

Standards Made the Web and Will Remake the Library

Photo: Carol Highsmith

Just over 10 years ago, Web pioneers agreed upon and implemented the standards and protocols that allowed the Internet to blossom. Learn what those standards are, how they effect libraries on a daily basis and what may be coming down the road to change our lives. By understanding these standards and how new standards are developed, professionals will be prepared to face the new world of libraries. This session will begin with current library standards and then anticipate those on the horizon and those developed by other disciplines.

Join Marjorie M.K. Hlava, president of Access Innovations/Data Harmony/NICEM, as she discusses her work in the standards arena as it relates to her career in creating and maintaining databases, software systems and services. Hlava is also a past president of ASIST, ASIDIC, Documentation Abstracts and an active past board member of both NISO and SLA.

Date

Tuesday, April 18, 2006

Time

12:30 p.m.—3:30 p.m. (Registration begins at 12:00 noon.)
