

TABLE OF CONTENTS

EXECUTIVE SUMMARY.....	1
CHAPTER 1 STATE OF LAKE ONTARIO	
1.1 Summary.....	1-1
1.2 Linking Lake Ontario’s Ecosystem Goals, Objectives and Indicators	1-1
1.3 Lake Ontario Status	1-1
1.3.1 Critical Pollutant Indicators.....	1-1
1.3.2 Lower Food Web Indicators.....	1-5
1.3.3 Upper Food Web Indicators.....	1-7
1.4 References.....	1-10
CHAPTER 2 BACKGROUND	
2.1 Summary.....	2-1
2.2 Introduction to Lake Ontario	2-1
2.2.1 Climate.....	2-2
2.2.2 Physical Characteristics and Lake Processes.....	2-2
2.2.3 Aquatic Communities	2-3
2.2.4 Demographics and Economy of the Basin.....	2-7
2.3 LaMP Background.....	2-8
2.4 LaMP Structure and Processes.....	2-9
2.5 References.....	2-11
CHAPTER 3 ECOSYSTEM GOALS, OBJECTIVES, AND INDICATORS	
3.1 Summary.....	3-1
3.2 Development of Lake Ontario Ecosystem Goals and Objectives.....	3-1
3.2.1 Ecosystem Goals for Lake Ontario.....	3-1
3.2.2 Ecosystem Objectives for Lake Ontario.....	3-1
3.3 Ecosystem Indicators.....	3-2
3.3.1 Critical Pollutant Indicators.....	3-3
3.3.2 Lower Foodweb Indicators.....	3-18
3.3.3 Upper Foodweb Indicators	3-22
3.4 Cooperative Monitoring Progress Towards Meeting LaMP Goals and Indicators.....	3-26
3.5 Major 2003 Cooperative Monitoring Projects.....	3-27
3.5.1 Lake Ontario Atmospheric Deposition Study (LOADS).....	3-28
3.5.2 Lake Ontario Lower Aquatic Foodweb Assessment (LOLA)	3-28
3.5.3 Interagency Laboratory Comparison Study.....	3-29

3.6	Other Indicator Initiatives	3-30
3.7	Actions and Progress	3-30
3.8	References.....	3-30

CHAPTER 4 IDENTIFICATION OF BENEFICIAL USE IMPAIRMENT ASSESSMENTS

4.1	Summary	4-1
4.2	Beneficial Use Impairments Defined by the Great Lakes Water Quality Agreement.....	4-1
4.3	Beneficial Use Impairment Identification Process and Problem Definition	4-1
4.4	Beneficial Use Impairments in Lake Ontario	4-2
4.4.1	Restrictions on Fish and Wildlife Consumption.....	4-3
4.4.2	“Degradation of Wildlife Populations” and “Bird or Animal Deformities or Reproduction Problems”.....	4-6
4.4.3	Loss of Fish and Wildlife Habitat.....	4-9
4.4.4	Degradation of Benthos	4-12
4.4.5	Degradation of Nearshore Phytoplankton Populations.....	4-13
4.4.6	Degradation of Fish Populations	4-15
4.5	Unimpaired Lakewide Beneficial Uses in Lake Ontario	4-18
4.5.1	Tainting of Fish and Wildlife Flavor.....	4-18
4.5.2	Fish Tumors	4-19
4.5.3	Restrictions on Dredging Activities.....	4-19
4.5.4	Eutrophication or Undesirable Algae.....	4-20
4.5.5	Restrictions on Drinking Water Consumption, or Taste and Odor Problems	4-21
4.5.6	Beach Closings	4-22
4.5.7	Degradation of Aesthetics.....	4-23
4.5.8	Degradation of Zooplankton.....	4-24
4.5.9	Added Costs to Agriculture or Industry.....	4-24
4.6	Actions and Progress	4-24
4.7	References.....	4-25

CHAPTER 5 HABITAT ASSESSMENT AND RESTORATION

5.1	Summary	5-1
5.2	Habitat Types of the Lake Ontario Basin.....	5-1
5.2.1	Habitat Zones and Foodwebs.....	5-1
5.2.2	Nearshore Habitat	5-1
5.2.3	Offshore Habitat	5-2
5.2.4	Nearshore Wetlands.....	5-2
5.2.5	Tributaries.....	5-2
5.3	Current Status of Basin Habitat	5-2
5.4	Ongoing Work.....	5-4
5.4.1	Binational Activities	5-4
5.4.2	U.S. Activities	5-6
5.4.3	Canadian Activities	5-9

5.5	Actions and Progress	5-11
5.6	References.....	5-11

CHAPTER 6 SOURCES AND LOADS OF CRITICAL POLLUTANTS

6.1	Summary	6-1
6.2	Identifying Lakewide Problems and Critical Pollutants	6-1
6.3	Lake Ontario Sources and Loadings Strategy.....	6-2
6.4	Identifying Sources and Loadings of Critical Pollutants	6-3
6.4.1	Data Sources and Limitations	6-3
6.4.1.1	Sources Within the Lake Ontario Basin.....	6-4
6.4.1.2	Sources and Releases Outside the Lake Ontario Basin	6-5
6.4.1.3	Atmospheric Deposition	6-6
6.4.2	Loadings – General.....	6-6
6.4.3	Loadings of Critical Pollutants	6-9
6.4.3.1	PCBs	6-9
6.4.3.2	DDT and its Metabolites.....	6-9
6.4.3.3	Mirex	6-9
6.4.3.4	Dioxins and Furans	6-10
6.4.3.5	Mercury	6-11
6.4.3.6	Dieldrin.....	6-11
6.5	Actions and Progress	6-11
6.5.1	Binational Activities	6-12
6.5.1.1	Niagara River Toxics Management Plan	6-12
6.5.1.2	Lake Ontario Air Deposition Study (LOADS	6-12
6.5.1.3	Great Lakes Binational Toxics Strategy	6-17
6.5.1.4	Lake Ontario Mass Balance Models.....	6-17
6.5.1.5	Binational Sediment Workshop	6-21
6.5.2	U.S. Activities.....	6-24
6.5.2.1	Contaminant Trackdown	6-24
6.5.2.2	Government Activities.....	6-27
6.5.2.3	Pollution Prevention Partnerships	6-31
6.5.3	Canadian Activities.....	6-32
6.5.3.1	Contaminant Trackdown.....	6-32
6.5.3.2	Government Activities.....	6-39
6.5.3.3	Pollution Prevention Partnerships	6-40
6.6	References.....	6-42

CHAPTER 7 HUMAN HEALTH

7.1	Summary	7-1
7.2	Background	7-1
7.3	Human Health and the Lake Ontario LaMP	7-2
7.4	Human Health Pathways	7-2
7.5	Beneficial Use Impacts	7-3
	7.5.1 Fish Consumption Advisories	7-4
	7.5.2 Drinking Water	7-6
	7.5.3 Bathing Beach (Closings) and Recreation	7-6
7.6	Great Lakes Human Health Network	7-7
7.7	Actions and Progress	7-8
7.8	References	7-8

CHAPTER 8 PARTNERSHIPS

8.1	Summary	8-1
8.2	Binational Partnerships	8-1
	8.2.1 Lake Ontario Committee	8-1
	8.2.2 Lake Ontario-St. Lawrence Water Level Study	8-2
	8.2.3 Cooperative Monitoring	8-3
	8.2.4 Remedial Action Plans	8-3
8.3	Public Partnerships	8-4
8.4	Actions and Progress	8-4
8.5	References	8-4

CHAPTER 9 PUBLIC INVOLVEMENT AND COMMUNICATION

9.1	Summary	9-1
9.2	Public Involvement Goals	9-1
9.3	Meeting Public Involvement Goals	9-1
	9.3.1 Public Meetings	9-1
	9.3.2 Publications	9-1
	9.3.3 Websites	9-2
	9.3.4 Media Events	9-3
	9.3.5 Special Projects	9-3
	9.3.6 Speaking Engagements	9-4
	9.3.7 LaMP Display	9-4
	9.3.8 Information Distribution	9-4
9.4	Information Connections	9-4
9.5	Actions and Progress	9-5
9.6	References	9-5

CHAPTER 10 SIGNIFICANT ONGOING AND EMERGING ISSUES

10.1	Summary	10-1
10.2	Significant Ongoing Issues	10-1
	10.2.1 Protection and Restoration of Native Species	10-1
	10.2.2 Invasive Species.....	10-2
	10.2.3 Lake Ontario Water Levels.....	10-6
10.3	Emerging Issues	10-8
	10.3.1 Rapid Urbanization of the Canadian Side of Western Lake Ontario	10-8
	10.3.2 Emerging Chemicals of Concern.....	10-9
	10.3.3 Other Emerging Chemicals.....	10-12
	10.3.4 Fish and Wildlife Disease	10-12
	10.3.5 Type E botulism.....	10-13
	10.3.6 Climate Change	10-14
	10.3.7 Harmful Algal Blooms.....	10-14
10.4	Actions and Progress	10-15
10.5	References.....	10-19

CHAPTER 11 SUMMARY OF AREA OF CONCERN STATUS

11.1	Summary	11-1
11.2	Background and Current Status	11-1
11.3	Binational Areas of Concern.....	11-3
	11.3.1 Niagara River Area of Concern	11-4
	11.3.1.1 Niagara River (U.S. Side).....	11-4
	11.3.1.2 Niagara River (Canada Side).....	11-5
	11.3.2 St. Lawrence River Area of Concern.....	11-7
	11.3.2.1 St. Lawrence River at Massena, New York.....	11-7
	11.3.2.2 St. Lawrence River at Cornwall, Ontario	11-8
11.4	U.S. Areas of Concern	11-11
	11.4.1 Eighteenmile Creek	11-11
	11.4.2 Rochester Embayment.....	11-12
	11.4.3 Oswego River	11-13
11.5	Canada Areas of Concern	11-14
	11.5.1 Hamilton Harbour.....	11-14
	11.5.2 Toronto and Region	11-16
	11.5.3 Port Hope Harbour.....	11-18
	11.5.4 Bay of Quinte.....	11-19
11.6	Actions and Progress	11-21
11.7	References.....	11-21

CHAPTER 12 LAMP WORKPLAN ACTIONS AND PROGRESS

12.1	Summary.....	12-1
------	--------------	------

CHAPTER 13 LAMP NEXT STEPS

13.1	Summary.....	13-1
13.2	Next Steps.....	13-1
13.3	Research and Monitoring Needs.....	13-2
13.4	Recommendations.....	13-2
13.5	References.....	13-2

TABLES

2.1	Basin Land Use (%).....	2-8
2.2	Shoreline Land Use (%).....	2-8
3.1	Concentrations of Critical Pollutants (pg/L) compared to NYSDEC ambient water quality guidelines.....	3-4
4.1	Lake Ontario Lakewide Beneficial Use Impairments, Impacted Species and Pollutants.....	4-4
6.1	Estimates of Critical Pollutant Loadings to Lake Ontario.....	6-7
6.2	PCB air concentrations, pg/m ³ and air temperature. Sampled from Ship and from nearby Land based station. Average of three intensive sampling events (April and September 2002 and July 2003).....	6-13
6.3	Total PCBs, DDE and Mirex in Lake Ontario Surface Water dissolved phase, ng/L (Average of 3 intensive sampling events: April and Sept. 2002 and July 2003).....	6-14
6.4	Concentrations of Total Gaseous Mercury (TGM) and Reactive Gaseous Mercury (RGM) in Air and filtered Total Gaseous Mercury (TGM) and Dissolved Gaseous Mercury (DGM) in the Water Column of Lake Ontario.....	6-16
6.5	Total Dioxins / Furans air concentrations (pg/m ³) LOADS three intensive sampling periods... 6-16	
6.5	Phases of Lake Ontario Trackdown Studies.....	6-34
10.1	Other non native species threatening Lake Ontario ecosystem, their origin, date and location of first sighting, mechanism of introduction into the Great Lakes, and their current or potential impacts. (Dermot and Legner 2002, Mills et al. 1993, Owens et al. 1998, Ricciardi 2001, Witt et al. 1997, and Zaranko et al. 1997).....	10-2
10.2	Summary of Actions and Progress.....	10-16
11.1	Summary of Beneficial Use Impairments for Lake Ontario Lakewide, Nearshore, and Areas of Concern (Based on the 14 IJC Use Impairment Indicators).....	11-2
12.1	Lake Ontario Lakewide Management Plan Binational Workplan (2007-2011).....	12-2

FIGURES

2.1	Lake Ontario Drainage Basin	2-1
2.2	Sedimentation Basins in Lake Ontario (Thomas, 1983).....	2-3
3.1	Diieldrin dissolved phase trends in Niagara River surface water at Niagara-on-the-Lake 1987-2000.....	3-5
3.2	Contaminants in Young-of-the-Year Fish From Nearshore Areas of New York's Lake Ontario Basin, 1997	3-7
3.3	Contaminant trends in Lake Ontario lake trout	3-8
3.4	PCBs in 65 cm Coho Salmon from Lake Ontario, 1976-2006	3-9
3.5	Mirex in 65 cm Coho Salmon from Lake Ontario, 1976-2006	3-9
3.6	Mercury in 65 cm Coho Salmon from Lake Ontario, 1976-2006	3-9
3.7	Total DDT and metabolites in 65 cm Coho Salmon from Lake Ontario, 1976-2006.....	3-9
3.8	PCB Trends in Lake Ontario Herring Gull Eggs	3-11
3.9	DDE Trends in Lake Ontario Herring Gull Eggs	3-12
3.10	Diieldrin Trends in Lake Ontario Herring Gull Eggs	3-13
3.11	Mirex Trends in Lake Ontario Herring Gull Eggs.....	3-14
3.12	2,3,7,8-Dioxin Trends in Lake Ontario Herring Gull Eggs	3-15
3.13	Mercury Trends in Lake Ontario Herring Gull Eggs, Toronto and Snake Island.....	3-16
3.14	Hexachorobenzene (HCB) Trends in Lake Ontario Herring Gull Eggs	3-17
3.15	Mean spring total phosphorus concentration in the open waters of Lake Ontario	3-19
3.16	Corrected chlorophyll-a values in 0 – 20 m integrated samples, offshore waters (depth ≥ 100 m) in Lake Ontario, 1974 – 2003.....	3-19
3.17	Summertime Secchi disc depths in Lake Ontario offshore waters (depth ≥ 100 m) 1966 – 2004.....	3-20
3.18	Numbers of Gull, Tern and Cormorant Nests on Lake Ontario, 1976 – 1999	3-24
3.19	Otter sightings and harvests in the Lake Ontario basin 1999-2000.....	3-25
3.20	Number of Occupied Bald Eagle Nesting Territories in the Lake Ontario basin	3-26
4.1	Phytoplankton Densities from Toronto-based Lake Ontario Water Treatment Plant Intakes, 1923-1998.....	4-14
6.1	Variations in flows and loads of mercury in US Tributaries	6-5
6.2	Total PCB comparison of IADN (1998-2000) and Sterling (2002-2003)	6-14
6.3	PCB air sampling at Sterling for the period April 2002 – March 2003 showing direct relationship between air temperature and amount of PCBs measured	6-14
6.4	Model Confirmation 1998 - 2001	6-20
6.5	Output for Lake Trout PCB Concentrations under Baseline and Other Loading Scenarios.....	6-20
6.6	Lake Ontario PCB Mass Balance for the Year 2000.....	6-21
6.7	Ontario Tributary Source Trackdown locations.....	6-33
10.1	Greenbelt Plan Area	10-9
11.1	Lake Ontario Areas of Concern (AOCs).....	11-3
