuel consumption and taxation; vehicle ownership and operation; and Federal excises and the Highway Trust Fund. The fourth section deals with the financing of highways by all government agencies; and the fifth section provides statistics on highway mileages.

Statistics in this publication have been analyzed and reported on a calendar year basis using procedures that provide comparability of values among States. Therefore, some values reported here may differ from values reported by other agencies for similar items.

Cooperation of Federal, State, and local agencies in providing the basic data from which these statistical series are derived is acknowledged and appreciated.

While the Highway Statistics Division is responsible for the preparation of this publication, a number of the statistical summaries are prepared by other units within the Federal Highway Administration as indicated by notes on the tables involved.

Responsibility for administering the highway network of the United States, providing funds for its continued improvement and maintenance, and the regulation of its use, is a complex affair involving Federal and State agencies, together with nearly 35,000 local county, township, and municipal governments. These agencies work in concert in many ways in the management of the Nation's highway plant.

Federal agencies

The Federal Highway Administration is the principal highway agency of the Federal Government. Under the Federal-aid highway program, initiative for selecting routes eligible for improvement with Federal-aid funds rests with the States, and these routes continue to remain under the jurisdiction of the States or local governments which are responsible for administering and maintaining them as part of the State or local highway systems.

Other Federal agencies that administer continuing highway programs are the Forest Service of the Department of Agriculture and the National Park Service and the Bureau of Indian Affairs of the Department of the Interior. The Department of Defense and the Bureau of Land Management of the Department of the Interior provide funds in their budgets to finance construction of roads leading to military installations, timber areas, etc., but these funds are usually transferred to the Federal Highway Administration to manage the construction program.

Other Federal agencies also provide funds for roads and bridges incidental to their major functions. For example, the Department of the Army's Corps of Engineers and the Bureau of Reclamation of the Department of the Interior expend funds for highways and bridge construction and reconstruction associated with projects involving water resources and navigable rivers. The Forest Service and Bureau of Land Management provide funds through a policy of sharing with States and counties some of the income from timber sales and oil and mineral royalties on Federal lands, a portion of which is placed in road funds.

The Treasury Department's Internal Revenue Service collects the Federal excise taxes on motor fuel and automotive products, and those dedicated by Congress for deposit in the Federal Highway Trust Fund are transferred to the Fund by the Department of the Treasury.

State agencies

In the Federal Highway Administration's analyses, special commissions and authorities, both toll and nontoll, as well as State highway departments, are classed as State highway agencies. Other executive branches of the State government also have been included when, and to the extent, they are responsible for the collection and distribution of road-user taxes or perform highway and related functions. Examples of these executive agencies are treasury and revenue departments, motor vehicle departments, public safety departments (highway police and law enforcement activities), and conservation departments when they are responsible for roads within State parks, forests, or reservations. The District of Columbia, although a municipal type of government, is treated as a State.

County and township governments

Statistics are included for counties, townships, and highway and road improvement districts. There are organized county governments in all States except Connecticut and Rhode Island. (County governments in Alaska are called boroughs and in Louisiana, parishes.) Counties, however, have little or no responsibility for roads in the New England States, in Alaska, Delaware, North Carolina, Virginia (except for Arlington and Henrico Counties), or in West Virginia. Beginning with 1970, the 11 boroughs in Alaska were divided into 2 groups, one having rural characteristics (8 boroughs), and the other predominantly urban (3 boroughs). None of the rural-type boroughs have assumed road and street functions or received State aid for maintenance. In addition, at the option of the counties, Alabama has assumed legal responsibility for county roads in ten counties, and Maryland performs this function on behalf of six counties.

Because the area of some counties is entirely or nearly comprised of incorporated cities, towns, and villages, the Federal Highway Administration classifies statistics relating to their mileage and expenditures as being on municipal streets. These counties are: Bergen, Essex, Hudson, and Union, N.J.; Nassau, N.Y.; Cuyahoga, Ohio; and Milwaukee, Wisconsin.

Historically, several counties have had boundaries co-extensive with cities. These counties are: San Francisco, California; Denver, Colorado; Orleans (New Orleans), Louisiana; Bronx, Kings, New York, Queens, and Richmond (New York City), New York; and Philadelphia, Pennsylvania. This list was augmented as a result of recent county-city mergers beginning in 1963. The purpose of the merger was to consolidate governmental functions, but the counties, in general, have retained their identities for certain administrative purposes. These counties are: Borough of Juneau (Juneau and Douglas) and Borough of Sitka (Sitka), Alaska; Duval (Jacksonville), Florida; Muscogee (Columbus), Georgia; Marion (Indianapolis), Indiana; Ormsby (Carson City), Nevada; Davidson (Nashville), Tennessee; and Norfolk (South Norfolk), Princess Anne (Virginia Beach), Virginia. Arlington County, Virginia, because it is entirely urban in character, is also classed as a municipality.

In 21 States, organized township governments exist and provide funds for or perform highway functions in varying degrees. In the six New England States and in New York and Wisconsin, these governments are known as "towns." Although generally considered to be rural governments, many of the townships in these eight States, as well as in New Jersey and Pennsylvania, serve heavily populated areas and perform functions of municipal governments. For the Federal Highway Administration's analyses, some of the townships in New England, New Jersey, and New York have been classed as municipalities.

This classification was determined on the basis of population density criteria. Pennsylvania considers "townships of the first class" having a population density of 300 or more per square mile to be municipalities. Special districts having a degree of autonomy exist primarily in Idaho, Illinois, and Missouri and are responsible, except in Missouri, for separate road systems.

Data for county-created toll authorities, parkway commissions, etc., are included in statistical summaries with those for the county and township governments.

Municipalities

Municipal governments included in summary tables, in addition to the specific counties and townships described, are those incorporated places legally designated as cities, boroughs, villages, and towns other than the New England-type. Data for special parking authorities and commissions and municipal toll authorities are also included with those of municipal governments.

The term "urban" has been avoided in referring to these political entities and is used herein solely in connection with Federal-aid statistics that refer specifically to areas including and adjacent to a municipality or other urban place having a population of 5,000 or more. These Federal-aid urban areas may extend beyond corporate boundaries and thus are not necessarily coextensive with cities or other municipal jurisdictions.

Individual unit statistics

In general, the statistical series present summary data only on a State-by-State basis. Beginning with the 1974 summaries, the receipts and disbursements for urban mass transit activities were added to the financial compilations. The urban mass transit data will be collected in cooperation with the Urban Mass Transit Administration as part of an anticipated national urban transportation reporting system.

While a number of States compile selected motor vehicle and mileage statistics on a county basis, this is not universal and tabulations of these data are, therefore, not included in this publication. Inquiries for information on a county-by-county basis should be directed to the respective State highway departments.

Duplications

Users of these data must be careful to avoid "double counting" of the statistical data that could result from the effect of intergovernmental relationships. This is particularly so with reference to tables in the finance and mileage sections, because of the overlapping of Federal-aid activities with the State and local highway activities, and the effects of grants-in-aid programs. Examples are Federal-aid payments, which are in turn reported as

State receipts, and included in their expenditures; and Federal-aid highway system mileages, which are parts of the State and/or local highway systems, and are also included in those systems. Summary tables that give National statistics have been included at the beginning of

the finance and mileage sections, and eliminate "double counting" or duplication. These are then followed by table series that reflect the transactions of each level of government, but which are not necessarily cumulative to National totals.

MOTOR FUEL

The tables in this section show gallons of motor fuel exempted, refunded, and taxed; the use of fuel for highway and nonhighway purposes; and motor fuel use by type of fuel. In addition there are tables that give revenues from the gallonage taxes of the States and the fees associated with the application and enforcement of the motor-fuel tax laws.

The term "motor fuel" applies to gasoline and all other fuels coming under the purview of the State motor-fuel tax laws. "Special fuels" include diesel fuel, liquefied petroleum gases, and those fuels known by such names as "tractor fuel" and "power fuel" when they are used to operate vehicles on the highways.

The State gasoline tax rates range from 5 to 11 cents per gallon with a majority of the States charging 7.5 cents or more per gallon.

Motor-fuel tax collections ✓

The motor-fuel tax collections for all States are given in table MF-1. In most States, the tax on aviation fuel is either refunded or placed in a special fund for aviation purposes. Similarly, some States place in a separate fund all or part of the tax paid on fuel used by marine craft and use these funds for the improvement of marine facilities. When revenue from fuels used for nonhighway purposes has been placed in separate funds, it has been deducted in column 8 of MF-1. The last column of the table, "Adjusted Net Total Receipts," lists the State highway-user revenues derived from motor fuel.

Diesel fuel is the most widely used of the special fuels, although the use of liquefied petroleum gases, especially butane, is increasing. By the end of 1976, nine States had imposed higher tax rates on diesel fuel than on gasoline because of the additional mileage obtained by diesel-powered vehicles from a gallon of fuel. Vermont and Wyoming were the only States that did not tax special fuels in 1976; however, Vermont levies special equalization fees on vehicles that use the special fuels, and Wyoming levies an additional mileage tax on special-fuel users.

The words "exemption" and "refund" have not been used interchangeably; in this publication, exemption has been applied when the State purposely did not collect the tax, and refund has been applied when the State collected the tax and later returned it, in whole or in part. Exemptions are most frequently granted on motor fuel purchased by the Federal Government; they are also granted as allowances for loss through evaporation, spillage, etc. Refunds are granted for nonhighway uses of motor fuel

such as for agriculture, aviation, manufacturing, construction, and marine purposes. In most States, non-highway gasoline use is taxed but refundable, whereas nonhighway special-fuel use is not taxed.

The disposition of motor-fuel tax revenue for 1976 is given in table MF-3. The provisions governing the disposition of motor-fuel tax receipts can be found in table MF-106, which was last published in *Highway Statistics, 1975*.

Motor fuel use ✓

Analyses of 1976 motor-fuel consumption are given in tables MF-2 and MF-21 through MF-23 and MF-26. Table MF-2, intended primarily to provide tax data for revenue analysis, shows gallonage taxed, exempted, and refunded regardless of the use of the fuel. The amounts of motor fuel used for highway and nonhighway purposes are shown separately in tables MF-21 through MF-23. These tables do not include data on fuel purchased by the Federal Government for military use or fuel exported from the United States. The differences that occur between tables MF-21 and MF-2 are primarily because adjustments have been made to show the gallonage, as nearly as possible, for the period in which the tax was paid. In tables MF-21 through MF-23, other adjustments have been made to allow for losses from destruction, evaporation, spillage, etc. Table MF-26 shows the highway use of gasoline by months for all States.

Tables not included

Some of the motor fuel tables which have been published in *Highway Statistics* in the past are not included this year as a test of demand. They are as follows:

Table MF-24—Private and Commercial Nonhighway Use of Gasoline

Table MF-25—Private and Commercial Highway Use of Special Fuels by Months

Tables MF-101 through MF-105 (biennial) which summarize the more important State provisions for administering gasoline and special-fuel taxes, as of January 1, 1978

Tables MF-107 through MF-110 (biennial) which give the State licenses and fees imposed on wholesalers, dealers, and users of motor fuel, and liquid fuel inspection fees, as of January 1, 1978

Copies of the omitted tables may be obtained from the Highway Statistics Division, Federal Highway Administration, Washington, D.C. 20590.

^{1/} THIS TABLE INCLUDES DATA ON ALL MOTOR-FUELS SUBJECT TO STATE MOTOR-FUEL TAXES, EXCEPT SPECIAL FUELS, WHICH ARE OTHER THAN GASOLINE USED FOR NON-FURNACE PURPOSES. IT IS NOT INTENDED TO REFLECT THE AMOUNT OF FUEL USED ON HIGHWAYS. FOR AN ANALYSIS OF THE FUEL MARKET, SEE THE STATE MOTOR-FUEL TAXES. THE STATES HAVE BEEN SEPARATED WHERE POSSIBLE BY THE GASOLINE GALLONAGE PORTION OF THIS COLUMN IS EQUIVALENT TO THAT SHOWN UNDER THE TABLE HEADINGS.

^{2/} INCLUDES FEDERAL USE, OTHER PUBLIC USE, CERTAIN TRANSIT USE, NONHIGHWAY USE WHERE INITIAL EXEMPTIONS RATHER THAN REPAYMENT ARE MADE, AND ALLOWANCES FOR EVAPORATION AND OTHER LOSSES. THE MAXIMUM ALLOWANCE USED IN THE ANALYSIS IS COVERED UNDER THE HEADINGS OF THE STATES. THE STATES HAVE BEEN SEPARATED WHERE POSSIBLE BY THE GASOLINE GALLONAGE PORTION OF THIS COLUMN IS EQUIVALENT TO THAT SHOWN UNDER THE TABLE HEADINGS.

^{3/} WHERE TWO TAX RATES ARE SHOWN FOR A STATE, THE FIRST APPLIES TO DIESEL FUEL AND THE SECOND TO LIQUEFIED PETROLEUM GASOLINE. SOME STATES IMPROVE ADDITIONAL REGISTRATION FEES OR MILEAGE TAXES ON VEHICLES USING SPECIAL FUELS, SUCH AS ADDITIONAL GALLONS. WHERE TWO TAX RATES ARE SHOWN FOR A STATE, THE FIRST APPLIES TO DIESEL FUEL AND THE SECOND TO LIQUEFIED PETROLEUM GASOLINE. SOME STATES IMPROVE ADDITIONAL REGISTRATION FEES OR MILEAGE TAXES ON VEHICLES USING SPECIAL FUELS, SUCH AS ADDITIONAL GALLONS.

^{4/} THE WEIGHTED AVERAGE TAX RATE (SPECIAL FUELS RATE EXCLUDES VEINUIT AND WYOMING). THE WEIGHTED AVERAGE RATE FOR ALL MOTOR FUEL WAS 7.71 CENTS PER GALLON.

TOTAL MOTOR FUEL CONSUMPTION BY MONTHS—1976¹

Compiled for the calendar year
from an analysis of motor-fuel use

(In thousands of gallons and thousands of litres except as noted; one gallon = 3.785412 litres)

¹ This table is one of a series (MF-21 through MF-26) giving an analysis of motor-fuel consumption. Table MF-21 gives the segregation between highway and nonhighway use, table MF-23 shows total highway use by months, table MF-24 shows nonhighway use of gasoline by purpose of use, and tables MF-25 and MF-26 show the highway use of special fuels and gasoline,

respectively, by months (see notes to table MF-21). Table MF-22 shows a segregation by months of the total consumption reported in the final column of table MF-21, and includes losses allowed for evaporation, handling, etc., as well as the highway and nonhighway uses.

HIGHWAY USE OF MOTOR FUEL BY MONTHS—1976¹

Compiled for the calendar year
from an analysis of motor-fuel use

(In thousands of gallons and thousands of litres except as noted; one gallon = 3.785412 litres)

Highway Statistics, 1976

¹ This table is one of a series (MF-21 through MF-26) giving an analysis of motor-fuel consumption. Table MF-21 shows the segregation between highway and nonhighway use, table MF-22 shows total consumption by month, table MF-24 shows nonhighway use of gasoline by purpose of use, and tables MF-25 and MF-26 show the highway use of special fuels and

gasoline, respectively, by months (see notes to table MF-21). Table MF-23 shows a segregation by months of the total highway use of gasoline and special fuels reported in column 9 on table MF-21.

Vehicle registrations

The annual vehicle registration date varies among the States. Ten use the calendar year for registering all vehicles, ten for trucks only, and two for automobiles only. Twenty States register their automobiles on a staggered basis, and five register all of their vehicles in this manner. The staggered system permits a distribution of the renewal workload into all months. Five States register all of their vehicles in March or April, three use these months to register automobiles only, and six register trucks only during March and April. The remaining States use other dates, mostly from the middle to the latter part of the year. Most States allow preregistrations or permit grace periods to better distribute the annual registration workload.

In order to present vehicle registration data uniformly for all States, the information is shown as nearly as possible on a calendar year basis. The registrations reported exclude transfers and reregistrations, and any other factors, insofar as possible, that could otherwise result in duplications in the vehicle counts.

Registration practices for commercial vehicles differ greatly among the States. Some States register a tractor-semitrailer combination as a single unit; others register the tractor and the semitrailer separately. For either, only the power units have been included in the truck count in table MV-1. Some States register buses with trucks or automobiles; many States do not report house and light utility trailers separately from commercial trailers or semitrailers; and some States do not require registration of car or light utility trailers. Many differences exist among the States in the definition and registration of taxicabs, station wagons, and other special types of vehicles, and in some instances the Federal Highway Administration has supplemented the data supplied by the States with information obtained from other sources.

Motor-vehicle registrations by major vehicle classes are reported in table MV-1. The format of table MV-1 has been changed to include motorcycles in the grand total for all vehicles. Table MV-1A is a new table which shows comparisons of 1976 registrations to 1975 registrations for each vehicle type, for all vehicles, and for all vehicles excluding motorcycles. Data on trucks, buses, and trailers and semi-trailers are given in tables MV-9, 10, and 11, respectively. Although available motor-vehicle data have improved in recent years, it is not yet

possible to obtain for all States separate data on single-unit trucks and combinations or satisfactory weight and capacity groupings of trucks and combinations.

Registrations of publicly owned motor vehicles are reported in table MV-7.

Registration taxes and fees

Taxes and fees connected with State motor-vehicle registrations and special taxes on motor carriers are given in table MV-2. The diversity of taxes and fees collected has made it necessary to group them into broad general classes, the most important being registration fees. The amounts shown are those collected solely as highway-user revenues and do not include any amounts, such as personal property levies, that are derived from taxes other than those incident to motor-vehicle ownership and operation. (Although portions of these revenues are later used in some States for nonhighway purposes, it is the source rather than the expenditure of the revenues that has determined their inclusion here.) The disposition of motor-vehicle revenue is given in table MV-3. The legal or administrative provisions governing the disposition of State motor-vehicle and motor-carrier receipts can be found in table MV-106, which was last published in *Highway Statistics, 1975*. The State motor-vehicle registration fee schedules that were in effect January 1, 1976, can be found in table MV-103, which was last published in *Highway Statistics, 1974*.

Driver licenses

Every State requires that motor-vehicle drivers pass a written or oral test, a vision test, and a driving test before a license can be issued. These licenses are periodically renewed and terms range from 1 to 4 years.

For new drivers, a learners permit or a learning license must be obtained in all but one State in order for the learner to operate a vehicle on the public highway. The minimum age for learners is 14 in nine States, and 15 or more in the remaining States. Two States permit the unlimited operation of a vehicle by a 15-year-old driver, 21 States require drivers to be 16 years old, 3 States license drivers at 17 years old, and 25 States require that a driver be 18 years old or older before he can qualify for unlimited vehicle operation. However, 25 States permit a lower driving age if an approved driver education course has been completed. The limitations for younger

drivers vary from use during daylight hours and only for certain distances to use as needed for school or employment. In 1976, approximately 8.8 percent of all drivers in the United States were 19 years old and under, and there were approximately 83 drivers per 100 persons in the driving age population.

A series of tables titled "Driver License Administration Requirements and Fees" has been issued by the Federal Highway Administration under separate cover. That series, DL-101 through 105, shows the administration, terms, age requirements, restrictions on juveniles, examination and renewal requirements, reciprocity among the States, items included on the driver license, fees, and requirements for reinstatement after cancellation or revocation.

In this publication, table DL-1 shows the number of motor vehicle driver licenses issued during the current year by each State; also shown are estimates of the number of motor-vehicle driver licenses in force at the end of the year. Table DL-1A shows the number of motor-vehicle driver licenses in force during the current year, by State, and by the sex of driver. Table DL-1B shows the ratio of licensed drivers to population.

Tables not included

Some of the tables normally published in this section of *Highway Statistics* are not included this year as a test of demand. They are as follows:

- MV-24—Motor Vehicles Owned by the Federal Government
- DL-20—Distribution of Licensed Drivers by Sex and Percentage in Each Age Group
- DL-21—Licensed Drivers by Sex and Age Groups, by State (46 States)
- DL-21A—Comparison of Licensed Drivers under 25 years old to Total Licensed Drivers
- DL-101—Classified Drivers Licenses

The tables that have been omitted may be obtained from the Highway Statistics Division, Federal Highway Administration, Washington, D.C. 20590.

Highway usage characteristics

Table VM-1 shows the estimated travel in 1976 by passenger cars, motorcycles, buses, and trucks on the rural Interstate System and other main rural roads, local rural roads, and urban Interstate System and other urban streets. Beginning with the 1976 data, Interstate System travel estimates are shown separately as a subcategory within the main rural road and the urban category. In prior years, travel estimates for the Interstate System

were included as part of the main rural road category and the urban category.

In addition, the table shows the number of vehicles registered by type and their total fuel consumption. Also included is the calculated average annual miles of travel, average miles traveled per gallon and average fuel consumption in gallons for each vehicle type.

Table VM-2 indicates 1976 travel by State and highway class. Because of highway system realignment into functional categories during 1976, newly established highway classes of travel estimates based on Federal-aid designation and functional system are shown in table VM-2. For comparative purposes, the 1976 travel estimates are also summarized by highway classes previously used which were based on Federal-aid designation and administrative category as shown in table VM-2A.

Travel estimates by highway class shown in the 1976 table VM-2 may differ from similar estimates for prior years. Functional realignment has resulted in the shifting of low-volume mileage from the Federal-aid system while high-volume mileage has been added.

The rural road and urban street categories shown in table VM-1 are based on a summary of highway classes from table VM-2. In addition to the rural Interstate System, the main rural category includes all other rural Federal-aid as well as non-Federal-aid arterials and collectors. The local rural category includes only the non-Federal-aid local class. All urban classes, both Federal-aid and non-Federal-aid, excluding the urban Interstate System, are included within the other urban category. The basic data used in developing tables VM-1 and VM-2 are reported by the State highway agencies to the Federal Highway Administration.

The highway use of motor fuel and the motor-vehicle registrations shown in table MF-21 and table MV-1 of this publication are used in obtaining the related items of average miles traveled per vehicle, average fuel consumption per vehicle, and average miles traveled per gallon of fuel consumed.

Numerous factors are considered in estimating the fuel consumption of each major vehicle group. These include the number of vehicles of each type, the characteristics of equipment that affect fuel consumption, and the operating weight distribution of the vehicles.

Table VS-1 presents data on speeds of free-moving vehicles on straight open sections of roads posted for 55 mph speed limits by type of highway for each State. These are not average operating speeds. The trends in free-flowing speeds on rural Interstate highways since 1960 are shown graphically in Figure 1.

1/ THE REGISTRATIONS GIVEN IN THIS TABLE ARE AS REPORTED BY THE STATES IN MOST INSTANCES, BUT HAVE BEEN SUPPLEMENTED IN SOME CASES BY ESTIMATES BASED ON DATA FROM OTHER SOURCES.

2/ IN THIS PARTIAL CLASSIFICATION A VEHICLE MAY BE INCLUDED MORE THAN ONCE; FOR INSTANCE, A DIESEL TRACTOR-TRUCK IN FARM USE COULD APPEAR IN ALL THREE COLUMNS.

3/ EXCEPT FOR GEORGIA, MISSISSIPPI, AND NORTH DAKOTA (FOOTNOTE 4), FARM REGISTRATIONS ARE SHOWN FOR ALL STATES THAT HAVE A SPECIAL "FARM" CLASSIFICATION. THE NUMBERS OF VEHICLES SHOWN DO NOT NECESSARILY REPRESENT THE TOTAL NUMBER OF REGISTERED VEHICLES USED ON THE FARM. THE FOLLOWING FARM TRUCKS, REGISTERED AT A NOMINAL FEE AND RESTRICTED TO USE IN THE VICINITY OF THE OWNER'S FARM, ARE NOT INCLUDED IN THIS TABLE: CONNECTICUT, 4,038; NEW HAMPSHIRE, 3,943; NEW JERSEY, 7,059; NEW YORK, 16,971; PENNSYLVANIA, 5,634; AND RHODE ISLAND, 1,348.

4/ ALTHOUGH GEORGIA, MISSISSIPPI, AND NORTH DAKOTA HAVE A SPECIAL "FARM" CLASSIFICATION, THEIR REGISTRATION REPORTS DO NOT SHOW A COMPLETE SEGREGATION OF FARM TRUCKS FROM PRIVATE CARRIERS.

5/ ADDITIONAL INFORMATION REQUIRED THE REVISION OF THE 1975 DATA.

6/ THE STATE WAS UNABLE TO PROVIDE THE NUMBER OF TRUCK AND TRACTOR-TRUCK REGISTRATIONS. THESE VEHICLES HAVE BEEN ESTIMATED BY THE FEDERAL HIGHWAY ADMINISTRATION.

^{1/} ROAD-USER REVENUES CONSIST PRIMARILY OF MOTOR-FUEL TAXES, SHOWN IN TABLE MF-1, AND MOTOR-VEHICLE AND MOTOR-CARRIER TAXES SHOWN IN THIS TABLE.

^{2/} WHERE THE REGISTRATION YEAR IS NOT MORE THAN ONE MONTH REMOVED FROM THE CALENDAR YEAR, REGISTRATION-YEAR RECEIPTS ARE GIVEN. WHERE THE REGISTRATION YEAR IS MORE THAN ONE MONTH REMOVED, CALENDAR-YEAR RECEIPTS ARE GIVEN.

^{3/} SPECIAL TITLING TAXES IMPOSED UNDER GENERAL SALES TAX LEVIES ARE NOT INCLUDED.

^{4/} COUNTY OR LOCAL OFFICERS IN MANY STATES ARE ALLOWED SERVICE CHARGES FOR ISSUING REGISTRATIONS, OPERATORS' LICENSES, OR FOR RELATED SERVICES. SOME OF THESE CHARGES ARE INCLUDED WITH REGISTRATION AND OTHER FEES. THE AMOUNTS SHOWN IN THIS COLUMN ARE ESTIMATES OF SERVICE CHARGES THAT ARE COLLECTED AND RETAINED BY LOCAL OFFICIALS AND NOT REPORTED ELSEWHERE IN THIS TABLE.

^{5/} NUMEROUS STATES IMPOSE TAXES ON THE GROSS RECEIPTS OF MOTOR CARRIERS IN CONNECTION WITH GENERAL STATE SALES TAXES OR TAXES ON ALL TRANSPORTATION COMPANIES OR PUBLIC UTILITIES. THIS COLUMN INCLUDES ONLY THE PROCEEDS OF GROSS RECEIPTS TAXES REPORTED BY THE STATES AS SPECIAL TAXES ON MOTOR CARRIERS.

^{6/} IN GENERAL, THE PROCEEDS OF SPECIAL WEIGHT OR CAPACITY TAXES IMPOSED AT A FLAT RATE PER

VEHICLE ARE INCLUDED UNDER SPECIAL LICENSE FEES AND FRANCHISE TAXES. APPLICATION OR FILING FEES REQUIRED FOR THE ISSUANCE OF CERTIFICATES OF CONVENIENCE AND NECESSITY TO COMMON CARRIERS, AND CORRESPONDING PERMITS TO CONTRACTY AND OTHER MOTOR CARRIERS, ARE INCLUDED UNDER CERTIFICATE OR PERMIT FEES.

^{7/} PROPERTY TAXES FORMERLY LEVIED ON MOTOR VEHICLES HAVE BEEN REPLACED BY "VEHICLE LICENSE FEES" IN CALIFORNIA, AND BY "MOTOR VEHICLE EXCISE TAXES" IN WASHINGTON. BECAUSE OF THE ORIGIN OF THESE TAXES, THE ADMINISTRATIVE OFFICERS OF THE TWO STATES DO NOT CONSIDER THEM TO BE ROAD-USER TAXES. THE AMOUNTS INCLUDED WITH REGISTRATION FEES IN THIS TABLE ARE AS FOLLOWS: CALIFORNIA, AUTOMOBILES \$275,300,829, BUSES \$693,673, TRUCKS \$186,785,435, TRAILERS \$66,906,640, MOTORCYCLES \$10,754,783; WASHINGTON, AUTOMOBILES \$52,676,747, BUSES \$142,400, TRUCKS \$22,964,864, TRAILERS \$4,612,086, MOTORCYCLES \$1,196,832, DEALERS \$53,412.

^{8/} LOUISIANA REGISTERS AUTOMOBILES FOR TWO-YEAR PERIODS ON EVEN-NUMBERED YEARS. MASSACHUSETTS AND OREGON REGISTER AUTOMOBILES FOR TWO-YEAR PERIODS ON A STAGGERED MONTHLY BASIS.

^{9/} THE STATE WAS UNABLE TO PROVIDE MOTOR-VEHICLE AND MOTOR-CARRIER TAX RECEIPT DATA FOR 1976. THE FIGURES SHOWN ARE ESTIMATES BY THE FEDERAL HIGHWAY ADMINISTRATION.

^{1/} Travel data for the 50 States and the District of Columbia.
^{2/} Separate estimates of passenger car and motorcycle travel are not available by highway category.
^{3/} Highway categories are based on functional classification established for 1976 in accordance with 23 U.S.C. 103 (B)(2), (C)(2), (D)(2) and differ from earlier years. Compared to the earlier reporting procedure main rural travel is 8 percent higher, local rural travel is 36 percent lower and urban travel is 1 percent higher.
^{4/} Main rural includes all rural Federal-aid systems and non-Federal-aid arterials and collectors.
^{5/} Local rural consists of the non-Federal-aid local class only.
^{6/} Urban consists of travel on all roads and streets in urban places of 5,000 or greater population.

Highway Statistics, 1976

ANNUAL AVERAGE OF QUARTERLY SPEED MONITORING DATA FOR FISCAL YEAR 1976

(OCTOBER 1975-September 1976)

TABLE WG-1
JANUARY 1976

HIGHWAY STATISTICS DIVISION
OFFICE OF HIGHWAY PLANNING, FHWA.

Table with columns for Region and State, Interstate Urban, Interstate Rural, Multi-Lane Divided, Multi-Lane Undivided, and 2-Lane Rural. Each column contains data for Average Speed, Median Speed, Percent Exceeding 55, 60, and 65 MPH, and Percent Exceeding 50, 55, and 60 MPH. Rows list 50 states and a National Average.

ON VEHICLE SPEEDS:
1/ MEDIAN SPEED IS THE SPEED AT OR BELOW WHICH 50 PERCENT OF THE VEHICLES ARE TRAVELING.
2/ 85 TH PERCENTILE SPEED IS THE SPEED AT OR BELOW WHICH 85 PERCENT OF THE VEHICLES ARE TRAVELING.
3/ NO MILEAGE IN ANY HIGHWAY CATEGORY WHERE THE 55 MPH SPEED LIMIT IS THE PRIMARY CONSTRAINT
ON MILEAGE OF MULTI-LANE UNDIVIDED ROADS COMBINED WITH MULTI-LANE DIVIDED ROADS:
4/ LOW MILEAGE REPORTED BUT NO SPEED DATA SUBMITTED.
5/ MILESON BRIDGE ONLY SECTION WITH 55 MPH SPEED LIMIT. MARYLAND MONITORS NEAR BRIDGE.

AVERAGE SPEED OF FREE-MOVING VEHICLES ON RURAL INTERSTATE HIGHWAYS

PERCENTAGE OF FREE-MOVING VEHICLES EXCEEDING 55, 60, AND 65 MILES PER HOUR

Figure 1 - SPEED TRENDS ON RURAL INTERSTATE HIGHWAYS ^{1/}

^{1/} All data represents free-moving traffic on level, straight, non-congested sections of rural Interstate Highways. Data shown between 1960 and 1975 represents speed trend information collected by several State Highway Agencies normally during the summer months and submitted in annual speed trend reports. Since

October 1975 all States have monitored speeds at locations on several highway systems, including the Interstate System, as part of the 55 m.p.h. speed limit monitoring program. The data are reported to FHWA on a quarterly basis.

FEDERAL FUEL AND AUTOMOTIVE TAXES AND THE HIGHWAY TRUST FUND

The total revenues from the Federal excise taxes on motor fuel, lubricating oil, and motor-vehicle use, and the estimated portions paid by private and commercial highway users, are given in table FE-205. Total revenues from Federal excise taxes on motor vehicles, tires, tubes, tread rubber, and parts and accessories, and the estimated portions paid by private and commercial highway users, are given in table FE-206. The amounts of these Federal excise revenues estimated to have been paid in the final instance in 1976 by private and commercial highway users in each State are shown in tables FE-7 and FE-8. As the Federal taxes on automotive products, except special fuel, diesel fuel, and motor-vehicle use, are collected in the first instance at the point of manufacture, production, or importation, these estimated payments differ from the actual Internal Revenue Service collections in the different States. The diesel-fuel tax is initially collected by the retailer on gallonage that is placed in the supply tanks of highway vehicles. The special-fuel tax is initially collected by the retailer on gallonage that is placed in the supply tanks of motor vehicles, motorboats, and airplanes. The motor-vehicle use tax is levied on the owners of certain heavy highway vehicles. Federal excise tax rates, together with their history, are given in table FE-101.

The Federal Highway Trust Fund was established by the Highway Revenue Act of 1956 as the source of Federal funds for highway aid. The Trust Fund receives: All of the revenues from the 4-cent-per-gallon tax on gasoline, diesel, and special fuels used in highway vehicles; the unrefunded portion of the tax on gasoline used for nonhighway purposes; the 2-cent-per-gallon tax on special fuels used in nonhighway vehicles; the 2-cent-per-gallon tax on diesel fuel for highway vehicles not registered or not required to be registered for highway use; the 2-cent-per-gallon tax on fuel used by certain transit systems; all of the 10-cent-per-pound tax on

highway tires and inner tubes and the 5-cent-per-pound tax on nonhighway tires and tread rubber; all of the 10-percent tax on new trucks, buses, and trailers over 10,000 pounds gross weight; the 8-percent tax on truck parts and accessories; the 6-cent-per-gallon tax on lubricating oil used on the highways; and all of the proceeds of the annual use tax of \$3.00 per 1,000 pounds on vehicles of more than 26,000 pounds gross weight.

The gasoline and special fuels tax collected on motorboat use is transferred monthly to the Land and Water Conservation Fund administered by the U.S. Department of the Interior. Full 4-cent-per-gallon refunds of the gasoline tax are paid to farmers for gasoline used in farming. Other non-highway uses of gasoline are refunded at 2 cents of the 4-cent tax by the Internal Revenue Service.

A statement of the operation of the fund, including receipts, disbursements, and unexpended balances for fiscal year 1977, is shown in table FE-10. Table FE-201 shows the net revenues to the Fund since its inception, together with an explanation of the tax rates. Additional information on the history of the Highway Trust Fund can be found in the Federal Highway Administration bulletin titled "Federal-Aid Financing and the Highway Trust Fund."

Table FE-221 shows a comparison, by States, of the amounts paid into the Trust Fund with the amounts drawn out of the Fund, and with apportionments.

Generally, the Trust Fund is similar to an individual bank account. Just as an individual bank account is a claim against the bank's general funds rather than a title to a particular group of dollars, the Trust Fund is a general credit with the U.S. Department of Treasury.

The amounts of Federal funds apportioned to the States, and paid to them from the Highway Trust Fund, are shown in tables in the highway finance section of this bulletin.

1/ TAX BASES, RATES, AND EFFECTIVE DATES ARE GIVEN IN TABLE F-101.
 2/ SINCE JUNE 1, 1946, THE FEDERAL GOVERNMENT HAS PAID THE TAXES ON ITS OWN PURCHASES, AND THE AMOUNTS ARE INCLUDED IN THESE COLUMNS.
 3/ ESTIMATED BY THE FEDERAL HIGHWAY ADMINISTRATION.
 4/ TOTALS FOR 1953 ARE NOT COMPARABLE WITH TOTALS FOR PRIOR YEARS, REPORTS AND PAYMENTS TO THE U.S. INTERNAL REVENUE SERVICE WERE PREVIOUSLY MADE MONTHLY, BUT IN 1953 THIS WAS CHANGED TO QUARTERLY. HENCE 1953 COLLECTIONS WERE CONSIDERABLY LOWER THAN 1952 COLLECTIONS.
 5/ ENTRIES FOR 1967 AND SUBSEQUENT YEARS ARE NOT COMPARABLE WITH PRIOR YEARS, SINCE REPURCHASES AND TAX CREDITS FOR NONHIGHWAY USE AS AUTHORIZED BY THE EXCISE TAX REDUCTION ACT OF 1965 HAVE BEEN DEDUCTED.

1/ All items are manufacturers excise taxes except special fuel, diesel fuel, and the Federal use tax. Special fuel and diesel fuel taxes are retailers excise taxes. The Federal use tax is an excise tax on users.
 2/ Excludes gasoline and closely related fuels used in the propulsion of motor vehicles, motor boats or airplanes. These "closely related fuels" include liquefied gases but do not include diesel fuel. The 4-cent gasoline tax applies to all gallons imported or produced. The 4-cent special fuels tax applies to all gallons used in a registered motor vehicle. Special fuels used in a nonregistered motor vehicle, motorboat or airplane are taxed at 2 cents per gallon. Special fuels used for farming are not taxed, or if the tax has been paid, it is fully refundable. Beginning January 1, 1956, the entire tax became refundable for gasoline and special fuels used by certain local transit systems. These rates do not apply to aviation use as of July 1, 1970. Compressed natural gas (CNG) is not taxed.
 3/ The 4-cent tax applies to all diesel fuel used in registered highway vehicles. Diesel fuel used in a nonregistered highway vehicle is taxed at 2 cents per gallon. No cents of the 4-cent tax rate is refundable for diesel fuel used by certain local transit systems. Diesel fuel used in farming is not taxed, or if the tax has been paid, it is fully refundable.
 4/ The tax originally applied to all lubricating oil, regardless of use. Effective January 1, 1966, cutting oil became exempt and the entire tax on other oil became refundable for nonhighway uses.
 5/ Percent of manufacturer's sales price to February 25, 1926; re-enacted effective June 21, 1932, on a cents-per-pound basis, but

applicable to all tires and tubes, not limited to those for automotive vehicles. Tires and tubes for toys exempted effective November 1, 1951. The additional 3 cents a pound, effective July 1, 1956, and 2 cents a pound, effective July 1, 1961, apply to tires for highway vehicles only. Aviation tires and tubes are not included in this table as of July 1, 1970.
 6/ Applies to use for tires of the type used on highway vehicles.
 7/ Exemptions from stated taxes are: House trailers, November 1, 1951; school buses, camper bodies, motor homes, truck or trailer accessories, January 1, 1966; trucks, buses and trailers 10,000 pounds or less gross weight, June 22, 1965; cutting oil and automobile parts and bodies designed for seed, feed and fertilizer, small three-wheeled vehicles, June 22, 1965; cutting oil and automobile parts and accessories, January 1, 1966; trucks, buses and trailers 10,000 pounds or less gross weight, September 23, 1971; and, local transit buses in urban use, and truck container bodies for trucks, December 11, 1971.
 8/ The tax applies to the entire gross weight of a vehicle or combination if its gross weight exceeds 26,000 pounds. Buses used in local transit service are exempt.
 9/ Although the "basic" tax on automobiles was 7 percent of the manufacturer's wholesale price until January 1, 1966, the 10 percent rate they became effective on a temporary basis November 1, 1951, remained in effect through periodic extensions.
 10/ Although the "basic" tax on parts and accessories is 5 percent of the manufacturer's wholesale price, the 8 percent rate that became effective on a temporary basis November 1, 1951, has remained in effect through periodic extensions.

HIGHWAY FINANCE

This section contains a series of tables reporting the highway receipts, disbursements, changes in debt status, and other financial information of Federal, State and local agencies. Federal and State highway finance data are for the calendar year 1976, with only minor exceptions; but finance data of the local governments are for various fiscal years ending in 1975 or the latest period for which complete information is available.

The following tables will not appear in this issue of Highway Statistics: State finance, SF-3B, SF-4B and SF-15; Local finance, LB-2, UB-2, UF-12, LF-32, LF-42, UF-32, UF-42, LB-42, UB-42, LF-14, UF-3 and UF-4. However, copies of any omitted tables may be obtained upon request to the Highway Statistics Division, Federal Highway Administration.

Because the expenditures of one governmental agency may become income to another, care must be taken to avoid double counting of income and expense when combining certain of the Federal, State, and local table series. For this reason, the first tables in this section give combined summaries of the highway finances of all government agencies in net amounts, i.e., duplications that would otherwise have resulted from interfund or intergovernmental transfers have been removed. These tables are followed by specialized series showing Federal, State, and local government data, but these are not additive without due allowance for the intergovernmental payments.

Intergovernmental Payments

In general, intergovernmental payments as reported herein refer to the actual payment of money from one governmental level to another.

Federal aid for highways

The improvement of Interstate and other Federal-aid highways is financed from the proceeds of motor-fuel and other highway-related excise taxes deposited in the Federal Highway Trust Fund. Administered by the Federal Highway Administration, this is a grant-in-aid type of program; that is, funds for use in highway improvements are allotted to States in accordance with formulas that give weight to population, area, mileage, and (for the Interstate System) relative costs (needs). Other highway funds administered by the Federal Highway Administration, but not financed from Trust Fund revenues, include

those for Highway Beautification, and the Appalachian Development program.

State and local governments also receive assistance from other Federal programs. Typical of this assistance is the return to the State of origin of 25 percent of Federal revenue from national forests. The States in turn distribute these funds for schools and roads to the counties in which such forests are located. Details of the different Federal assistance programs are given in Table F-106, which was published in *Highway Statistics, 1975*.

State aid to local governments

There are numerous State transactions or activities that benefit local governments but that do not involve the flow of funds, and are not treated as intergovernmental payments. Among these transactions are: (1) Advisory, consulting, and supervisory services or aid in kind (for example, free provision of road materials or loans of equipment); (2) Assumption by a State of responsibility for construction and maintenance of former county roads or municipal streets; (3) payments made by the State for materials or direct to contractors for the State's share of the cost of joint State-local projects of local road systems.

Some transactions, however, that do involve the flow of funds from States to local governments have been shown herein as direct expenditures by activity, rather than as intergovernmental payments. These transactions include: (1) Amounts paid to local governments under contractual agreements whereby counties or municipalities perform construction or maintenance work for the State highway department; (2) Federal-aid funds received in reimbursement for the Federal share of the cost of Federal-local projects; (3) payments on county or other local obligations assumed by the States as reimbursement for the cost of local roads added to the State highway systems.

For uniformity in the Federal Highway Administration's analyses, all State-imposed highway-user imposts are considered as being collected and distributed by the States. The local government shares, if any, have been shown as intergovernmental payments. This has been done even when there has been no actual flow of funds or when there has been a reverse flow of funds such as occurs in States where motor-vehicle registration fees are collected, and a share is retained, by the local governments.

In 1976 the statutes of 48 States provided for the sharing of State-collected funds, chiefly highway-user tax revenues, with local governments for road and street purposes. This assistance is in the form of direct grants-in-aid and shared revenue. The two States that did not have such statutes are Alaska and West Virginia. Table SF-5A shows the sources and payments of the shared State funds.

In 1976 forty-three States provided aid from road-user taxes to municipalities, including New England towns. Counties in 46 States received grants-in-aid. Townships, including those in New England, in 16 States received State grants. Many States provide aid to more than one type of local government.

Intergovernmental payments of local agencies

All Federal-aid projects receipts and disbursements are considered to be transactions of the State. Hence, county or municipal funds expended on such projects are considered to be payments to the State regardless of whether an actual flow of funds occurs. In some States, a portion of the local share of State tax revenues is not paid directly to local governments, but is retained by the State to match Federal funds for local road projects, to reimburse the State for work performed at the request of the local agency, or for other purposes. When the State retains such tax revenue, the transactions do not appear as intergovernmental payments in the State or local finance series of tables.

Payments between similar government units have been eliminated; for example, those between counties, between States, or between municipalities. But payments made between different government classes, such as those between counties and municipalities, have been shown.

Combined finances

Table HF-10 combines, for all government units, receipts and expenditures for 1976 (with local government data estimated) and identifies separately the intergovernmental payments. Tables HF-1 and 2 eliminate intergovernmental payments and show, by States, total receipts and expenditures for highways in 1975, the last year for which complete finance data for all governmental units are available.

Federal financing

The Federal Government acts in cooperation with the States in the financing of a large volume of highway activity. Federal aid for highways began in 1916. An important step came in 1921 when the use of Federal aid was restricted to a limited, connected system of principal roads, now called the Federal-aid primary highway system. Provision was made in 1944 for designation of a Federal-aid secondary system of principal farm-to-market and feeder roads. Also in 1944, for the first

time, specific authorization of Federal-aid funds was made for the urban extensions of the primary system, and in 1954, for the urban extensions of the secondary system.

In the use of Federal aid for highway construction, the States initiate the improvements to be made. They make the surveys and plans, let the contracts, and supervise the construction. In all of these steps the States consult with and obtain the approval of the Federal Highway Administration, acting for the Federal Government. The roads remain under the administrative control of the States or local governments, who are responsible for their operation and maintenance.

The Federal-aid annual authorizations for primary, secondary, and urban improvements, commonly called ABCD funds, are proportionally divided among the States by formulas that take into account the area, population, and postal-route mileage in each State. These funds are matched 70-30 by the States, but the Federal share is proportionately increased for States in which public lands are in excess of 5 percent of their area.

The National System of Interstate and Defense Highways, now a dominant feature of the Federal-aid program, was authorized in 1944, but prior to 1956 only modest funds were provided for it, first at a 50-50 and then a 60-40 matching ratio. The Federal-Aid Highway Act of 1956, as subsequently amended, provides for completion of the System by 1990, on a 90-percent Federal, 10-percent State matching basis. Funds to support this program, and the ABCD program, are drawn from the Federal Highway Trust Fund, which is wholly supported by Federal taxes on road users.

During 1965, there were two additions to Federal highway policy. One is a program to aid the States in Appalachia in building main and feeder roads that will assist in their economic development. The second was the program of landscaping and scenic enhancement of the Federal-aid highway systems, including the control of outdoor advertising and junkyards. Funds for these programs are appropriated from the general fund, rather than from the Trust Fund. A major development in 1966 was the enactment by Congress of legislation embracing broad new highway and motor vehicle safety programs.

The 1968 Federal-Aid Highway Act established urban traffic operations improvement programs, or "TOPICS" to reduce traffic congestion and facilitate the flow of traffic in the urban areas. The Act also created a right-of-way revolving fund and authorized additional funds for the Federal-aid primary and secondary systems in rural areas.

The 1970 Federal-Aid Highway Act provided for the establishment of a Federal-aid urban system in the urbanized areas. The Act also changed the Federal share of ABCD funds from 50 percent to 70 percent effective

July 1, 1973. Another change in the 1970 Act provides that two-thirds of the funds authorized for safety programs for fiscal years 1972 and 1973 shall be appropriated from the Highway Trust Fund. All of these funds formerly were paid from the general fund. In addition, Forest Highway and Public Lands funds are also paid from the Highway Trust Fund, beginning with the 1972 apportionments.

The 1973 Federal-Aid Highway Act provided several additions to highway policy, namely: (1) Use of Highway Trust Fund apportionments for public mass transportation systems including the purchase of buses in 1975 and for rail transit facilities in 1976; (2) financing of bicycle transportation and pedestrian walkway facilities; and (3) the selection of priority primary routes. In addition, the Trust Fund shall be used to pay the cost of constructing parkways located on a Federal-aid system and will support the entire Federal share of highway and motor vehicle safety programs.

The Federal Highway Safety Act of 1973, Title II, augmented the existing highway safety program with several additional programs. These programs are railway crossings, high hazard locations, elimination of roadside obstacles, pavement marking, and safer roads demonstration. The safer roads demonstration program is for projects on public roads, or segments thereof, that are not on a Federal-aid system.

The Federal-aid Highway Amendments Act of 1974 authorized \$200 million of Federal funds, payable from the general fund, to be expended on any rural road or bridge which is toll free and not on any Federal-aid system. This program is called the *Off-System Federal-Aid Highway Program*.

Beginning with the 1977 fiscal year, the Federal Government's fiscal year period was changed from a 12-month period ending June 30 to a 12-month period ending September 30. In order to provide funds for the interim or transition quarter, \$1,637 million of Federal-aid funds were apportioned to the States to be expended on Interstate projects in those States which receive less than one-half percent of the 1977 fiscal year Interstate apportionment, projects on the primary, secondary and urban systems and projects not identified with a specific Federal-aid system. In addition, \$8.2 million was apportioned for forest highways and \$18.7 million was apportioned for rail-highway crossing funds on roads other than those on any Federal-aid system.

For fiscal year 1978, \$6,028 million of Federal-aid funds (shown in Table FA-4) were apportioned to the States as follows:

<i>Apportionment (millions of dollars)</i>	<i>System</i>
3,252	Interstate
1,263	Consolidated primary
389	Rural secondary
778	Urban
29	Metropolitan planning
33	Forest highways
64	Urban high density
50	Priority primary (Discretionary)
170	Interstate resurfacing

The 1978 apportionments for safety projects amounts to \$394 million (shown in table FA-4) as listed below:

<i>Apportionment (millions of dollars)</i>	<i>System</i>
122	Elimination of roadside obstacles
122	Elimination of hazards at rail-highway crossings
150	Highway safety

Other Federal-aid fund apportionments for fiscal year 1978 include \$49 million for economic growth centers, \$176 million for bridge replacement and \$49 million for pavement marking demonstration programs.

Apportionments for the Off-System Federal-Aid Highway Program include \$195 million for safer roads and \$73 million for elimination of hazards of rail-highway crossings.

The 1976 Federal-Aid Highway Act extends completion of the Interstate System to 1990 and provides funds for resurfacing, restoring and rehabilitating the Interstate System. In addition, the authorization of \$1,350 million for the Federal-aid primary consolidates three separate programs into one, the Federal-aid primary, urban extensions and priority primary programs.

Amounts apportioned to the States pursuant to authorizations by Congress for a fiscal year are not to be confused with payments to the States for work completed. Although an apportionment of Federal-aid funds is for 1 year, a 2-year grace period in expending the funds is permitted to allow the State time for orderly planning, budgeting, and execution of their highway programs.

Payments to contractors for work done on Federal-aid projects are made initially from State funds, or, sometimes, from funds transferred to the State by cities, counties, or other local governments. The Federal share is paid as reimbursement to the States as work progresses; final payment is made after completion of the project.

The actual payment of Federal funds administered by the Federal Highway Administration during calendar year 1976 is shown in table FA-3. Most of these payments were made to the States, but in addition to its own

administrative costs, some funds were expended by FHWA directly on projects. These amounts, together with a summary of the finances of all other Federal assistance programs for highways are shown in table FA-5.

Table FA-6 shows financial statements for the appropriation on Federal-aid highways which have been prepared on an accrual basis in accordance with generally accepted accounting principles and practices, and in accordance with the provisions of the Budget and Accounting Procedures Act of 1950 as amended.

State financing

Finances and debt status of State highway agencies are given in the SF and SB series. Table SF-21 consolidates and summarizes all highway receipts and disbursements of the States, while table DF shows the allocation of all special State imposts on highway users. The remaining tables in the SF series provide further details and breakdowns of these statistics. The SB series of tables provides details of the highway debt transactions of the States.

Local financing

Highway finance of county and township governments is shown in the LF table series, and of municipalities in the UF series. Debt status for these two groups of local governments is given in the separate LB and UB series. The separate tables LF-14 and UF-3 show highway finance data by counties comprising individual SMSA's and by individual cities of 50,000 population or more, respectively. Table UF-4 provides the receipts and disbursements for parking and indirect street functions for the same cities. All tables other than those defined in the first sentence of this paragraph are issued only upon request. There are no consolidated tables of local finance except as contained in Tables HF-10 and HF-1 and 2.

The local finance data are for various fiscal years ended in 1975, the latest year for which data for local governments have been compiled in all States. Approximately half of all local governments use the calendar year ending December 31, and about two-thirds of the remainder use a fiscal year ending June 30. In most States, sampling is used to some extent in developing statistics for the smaller municipalities (under 5,000) and for townships, but is not used to compile data for counties, or for the larger municipalities.

Classification of Highway Receipts

The phrase "highway receipts" used in this section includes highway-user revenues, and all other receipts applied for highway purposes regardless of source. The exceptions are tables DF, LF-1, and UF-1 which include the total of user tax revenues regardless of their use for

highway or nonhighway purposes. However, in the local highway finance analysis, the nonhighway expenditures are eliminated by an offset against general fund contributions for highways. The classification of these receipts is described in the following paragraphs.

Funds attributable to highway users

Chief among this group of revenues are the highway-user taxes and fees. The States and the Federal Government have largely preempted this field of taxation as their principal source of funds for highways. However, counties in Alabama, Hawaii, Mississippi, and Nevada, and municipalities in Alabama, Florida, Nevada (Carson City-Ormsby County) and New York levy local motor-fuel taxes. Included in this group is the regional gasoline tax. It is different from a tax levied only by the local agency because it may cross political boundaries. The regional tax is considered a local tax until it is levied uniformly throughout the State. Vehicle fees also are levied in many local communities. By definition, highway-user imposts are those levied on owners and operators of motor vehicles because of their use of the public highways. These imposts consist chiefly of motor-fuel taxes, registration fees, operators licenses, and other fees closely allied with the ownership and operation of motor vehicles. Also included are fines and penalties for registration violations and vehicle size and weight violations. Not all taxes paid by highway users are included in the definition. Sales and use taxes, gross receipts taxes, and ad valorem property taxes are among those that have been excluded when such taxes are parts of general tax structures applicable to a variety of commodities, operations, and commercial activities.

In general, the revenue from highway-user taxes is derived from taxes imposed for the use of the highways, but small amounts are actually derived from off-highway use. Although tax refunds are usually granted for off-highway use of motor fuel, not all refunds are claimed and not all refund claims are granted. For example, agricultural use may be eligible for a refund of 6 cents out of a 7-cent tax. Similarly, not all highway use of motor fuel is taxed. Some States exempt or refund the tax for Federal Government or other public use, for transit bus operations, and in at least one State, for fuel consumed on toll roads.

Allocation of the proceeds of State motor-fuel taxes and motor-vehicle fees is shown in detail in tables MF-3 and MV-3, respectively. These tables and the summary table DF follow the history of the highway-user imposts from collection to their eventual allocation for specific purposes. These allocations differ from those shown in the State finance (SF) tables since the DF table includes funds

allocated for collection expenses, nonhighway, and mass transportation programs—the latter being shown for the third year.

In many States, specific revenues or portions of revenues from each type of highway-user tax are dedicated to specific highway purposes. Most States place highway-user revenues in special highway funds, but a few place them in a general State fund that receives many types of revenues, including those from highway users. For the latter group of States, each appropriation of expenditure for highway purposes has been treated as if it had been made from motor-fuel taxes and from motor-vehicle taxes and fees in proportion to the revenue received by the general fund from each of the sources. Revenues are not earmarked for specific purposes and thus it is impossible to identify how funds from particular sources are used.

Even in some States, that have separate highway funds, portions of highway-user revenues have been allocated to the State general fund or for nonhighway purposes; and in some of these States, general fund appropriations have also been made for highway purposes. In the Federal Highway Administration analyses, such appropriations have been offset, to the extent possible, against the allocations of highway-user revenues for funds or purposes other than highways.

Table MF-106 which gives the legal or administrative provisions for allocating State motor-fuel taxes, and table MV-106 which provides similar information for State motor-vehicle registration fees, operators license fees, and motor-carrier taxes, are published biennially and were included in *Highway Statistics, 1975, Section 1*.

Closely related to highway-user imposts are toll receipts and parking fees. Tolls provide more revenue to State agencies than to local governments, whereas income from parking meters and lots is chiefly an item of municipal finance. Parking revenues used for highways are the net sums that remain after deduction of costs of maintenance and operation of meters and parking lots.

Other taxes and fees

Special taxes and assessments on property are the chief source of locally raised income used by counties and municipal governments to finance local highway programs. Often, however, and especially by municipalities, special taxes and assessments are not earmarked for highways but are commingled with other local revenue in a general fund from which appropriations are made for highways as well as for other purposes. All, or portions, of the proceeds of many other State and local taxes such as oil royalties, and sales and use taxes, are allocated or drawn on for highways, but the amount of money from those sources is usually not significant. When miscellaneous State taxes and appropriations are specifically allocated for highways, these provisions are shown in table S-106, which was published in *Highway Statistics, 1973*.

Investment income and miscellaneous receipts

By investing highway funds until needed, many highway agencies are able to realize interest income or profit on the purchase and sale of securities. Other miscellaneous income is sometimes derived from rentals, donations, and sales of surplus equipment and supplies.

Income from sale of bonds and notes

For the State finance (SF) series of tables, the infrequent transactions involving short-term borrowing (2 years or less maturity) have been omitted. Among local governments, however, the use of short-term note financing is rather common and these transactions have been included in the LF and UF series of tables. Note proceeds and redemptions have been omitted from the summary tables HF-10, HF-1, and 2.

Special tables that give details of State obligations (SB series) have been included. State bond issues for highways usually can be identified readily. Bond issues of local governments occasionally combine borrowing for more than one purpose, and the road and street shares of such local general improvement loans in the tables are estimates.

Classification of Highway Expenditures

Expenditures for highways have been grouped in major classes: Capital outlay; maintenance; administration; highway police and safety; interest on debt; debt retirement; and intergovernmental payments.

Capital outlays are those costs associated with highway improvements, including land acquisition and other right-of-way costs, preliminary and construction engineering, construction costs of roadway and structure, and installation of traffic service facilities such as guard rails, fencing, signs, and signals, etc.

Costs included in the classification as maintenance are of two types: (1) Those required to keep the highways in usable condition, such as routine patching and repairs, bridge painting, and other maintenance of condition costs; and (2) traffic service costs, such as snow and ice removal, pavement markings, signs, signals, litter cleaning, etc.

Classed as administration costs are those for general overhead, and engineering and research not assignable to specific road projects. Included in the tables as highway law enforcement and safety expenditures are activities of the Federal highway safety program, State highway patrols, safety education and promotion, driver training programs, and enforcement of vehicle size and weight limitations. Costs of municipal traffic police also have been included where the function is separate from that of general policing activities.

Indirect Municipal Street Functions

The municipal highway summaries do not include receipts and disbursements for street lighting and cleaning, sidewalks, nor storm drainage. Although programs related to street lighting and cleaning, sidewalks, and storm sewers are frequently administered by the municipal government in connection with street programs, expenditures for such programs are generally considered to be for the protection of the health and safety of the public rather than expenditures for highways.

Parking revenues used for maintenance and operation of parking meters and lots have also been treated sepa-

rately. This information has been excluded so that the data presented for municipalities are comparable to those shown for other types of governments or agencies. Parking funds that were used for highways, however, are listed separately on table UF-1.

Table UF-11 presents the local parking facility data that have been reported for the items excluded from the municipal summaries. However, the 1975 table UF-12, which reports the transactions for indirect street functions is not included in this bulletin and will be available upon request.

^{1/} The financial statements presented herein reflect activity for fiscal year 1976 and the transition quarter, July 1, 1976 through September 30, 1976, therefore, any comparison with prior years' activity must reflect this consideration. The activity includes appropriations for Federal-aid highways, Safety Construction and the Right-of-Way Revolving Fund.

^{2/} Reduction in Contract Authority consists of:

Transferred to Urban Mass Transportation Administration	\$147,488,721
Transferred to Highway Related Safety Grants	13,151,010
Less: of Contract Authority (1973)	864,032
Total Reduction in Contract Authority	\$160,483,709

^{3/} The available balance of contracting authority shown in the Statement of Operations includes both obligated and unobligated balances of contracting authority plus unliquidated obligations for administration and research.

^{4/} Title 23, United States Code, Sections 125 and 220 allows payment for disaster assistance prior to appropriation. The unappropriated expenditures for emergency relief are \$610,678,534.

^{5/} The fixed assets are stated at cost. Depreciation is taken on Equipment Depot fixed assets. Office

furniture and equipment are utilized for administrative operations and are replaced as needed. Office furniture and equipment are not depreciated.

^{6/} The Congress grants contracting authority to the Federal Highway Administration in advance of appropriations in order to permit it and the States to plan highway construction and highway related safety programs. This authority is apportioned to the States and FHWA records the obligations as the States are permitted to proceed. Funds are appropriated by the Congress annually to cover estimated needs for liquidating the obligations maturing within the current fiscal year.

^{7/} The Equipment Depot operates on a non-profit basis. Excesses or deficiencies in revenue are adjusted through the subsequent year's charges to users.

^{8/} Beginning in fiscal year 1975, salaries and expenses of the Federal Highway Administration are financed directly, through a limitation, from the appropriation for Federal-Aid Highways. Furniture and equipment and the liability for accrued annual leave have been transferred at no cost to the current fiscal year.

1/ This table is one of a series giving available information concerning State and quasi-State obligations incurred for highway purposes. The remaining tables in the series are as follows: Table SB-2, change in indebtedness during year; table SB-2B, obligations outstanding at end of year; table SB-3, receipts and disbursements for debt service. When bonds were issued partly for highway and partly for other purposes, such issues have been charged to State highways, to county or other local roads and streets, and to nonhighway purposes, respectively, in proportion to the amounts of the original issues for these purposes, with the nonhighway portion being omitted from these tables. Also omitted are obligations issued for terms of less than two years (interest payments, however, are included in table SB-3).
2/ Coincides with date bonds began to bear interest, unless noted otherwise.
3/ Payment by bond purchaser for interest accrued from date of issue to date of sale.

4/ In most cases, premium and accrued interest are used for debt service payments. Interest requirements for toll facility construction bonds are usually paid out of bond proceeds during the period of construction.
5/ "Posted Rate" is declared rate printed on bonds. "Net Interest Cost" is bid price to borrower for combined bond issue, and reflects the premium or discount on sales.
6/ Entries in this column reflect first date bond issue may be redeemed in its entirety. If called subsequent to the date shown, the premium will usually be scaled downward accordingly.
7/ Where an asterisk appears in this column, the bonds are understood to be secured by the full faith and credit of the State, in addition to the specific revenues dedicated by law to debt service.

ROADWAY

This section presents statistics of public roads and streets existing in the United States as of December 31, 1976 and data on construction during 1976.

Existing mileage and mileage built

Tables M-1, 2, 3, 4, 5, 12 and 21 show the total existing mileage of roads and streets in the United States, classified by systems and surface types. Tables M-4 and M-21 show the extent to which State, local, and other roads comprise the Federal-aid systems. Table M-5 shows the Federal-aid mileage by administrative systems within Standard Metropolitan Statistical Areas (SMSA's) for each State.

The miles of construction and reconstruction completed during 1976 on the State highway systems are shown in table SMB-2. Table OMB supplements table SMB-2 by showing the miles of construction and reconstruction on local roads and streets and on Federal domain roads (when reported) which were not integral parts of the State highway systems. Municipal data are limited to municipal extensions of State system mileage shown in table SMB-2.

The increase in total road and street mileage by construction is relatively small each year. Most construction is for the improvement of existing highways and streets, such as resurfacing those not previously surfaced, widening pavements, reducing grades, minimizing curves, eliminating grade crossings, and other improvements that provide safer, more efficient highways having greater traffic and load-bearing capacities.

The SM tables present the mileage data for State-administered roads and streets, classified by system and type of surface. For the State primary system only, they provide additional information on the width of roadways, number of lanes, access control and traffic volumes. The mileage under control of the Federal Government and the local rural governments is shown in table OM. Local municipal mileage is shown in table LM.

Roads in Federal parks, forests, reservations, etc., are generally part of the State and local systems, and are included with the mileages reported for those systems. Only the remaining miles are shown separately in tables OM, M-1, M-2, and M-21 as being under Federal control.

The designation of a road or street as part of a Federal-aid system does not alter its status as a State or county

road or city street. Inclusion of a highway in a Federal-aid system simply means that, because of its service value and importance, it has been made eligible for Federal construction funds.

Surface types

The classification used in the mileage tables identifies only the visible surface types on existing streets and roadways. Many highways, either by original design or because of reconstruction, consist of more than one major type of construction material. No practical way exists for presenting useful data on their vertical composition.

Administrative categories

"State primary system" refers to highways that have been officially designated by States as the "primary system" on the "State highway system," or some similar term. Although the criteria for selecting these highways have varied greatly among the States, they encompass the principal intercounty, intercity, and interstate roads of all States.

Mileage for "State secondary systems" is reported in the tables for States that have designated both a primary and a secondary system. Some States, in addition to having designated secondary systems, are responsible for constructing and maintaining specified local roads, and these have been shown as "local roads under State control."

The term "municipal extensions" is used exclusively here to identify the extensions of State highway systems into or through municipalities as defined below.

The term "local city streets" refers to all roads and streets other than municipal extensions of State systems in the areas defined as follows: (1) Municipalities as defined on page 2 of the introduction; (2) delimited unincorporated places having an estimated population of 1,000 or more.

Federal-Aid System Mileage

Except for minor amounts of highway mileage, primarily in Federal parks and installations, practically all of the roads and streets in the United States are under the jurisdiction of the States and local governments. The Federal-aid systems are, basically, segments of State and local mileage eligible for Federal aid. The Federal-aid system mileages therefore duplicate mileage also reported

on State and local systems. All highways in the Federal-aid systems are selected by the State and local governments, subject to the approval of the Federal Highway Administration.

System realignment

The Federal-aid system reclassification, based on functional usage, became effective on July 1, 1976, and accounts for a substantial shift in Federal-aid system mileages from the previous year. The mileages previously identified as Federal-aid Secondary Urban and Primary Urban Type II on the FM-1 table have, for the most part, been transferred to the Federal-Aid Urban System.

Federal-aid primary system

The Federal-aid primary system was authorized by the Federal Highway Act of 1921. Originally the system mileage in each State was limited to seven percent of the rural road mileage existing in the State at the time the 1921 Act was passed but, under specified conditions, this proportion could be increased. The Federal-aid realignment has removed this limitation completely starting in 1976.

Interstate system

The National System of Interstate and Defense Highways was originally established by the Federal-Aid Highway Act of 1944. The Federal-Aid Highway Act of 1956 and the companion Highway Revenue Act of 1956 further defined the purpose and extent of the system and, as subsequently amended, dedicated a group of Federal excises on motor fuel and automotive products to the support of Federal highway activities. By law the system is limited to 42,500 miles except that other Federal-aid primary routes may be incorporated into the system provided they are logical additions or connections to the system and meet all the standards of highways on the Interstate System.

The Interstate System connects, as directly as practicable, the Nation's principal metropolitan areas, cities, and industrial centers; serves the national defense; and connects at suitable border points with routes of continental importance.

Federal-aid secondary system

In 1944, Congress approved the designation of a Federal-aid secondary system. It is comprised of the principal secondary and feeder roads linking farms, distribution outlets, and smaller communities with the Federal-aid primary system. As mentioned above, the urban portion of this mileage has, because of realignment, been transferred to other systems.

Urban extensions of Federal-aid systems

The term "urban extensions" is used here exclusively to identify the portions of Federal-aid routes in urban

areas. Although reference to extensions continues in the law and originated because for many years the use of Federal aid was restricted to rural roads, the urban portions of Federal-aid routes are now considered to be integral and important parts of the systems. An urban area as defined in Federal-aid legislation is an area, including and adjacent to a municipality or other urban place, that has a population of 5,000 or more. The boundaries are fixed by the State subject to approval of the Secretary of Transportation. The term "urban" is not synonymous with the term "municipal" as used in this bulletin.

Federal-aid urban system

The Federal-aid urban system was first authorized by the Federal-Aid Highway Act of 1970. Its definition was modified by the Federal-Aid Highway Act of 1973. The urban system is established in each urbanized area, as designated by the Bureau of the Census, and in such urban areas as the State highway departments may designate. The system serves major centers of activity and includes high traffic volume arterial and collector routes, including access roads to airports and other transportation terminals, so as to serve the goals and objectives of the community. Designation of the system is subject to the approval of the Secretary of Transportation.

Traveled-way mileage

Some segments of the Interstate System and some mileage of other systems are either under construction or are to be constructed on new locations. Pending completion of these segments (projected routes), existing routes are continued in use. These existing routes plus the officially designated routes that are completed and open to traffic comprise what is called the "traveled way" of a Federal-aid system.

Construction data and mileage characteristics

The Federal-aid mileages are classified according to system and types of surface in the FM and INT tables. Additional information such as the width of roadways, number of lanes, access control, and traffic volume data for the Federal-aid primary, Federal-aid urban and TOPICS systems appears in tables FM-8, 9, 11, 15, and 110. Similar information for the Interstate System is given in the INT tables bearing the same numbers.

Table FB-2 data show the total mileage improved during 1976 on the Federal-aid primary (including Interstate), urban, secondary, and urban type II systems. Information on projects financed by the States without Federal participation, as well as on work accomplished with Federal aid, has been included in this table. In this respect, table FB-2 differs from tables FA-1 and 2 of this section, which show information only on mileage

improvements that were financed, at least in part, with Federal funds.

Table CA-5 lists, by States, the construction contracts awarded and force account work authorized by State agencies for highways, including Federal-State, Federal-State-local, and State-local cooperative work, and a small amount by the Federal Government for National park, forest and reservation roads. Work on local roads and streets is included only when contracted or performed by the State or when Federal funds are involved. The contracts (and force account work) are broken down into those funded by Interstate appropriation, other federally funded contracts (including direct Federal and emergency relief), and those where no Federal funds were used.

Metrication

A step toward conversion to the metric system has been made with the conversion of eight mileage tables to kilometres. They are M-1, L-3, M-21, SM-2, OM, LM, FM-2, and INT-2. The kilometre tables are suffixed with the word metric.

The factor used in the conversion was 1 mile equals 1.60934 kilometres. Because the data were converted and rounded before the tabulations were done, corresponding cells and totals in the metric tables may not agree with those in the mileage tables. However all cells do add to the appropriate totals.

1/ INCLUDES STREETS WITHIN MUNICIPAL BOUNDARIES AS WELL AS MUNICIPAL EXTENSIONS OF COUNTY, TOWN AND TOWNSHIP ROADS NOT A PART OF EXTENSIONS OF STATE SYSTEMS. SEE TABLE SM-3 FOR MUNICIPAL EXTENSIONS OF STATE SYSTEMS.

2/ INCLUDES PRIMITIVE, UNIMPROVED, AND GRADED AND DRAINED ROADS.

3/ SURFACE TYPES INDICATED BY SYMBOLS IN THESE COLUMNS ARE AS FOLLOWS: D, SOIL-SURFACED; E, SLAG, GRAVEL, OR STONE; F, BITUMINOUS SURFACE TREATED; G-1, MIXED BITUMINOUS, AND H-1, BITUMINOUS PENETRATION HAVING A COMBINED THICKNESS OF SURFACE AND BASE LESS THAN 18 CENTIMETRES (APPROX.) AND/OR LOW LOAD-BEARING CAPACITY; G-2, MIXED BITUMINOUS, AND H-2, BITUMINOUS PENETRATION HAVING A COMBINED THICKNESS OF SURFACE AND BASE 18 CENTIMETRES (APPROX.) OR MORE AND/OR A HIGH LOAD-BEARING CAPACITY WITH OR WITHOUT PORTLAND CEMENT CONCRETE BASE; I, BITUMINOUS CONCRETE AND SHEET ASPHALT WITH OR WITHOUT PORTLAND CEMENT CONCRETE BASE; AND J, PORTLAND CEMENT CONCRETE WITH OR WITHOUT BITUMINOUS WEARING SURFACE LESS THAN 2.5 CENTIMETRES (APPROX.) IN COMPACTED THICKNESS. SEGREGATION OF G AND H SURFACES ACCORDING TO THICKNESS AND LOAD-BEARING CAPACITY IS NOT UNIFORM FOR ALL STATES. WHERE NO SEGREGATION WAS REPORTED FOR THEM, THE SURFACES WERE CLASSIFIED AS G-1 AND H-1.

Introduction

LOCATING AND OBTAINING TRANSPORTATION RELATED STATISTICS

This section has been included to assist users of *Highway Statistics* in determining the availability of and obtaining transportation-related information. Included are lists of other FHWA publications, FHWA, DOT, and Bureau of the Census staff concerned with transportation. Names, addresses, and telephone numbers are provided. Also listed are addresses and telephone numbers for the Transportation Research Board (TRB) and the National Technical Information Service (NTIS) and some non-government organizations which assemble, analyze, and publish data.

There are several efficient approaches to identifying and obtaining available data. A library subject-type catalog and the reference section in a public, high school, or university library are often the most effective, readily available, and frequently overlooked sources. The annual *Statistical Abstract of the United States* shows the sources of data for all tables and a follow up to the Federal or other source agency will indicate if more detailed or other related data are available. Similarly text books, guides, and manuals provide references to other publications in bibliographies and footnotes. Inquiry to the authors or agencies will usually determine the extent of related or more recent data. For subscribers, TRB and NTIS provide various computerized information system searches for a fee. There are numerous transportation-related national associations, many with chapters in State capitals and large cities, which compile information related to their activities. There may be a charge or a membership requirement. The listing of non-government

sources is not all inclusive, but contains those most frequently referred to for transportation data not obtained or compiled by the government. Each State has a State highway agency or department of transportation; cities, counties, and metropolitan areas have public works, traffic engineering and transportation planning organizations with knowledgeable staffs. The agencies are usually listed in telephone directories under the name of the city, county, State, United States, or other organization as the case may be.

For the Federal Government, the Department of Commerce compiles, revises every two years, and publishes *Statistical Services of the United States Government* (Superintendent of Documents, Washington, D.C. 20402, price for 1975 edition \$3.40, stock number 041-001-00100-0) and *Federal Statistical Directory* (Superintendent of Documents, Washington, D.C. 20402, price for 1976 edition \$2.50, stock number 041-001-00125-5). The first describes the kinds of statistics compiled by each agency while the second provides a directory classified by agency unit with staff member names and telephone numbers. All staff names are also listed alphabetically with phone number and agency names. The Department of Commerce monthly *Statistical Reporter* (Superintendent of Documents, Washington, D.C. 20402, January 1978 subscription price \$9.70 per year) lists all new Federal reporting procedures or forms with the name of the agency and often with the name and telephone number of a responsible individual. New statistical releases are also announced. Thus, the *Statistical Reporter* provides a current indication of statistical activities of executive branch agencies.
