

# APPENDIX E

## FINAL SELECTION CRITERIA FOR 2005

*The final selection criteria for the 2005 round of base closures and realignment were originally published by the Department of Defense in the Federal Register on December 23, 2003. They were adopted as final criteria on February 12, 2004, unless Congress passed a resolution of disapproval by March 1, 2004. Congress's decision not to do so meant the criteria went into effect. Congress later enshrined the final selection criteria into law as Subtitle C of P.L. 108-375 (which amended Section 2913 of P.L. 101-510).*

*The final criteria to be used by the Secretary in making recommendations for the closure or realignment of military installations inside the United States under this part in 2005 shall be the military value and other criteria specified [below]:*

### **MILITARY VALUE (GIVEN PRIORITY CONSIDERATION)**

---

1. The current and future mission capabilities and the impact on operational readiness of the total force of the Department of Defense, including the impact on joint warfighting, training, and readiness.
2. The availability and condition of land, facilities, and associated airspace (including training areas suitable for maneuver by ground, naval, or air forces throughout a diversity of climate and terrain areas and staging areas for the use of the Armed Forces in homeland defense missions) at both existing and potential receiving locations.
3. The ability to accommodate contingency, mobilization, surge, and future total force requirements at both existing and potential receiving locations to support operations and training.
4. The cost of operations and the manpower implications.

### **OTHER CONSIDERATIONS**

---

5. The extent and timing of potential costs and savings, including the number of years, beginning with the date of completion of the closure or realignment, for the savings to exceed the costs.
6. The economic impact on existing communities in the vicinity of military installations.
7. The ability of the infrastructure of both the existing and potential receiving communities to support forces, missions, and personnel.
8. The environmental impact, including the impact of costs related to potential environmental restoration, waste management, and environmental compliance.
