

## Open-File Report 02-473

Each year, the U.S. Forest Service requests a number of individual reports on locatable mineral resources for specific land parcels considered for exchange. This report is a compilation of reports provided in fiscal year 2002. Instead of being arranged chronologically by report date, this data release arranges the reports by State and National Forest.

To use this report, open the file OFR02\_473.pdf using Adobe Acrobat Reader (downloadable from [www.adobe.com](http://www.adobe.com)). Bookmarks are provided along the left side of the screen to navigate to individual reports and their attachments. Hot links from the “contents” directly to the individual text files are an alternate way to navigate: click on the a page number to go directly to that report without using the bookmarks. Return to the “contents” using the bookmarks. Alternatively, click on the thumbnails tab below the bookmarks tab to navigate using images of the pages in the report.
