

United States General Accounting Office
Washington, DC 20548

On August 13, 2004, GAO reissued this report to correct a report production error that mistakenly contained an incomplete "agency comment and evaluation" section from an earlier version of the report. The changes affect pages 5-7. We apologize for the error.

July 2, 2004

The Honorable Jim Turner
Ranking Minority Member
Select Committee on Homeland Security
House of Representatives

Subject: *Status of Key Recommendations GAO Has Made to DHS and Its Legacy Agencies*

Dear Mr. Turner:

Since the terrorist attacks of September 11, 2001, the federal government has undertaken numerous actions to enhance the nation's homeland security, including the creation of the Department of Homeland Security (DHS). One of the primary reasons for the establishment of DHS was to unify the vast national network of organizations and institutions involved in efforts to protect our nation. Since it began operations on March 1, 2003, DHS has faced enormous challenges to protect the nation from terrorism while it organizes itself into a coherent and integrated agency. As you know, we support Congress by reviewing various government programs and activities to help improve their performance and accountability. When our work identifies a significant need for action by the Congress or an agency, we develop recommended solutions. These recommendations identify actions we believe the department, agency, bureau, or office should implement to ensure government programs operate effectively and efficiently. We have issued numerous recommendations to DHS and its legacy agencies to improve the programs and activities they administer.

This report responds to your request that we provide you with status information on key recommendations we have made to DHS and its legacy agencies. On June 30, 2004, we briefed your office on the results of our review. This report transmits information provided during that briefing, including (1) the status of key GAO recommendations issued to DHS, (2) timeframes DHS established for implementing key recommendations, and (3) challenges DHS faces in implementing such recommendations.

This report is one in a series of GAO efforts to assess and baseline the progress and effectiveness of federal agency efforts to improve homeland security mission performance. We recently evaluated and reported on congressionally chartered commissions' recommendations, by mission

area, related to homeland security.¹ In addition, we have ongoing work on key departments' plans to implement the National Strategy for Homeland Security and the challenges they will face in doing so. Efforts to implement key recommendations from GAO, congressionally chartered commissions, or other homeland security experts, to incorporate critical actions into agency strategic plans, and to identify milestones, timelines, and challenges will provide measures by which to assess whether homeland security is being improved.

Background

Under the Homeland Security Act of 2002,² 22 federal agencies were merged into DHS, which officially began operations as a new department on March 1, 2003. To carry out its responsibilities, DHS is organized into four directorates and one division.

- **The Border and Transportation Security (BTS) Directorate** (BTS), which is responsible for maintaining the security of our nation's borders and transportation systems and enforcing the nation's immigration laws. Additionally, BTS manages and coordinates port-of-entry activities and oversees the protection of government buildings.
- **The Emergency Preparedness and Response (EPR) Directorate**, which is tasked with helping the nation prepare for catastrophes, whether natural disasters or the result of terrorist-related attacks. As such, EPR coordinates with first responders and oversees the federal government's national response and recovery strategy.
- **The Information Analysis and Infrastructure Protection (IAIP) Directorate**, which identifies and assesses threats to the homeland, maps those threats against vulnerabilities, issues warnings, and recommends measures necessary to protect the key resources and critical infrastructure of the United States.

¹See U.S. General Accounting Office, *Homeland Security: Selected Recommendations from Congressionally Chartered Commissions and GAO*, GAO-04-591 (Washington, D.C.: Mar. 31, 2004).

²P.L. 107-296 (Nov. 25, 2002).

-
- **The Science and Technology (S&T) Directorate**, which coordinates DHS's efforts in research and development. As such, S&T is responsible for organizing the scientific and technological resources of the United States to assist in preventing or mitigating the impact resulting from terrorist attacks against the United States or its allies.
 - **The Management Division**, which is responsible for administering DHS's budget, financial management systems, procurement activities, human resources functions, information technology systems, facilities management, and performance measurement efforts.
-

Scope and Methodology

To address the status of key recommendations we issued to DHS, the timeframes DHS established for implementing key recommendations,³ and related challenges, we reviewed 325 recommendations made in our unclassified and limited official use reports issued to DHS and its 22 legacy agencies between March 1, 1997, and March 1, 2004. We selected March 1, 2004, because it reflects the 1-year anniversary of the operational startup of DHS. We then consulted with the subject matter experts that made these recommendations to prioritize them according to the greatest risk. As a result, we identified 104 key recommendations that reflect actions we believe should be taken either to aid in securing the nation's homeland or to swiftly and appropriately respond to future terrorist attacks.⁴

We also met with DHS officials and obtained documentation on actions taken to implement key recommendations, timeframes established for the implementation of these recommendations, and related challenges facing DHS. We then analyzed this documentation and consulted with our subject matter experts to assess the status of each recommendation discussed in the documentation based on actions DHS reported taking. As part of this

³We believe that the implementation of these recommendations is key to the agency's ability to effectively fulfill its homeland security mission.

⁴Since March 1, 2003, we have and will continue to issue recommendations, many of which are key to DHS's ability to effectively fulfill its homeland security mission. For example, in May 2004, we issued *Overstay Tracking: A Key Component of Homeland Security and a Layered Defense* that cites recommendations that are relevant to the evaluation of DHS's new U.S. Visitor and Immigrant Status Indicator Technology program, see GAO-04-82, May 21, 2004. This report and its recommendations as well as others like it are not included in the results of our review since they are outside the scope of our work.

assessment, our subject matter experts reviewed documentation provided by DHS to verify that certain actions DHS reported taking to implement key recommendations were completed. In some cases, complete verification of actions taken would have required extensive follow-up audit work. Thus, in these cases, our experts reviewed documentation provided and discussed actions taken with agency officials.

We conducted our work from January through June 2004 in accordance with generally accepted government auditing standards.

Results

As of June 28, 2004, DHS had implemented 40 of 104 recommendations that we consider key to the agency's ability to effectively fulfill its homeland security mission. For a list of implemented recommendations, see enclosure II. DHS is currently addressing another 63 key recommendations. For a list of recommendations not yet fully implemented, see enclosure III. Additionally, GAO closed one key recommendation in August 2001, although action taken by one of DHS's legacy agencies did not fully address the intent of the recommendation prior to closure.

Of the 104 key recommendations issued to DHS, 38 were issued prior to the agency's official formation on March 1, 2003. Of these, 20 have been fully implemented. The other 66 recommendations were issued after the creation of DHS. Of these 66, 20 have been fully implemented.

More than half of the key recommendations—60—have been directed to BTS or its legacy agencies, which address border and transportation security as well as immigration enforcement. Of these, 27 have been fully implemented, while another 33 are currently being addressed by BTS.

DHS's efforts to address the key recommendations have generated positive results toward improved mission effectiveness. For example, the 27 recommendations fully implemented within DHS's BTS directorate have resulted in a reduction in the vulnerabilities and inefficiencies of the land ports of entry inspection process. BTS has also benefited with respect to more timely and accurate information pertaining to the smuggling of aliens and the legal status of immigrants. Within the EPR directorate, the implementation of 3 of the key 6 recommendations have resulted in improved emergency response and related planning efforts.

DHS provided documentation and other information to us describing specific actions taken by the agency or its legacy agencies to implement

55 of the 63 remaining key recommendations.⁵ This documentation provides information on timeframes for planned implementation of actions pertaining to 38 of the recommendations. For example, one document describes preparation of a National Plan for Critical Infrastructure and Key Resources Protection, with a completion date of December 17, 2004.⁶ DHS did not provide timeframes for 6 key recommendations because it maintains that it has taken action to fully implement these recommendations.

Effective implementation of the remaining 63 key recommendations could also help to strengthen mission effectiveness. For example, effective implementation of the remaining 33 recommendations related to the BTS directorate could result in reducing the nation's current security vulnerabilities in such activities as passenger screening, border security, and ports of entry. Similarly, the implementation of the remaining 3 recommendations related to the EPR directorate could better position the federal government to provide essential services in the event of a disaster.

While DHS is working to address the remaining 63 key recommendations, agency documents and other information DHS provided indicated that the agency faces challenges related to 24 of these recommendations, such as funding and other resource constraints. These challenges will need to be overcome for DHS to effectively address these recommendations.

Agency Comments

Throughout the process of identifying, prioritizing, and updating the status of GAO recommendations, we shared worksheets and drafts of enclosures II and III with DHS to resolve issues and obtain the most complete and current information from them. We then provided a draft copy of this report, including the enclosures, to DHS for comment. DHS provided formal written comments to the draft, which are presented in their entirety in enclosure IV. In commenting on the draft report, DHS noted that it takes GAO recommendations very seriously, invests significant effort to be responsive, generally welcomes the insight and guidance imparted in the

⁵In commenting on our reports, which contained the other 8 recommendations, DHS generally indicated concurrence with the recommendations.

⁶This plan addresses the recommendations contained in our report, *Critical Infrastructure Protection: Significant Challenges in Developing National Capabilities*, GAO-01-323 (Washington, D.C.: Apr. 25, 2001).

recommendations, and is eager to achieve resolution of the status of GAO-listed open recommendations. However, DHS noted concern about the time spent by its very limited personnel in responding to current GAO engagements and working to close “...more than 350 open recommendations....,” asserting that the “...preponderance of the total pending recommendations were presented to federal entities prior to the formation of DHS.” DHS requested both GAO and congressional staff support to develop a functional approach to consolidate and resolve GAO recommendations, particularly those associated with the legacy organizations now merged into the new DHS organizational structure, so that DHS “...would be able to devote appropriate attention to current homeland security issues.”

We believe GAO open recommendations reflect current homeland security issues and the current interest of congressional oversight committees. Our report prioritized 104 recommendations as key from a total of 325 recommendations yet to be implemented, of which 66 were issued after the formation of DHS, in our effort to reduce the burden of response from DHS. Thus, the recommendations discussed in this report focus on homeland security issues that are key to DHS’s ability to effectively fulfill its homeland security mission. Therefore, we believe the implementation of these recommendations will help reduce current vulnerabilities in areas such as passenger screening, border security, and ports of entry. DHS also suggested that we consider closing recommendations that are no longer applicable due to evolving missions. In conducting this review, we considered the validity and applicability of all key recommendations yet to be implemented in light of DHS’s mission and concluded that the recommendations are still valid. Additionally, DHS noted that we should take into account that some recommendations were previously targeted to legacy units (such as the National Infrastructure Protection Center or the Critical Infrastructure Assurance Office) that are now dissolved or partially integrated into DHS. We agree that some legacy units no longer exist. However, while the entities no longer exist, their overall goals and objectives with respect to homeland security are still vital. Consequently, the responsibility for implementing the key recommendations in this report previously targeted to these entities now resides with DHS.

DHS identified a need to agree with GAO on criteria for closure of recommendations and offered specific suggestions to create a “...better process for a more efficient and effective open recommendation resolution process...” noting its concern that DHS is “...shooting at the proverbial... ‘moving target.’” Our report necessarily reflects the status of recommendations at a specific point in time, since we work continually to

update the status and close out recommendations that have been implemented, and issue new recommendations in our ongoing work for the Congress. We have and will continue to work with DHS to enhance the process and clarify criteria, since our objective also is to improve homeland security. We recognize the tremendous responsibility DHS has and the importance of the agency succeeding in its mission to ensure the safety and security of the nation's citizens. We continue to believe that effective implementation of our key recommendations can greatly assist DHS in achieving this goal.

We plan no further distribution of this report until 30 days after the date of this report. At that time, we will send copies of this report to the Subcommittee on Homeland Security, Senate Committee on Appropriations; Senate Committee on Governmental Affairs; Subcommittee on Homeland Security, House Committee on Appropriations; House Committee on Government Reform; the Chairman, House Select Committee on Homeland Security; the Secretary of Homeland Security; the Director, Office of Management and Budget; and other interested parties. We will also make copies available to others on request.

In addition, the report will be available on GAO's Web site at <http://www.gao.gov>. If you or your staff have any questions about this report, please contact me at (202) 512-8777 or by e-mail at yimr@gao.gov or Debra Sebastian at (202) 512-9385 or by e-mail at sebastiand@gao.gov. GAO contacts and staff acknowledgments are listed in enclosure V.

Sincerely yours,

Randall A. Yim, Managing Director
Homeland Security and Justice Issues

Enclosures – 5

Enclosure 1: Briefing to Ranking Member Turner

Status of Key Recommendations to the Department of Homeland Security

**Briefing for Ranking Member Jim Turner
Select Committee on Homeland Security
House of Representatives**

June 30, 2004

Introduction

- Since the terrorist attacks of September 11, 2001, the federal government has undertaken numerous actions to enhance the nation's homeland security, including the creation of the Department of Homeland Security (DHS).
- The General Accounting Office supports the Congress in meeting its Constitutional responsibilities and helps improve the performance and accountability of the federal government by reviewing various government programs and activities.
- When GAO's work identifies a significant need for action by the Congress or an agency, GAO develops recommended solutions.
- GAO has issued numerous recommendations to DHS or its legacy agencies to improve the programs and activities they administer.

Introduction (cont'd)

- GAO has undertaken a series of efforts to assess the progress and effectiveness of efforts to improve homeland security mission performance.
 - GAO recently evaluated and reported on congressionally chartered commissions' recommendations related to homeland security.¹
 - GAO has ongoing work on key departments' plans to implement the National Strategy for Homeland Security and the challenges they face.
 - Efforts to implement key recommendations from GAO, congressionally chartered commissions, or other homeland security experts will help provide a base by which to assess whether homeland security is being improved.

¹See U.S. General Accounting Office, *Homeland Security: Selected Recommendations from Congressionally Chartered Commissions and GAO*, GAO-04-591 (Washington, D.C.: Mar. 31, 2004).

Objectives

GAO determined the

- status of key GAO recommendations issued to DHS;
- timeframes DHS established for implementing key recommendations not yet fully implemented, and
- challenges DHS faces in implementing key recommendations not yet fully implemented.

Scope and Methodology

To address the status of key GAO recommendations² issued to DHS, agency timeframes for implementing recommendations and related challenges, GAO:

- reviewed 325 recommendations it made in unclassified and limited official use reports issued to DHS and its 22 legacy agencies between March 1, 1997, and March 1, 2004;
- consulted with subject matter experts in the agency to prioritize the recommendations according to the greatest risk, identifying 104 key recommendations that GAO believes reflect actions that should be taken either to aid in securing the nation's homeland or to swiftly and appropriately respond to future terrorist attacks;

²We believe that the implementation of these recommendations is key to the agency's ability to effectively fulfill its homeland security mission.

Scope and Methodology (cont'd)

- met with DHS officials and obtained some documentation on actions taken to implement key recommendations still outstanding, timeframes for implementation, and implementation challenges facing DHS; and
- reviewed documentation to verify that DHS completed certain actions it reported taking to implement key recommendations.³

GAO conducted its work from January to June 2004 in accordance with generally accepted government auditing standards.

³In some cases, complete verification of actions taken would have required extensive follow-up audit work. Thus, in these cases, GAO reviewed documentation provided and discussed actions taken with agency officials.

Background

- Under the Homeland Security Act of 2002,⁴ 22 federal agencies were merged into DHS, which officially began operations as a new department on March 1, 2003.
- To carry out its responsibilities, DHS is organized into 4 directorates and 1 division:
 - The Border and Transportation Security Directorate (BTS)
 - maintains the security of our nation's borders and transportation systems;
 - enforces the nation's immigration laws; and
 - manages and coordinates port-of-entry activities and the protection of government buildings.

⁴P.L. 107-296

Background (cont'd)

- The Emergency Preparedness and Response Directorate (EPR)
 - helps the nation prepare for catastrophes and
 - coordinates with first responders and oversees the federal government's national response and recovery strategy.
- The Information Analysis and Infrastructure Protection Directorate (IAIP)
 - identifies and assesses threats to the homeland;
 - maps those threats against vulnerabilities;
 - issues warnings; and
 - recommends measures to protect the key resources and critical infrastructure of the United States.

Background (cont'd)

- The Science and Technology Directorate (S&T)
 - coordinates DHS's efforts in research and development.
- The Management Division administers
 - DHS's budget,
 - financial management systems,
 - procurement activities,
 - human resources functions,
 - information technology systems,
 - facilities management, and
 - performance measurement efforts.

Status of Key Recommendations

As of June 28, 2004, DHS

- has implemented 40 of the 104 key recommendations and
- is working to address another 63 recommendations.
- Additionally, GAO closed 1 key recommendation although action taken by one of DHS's legacy agencies (U.S. Customs Service) did not fully address the intent of the recommendation prior to closure.

Status of Key Recommendations (cont'd)

Table 1: Status of Key GAO Recommendations Issued before and after DHS Began Operations

Description	Issued before March 1, 2003	Issued after March 1, 2003	Totals
Number of key recommendations that have been implemented	20	20	40
Number of key recommendations that are closed, but not fully implemented	1	0	1
Number of key recommendations that DHS is currently working to address	17	46	63
Totals	38	66	104

Source: GAO analysis of key recommendations from GAO reports and DHS documents.

Status of Key Recommendations (cont'd)

Table 2: Status of Key GAO Recommendations by DHS Directorate/Division

DHS directorate or division	Number of recommendations that have been implemented	Number of recommendations that DHS is working to address	Totals ⁵
BTS	27	33	60
EPR	3	3	6
IAIP	0	12	12
S&T	9	10	19
Management	1	5	6
Totals	40	63	103

Source: GAO analysis of key recommendations from GAO reports and DHS documents.

⁵GAO closed one recommendation in August 2001, although action taken by one of DHS's legacy agencies did not fully address the intent of the recommendation. This closed recommendation is not reflected in this slide.

Status of Key Recommendations (cont'd)

Table 3: Examples of Results Generated from Implementation of Key GAO Recommendations

DHS directorate or division	Number of recommendations that have been implemented	Results generated from implementation
BTS	27	Vulnerabilities and inefficiencies in the land border ports of entry inspection process were reduced. Information available for decision-making related to alien smuggling and the legal status of immigrants became more timely and accurate.
EPR	3	Emergency response efforts and related planning efforts were improved through lessons learned as the result of national-level field exercises.
S&T	9	Unauthorized access to pathogens has been reduced and security over the facility that houses these pathogens has been strengthened.
Management	1	Planned investment and acquisition controls for DHS's entry-exit system improved through incorporation of recognized best practices and other federal requirements.

Source: GAO analysis of key recommendations from GAO reports and DHS documents.

Status of Key Recommendations (cont'd)

Table 4: Examples of Potential Impacts Resulting from Key GAO Recommendations not yet Implemented

DHS directorate or division	Number of recommendations outstanding	Potential impact
BTS	33	The nation's current security vulnerabilities in areas such as passenger screening, border security, and ports of entry should be reduced. Controls over the prompt identification of the location of aliens should be strengthened.
EPR	3	The federal government would be better positioned to continue to provide essential services in the event of a disaster.
IAIP	12	Critical infrastructure protection activities would be better prioritized and coordinated among federal, state, local, and private sector entities and current security vulnerabilities at chemical facilities would be reduced.
S&T	10	Unauthorized access to pathogens would be further restricted, and security over the facility that houses these pathogens could be significantly strengthened.
Management	5	Information sharing activities among federal, state, local, and private sector entities would be improved.

Source: GAO analysis of key recommendations from GAO reports.

Timeframes for Implementing Key Recommendations

- DHS provided GAO with documents and other information on actions taken or planned by DHS or its legacy agencies to implement 55 of the 63 key recommendations not yet fully implemented.⁶
- This information reflects timeframes indicating planned implementation of actions related to 38 key recommendations.
- DHS did not provide timeframes for 6 of the 63 key recommendations because it maintains that it has taken action to fully implement these recommendations.

⁶In commenting on GAO reports that contained the other 8 recommendations, DHS generally indicated concurrence with the recommendations.

Enclosure II: List of Key GAO Recommendations to DHS That Have Been Fully Implemented

Report title	Key recommendation ^a	Report number and date of issuance
Directorate of Border and Transportation Security^b		
<i>Homeland Security: Risks Facing Key Border and Transportation Security Program Need to Be Addressed</i>	To address the U.S. Visitor and Immigrant Status Indicator Technology (US-VISIT) as a governmentwide program and to minimize the risks facing the program, the Secretary of Homeland Security, in collaboration with cabinet officials from US-VISIT stakeholder departments and agencies, should establish and charter an executive body, chaired by the Secretary's designee, potentially co-chaired by the leadership from key stakeholder departments and agencies, and composed of appropriate senior-level representatives from DHS and each stakeholder organization, to guide and direct the US-VISIT program.	GAO-03-1083 (September 19, 2003)
<i>Homeland Security: Limited Progress in Deploying Radiation Detection Equipment at U.S. Ports of Entry</i>	In order to ensure that the Bureau of Customs and Border Protection (BCBP) deploys radiation detection equipment as efficiently and quickly as possible, the Commissioner of Customs should complete BCBP's plan for deploying radiation detection equipment at U.S. ports of entry, including total costs and schedules for all categories of entry points.	GAO-03-963 LOU (September 4, 2003)
<i>Land Border Ports of Entry: Vulnerabilities and Inefficiencies in the Inspections Process</i>	In relation to land border ports of entry, the Commissioner of BCBP should review existing security arrangements and controls over persons referred for secondary inspections at all ports of entry and take steps to address any identified weaknesses.	GAO-03-782NI (July 11, 2003)
<i>Land Border Ports of Entry: Vulnerabilities and Inefficiencies in the Inspections Process</i>	In relation to land border ports of entry, the Commissioner of BCBP should develop and implement a field-training program that provides on-the-job training to new inspectors before they independently conduct inspections, and continuing training to all inspectors to sharpen their skills.	GAO-03-782NI (July 11, 2003)
<i>Land Border Ports of Entry: Vulnerabilities and Inefficiencies in the Inspections Process</i>	In relation to land border ports of entry, the Commissioner of BCBP should establish a standard list of essential equipment for all inspectors stationed at land border ports and ensure such equipment is provided.	GAO-03-782NI (July 11, 2003)
<i>Land Border Ports of Entry: Vulnerabilities and Inefficiencies in the Inspections Process</i>	BCBP should provide all border inspectors with continuing training on the detection of fraudulent documents and establish controls to ensure that such training is received at appropriate intervals.	GAO-03-782NI (July 11, 2003)
<i>Foreign Military Sales: Actions Needed to Provide Better Controls over Exported Defense Articles</i>	To strengthen the BCBP's role in controlling the export of Foreign Military Sales (FMS) shipments, the Secretary of Homeland Security should revise guidelines on seizure authority over FMS exports to clearly establish Customs inspectors' authority to seize FMS articles when exports violate laws or regulations.	GAO-03-599 (June 5, 2003)

**Enclosure II: List of Key GAO
Recommendations to DHS That Have Been
Fully Implemented**

Report title	Key recommendation ^a	Report number and date of issuance
<i>Foreign Military Sales: Actions Needed to Provide Better Controls over Exported Defense Articles</i>	To strengthen BCBP's role in controlling the export of FMS shipments, the Secretary of Homeland Security should establish guidelines for the proper recording and subtracting of FMS shipments against the appropriate export value, as defined by the interagency work group mentioned previously.	GAO-03-599 (June 5, 2003)
<i>Foreign Military Sales: Actions Needed to Provide Better Controls over Exported Defense Articles</i>	To strengthen BCBP's role in controlling the export of FMS shipments, the Secretary of Homeland Security should ensure each shipment matches the information provided in FMS's shipping document noted in the previous recommendation.	GAO-03-599 (June 5, 2003)
<i>Rail Safety and Security: Some Actions Already Taken to Enhance Rail Security, but Risk-based Plan Needed</i>	To help meet the requirement to secure all modes of transportation under the Aviation and Transportation Security Act, the Secretary of Homeland Security should work jointly with the Secretary of Transportation to develop a risk-based plan that specifically addresses the security of the nation's rail infrastructure. This plan should build upon the railroad industry's experience with rail infrastructure and the transportation of hazardous materials and establish time frames for implementing specific security actions necessary to protect hazardous material rail shipments. Among the areas that should be addressed in developing this plan are (1) the appropriate roles of the private sector and federal, state, and local governments; (2) minimum security standards for hazardous materials stored in transit in rail cars; and (3) the appropriate level of disclosure to local communities of the types and quantities of hazardous materials passing through or stored in transit in these communities.	GAO-03-435 (April 30, 2003)
<i>Customs Service Modernization: Automated Commercial Environment Progressing, but Further Acquisition Management Improvements Needed</i>	The Commissioner of the Customs Service should direct the Chief Information Officer (CIO) to immediately develop and implement each of the missing Software Engineering Institute Software Acquisition Capability Maturity Model practices for the key process areas discussed in this report and, until this is accomplished, report to its appropriations subcommittees quarterly on the progress of its efforts to do so.	GAO-03-406 (February 28, 2003)
<i>Aviation Security: Vulnerabilities and Potential Improvements for the Air Cargo System</i>	The Under Secretary of Transportation for Security should develop a comprehensive plan for air cargo security that includes priority actions identified on the basis of risk, costs of these actions, deadlines for completing those actions, and performance targets.	GAO-03-344 (December 20, 2002)

**Enclosure II: List of Key GAO
Recommendations to DHS That Have Been
Fully Implemented**

Report title	Key recommendation ^a	Report number and date of issuance
<i>Customs Service Modernization: Management Improvements Needed on High-Risk Automated Commercial Environment Project</i>	To improve Customs' Automated Commercial Environment (ACE) modernization management, the Customs Service Commissioner should direct the chief information officer, as the designated modernization executive, to develop and implement process controls for the Software Engineering Institute's Software Acquisition Capability Maturity Model level 2 key process areas and the level 3 acquisition risk management key process area.	GAO-02-545 (May 13, 2002)
<i>Customs Service Modernization: Management Improvements Needed on High-Risk Automated Commercial Environment Project</i>	To improve Customs' ACE modernization management, the Customs Service Commissioner should direct the chief information officer, as the designated modernization executive, to certify to Customs' House and Senate appropriations subcommittees, before building each ACE release (i.e., beginning detailed design and development), that the enterprise architecture has been sufficiently extended to provide the requisite enterprise design content and has been updated to ensure consistency and integration across business areas.	GAO-02-545 (May 13, 2002)
<i>Defense Trade: Lessons to Be Learned from the Country Export Exemption</i>	To strengthen enforcement activities, the Commissioner of the U.S. Customs Service should update, finalize, and disseminate its guidance on defense export inspection requirements to all inspectors.	GAO-02-63 (March 29, 2002)
<i>Defense Trade: Lessons to Be Learned from the Country Export Exemption</i>	To strengthen enforcement activities, the Commissioner of the U.S. Customs Service should assess the threat of illegal defense exports at all ports along the northern border and evaluate whether reallocation of its inspectors, additional training, or other actions are warranted to augment the capability of inspectors to enforce export regulations.	GAO-02-63 (March 29, 2002)
<i>Information Technology Management: Coast Guard Practices Can Be Improved</i>	In order to improve the Coast Guard's Information Technology management practices, the Secretary of Transportation should direct the Coast Guard Commandant to ensure that the appropriate officials implement appropriate corrective actions on the network security weaknesses that GAO identified.	GAO-01-190 (December 12, 2000)
<i>Alien Smuggling: Management and Operational Improvements Needed to Address</i>	The Commissioner of the Immigration and Naturalization Service (INS) should establish criteria for opening an anti-smuggling case to help ensure that INS' s anti-smuggling resources are focused on the highest-priority cases.	GGD-00-103 (May 1, 2000)

**Enclosure II: List of Key GAO
Recommendations to DHS That Have Been
Fully Implemented**

Report title	Key recommendation ^a	Report number and date of issuance
<i>Alien Smuggling: Management and Operational Improvements Needed to Address Growing Problem</i>	The Commissioner of INS should establish a cost-effective case tracking and management system of alien smuggling investigations that is automated, agencywide, and readily available to investigative personnel and program managers to facilitate the sharing of case information and prevent duplication of effort.	GGD-00-103 (May 1, 2000)
<i>Alien Smuggling: Management and Operational Improvements Needed to Address Growing Problem</i>	The Commissioner of INS should require that intelligence reports be prepared using a database format so the information can be systematically analyzed.	GGD-00-103 (May 1, 2000)
<i>Drug Control: INS and Customs Can Do More To Prevent Drug-Related Employee Corruption</i>	The Attorney General should require the Commissioner of INS to comply with policies that require employment reinvestigations to be completed when they are due.	GGD-99-31 (March 30, 1999)
<i>Drug Control: INS and Customs Can Do More To Prevent Drug-Related Employee Corruption</i>	The Attorney General should direct the Commissioner of INS to strengthen internal controls at Southwest Border ports of entry and at Border Patrol checkpoints by establishing: (1) one or more methods to deprive drivers of their choice of inspection lanes at ports of entry; (2) a policy for the inspection of law enforcement officers or their vehicles at ports of entry and Border Patrol checkpoints; and (3) a recusal policy concerning the performance of inspections by immigration inspectors and Border Patrol agents where their objectivity may be in question.	GGD-99-31 (March 30, 1999)
<i>Drug Control: INS and Customs Can Do More to Prevent Drug-Related Employee Corruption</i>	The Secretary of the Treasury should direct the Commissioner of Customs to strengthen internal controls at Southwest Border ports of entry by establishing: (1) one or more methods to deprive drivers of their choice of inspection lanes; (2) a policy for inspection of law enforcement officers and their vehicles; and (3) a recusal policy concerning the performance of inspections by Customs inspectors where their objectivity may be in question.	GGD-99-31 (March 30, 1999)
<i>Immigration Statistics: Information Gaps, Quality Issues Limit Utility of Federal Data to Policymakers</i>	To reduce the uncertainty associated with statistical estimates of relevant demographic concepts other than immigration flow, fill information gaps for specific legal statuses, and address fragmented reporting, the Commissioner of INS and the Director of the Bureau of the Census should together further develop, test, and evaluate the three-card method that GAO devised for surveying foreign-born about their legal status.	GGD-98-164 (July 31, 1998)
<i>INS Management: Follow-up on Selected Problems</i>	To help achieve the reorganization goals, the INS Commissioner should determine whether staffing levels need to be adjusted for programs, field operations, and regional offices to accomplish their prescribed roles and responsibilities consistent with the respective mission and workloads for each office.	GGD-97-132 (July 22, 1997)

**Enclosure II: List of Key GAO
Recommendations to DHS That Have Been
Fully Implemented**

Report title	Key recommendation ^a	Report number and date of issuance
<i>Criminal Aliens: INS' Efforts To Identify and Remove Imprisoned Aliens Need To Be Improved</i>	The INS Commissioner should identify the causes of immigration agent attrition and take steps to ensure that staffing is adequate to achieve the Institutional Hearing Program's goals.	T-GGD-97-154 (July 15, 1997)
<i>Criminal Aliens: INS' Efforts To Identify and Remove Imprisoned Aliens Need To Be Improved</i>	The INS Commissioner should (1) develop a workload analysis model to identify the IHP resources needed in any period to achieve overall program goals and the portion of those goals that would be achievable with alternative levels of resources and (2) use the model to support its IHP funding and staffing requests. Such a model should consider several factors, including the number of foreign-born inmates, number of prisons that must be visited, number and types of IHP staff, length of time to process cases, and travel time and costs.	T-GGD-97-154 (July 15, 1997)
Directorate of Emergency Preparedness and Response^b		
<i>Fire Safety: Comprehensive Information on Fire Incidences in Federal Facilities Is Lacking</i>	The Administrator, U.S. Fire Administration, in conjunction with the Consumer Product Safety Commission, the General Services Administration, Occupational Safety and Health Administration, and other federal agencies identified as being relevant, should examine whether the systematic collection and analysis of data on fires in federal workspace is warranted. If they determine that data collection and analysis are warranted, data that should be considered for collection and analysis include: the number of fires in federal workspace; property damage, injuries, and deaths resulting from such fires; and the causes of these fires, including any products involved, if determined. In addition, the agencies should discuss, among other topics deemed relevant, the availability of resources for implementing any data collection system and any needed authority to facilitate federal agencies' cooperation in this effort.	GAO-01-879 (August 20, 2001)
<i>Combating Terrorism: Federal Response Teams Provide Varied Capabilities; Opportunities Remain to Improve Coordination</i>	To provide a sound analytical basis for developing appropriate federal consequence management responses, the Director of the Federal Emergency Management Agency (FEMA) should take steps to require that the Weapons of Mass Destruction Interagency Steering Group develop realistic scenarios involving chemical, biological, radiological, and nuclear agents and weapons with experts in the scientific and intelligence communities.	GAO-01-14 (November 30, 2000)
<i>Combating Terrorism: Federal Response Teams Provide Varied Capabilities; Opportunities Remain to Improve Coordination</i>	To build upon the experience and lessons learned by the federal response teams from the May 2000 exercise, the FEMA Director should sponsor periodic national-level consequence management field exercises involving federal, state, and local governments. Such exercises should be conducted together with national-level crisis management field exercises.	GAO-01-14 (November 30, 2000)

Recommendations to DHS That Have Been
Fully Implemented**

Report title	Key recommendation ^a	Report number and date of issuance
Directorate of Science and Technology^b		
<i>Combating Bioterrorism: Actions Needed to Improve Security at Plum Island Animal Disease Center</i>	To complete and enhance Plum Island's security arrangements, the Secretary of Homeland Security should, in consultation with the Secretary of Agriculture, correct physical security deficiencies by better securing the foot-and-mouth disease vaccine bank.	GAO-03-847 (September 19, 2003)
<i>Combating Bioterrorism: Actions Needed to Improve Security at Plum Island Animal Disease Center</i>	To complete and enhance Plum Island's security arrangements, the Secretary of Homeland Security should, in consultation with the Secretary of Agriculture, correct physical security deficiencies by better securing certain features of the physical infrastructure that supports the continued operation of the Plum Island Animal Disease Center.	GAO-03-847 (September 19, 2003)
<i>Combating Bioterrorism: Actions Needed to Improve Security at Plum Island Animal Disease Center</i>	To complete and enhance Plum Island's security arrangements, the Secretary of Homeland Security should, in consultation with the Secretary of Agriculture, reconsider the security risks at Plum Island, taking into account recent acts of disgruntled employees.	GAO-03-847 (September 19, 2003)
<i>Combating Bioterrorism: Actions Needed to Improve Security at Plum Island Animal Disease Center</i>	To complete and enhance Plum Island's security arrangements, the Secretary of Homeland Security should, in consultation with the Secretary of Agriculture, enhance incident response capability by increasing the size of the guard force.	GAO-03-847 (September 19, 2003)
<i>Combating Bioterrorism: Actions Needed to Improve Security at Plum Island Animal Disease Center</i>	To complete and enhance Plum Island's security arrangements, the Secretary of Homeland Security should, in consultation with the Secretary of Agriculture, limit access to pathogens by further developing and enforcing specific procedures, including internal control checks, to ensure that background checks of these individuals are updated regularly.	GAO-03-847 (September 19, 2003)
<i>Combating Bioterrorism: Actions Needed to Improve Security at Plum Island Animal Disease Center</i>	To complete and enhance Plum Island's security arrangements, the Secretary of Homeland Security should, in consultation with the Secretary of Agriculture, limit access to pathogens by further developing and enforcing specific procedures, including internal control checks, to ensure that cleaning, maintenance, and repair staff entering the biocontainment area are escorted at all times by individuals with completed background checks.	GAO-03-847 (September 19, 2003)
<i>Combating Bioterrorism: Actions Needed to Improve Security at Plum Island Animal Disease Center</i>	To complete and enhance Plum Island's security arrangements, the Secretary of Homeland Security should, in consultation with the Secretary of Agriculture, enhance incident response capability by developing and implementing a policy on how guards should deal with intruders and use weapons.	GAO-03-847 (September 19, 2003)

**Enclosure II: List of Key GAO
Recommendations to DHS That Have Been
Fully Implemented**

Report title	Key recommendation^a	Report number and date of issuance
<i>Combating Bioterrorism: Actions Needed to Improve Security at Plum Island Animal Disease Center</i>	To complete and enhance Plum Island's security arrangements, the Secretary of Homeland Security should, in consultation with the Secretary of Agriculture, correct physical security deficiencies by fully implementing the physical security measures.	GAO-03-847 (September 19, 2003)
<i>Combating Bioterrorism: Actions Needed to Improve Security at Plum Island Animal Disease Center</i>	To complete and enhance Plum Island's security arrangements, the Secretary of Homeland Security should, in consultation with the Secretary of Agriculture, consult with other laboratories to identify ways to mitigate the inherent difficulty of securing pathogens.	GAO-03-847 (September 19, 2003)
Management Division^b		
<i>Information Technology: Homeland Security Needs to Improve Entry Exit System Expenditure Planning</i>	To help ensure the effective management and acquisition of the entry exit system, the Secretary of Homeland Security should, through whatever entry exit program governance structure is established, direct the entry exit program manager to ensure that planned investment and acquisition management controls, including the development of a business case, are fully implemented in accordance with recognized best practices and relevant federal requirements and guidance.	GAO-03-563 (June 9, 2003)

^aKey GAO recommendations reflect actions that must be taken either to aid in securing the nation's homeland or to swiftly and appropriately respond to future terrorist attacks.

^bGAO reports issued prior to March 1, 2003, were directed to legacy agencies that are now part of this directorate.

Enclosure III: Key Recommendations DHS Is Currently Addressing

Report title	Key Recommendation ^a	Report number and date of issuance	Timeframes reported by DHS	Challenges reported by DHS
Directorate of Border and Transportation Security^b				
<i>Aviation Security: Computer-Assisted Passenger Prescreening System Faces Significant Implementation Challenges</i>	To address the challenges associated with the development, implementation, and operation of the Computer-Assisted Passenger Prescreening System II (CAPPS II), the Secretary of Homeland Security should instruct the Administrator of the Transportation Security Administration (TSA) to develop policies and procedures outlining the CAPPS II passenger redress process that include defining the appeal rights of passengers and their ability to access and correct personal data.	GAO-04-385 (February 12, 2004)	None provided	None provided
<i>Aviation Security: Computer-Assisted Passenger Prescreening System Faces Significant Implementation Challenges</i>	To address the challenges associated with the development, implementation, and operation of CAPPS II, the Secretary of Homeland Security should instruct the Administrator of TSA to develop policies and procedures detailing CAPPS II oversight mechanisms, including offices responsible for providing oversight, and reporting requirements for oversight information.	GAO-04-385 (February 12, 2004)	None provided	None provided

**Enclosure III: Key Recommendations DHS Is
Currently Addressing**

Report title	Key Recommendation ^a	Report number and date of issuance	Timeframes reported by DHS	Challenges reported by DHS
<i>Aviation Security: Computer-Assisted Passenger Prescreening System Faces Significant Implementation Challenges</i>	To address the challenges associated with the development, implementation, and operation of CAPPS II, the Secretary of Homeland Security should instruct the Administrator of TSA to develop results-oriented performance goals and measures to evaluate the program's effectiveness, including measures to assess performance of the system in generating reliable risk scores.	GAO-04-385 (February 12, 2004)	None provided	None provided
<i>Aviation Security: Computer-Assisted Passenger Prescreening System Faces Significant Implementation Challenges</i>	To address the challenges associated with the development, implementation, and operation of CAPPS II, the Secretary of Homeland Security should instruct the Administrator of TSA to develop a strategy for mitigating the high risk associated with system and database testing that ensures (1) accuracy testing of commercial and government databases is conducted prior to the database being used and (2) appropriate stress testing is conducted to demonstrate the system can meet peak load requirements.	GAO-04-385 (February 12, 2004)	None provided	None provided

**Enclosure III: Key Recommendations DHS Is
Currently Addressing**

Report title	Key Recommendation^a	Report number and date of issuance	Timeframes reported by DHS	Challenges reported by DHS
<i>Aviation Security: Computer-Assisted Passenger Prescreening System Faces Significant Implementation Challenges</i>	To address the challenges associated with the development, implementation, and operation of CAPPS II, the Secretary of Homeland Security should instruct the Administrator of TSA to develop a schedule for critical security activities, including finalizing the security policy, the security risk assessment, and system certification and accreditation.	GAO-04-385 (February 12, 2004)	None provided	None provided
<i>Aviation Security: Computer-Assisted Passenger Prescreening System Faces Significant Implementation Challenges</i>	To address the challenges associated with the development, implementation, and operation of CAPPS II, the Secretary of Homeland Security should instruct the Administrator of TSA to use established plans to track development progress to ensure that promised functionality is being delivered on time and within established cost estimates.	GAO-04-385 (February 12, 2004)	None provided	None provided
<i>Aviation Security: Computer-Assisted Passenger Prescreening System Faces Significant Implementation Challenges</i>	To address the challenges associated with the development, implementation, and operation of CAPPS II, the Secretary of Homeland Security should instruct the Administrator of TSA to develop plans identifying the specific functionality that will be delivered during each increment of CAPPS II, the specific milestones for delivering this functionality, and expected costs for each increment.	GAO-04-385 (February 12, 2004)	None provided	None provided

**Enclosure III: Key Recommendations DHS Is
Currently Addressing**

Report title	Key Recommendation^a	Report number and date of issuance	Timeframes reported by DHS	Challenges reported by DHS
<i>Homeland Security: Risks Facing Key Border and Transportation Security Program Need to Be Addressed</i>	To address the U.S. Visitor and Immigrant Status Indicator Technology (US-VISIT) Program as a governmentwide program and to minimize the risks facing the program, the Secretary of Homeland Security, in collaboration with cabinet officials from US-VISIT stakeholder departments and agencies, should direct this executive body ^c to immediately take steps to (1) ensure that the human capital and financial resources are expeditiously provided to establish a fully functional and effective US-VISIT program office and associated management capability, (2) clarify the operational context within which US-VISIT must operate, and (3) decide whether proposed US-VISIT increments will produce mission value commensurate with costs and risks and disclose to the Congress planned actions based on this body's decisions.	GAO-03-1083 (September 19, 2003)	DHS notes that 4 months after GAO issued this recommendation, the US-VISIT Federal Stakeholders Advisory Board was chartered to provide oversight and strategic direction and to ensure that program plans, policies, funding, and business goals are aligned and moving forward for the US-VISIT program.	None provided
<i>Homeland Security: Risks Facing Key Border and Transportation Security Program Need to Be Addressed</i>	Further, the Secretary of Homeland Security, through the Under Secretary for Border and Transportation Security, should direct the US-VISIT Program Director to expeditiously establish an effective program management capability, including immediately developing an analysis of incremental program costs, benefits, and risks, and providing this analysis to the executive body, to assist it in the body's deliberations and decision making.	GAO-03-1083 (September 19, 2003)	DHS notes that the cost, schedule, performance, and risks documents were completed and presented on November 25, 2003, to the DHS Investment Review Board. Approval via the Management Decision Memorandum was received in February 2004.	None provided

**Enclosure III: Key Recommendations DHS Is
Currently Addressing**

Report title	Key Recommendation^a	Report number and date of issuance	Timeframes reported by DHS	Challenges reported by DHS
<i>Homeland Security: Risks Facing Key Border and Transportation Security Program Need to Be Addressed</i>	Further, the Secretary of Homeland Security, through the Under Secretary for Border and Transportation Security, should direct the US-VISIT Program Director to expeditiously establish an effective program management capability, including immediately defining program office positional roles, responsibilities, and relationships.	GAO-03-1083 (September 19, 2003)	None provided	None provided
<i>Homeland Security: Risks Facing Key Border and Transportation Security Program Need to Be Addressed</i>	Further, the Secretary of Homeland Security, through the Under Secretary for Border and Transportation Security, should direct the US-VISIT Program Director to expeditiously establish an effective program management capability, including immediately developing and implementing a human capital strategy that provides for staffing these positions with individuals who have the requisite core competencies (knowledge, skills, and abilities).	GAO-03-1083 (September 19, 2003)	DHS believes that the agency will complete its human capital strategy by December 31, 2004. In the interim, DHS has engaged the Office of Personnel Management to assist in performing aspects of personnel management, such as drafting position descriptions and performance plans, which will contribute to the development of the agency's human capital strategy.	None provided

**Enclosure III: Key Recommendations DHS Is
Currently Addressing**

Report title	Key Recommendation ^a	Report number and date of issuance	Timeframes reported by DHS	Challenges reported by DHS
<i>Homeland Security: Risks Facing Key Border and Transportation Security Program Need to Be Addressed</i>	Further, the Secretary of Homeland Security, through the Under Secretary for Border and Transportation Security, should direct the US-VISIT Program Director to expeditiously establish an effective program management capability, including immediately developing and implementing a plan for satisfying key Software Engineering Institute acquisition management controls, to include acquisition planning, solicitation, requirements development and management, project management, contractor tracking and oversight, evaluation, and transition to support.	GAO-03-1083 (September 19, 2003)	DHS believes that it will take more than 2 years after a dedicated leader is brought on board to the US-VISIT office to achieve key Software Engineering Institute acquisition management controls. A firm goal and timeline will be set after that person is hired. However, the agency has not specified a timeline for bringing that person on board.	None provided
<i>Homeland Security: Risks Facing Key Border and Transportation Security Program Need to Be Addressed</i>	Further, the Secretary of Homeland Security, through the Under Secretary for Border and Transportation Security, should direct the US-VISIT Program Director to expeditiously establish an effective program management capability, including immediately developing and implementing a risk management plan and ensuring that all high risks and their status are reported regularly to the executive body.	GAO-03-1083 (September 19, 2003)	DHS notes that an executive Risk Review Board is currently being chartered and is projected to be in place by September 30, 2004.	None provided

**Enclosure III: Key Recommendations DHS Is
Currently Addressing**

Report title	Key Recommendation ^a	Report number and date of issuance	Timeframes reported by DHS	Challenges reported by DHS
<i>Homeland Security: Risks Facing Key Border and Transportation Security Program Need to Be Addressed</i>	Further, the Secretary of Homeland Security, through the Under Secretary for Border and Transportation Security, should direct the US-VISIT Program Director to expeditiously establish an effective program management capability, including immediately defining performance standards for each US-VISIT system increment that are measurable and reflect the limitations imposed by relying on existing systems for these system increments.	GAO-03-1083 (September 19, 2003)	DHS notes that US-VISIT has initiated a process to define performance standards that meet the criteria specified. US-VISIT is also defining performance measures for both internal managerial and external reporting purposes. DHS anticipates reportable criteria by September 30, 2004.	None provided

**Enclosure III: Key Recommendations DHS Is
Currently Addressing**

Report title	Key Recommendation ^a	Report number and date of issuance	Timeframes reported by DHS	Challenges reported by DHS
<i>Homeland Security: Limited Progress in Deploying Radiation Detection Equipment at U.S. Ports of Entry</i>	To apply lessons learned from its initial deployments of portal monitors and other radiation detection equipment and ensure their effective application, the Bureau of Customs and Border Protection (BCBP) should consider deploying sufficient isotope identifiers to each port of entry so that inspectors can immediately respond to alarms without having to retrieve equipment from another location.	GAO-03-963 LOU (September 4, 2003)	DHS notes that it plans to fully implement this recommendation by December 30, 2004.	In implementing this recommendation, DHS notes that it is facing funding and deployment support challenges. For example, due to funding constraints, there are times when an isotope identifier must be retrieved from one location to be used at another location. Additionally, DHS reports that logistical issues associated with deploying equipment must be addressed. Such issues include ensuring equipment is distributed to proper personnel and that adequate training is in place and provided to those who require it.
<i>Homeland Security: Limited Progress in Deploying Radiation Detection Equipment at U.S. Ports of Entry</i>	To apply lessons learned from its initial deployments of portal monitors and other radiation detection equipment and ensure their effective application, BCBP should consider, establish, and implement minimum training requirements so that all inspectors have a clear understanding of the capabilities and limitations of the radiation detection equipment.	GAO-03-963 LOU (September 4, 2003)	DHS believes that it has fully implemented this recommendation and provided GAO with documentation to support this position on June 24, 2004. GAO is currently evaluating this documentation.	None provided

**Enclosure III: Key Recommendations DHS Is
Currently Addressing**

Report title	Key Recommendation ^a	Report number and date of issuance	Timeframes reported by DHS	Challenges reported by DHS
<i>Homeland Security: Limited Progress in Deploying Radiation Detection Equipment at U.S. Ports of Entry</i>	To apply lessons learned from its initial deployments of portal monitors and other radiation detection equipment and ensure their effective application, BCBP should consider, as it proceeds to deploy radiation detection equipment to air cargo facilities, analyze opportunities at airports to deploy portal monitors to cover multiple international mail, package, and air cargo facilities so that fewer portal monitor locations are needed to cover a greater proportion of goods entering the United States.	GAO-03-963 LOU (September 4, 2003)	DHS plans to complete implementation of this recommendation by December 30, 2004.	According to a DHS official, implementation of this recommendation is a multistaged process, requiring continuing analysis to develop lessons learned as DHS moves through each stage. The official also noted that the long-term nature of the deployment process is a challenge for DHS. For instance, there are a large number of ports involved for which large-scale equipment must be disbursed appropriately.
<i>Homeland Security: Limited Progress in Deploying Radiation Detection Equipment at U.S. Ports of Entry</i>	To apply lessons learned from its initial deployments of portal monitors and other radiation detection equipment and ensure their effective application, BCBP should consider, for the final three categories of deployment, continuing to proactively engage local government and private entities that must be consulted before deploying portal monitors early in the deployment process in order to minimize delays resulting from protracted negotiations.	GAO-03-963 LOU (September 4, 2003)	DHS believes that it has fully implemented this recommendation and provided GAO with documentation to support this position on June 24, 2004. GAO is currently evaluating this documentation.	None provided

**Enclosure III: Key Recommendations DHS Is
Currently Addressing**

Report title	Key Recommendation ^a	Report number and date of issuance	Timeframes reported by DHS	Challenges reported by DHS
<i>Homeland Security: Limited Progress in Deploying Radiation Detection Equipment at U.S. Ports of Entry</i>	To obtain the assistance of other federal agencies and national laboratories that could help, in the long term, to overcome technical and deployment issues in adapting radiation detection equipment to the border environment, the Secretary of Homeland Security should establish a working group composed of agencies and entities involved in the research and deployment of radiation detection equipment. This working group should include, but not be restricted to, representatives from BCBP, TSA, the DHS Science and Technology Directorate, the Department of Defense (DOD), the Department of Energy (DOE), and DOE's national laboratories. The working group should serve as a forum for exchanging information on testing and performance of radiation detection equipment, the conditions at U.S. ports of entry, the challenges to deploying radiation detection equipment, and ways to overcome those challenges. The working group, meeting as often as needed, should also provide guidance to radiation detection experts for research and development of new radiation detection technologies to ensure that those efforts provide solutions to current challenges.	GAO-03-963 LOU (September 4, 2003)	None provided	None provided

**Enclosure III: Key Recommendations DHS Is
Currently Addressing**

Report title	Key Recommendation ^a	Report number and date of issuance	Timeframes reported by DHS	Challenges reported by DHS
<i>Border Security: New Policies and Procedures Are Needed to Fill Gaps in the Visa Revocation Process</i>	To strengthen the visa revocation process as an antiterrorism tool, the Secretary of Homeland Security should, in conjunction with the Secretary of State and the Attorney General, develop specific policies and procedures for the interagency visa revocation process to ensure that notification of visa revocations for suspected terrorists and relevant supporting information is transmitted from State to immigration and law enforcement agencies, and their respective inspection and investigation units, in a timely manner.	GAO-03-798 (June 18, 2003)	GAO is currently reviewing the status of this recommendation in relation to a request by the Subcommittee on National Security, Emerging Threats, and Intergovernmental Relations, House Committee on Government Reform and plans to report on its status by July 6, 2004.	DHS notes that it is challenged in implementing this recommendation because it involves extensive interagency coordination with both the Department of State as well as the Department of Justice.
<i>Border Security: New Policies and Procedures Are Needed to Fill Gaps in the Visa Revocation Process</i>	To strengthen the visa revocation process as an antiterrorism tool, the Secretary of Homeland Security should, in conjunction with the Secretary of State and the Attorney General, develop a specific policy on actions that immigration and law enforcement agencies should take to investigate and locate individuals whose visas have been revoked for terrorism concerns and who remain in the United States after revocation.	GAO-03-798 (June 18, 2003)	GAO is currently reviewing the status of this recommendation in relation to a request by the Subcommittee on National Security, Emerging Threats, and Intergovernmental Relations, House Committee on Government Reform and plans to report on its status by July 6, 2004.	DHS notes that it is challenged in implementing this recommendation because it involves extensive interagency coordination with both the Department of State as well as the Department of Justice. Additionally, once the policy is developed, funding issues could be a concern for DHS and other law enforcement agencies responsible for implementing the policy.

**Enclosure III: Key Recommendations DHS Is
Currently Addressing**

Report title	Key Recommendation ^a	Report number and date of issuance	Timeframes reported by DHS	Challenges reported by DHS
<i>Border Security: New Policies and Procedures Are Needed to Fill Gaps in the Visa Revocation Process</i>	To strengthen the visa revocation process as an antiterrorism tool, the Secretary of Homeland Security should, in conjunction with the Secretary of State and the Attorney General, determine if persons with visas revoked on terrorism grounds are in the United States and, if so, whether they pose a security threat.	GAO-03-798 (June 18, 2003)	GAO is currently reviewing the status of this recommendation in relation to a request by the Subcommittee on National Security, Emerging Threats, and Intergovernmental Relations, House Committee on Government Reform and plans to report on its status by July 6, 2004.	DHS notes that it is challenged in implementing this recommendation because it involves extensive interagency coordination with both the Department of State as well as the Department of Justice.
<i>Land Border Ports of Entry: Vulnerabilities and Inefficiencies in the Inspections Process</i>	In relation to land border ports of entry, the Commissioner of BCBP should develop an inspections-related immigration intelligence program for the field, and in doing so, consider (1) defining the roles and responsibilities of intelligence units at headquarters and in the field regarding the collection, analysis, and use of intelligence information; (2) reassessing the need for intelligence officers at each field location; (3) coordinating the integration and sharing of intelligence information among locations; and (4) ensuring that inspectors have the time and opportunity to access and review intelligence information, including via routine briefings and access to NetLEADS.	GAO-03-782NI (July 11, 2003)	DHS plans to complete implementation of this recommendation by December 30, 2004.	DHS reports that it is difficult to assess resource and other field intelligence needs given the significant organizational restructuring resulting from the establishment of Customs and Border Protection and Immigration and Customs Enforcement.

**Enclosure III: Key Recommendations DHS Is
Currently Addressing**

Report title	Key Recommendation ^a	Report number and date of issuance	Timeframes reported by DHS	Challenges reported by DHS
<i>Foreign Military Sales: Actions Needed to Provide Better Controls over Exported Defense Articles</i>	To strengthen BCBP's role in controlling the export of Foreign Military Sales (FMS) shipments, the Secretary of Homeland Security should establish a centralized system to identify where specific FMS agreements are filed to prohibit multiple port filings.	GAO-03-599 (June 5, 2003)	CBP expects to develop and establish an electronic repository for FMS case information that will allow for the transmission of database information on FMS. CBP expects it to become part of the Automated Commercial Environment by September 30, 2007.	DHS notes that ensuring adequate funding and programming resources for actions necessary to implement this recommendation, such as establishing an electronic repository for FMS case information, has been difficult. However, DHS believes the recommendation could be implemented earlier than September 30, 2007, if additional funding is provided sooner.

**Enclosure III: Key Recommendations DHS Is
Currently Addressing**

Report title	Key Recommendation ^a	Report number and date of issuance	Timeframes reported by DHS	Challenges reported by DHS
<i>Customs Service Modernization: Automated Commercial Environment Progressing, but Further Acquisition Management Improvements Needed</i>	The Commissioner of the Customs Service should take steps, as appropriate in light of Customs' merger into the Department of Homeland Security, to have future ACE expenditure plans specifically address any proposals or plans, whether tentative or approved, for extending and using ACE infrastructure to support other homeland security applications, including any impact on ACE of such proposals and plans.	GAO-03-406 (February 28, 2003)	CBP notes that this recommendation is of an ongoing nature and is not conducive to a hard target completion date. For example, on February 14, 2004, CBP initiated a coordinating meeting with the US-VISIT program seeking agreement on avenues for sharing and integration. CBP expects that once these results are formalized, the agency would expect to establish further milestone dates responsive to GAO's recommendation.	DHS reports that large automation projects typically require actions to be taken over a long-term period, thus, it believes implementation of this recommendation will require sustained efforts over the long-term.
<i>Customs Service Modernization: Automated Commercial Environment Progressing, but Further Acquisition Management Improvements Needed</i>	The Commissioner of the Customs Service should direct the Chief Information Officer (CIO) to develop and implement the missing human capital management practices discussed in this report, and until this is accomplished, report to its appropriations committees quarterly on the progress of its efforts to do so.	GAO-03-406 (February 28, 2003)	DHS plans to complete implementation of this recommendation by September 30, 2004.	DHS reports that it is challenged in implementing this recommendation by the technical nature of the project and the significant number of personnel required to support the Customs and Border Protection modernization effort.

**Enclosure III: Key Recommendations DHS Is
Currently Addressing**

Report title	Key Recommendation^a	Report number and date of issuance	Timeframes reported by DHS	Challenges reported by DHS
<i>Customs Service Modernization: Automated Commercial Environment Progressing, but Further Acquisition Management Improvements Needed</i>	The Commissioner of the Customs Service should direct the CIO to establish an independent verification and validation function to assist Customs in overseeing contractor efforts, such as testing.	GAO-03-406 (February 28, 2003)	DHS plans to complete implementation of this recommendation by August 30, 2004.	None provided
<i>Homeland Security: INS Cannot Locate Many Aliens Because It Lacks Reliable Address Information</i>	In order to promote compliance with the change of address notification requirements through publicity and enforcement and to improve the reliability of its alien address data, the Attorney General should direct the INS Commissioner to evaluate alternative approaches and their associated costs for obtaining or assembling complete alien address information, particularly for those aliens who do not comply with the change of address notification requirement.	GAO-03-188 (November 21, 2002)	DHS believes it has implemented this recommendation. Thus, it did not provide any future timeframes for completing this recommendation. GAO has requested that DHS provide it with documentation to demonstrate that DHS has implemented a process for getting complete and updated alien address information into DHS systems.	DHS notes that ensuring adequate funding for actions taken related to this recommendation is a challenge.

**Enclosure III: Key Recommendations DHS Is
Currently Addressing**

Report title	Key Recommendation ^a	Report number and date of issuance	Timeframes reported by DHS	Challenges reported by DHS
<i>Homeland Security: INS Cannot Locate Many Aliens Because It Lacks Reliable Address Information</i>	In order to promote compliance with the change of address notification requirements through publicity and enforcement and to improve the reliability of its alien address data, the Attorney General should direct the INS Commissioner to establish written procedures and controls to ensure that alien address information in all automated databases is complete, consistent, accurate, and current.	GAO-03-188 (November 21, 2002)	DHS believes it has implemented this recommendation. Thus, it did not provide any future timeframes for completing this recommendation. GAO has requested that DHS provide it with documentation to demonstrate that Customs and Immigration Services has developed procedures and controls to ensure that an alien's address information is updated appropriately in all related databases.	DHS notes that ensuring adequate funding for actions taken related to this recommendation is a challenge.
<i>Homeland Security: INS Cannot Locate Many Aliens Because It Lacks Reliable Address Information</i>	In order to promote compliance with the change of address notification requirements through publicity and enforcement and to improve the reliability of its alien address data, the Attorney General should direct the INS Commissioner to identify and implement an effective means to publicize the change of address notification requirement nationwide. As part of its publicity effort, INS should make sure that aliens have information on how to comply with this requirement, including where information may be available and the location of change of address forms.	GAO-03-188 (November 21, 2002)	DHS believes it has implemented this recommendation. Thus, it did not provide any future timeframes for completing this recommendation. GAO is requesting that DHS provide it with documentation to demonstrate that publicity efforts to make aliens aware of the notification requirement have been implemented.	DHS notes that ensuring adequate funding for actions taken related to this recommendation is a challenge.

**Enclosure III: Key Recommendations DHS Is
Currently Addressing**

Report title	Key Recommendation ^a	Report number and date of issuance	Timeframes reported by DHS	Challenges reported by DHS
<i>Customs Service Modernization: Management Improvements Needed on High-Risk Automated Commercial Environment Project</i>	<p>To improve Customs' ACE modernization management, the Customs Service Commissioner should direct the chief information officer, as the designated modernization executive, to immediately develop and implement a Customs Modernization Office (CMO) human capital management strategy that provides both near- and long-term solutions to CMO's human capital capacity limitations, including defining the office's skill and capability needs in terms that will allow Customs to attract qualified individuals and that will provide sufficient rewards and training, linked to performance, to promote their retention.</p>	GAO-02-545 (May 13, 2002)	None provided.	DHS reports that it is challenged in implementing this recommendation by the technical nature of the project and the significant number of personnel required to support the Customs and Border Protection modernization effort.
<i>Alien Smuggling: Management and Operational Improvements Needed to Address Growing Problem</i>	<p>The INS Commissioner should establish performance measures for the anti-smuggling efforts and intelligence program with which to gauge program effects.</p>	GGD-00-103 (May 1, 2000)	None provided.	DHS notes that it is challenged in implementing this recommendation by ensuring that appropriate resources, including funding and personnel, are available.
<i>Criminal Aliens: INS's Efforts to Identify and Remove Imprisoned Aliens Need to Be Improved</i>	<p>The INS Commissioner should establish a nationwide data system containing the universe of foreign-born inmates reported to INS by the Bureau of Prisons and the state departments of corrections and use this system to track the Institutional Hearing Program status of each inmate.</p>	T-GGD-97-154 (July 15, 1997)	None provided.	DHS notes that it is challenged in implementing this recommendation by ensuring that appropriate resources, including funding and personnel, are available.

Directorate of Emergency Preparedness and Response^b				
<i>Continuity of Operations: Improved Planning Needed to Ensure Delivery of Essential Government Services</i>	To ensure that agencies can continue operations in emergencies and are prepared for the governmentwide exercise planned for May 2004, the Secretary of Homeland Security should direct the Under Secretary for Emergency Preparedness and Response to take steps to ensure that agencies that do not have continuity of operations (COOP) plans develop them by May 1, 2004.	GAO-04-160 (February 27, 2004)	On June 24, 2004, DHS provided GAO with a list of actions it has taken and plans to take in relation to this recommendation. For example, DHS noted that as part of an exercise it developed, Forward Challenge 2004, which was held from May 12 through May 15, 2004, participating department and agencies' COOP were successfully activated and tested. DHS also noted that it has developed a COOP manager's course which it plans to pilot from June 29 to July 1, 2004. Additionally, DHS has scheduled 10 additional courses from June 2004 through January 2005. GAO is currently evaluating this information to determine the continued status of this recommendation.	None Provided.

<i>Continuity of Operations: Improved Planning Needed to Ensure Delivery of Essential Government Services</i>	The Secretary should direct the Under Secretary to take steps to improve the oversight of COOP planning by conducting assessments of agency continuity plans that include independent verification of agency-provided information, as well as an assessment of the essential functions identified and their interdependencies with other activities.	GAO-04-160 (February 27, 2004)	DHS reports that its Readiness Reporting System will be used to assist it in assessing agency contingency plans. DHS further notes that it plans to initially deploy this system in fiscal year 2005. Finally, DHS reported that it would conduct an independent validation of each departments' and agency's self-assessment after deployment of the Readiness Reporting System.	None provided

<i>Continuity of Operations: Improved Planning Needed to Ensure Delivery of Essential Government Services</i>	The Secretary should direct the Under Secretary to take steps to improve the oversight of COOP planning by ensuring that agencies correct the deficiencies in individual COOP plans identified here, as well as those identified in previous assessments.	GAO-04-160 (February 27, 2004)	DHS noted that it developed an exercise, Forward Challenge, to assist departments and agencies in improving individual COOP. As a result, DHS is working with those departments and agencies to complete after-action reports and will work with those agencies to improve their COOP capabilities. DHS further reports that the Forward Challenge after-action reports will be completed by September 30, 2004, and will include recommendations for measures to improve COOP capability. DHS also noted that it has developed a COOP manager's course which it plans to pilot from June 29 to July 1, 2004. Additionally, DHS has scheduled 10 additional courses from June 2004 through January 2005.	None provided

Directorate of Information Analysis and Infrastructure Protection^b				
<i>Homeland Security: Voluntary Initiatives Are Under Way at Chemical Facilities, but the Extent of Security Preparedness Is Unknown</i>	In order to ensure that chemical facilities take action to review and address security vulnerabilities, the Secretary of Homeland Security and the Administrator of the Environmental Protection Agency (EPA) should jointly develop, in consultation with the Office of Homeland Security, a comprehensive national chemical security strategy that is both practical and cost effective. This national strategy should specify the roles and responsibilities of each federal agency partnering with the chemical industry.	GAO-03-439 (March 14, 2003)	Homeland Security Presidential Directive Number 7 (HSPD-7) requires DHS to produce a comprehensive, integrated National Plan for Critical Infrastructure and Key Resources Protection to outline national goals, objectives, milestones, and key initiatives by December 17, 2004. DHS states that this plan will consist of an overview as well as supplements addressing each critical infrastructure sector. As such, DHS notes that the chemical sector-specific plan will describe the roles and responsibilities of all sector stakeholders, including federal agencies.	DHS indicated that it does not face any challenges in implementing actions on this recommendation.

Directorate of Science and Technology^b <i>The Department of Homeland Security Needs to Fully Adopt a Knowledge-Based Approach to Its Counter-MANPADS Development Program</i>	The Secretary of Homeland Security should fully adopt the knowledge-based approach, including the use of exit criteria, to help ensure that key decisions in DHS's effort to develop and demonstrate a counter man-portable air defense systems (MANPADS) are based on sufficient information.	GAO-04-341R (January 30, 2004)	DHS reports that implementation of this recommendation is being conducted in two phases. The first phase is scheduled to occur from January through July 2004. The second phase will take place from August 2004 to January 2006.	DHS notes that it faces several challenges in implementing this recommendation, including (1) ensuring the contractor meets rigorous system performance requirements, (2) integrating the defense systems into commercial aircraft, (3) obtaining Federal Aviation Administration certification, (4) ensuring that there is an appropriate maintenance plan for the program, (5) fully evaluating and testing the system, and (6) conducting appropriate lifecycle cost analysis.

Report title	Key Recommendation^a	Report number and date of issuance	Timeframes reported by DHS	Challenges reported by DHS
<i>Combating Bioterrorism: Actions Needed to Improve Security at Plum Island Animal Disease Center</i>	To complete and enhance Plum Island's security arrangements, the Secretary of Homeland Security should, in consultation with the Secretary of Agriculture, correct physical security deficiencies by addressing the specific security shortcomings identified by GAO's Office of Special Investigations.	GAO-03-847 (September 19, 2003)	DHS has addressed several components of this recommendation such as key control and enhanced security of overnight accommodations. On June 28, 2004, a DHS official informed GAO that the fire brigade is fully operational. GAO is currently working to verify this information.	The background checks GAO has recommended require access to the Federal Bureau of Investigation's database, and no permanent arrangement has been made that provides Plum Island Animal Disease Center (PIADC) the needed access or working relationships (and reimbursement for services) to accomplish these checks on an ongoing basis.

<i>Combating Bioterrorism: Actions Needed to Improve Security at Plum Island Animal Disease Center</i>	To complete and enhance Plum Island's security arrangements, the Secretary of Homeland Security should, in consultation with the Secretary of Agriculture, enhance incident response capability by resolving the issue of the guards' authority to carry firearms and make arrests.	GAO-03-847 (September 19, 2003)	DHS will implement this recommendation by assigning responsibility to its Federal Protective Service (FPS). On June 28, 2004, a DHS official informed GAO that an initial FPS officer was placed on-site at the island. Additional personnel are to be assigned by the fall of 2004. GAO will work with DHS to verify information provided as of June 28, 2004, and to determine the continued status of this recommendation.	While security guards at PIADC currently carry firearms, DHS notes that they do not have the authority to make arrests. This recommendation will not be fully implemented until the guard force has the authority to make arrests. DHS reports that placing such officers on-site is a complex action involving several DHS offices and the General Services Administration.

RE: Status and Disposition of Key GAO Recommendations to the Department of Homeland Security (Job Code 440280)

Dear Randall:

We appreciate the opportunity to review and update the status of high priority open GAO recommendations for DHS programs. The Department has worked with GAO in earnest since late last fall to resolve all (roughly 354) open GAO recommendations even though some date back to 1997. DHS takes GAO's recommendations very seriously and invests significant effort to be responsive and we generally welcome their insight and guidance they impart. This Department also appreciates GAO's efforts to assist us and reconcile the recommendations made to the DHS Organizational Elements (OE)s.

On the other hand, it is important to remember that standing up a new Department from a myriad of previous organizational configurations is challenging. DHS is comprised of many legacy organizations with long and established infrastructures such as the U.S. Secret Service and the U.S. Coast Guard to recently formed OE's such as the Infrastructure Analysis and Infrastructure Protection (IAIP) Directorate. Among other things it has been challenging just to align, or realign, open GAO recommendations with our current organizational structure. This is especially so when the preponderance of the total pending recommendations were presented to federal entities prior to the formation of DHS. Moreover, a fair number of the open recommendations are associated with entities that are no longer in existence. As a result, it is extremely difficult for current DHS personnel to assure implementation for recommendations associated with legacy departments.

Nonetheless, we have assessed the recommendations and are currently in discussions with GAO staff to close those identified with the legacy organizations and reevaluate others that may be continued for ongoing programs. DHS has provided a large volume of documentation on the corrective actions taken to address GAO's recommendations and we are eager to achieve resolution of these long outstanding issues. This requires a delicate balance as we request our very limited personnel to be responsive to the 100+ ongoing GAO engagements along with special emphasis on closing the more than 350 open GAO recommendations. Under this crushing workload, we seek both GAO and other Congressional staff support to work with us to develop a functional approach to consolidate and resolve GAO recommendations. And, as a result, we would be able to devote appropriate attention to current homeland security issues.

**Enclosure IV: Comments from the Department
of Homeland Security**

2

As we have also discussed before, further complicating matters is that there is no real-time interactive database either within GAO (or between GAO and DHS) to ensure prompt and timely routing of the DHS proposed resolutions. Thus, many DHS OEs feel like they are shooting at the proverbial "moving target".

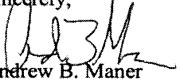

There is a clear need for DHS and GAO to agree on criteria for closure, and a better process for a more efficient and effective open recommendation resolution process.

To facilitate such a discussion I offer the following for your consideration.

1. Close recommendations that are no longer applicable due to a new mission(s) and federal directives.
2. Move forward those recommendations which relate to ongoing engagements or ones known to be starting as new engagements.
3. Meet face-to-face with DHS employees to establish the most efficient approach to close recommendations and still meet Congressional requests.
4. Consider the fact that some legacy units (i.e., NIPC/CIAO) are now dissolved; integrated in-part; and/or that the corporate knowledge may be gone.

As mentioned above, the Department is committed to resolving all open GAO recommendations, especially those that were issued prior to the establishment of DHS. At our request our components and directorates have spent hundreds of hours updating and closing many of these recommendations—I commend them on their efforts and ask for your assistance in streamlining the current closure process.

We are available to meet and discuss these issues at your convenience.

Sincerely,

Andrew B. Maner
Chief Financial Officer

Enclosure V: GAO Contacts and Staff Acknowledgments

GAO Contacts

Randall A. Yim (202) 512-8777
Debra B. Sebastian (202) 512-9385

Acknowledgments

In addition to the individuals named above, Amy Bernstein, Roosevelt R. Burns, R.E. Canjar, Amanda Rose, Gladys Toro, Margaret A. Ullengren, and William D. Updegraff made key contributions to this report as well as many other staff throughout GAO who contributed to selected sections of this report.

GAO's Mission

The General Accounting Office, the audit, evaluation and investigative arm of Congress, exists to support Congress in meeting its constitutional responsibilities and to help improve the performance and accountability of the federal government for the American people. GAO examines the use of public funds; evaluates federal programs and policies; and provides analyses, recommendations, and other assistance to help Congress make informed oversight, policy, and funding decisions. GAO's commitment to good government is reflected in its core values of accountability, integrity, and reliability.

Obtaining Copies of GAO Reports and Testimony

The fastest and easiest way to obtain copies of GAO documents at no cost is through the Internet. GAO's Web site (www.gao.gov) contains abstracts and full-text files of current reports and testimony and an expanding archive of older products. The Web site features a search engine to help you locate documents using key words and phrases. You can print these documents in their entirety, including charts and other graphics.

Each day, GAO issues a list of newly released reports, testimony, and correspondence. GAO posts this list, known as "Today's Reports," on its Web site daily. The list contains links to the full-text document files. To have GAO e-mail this list to you every afternoon, go to www.gao.gov and select "Subscribe to e-mail alerts" under the "Order GAO Products" heading.

Order by Mail or Phone

The first copy of each printed report is free. Additional copies are \$2 each. A check or money order should be made out to the Superintendent of Documents. GAO also accepts VISA and Mastercard. Orders for 100 or more copies mailed to a single address are discounted 25 percent. Orders should be sent to:

U.S. General Accounting Office
441 G Street NW, Room LM
Washington, D.C. 20548

To order by Phone: Voice: (202) 512-6000
 TDD: (202) 512-2537
 Fax: (202) 512-6061
