§ 94.9 Pork and pork products from regions where classical swine fever exists.

(a) Classical swine fever is known to exist in all regions of the world except Australia; Canada; Chile; Fiji; Iceland; the Mexican States of Baja California, Baja California Sur, Campeche, Chi-huahua, Quintana Roo, Sinaloa, Sonora, and Yucatan; New Zealand; Norway; and Trust Territory of the Pacific Islands.¹⁰

(b) The EU-15 is a single region of low-risk for CSF.

(c) Except as provided in § 94.24 for the EU-15, no fresh pork or pork product may be imported into the United States from any region where classical swine fever is known to exist unless it complies with the following requirements:

(1) Such pork or pork product has been treated in accordance with one of the following procedures:

(i) Such pork and pork product has been fully cooked by a commercial method in a container hermetically sealed promptly after filling but before such cooking, so that such cooking and sealing produced a fully sterilized product which is shelf-stable without refrigeration;

(ii) Such pork or pork product is in compliance with the following requirements:

(A) All bones were completely removed prior to cooking; and

(B) Such pork or pork product was heated by other than a flash-heating method to an internal temperature of 69 °C. (156 °F.) throughout; or

(iii) Such pork or pork product is in compliance with the following requirements:

(A) All bones have been completely removed in the region of origin, and

(B) The meat has been held in an unfrozen, fresh condition for at least 3

days immediately following the slaughter of the animals from which it was derived, and

(C) The meat has been thoroughly cured and fully dried for a period of not less than 90 days so that the product is shelf stable without refrigeration: *Provided*, That the period of curing and drying shall be 45 days if the pork or pork product is accompanied by the processing establishment by a certificate of an official of the national government of a classical swine fever free region which specifies that:

(1) The pork involved originated in that region and the pork or pork product was consigned to a processing establishment in _____ (a region not listed in paragraph (a) of this section as free of classical swine fever), in a closed container sealed by the national veterinary authorities of the classical swine fever free region by seals of a serially numbered type; and

(2) The numbers of the seals used were entered on the meat inspection certificate of the classical swine fever free region which accompanied the shipment from such free region: *And, provided further*, That the certificate required by paragraph (c)(3) of this section also states that: The container seals specified in paragraph (c)(1)(iii)(C)(1) of this section were found intact and free of any evidence of tampering on arrival at the processing establishment by a national veterinary inspector; and the processing establishment from which the pork or pork product is shipped to the United States does not receive or process any live swine, and uses only pork or pork product which originates in regions listed in paragraph (a) of this section as free of classical swine fever and processes all such pork or pork products in accordance with paragraph (c)(1)(i), (ii), or (iii) of this section.

(2) Articles under paragraph (c)(1)(ii) or (iii) of this section were prepared in an inspected establishment that is eligible to have its products imported into the United States under the Federal Meat Inspection Act and § 327.2 of this title; and,

(3) In addition to the foreign meat inspection certificate required by § 327.4 of this title, pork and pork products prepared under paragraph (c)(1)(ii) or

¹⁰See also other provisions of this part and parts 93, 95, and 96 of this chapter, and part 327 of this title, for other prohibitions and restrictions upon the importation of swine and swine products.

§ 94.10

9 CFR Ch. I (1–1–07 Edition)

(iii) of this section shall be accompanied by a certificate that states that the provisions of paragraph (c)(1)(ii) or (iii) of this section have been met. This certificate shall be issued by an official of the national government of the region of origin who is authorized to issue the foreign meat inspection certificate required by § 327.4 of this title.¹¹ Upon arrival of the pork or pork products in the United States, the certificate must be presented to an authorized inspector at the port of arrival.

(4) Small amounts of pork or pork product, subject to the restrictions in this section, may in specific cases be imported for purposes of examination, testing, or analysis if the importer applies for and receives written approval for such importation from the Administrator. Approval will be granted only when the Administrator determines that the articles have been processed by heat in a manner so that such importation will not endanger the livestock of the United States.

(d) Thoroughly cured and fully dried pork and pork products from regions where both classical swine fever and swine vesicular disease are known or considered to exist need not comply with paragraph (c)(1)(iii) of this section if they are in compliance with the provisions of § 94.12(b)(1)(iii) of this part.

(Approved by the Office of Management and Budget under control number 0579–0015)

§ 94.10 Swine from regions where classical swine fever exists.

(a) Classical swine fever is known to exist in all regions of the world, except Australia; Canada; Chile; Fiji; Iceland; the Mexican States of Baja California, Baja California Sur, Campeche, Chihuahua, and Yucatan; New Zealand; Nor-

¹¹ The certification required may be placed on the foreign meat inspection certificate prescribed by § 327.4 of this title or may be contained in a separate document.

way; and Trust Territory of the Pacific Islands.

(b) The EU-15 is a single region of low-risk for CSF.

(c) Except as provided in § 94.24 for the EU-15, no swine that are moved from or transit any region where classical swine fever is known to exist may be imported into the United States, except for wild swine imported into the United States in accordance with paragraph (d) of this section.

(d) Wild swine may be allowed importation into the United States by the Administrator upon request in specific cases under § 93.501 or § 93.504(c) of this chapter.

[71 FR 29070, May 19, 2006, as amended at 71 FR 31070, June 1, 2006]

§ 94.11 Restrictions on importation of meat and other animal products from specified regions.

(a) Austria, The Bahamas, Belgium, Channel Islands, Chile, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Ireland, Italy, Japan, Luxembourg, Namibia (excluding the region north of the Veterinary Cordon Fence), The Netherlands, Norway, Papua New Guinea, Poland, Portugal, Spain, Sweden, Switzerland, and the United Kingdom, which are declared in § 94.1(a)(2) to be free of rinderpest and foot-and-mouth disease, supplement their national meat supply by the importation of fresh (chilled or frozen) meat of ruminants or swine from regions that are designated in § 94.1(a) to be infected with rinderpest or foot-and-mouth disease; or have a common land border with regions designated as infected with rinderpest or foot-and-mouth disease; or import ruminants or swine from regions designated as infected with rinderpest or foot-and-mouth disease under conditions less restrictive than would be acceptable for importation into the United States. Thus, even though this Department has declared such regions to be free of rinderpest and foot-and-mouth disease, the meat and other animal products produced in such free regions may be commingled with the fresh (chilled or frozen) meat of animals from an infected region, resulting in an undue risk of introducing rinderpest or foot-and-mouth disease
