FOREWARD

Public Law 93-400 requires that the Office of Management and Budget (OMB), Office of Federal Procurement Policy (OFPP), "...establish a system for collecting, developing, and disseminating procurement data which takes into account the needs of the Congress, the Executive branch, and the private sector." Under the guidance of OFPP, design of the Federal Procurement Data System (FPDS) was completed in early 1978 and data collection began October 1, 1978. The Federal Procurement Data Center was established to operate the system. The Center provides a central point to respond to the requirements of the legislative, executive, and judicial branches of Government as well as the private sector.

The Federal Procurement Data Center produces reports which examine various aspects and impacts of the Federal acquisition process. The data can be used for geographical analysis, market analysis, and analysis of the impact of congressional and presidential initiatives in socio-economic areas such as small business. The data are also a reliable basis for measuring and assessing the impact of federal acquisition policy and management improvement.

Basic acquisition data will be published annually in the "FPDS Federal Procurement Report" formerly known as the FDPS Standard Report. Quarterly data will be available on tape and special reports to meet specific data requirements can be produced on demand.

Further information regarding the Federal Procurement Data System reports or capabilities can be obtained from the General Services Administration, Automated External Information Division, Federal Procurement Data Center, ROB, Room 5652, Washington, DC 20407 or by calling area code (202) 401–1529.

HOW VALID IS FPDS DATA?

The "Agency Reporting Performance" chart displays each reporting activity's procurement dollars as submitted into the Federal Procurement Data System (FPDS). All dollars shown on the chart reflect the absolute dollar value of actions reported. For example, an agency submitting three records, one award (obligation) of \$20,000, one deobligation of \$12,000 against a previously reported contract, and one invalid transaction of \$10,000 would appear on the charts as follows:

Total \$(000)	Total Invalid (\$000)	Previous Quarters
Agency X \$42	\$10	\$0

(Note: Total \$ includes all transactions reported during the current report period, timely or untimely, valid or invalid.)

The absolute dollar value of each record is utilized to provide a meaningful index of the total effect on the FPDS master file. However, because this is the only place in the report where absolute values are reflected, the figures in this chart and those in the rest of the report are not comparable.

The total invalid dollars column includes those records that fail to pass FPDS system edits and are not entered into the master file. Agencies had 30 days to correct their invalid transactions, and only those records which are not corrected in time for inclusions in this publication are reflected in the invalid dollars total.

Previous Quarters' Dollars column includes any records submitted during the current reporting quarter for actions which occurred during a previous quarter, and changes or correction to records already in the FPDS master file. Separate totals for action completed during the current fiscal year and for the year-to-date totals in the report will reflect all reported actions which occurred during the current fiscal year. Most actions submitted subsequent to the fiscal year in which they occurred will not be reflected in the FPDS report. FPDS historical master files are updated with all records such that any special reports produced reflect the latest data.

FEDERAL PROCUREMENT DATA SYSTEM FEDERAL PROCUREMENT HISTORY Actions Reported Individually on SF279 Fiscal Year 1989 Through Fourth Quarter

HIGHLIGHTS

After 10 years of data collection, the FPDS has been redesigned to reflect the changing needs for information. Beginning with this edition, the FPDS Standard Report has been renamed "The FPDS Federal Procurement Report". An annual report will be published, but quarterly data will be available on tape.

Due to the redesign, the information contained in this report may not be reflective of the total contract dollars awarded in FY-1989. Further, due to rounding, dollars on the charts may not equal the TOTAL DOLLAR figure, and percentages may not total 100 percent.

Since the FPDS Federal Procurement Report is current as of the date of issuance and all older reports are obsolete, FPDC will not maintain prior issuances for either distribution or for reference.

^{*}Number of actions and dollars on this page do not match other Federal totals in this Federal Procurement Report because the chart displays statistics comparable to the Competition Advocates Report to Congress.

^{**}Includes any procurement actions that round down to \$25,000 reported on SF279. In theory, actions that round up to \$25,000 fall below the threshold and, therefore, are reported on the SF 281.

^{***}Includes data from SF 281 plus procurement actions under \$25,000 that were reported on the SF 279.
