

Calculate your drug costs under the House Republican prescription drug plan

1 _____
(Total yearly drug costs)

(yearly = monthly costs x 12)

Enter your **total yearly drug costs** on line **1**.

2 _____
(Gap in coverage that seniors must cover themselves)

3 _____
(Deductible)

4 _____

5 _____
(Copay)

6 _____
(Yearly premium)

7 _____
(YOUR TOTAL COSTS)

Senior's Gap. Enter \$2,900 for costs you will have to cover yourself on line **2**.

Calculate **Senior's Gap**: subtract \$2,000 from your total yearly drug costs. Enter result on line **2**.

Costs are less than \$2000. Enter 0 on line **2**.

Yearly **deductible** is \$250. Enter \$250 on line **3**.

If total yearly drug costs are less than \$250 enter 0 on line **3**, else your yearly **deductible** is \$250. Enter \$250 on line **3**.

Copay (Part One)
Subtract \$250 from \$2,000. Enter result on line **4**.

Yearly **deductible** is \$250. Enter \$250 on line **3**.

Co-pay (Part One)
Subtract \$250 from total yearly drug costs. Enter result on line **4**.

Copay (Part Two)
Multiply line **4** by 0.2. Enter result on line **5**.

GOP estimates **yearly premium** as \$35/m = \$420/y. Enter \$420 on line **6**.

Add **2+3+5+6**. Enter total on line **7**. This is amount you will have to pay under GOP plan.

TIP: To calculate percentage of costs **you** will have to cover:

Divide line **7** by line **1** and multiply the result by 100.

NOTE: Seniors with retirement income greater than \$60,000 will pay slightly more. Seniors with retirement income below \$12,120 (135 percent poverty) wouldn't have to pay the annual premium or most of the copay..
