

FIREWOOD ALERT

Emerald Ash Borer beetles, and larval tunneling below bark

EAB infested firewood will bring this tree-killing pest into new areas

- **Discounted firewood from an unknown source is no bargain!**
- **It may contain the deadly Emerald Ash Borer – the EAB – already found throughout Michigan, Ohio, Indiana, and a known threat to our area.**
- **Purchase firewood from a reputable local dealer.**
- **Look for a USDA inspection shield or buy logs that have all bark and one-half inch of surface wood removed.**
