

(ii) A signed statement agreeing to:

(A) Send official eartags only to a State or APHIS representative, to a flock owner at the address to which the premises number or tag sequence was assigned by a State or APHIS representative, or as directed by APHIS;

(B) Provide a monthly report by State of all tags produced, including the tag sequences produced and the person's and address to which the tags were shipped; and

(C) When required by APHIS, enter the sequences of tags shipped into the National Scrapie Database through a web page interface or other means specified by APHIS.

(iii) Twenty-five sample tags. Additional tags must be submitted if requested by APHIS.

(3) Approval to produce official premises and/or individual identification tags will be valid for 1 year and must be renewed annually. The Administrator may also grant approval to produce tags for periods of less than 1 year in cases where all of the submissions required by this section have not been received or evaluated but there is substantial evidence that the tags meet the requirements of this section. The Administrator may decline to renew a company's approval if the tags do not show adequate retention and durability in field use or if any of the requirements of this section are not met by the tag company. If a company's tags do not show adequate retention and durability in field use or if any of the requirements of this section are not met by the tag company, the approval may be withdrawn with 60 days

written notice. Any person who is approved to produce official premises or individual identification tags in accordance with this section and who knowingly produces tags that are not in compliance with the requirements of this section, and any person who is not approved to produce such tags but does so, shall be subject to such civil penalties and such criminal liabilities as are provided by 18 U.S.C. 1001, 7 U.S.C. 8313, or other applicable Federal statutes. Such action may be in addition to, or in lieu of, withdrawal of approval to produce tags.

(g) *New types of identification.* Written requests for approval of sheep or goat identification devices and markings not listed in paragraph (a)(2) of this section should be sent to the Animal and Plant Health Inspection Service, Veterinary Services, National Animal Health Programs Staff, 4700 River Road Unit 43, Riverdale, MD 20737-1235. If the Administrator determines that the devices and markings will provide a means of tracing sheep and goats in interstate commerce, a proposal will be published in the FEDERAL REGISTER to add the devices and markings to the list of approved means of sheep and goat identification.

[66 FR 43990, Aug. 21, 2001, as amended at 68 FR 6343, Feb. 7, 2003; 69 FR 64650, Nov. 8, 2004]

§ 79.3 General restrictions.

The following prohibitions and movement conditions apply to the interstate movement of sheep and goats, and no sheep or goat may move interstate except in compliance with them.

INTERSTATE MOVEMENT GENERAL RESTRICTIONS FOR SHEEP AND GOATS

Note: A CONSISTENT STATE is one whose intrastate identification, reporting, and movement restrictions for infected and source flocks and high-risk animals are consistent with the APHIS standards for State scrapie programs.

Type of interstate movement	Moved from INCONSISTENT state	Moved from CONSISTENT state
(a) Sale or other movement of breeding animals, show animals or any other animal not specifically addressed in this chart. General Condition: No animal may be removed from slaughter channels in interstate commerce if it was sold at a slaughter-only auction, is identified with a tag or ear tattoo marked "meat" or "slaughter only," or was sold with a bill of sale marked for slaughter only, and other animals may be removed from slaughter channels in interstate commerce only if they are identified to their flock of birth.—		

INTERSTATE MOVEMENT GENERAL RESTRICTIONS FOR SHEEP AND GOATS—Continued

Note: A CONSISTENT STATE is one whose intrastate identification, reporting, and movement restrictions for infected and source flocks and high-risk animals are consistent with the APHIS standards for State scrapie programs.

Type of interstate movement	Moved from INCONSISTENT state	Moved from CONSISTENT state
(1) High-risk, scrapie-positive, or suspect animals, or animals from a noncompliant flock.	Prohibited ¹	Prohibited ¹
(2) Non-high-risk animals from an infected or source flock that are not scrapie-positive or suspect animals.	Prohibited ¹	Prohibited, ¹ except as allowed in an approved scrapie control pilot project flock plan and must meet the requirements for exposed animals.
(3) Sexually intact exposed animals that are not scrapie-positive, suspect, or high-risk animals and are not animals from an infected or source flock.	Flock must be enrolled in the Complete Monitored category of the Scrapie Flock Certification Program or equivalent APHIS recognized program, have official individual animal identification, and a permit. ² For any female exposed sheep the results of an official genotype test must be included on or attached to the permit and must be QR or RR at codon 171. For any female animal moving for exhibition, the permit must include a statement by both the owner and the accredited veterinarian that the animal has not lambed or aborted within 30 days of being exhibited and is not due to lamb within 30 days of being exhibited and that there is no visible vaginal discharge. For any animal born after 1–1–2002, the certificate must include the flock of birth and the flock of origin, if different.	Official individual animal identification and a permit. ² For any female exposed sheep the results of an official genotype test must be included on or attached to the permit and must be QR or RR at codon 171. For any female animal moving for exhibition, the permit must include a statement by both the owner and an accredited veterinarian that the animal has not lambed or aborted within 30 days of being exhibited and is not due to lamb within 30 days of being exhibited and that there is no visible vaginal discharge. For any animal born after 1–1–2002, the permit must include the flock of birth and the flock of origin, if different.
(4)(i) Sexually intact sheep except as allowed in (a)(7). (ii) Sexually intact goats, except for low-risk goats.	Flock must be enrolled in the Complete Monitored category of the Scrapie Flock Certification Program or equivalent APHIS-recognized program, have official individual animal identification, and a certificate. For any animal born after 1–1–2002, the certificate must include the flock of birth and the flock of origin, if different.	Official individual animal identification and a certificate. For any animal born after 1–1–2002, the certificate must include the flock of birth and the flock of origin, if different.
(5) Sexually intact low-risk goats	Official individual animal identification and a certificate. For any animal born after 1–1–2002, the certificate must include the flock of birth and the flock of origin, if different.	Official individual animal identification and a certificate. For any animal born after 1–1–2002, the certificate must include the flock of birth and the flock of origin, if different.
(6) Castrated animals that are not scrapie-positive or suspect animals.	Official individual animal identification and a certificate.	None, except for exposed animals that must have official individual animal identification.
(7) Low-risk commercial sheep	Official individual animal identification and a certificate, and the flock must be enrolled in the Complete Monitored category of the Scrapie Flock Certification Program or an equivalent APHIS-recognized program. For any animal born after 1–1–2002, the certificate must include the flock of birth and the flock of origin, if different.	(i) Official premises identification that is a permanent brand or ear notch pattern registered with an official brand registry; (ii) A brand inspection certificate; (iii) An owner statement dated within 30 days stating that the animals were born in the flock, that the flock does not contain any animal exhibiting signs of scrapie, that to the best of his or her knowledge the flock has no risk factors for or exposure to scrapie, and that the flock has never contained: (A) Any animal diagnosed as having scrapie; (B) any female blackfaced sheep; or (C) any female blackfaced cross sheep that were not born in the flock; and

Type of interstate movement	Moved from INCONSISTENT state	Moved from CONSISTENT state
(8) Commercial low-risk goats.	Official individual animal identification and a certificate. For any animal born after 1–1–2002, the certificate must include the flock of birth and the flock of origin, if different.	(iv) An accredited veterinarian's statement issued within 12 months of the date of movement indicating that, to the best of his or her knowledge, the flock has no known risk factors for or exposure to scrapie, and that he or she has inspected the flock and it does not contain: (A) Any animal exhibiting signs of scrapie; (B) any female blackfaced sheep; or (C) any female blackfaced cross sheep that were not born in the flock. The statements must include the owner's name, address, and the premises identification number and a drawing of the owner's registered brand or ear notch pattern. None.
(b) Sale or other movement directly to slaughter, through slaughter channels to slaughter, or to feedlots for later movement to slaughter of animals that are under 18 months of age as evidenced by eruption of the second incisor, not pregnant, and have not lambed or kidded. General Condition: No animal may be removed from slaughter channels in interstate slaughter channels in interstate commerce if it was sold at a slaughter-only auction, is identified with a tag or ear tattoo marked "meat" or "slaughter only," or was sold with a bill of sale marked for slaughter only, and other animals may be removed from slaughter channels in interstate commerce only if they are identified to their flock of birth.— (1) Scrapie-positive or suspect animal.	Prohibited ¹	Prohibited. ¹
(2) Sexually intact high-risk animals and sexually intact animals from infected or source flocks that are not scrapie-positive or suspect animals.	Official individual animal identification and a permit, or a permit and an indelible "S" mark on the left jaw, or sealed conveyance and a permit. (Note: these animals may only be permitted to slaughter or to terminal feedlots. ³)	Official individual animal identification and a permit, or a permit and an indelible "S" mark on the left jaw, or sealed conveyance and a permit. (Note: these animals may only be permitted to slaughter or to terminal feedlots. ³)
(3) Exposed sexually intact animals that are not scrapie-positive, suspect, or high-risk. animals and that are not animals from an infected or source flock.	Official individual animal identification for any animal that is not moving directly to slaughter or to a terminal feedlot. ^{3,4} (Note: pregnant animals and animals with a visible vaginal discharge may only be permitted to slaughter or to terminal feedlots.)	Official individual animal identification for any animal that is not moving direct to slaughter or to a terminal feedlot. ^{3,4} (Note: Pregnant animals and animals with a visible vaginal discharge may only be permitted to slaughter or to terminal feedlots.)
(4) Sexually intact sheep that are not scrapie-positive, suspect, high-risk, or exposed animals and are not animals from an infected or source flock.	Official premises identification or official individual animal identification for any animal that is not moving direct to slaughter or to a terminal feedlot. ³	None.
(5) Sheep enrolled in the selective monitored or complete monitored category of the SFCP that are not scrapie-positive, suspect, high-risk, or exposed animals.	None	None.
(6) Castrated animals that are not scrapie-positive, or suspect animals.	None	None.

(6) Goats that are not scrapie-positive, suspect, sexually intact high-risk, or sexually intact exposed animals and that are not sexually intact animals from an infected or source flock.	None	(iv) An accredited veterinarian's statement issued within 12 months of the date of movement indicating that, to the best of his or her knowledge, the flock has no known risk factors for or exposure to scrapie, and that he or she has inspected the flock and it does not contain: (A) Any animal exhibiting signs of scrapie; (B) any female blackfaced sheep; or (C) any female blackfaced cross sheep that was not born in the flock. The statements must include the owner's name, address, and the premises identification number and a drawing of the owner's registered brand or ear notch pattern. ⁴ None.
(d) Movement of animals for grazing or other management purposes without change of ownership.—		
(1) Scrapie-positive, suspect, or sexually intact high-risk animals.	Prohibited ¹	Prohibited. ¹
(2) Non-high-risk animals from an infected or source flock.	Prohibited ¹	Prohibited, ¹ except as allowed in an approved scrapie control pilot project flock plan and must meet the requirements for exposed animals.
(3) Sexually intact exposed animals that are not scrapie-positive, suspect, or high-risk animals and that are not animals from an infected or source flock.	Official individual animal identification and a permit. ² For any female exposed sheep the results of an official genotype test must be included on or attached to the permit and must be QR or RR at codon 171.	Official individual animal identification and a permit. ² For any female exposed sheep the results of an official genotype test must be included on or attached to the permit and must be QR or RR at codon 171.
(4) Sexually intact sheep or sexually intact goats that have been commingled with sheep and that are not scrapie-positive, suspect, high-risk, or exposed animals and are not animals from an infected or source flock.	Official premises identification and a certificate..	None.
(5) Sexually intact goats that have not been commingled with sheep and that are not scrapie-positive, suspect, high-risk, or exposed animals and are not animals from an infected or source flock.	None	None.
(6) Castrated animals that are not scrapie-positive or suspect animals and are not an animal from an infected or source flock.	None	None.

¹ Animals prohibited movement may be moved interstate only if they are moving interstate for destruction or research as approved by the Administrator.

² A copy of the permit must be sent to the State veterinarian and the AVIC of the receiving State prior to movement of animals.

³ No exposed or high-risk animal from any State or any animal from an Inconsistent State shall be removed from slaughter channels once it has entered interstate commerce.

⁴ Official individual animal identification or official premises identification is not required for these slaughter animals if the animals are kept as a group on the same premises on which they were born or used for breeding purposes and are not commingled with animals from another premises at any time, including throughout the feeding, marketing, and slaughter process.
