B-282438

August 5, 1999

The Honorable Stephen Horn  
Chairman  
Subcommittee on Government Management,  
Information and Technology  
Committee on Government Reform  
House of Representatives

Dear Mr. Chairman:

At your request, we obtained information on federal agencies' reporting to the Office of Management and Budget (OMB) on the Year 2000 status of their classified systems. Our objectives were to determine (1) whether agencies are including classified systems in their quarterly reports to OMB, (2) whether agencies are separately reporting to OMB on the status of their classified systems,<sup>1</sup> and, if so, how OMB uses the information, and (3) for those agencies not reporting to OMB, the status of those systems. On May 27, 1999, we briefed your office on the results of our work. This letter summarizes and updates the information presented at that briefing.

To accomplish our objectives, we surveyed both OMB and the 34 major federal agencies that report quarterly to OMB on the status of their Year 2000 efforts. We then interviewed OMB and agency officials and requested and reviewed supporting documents, as appropriate, to clarify survey responses. We achieved a 100-percent response rate to our survey. We did not verify agency responses. We performed our work from March through July 1999 in accordance with generally accepted government auditing standards.

We requested comments from key agencies discussed in this letter. Their comments are discussed in the "Agency Comments" section of this letter.

---

<sup>1</sup>For purposes of our survey, we defined "classified system" as any system that receives, processes, or transmits top secret, secret, or confidential information. These classifications are defined as the following. *Top secret*—any information for which the unauthorized disclosure could reasonably be expected to cause exceptionally grave damage to national security. *Secret*—any information for which the unauthorized disclosure could reasonably be expected to cause serious damage to national security. *Confidential*—any information for which the unauthorized disclosure could reasonably be expected to cause damage to national security.

---

## Results in Brief

Of the 34 federal agencies surveyed, 21 agencies reported that they do not have any classified systems. Of the remaining 13 federal agencies, 12 agencies<sup>2</sup> reported that they include the Year 2000 status of their mission-critical, classified systems in their reports to OMB. OMB uses the information provided by the agencies to monitor Year 2000 progress across the federal government and to keep the Congress informed of agencies' Year 2000 progress.

As of July 1999, the Department of the Treasury had not reported the status of all of its mission-critical, classified systems to OMB. However, it plans to do so in its subsequent reports to OMB. Treasury reported that it has 13 systems that are not reported to OMB. Of these 13 systems, 7 systems are Year 2000 compliant, 5 systems are being repaired, and 1 system is being replaced. According to Treasury, the 5 systems being repaired and the 1 system being replaced are all in the testing/validation phase.

---

## Background

In a May 7, 1997, memorandum, and in subsequent memorandums, OMB directed selected federal agencies to report to it quarterly on their Year 2000 progress.<sup>3</sup> Among other things, OMB directed agencies to report on the status of their (1) data exchanges, (2) continuity and contingency planning efforts, (3) independent verification and validation methods, (4) Year 2000 remediation costs for mission-critical and nonmission-critical systems, (5) non-IT equipment (i.e., any products or devices using embedded chips), and (6) mission-critical information systems. For those systems being repaired, OMB directed the agencies to report on milestones and number of systems completed for each remediation phase:

- Assessment—includes completing the inventory and assessment of information systems and their components and assessing the severity of the Year 2000 problem across the enterprise.

---

<sup>2</sup>The Executive Office of the President, Office of Administration, and the Department of Transportation began reporting the Year 2000 status of their mission-critical, classified systems to OMB in May 1999 and July 1999, respectively.

<sup>3</sup>OMB issued several memorandums to selected federal agencies regarding its Year 2000 quarterly reporting requirements (OMB issued Memorandum 97-13 on May 7, 1997; Memorandum 98-02 on January 20, 1998; Memorandum 98-07 on March 9, 1998; Memorandum 98-12 on July 22, 1998; and Memorandum 99-09 on January 26, 1999).

- 
- **Renovation**—includes converting, replacing, or eliminating selected platforms, applications, databases, and utilities and the modification of interfaces.
  - **Validation**—includes testing, verification, and validating converted or replaced platforms, applications, databases, and utilities.
  - **Implementation**—includes implementing converted or replaced platforms, applications, databases, and utilities.

OMB established March 31, 1999, as the milestone date for completing implementation of all mission-critical systems. OMB also directed agencies to provide a list of those mission-critical systems that could not be implemented by the March 1999 deadline.

---

## Most Agencies That Reported Having Classified Systems Are Reporting Their Year 2000 Status to OMB

Most federal agencies that reported having mission-critical, classified systems report the Year 2000 status of these systems to OMB's Office of Information and Regulatory Affairs (OIRA). Of the 34 major federal agencies reporting to OMB, 21 agencies reported that they do not have any classified systems. Of the 13 federal agencies that reported having classified systems, 12 agencies<sup>4</sup> reported that they include the Year 2000 status of these systems in their reports to OMB. Eleven agencies submit their reports to OMB's Office of Information and Regulatory Affairs. According to OMB officials, OMB uses the information provided by the agencies to monitor Year 2000 progress across the federal government and to keep the Congress informed of agencies' Year 2000 progress.

The CIA reports the status of its mission-critical, classified systems quarterly to OMB's National Security Division for Command, Control, Computer, Communications, and Intelligence (NSD/C4I). NSD/C4I also uses the information provided by the CIA to monitor its Year 2000 progress and has shared this information upon request with the President's Council on Year 2000 Conversion.

---

<sup>4</sup>The Executive Office of the President, Office of Administration, began reporting on its mission-critical, classified systems in its May 1999 quarterly report to OMB. At this time, the Executive Office of the President, Office of Administration, reported that it has eight mission-critical, classified systems under repair: two systems in the renovation phase, five systems in the validation phase, and one system in the implementation phase. All eight systems are scheduled to be Year 2000 compliant by September 30, 1999. The Department of Transportation began reporting on its mission-critical, classified system in its July 1999 monthly report to OMB and noted in its report that the system is Year 2000 compliant.

---

## One Agency Plans to Report the Status of Its Classified Systems to OMB

As of July 1999, one agency—the Department of the Treasury—has not reported the status of its mission-critical, classified systems to OMB, however it plans to do so in its subsequent reports to OMB.

Treasury reported that it has 15 mission-critical, classified systems. Of these 15 systems, Treasury reports the Year 2000 status of only 2 to OMB. The status of the other 13 is not reported. According to Treasury, 7 systems are Year 2000 compliant, 5 systems are being repaired, and 1 system is being replaced. The 5 systems being repaired and the 1 system being replaced are all in the testing/validation phase. Treasury plans to have all of its mission-critical, classified systems fully implemented by August 31, 1999.

---

## Agency Comments

We received comments from the Secretary of the Treasury, the Secretary of Transportation, the Director of the Executive Office of the President, Office of Administration, and the Director of the Office of Management and Budget. The main thrust of their comments was to provide updated information on the status of their Year 2000 reporting. We have incorporated the updated information in this letter as appropriate.

---

We are sending copies of this report to Representative Jim Turner, Ranking Minority Member, Subcommittee on Government Management, Information and Technology, House Committee on Government Reform; Senator Robert F. Bennett, Chairman, and Senator Christopher J. Dodd, Vice Chairman, Senate Special Committee on the Year 2000 Technology Problem; The Honorable Jacob J. Lew, Director, Office of Management and Budget; and John Koskinen, Chairman of the President's Council on Year 2000 Conversion. Copies will be made available to others upon request.

---

If you have questions about this report, please contact me at (202) 512-6240, or by e-mail at [hiter.aimd@gao.gov](mailto:hiter.aimd@gao.gov). Key contributors to this assignment were R.E. Canjar and Deborah Davis.

Sincerely yours,

A handwritten signature in black ink that reads "Randolph C. Hite". The signature is written in a cursive style with a large initial "R" and a distinct "C" and "H".

### **Ordering Information**

**The first copy of each GAO report and testimony is free. Additional copies are \$2 each. Orders should be sent to the following address, accompanied by a check or money order made out to the Superintendent of Documents, when necessary, VISA and MasterCard credit cards are accepted, also.**

**Orders for 100 or more copies to be mailed to a single address are discounted 25 percent.**

**Orders by mail:**

**U.S. General Accounting Office  
P.O. Box 37050  
Washington, DC 20013**

**or visit:**

**Room 1100  
700 4th St. NW (corner of 4th and G Sts. NW)  
U.S. General Accounting Office  
Washington, DC**

**Orders may also be placed by calling (202) 512-6000  
or by using fax number (202) 512-6061, or TDD (202) 512-2537.**

**Each day, GAO issues a list of newly available reports and testimony. To receive facsimile copies of the daily list or any list from the past 30 days, please call (202) 512-6000 using a touchtone phone. A recorded menu will provide information on how to obtain these lists.**

**For information on how to access GAO reports on the INTERNET, send an e-mail message with "info" in the body to:**
