

(Sample Format of an Abstract)

New Techniques for Valuation of Ecosystem Services

Terry R. Farmer¹, J. Mark Genesis¹ and S. Forest²

¹Department of Soil and Water Science, University of Florida, Gainesville, FL, USA

²Department of Soil Science, The University of Reading, Whiteknights, Reading, England

This is a sample of the body of the abstract. Please pay strict attention to the preparation of your abstract. The abstract should be as informative as possible and cover six key areas: 1) purpose, 2) scope, 3) methods used, 4) the results, 5) conclusions, and 6) recommendations.

Limit your abstract to one page with 1-inch margins – top, bottom, and sides. Font size must be at least 10 points. Verdana is the suggested font, but if Verdana is not available, use a common sans serif font such as Arial. One full page will be approximately 250-500 words or contingent on the number of authors, affiliations, and paragraph breaks. If you have questions about the abstract format, please contact jhanna@ufl.edu. Should you have questions about the abstract content, contact cshapiro@usgs.gov.

Prior to sending your abstract, be certain to proof one last time, including all author information. Thank you. We are looking forward to your abstract submission and later presentation.
