U.S. Wheat Exports Soar to North Africa and Middle East

**U.S. Total Commitments
to North Africa and Middle East
Through the End of December**

**U.S. Exports Rise
as Competition Falters**

Sales of U.S. wheat continue at a very strong level due largely to demand in North Africa and the Middle East. The United States is competitive in these regions because other major suppliers, including Australia and the EU-27, have lower exportable supplies. As a result, buyers in these regions, such as Algeria and Egypt, are depending on wheat from the United States.

It is important to note, however, that importers purchase high and low quality wheat for blending. So far this year, Russia has been the primary supplier of low quality wheat into both regions since Ukraine, a traditional exporter, has tight exportable supplies and government imposed export restrictions. Russia recently announced a prohibitive export tax that will effectively cut off exports until it is removed.

The elevated level of 2007/08 U.S. wheat exports is unlikely to be maintained to these regions when supplies of other major competitors return to more normal levels.

WHEAT: WORLD MARKETS AND TRADE

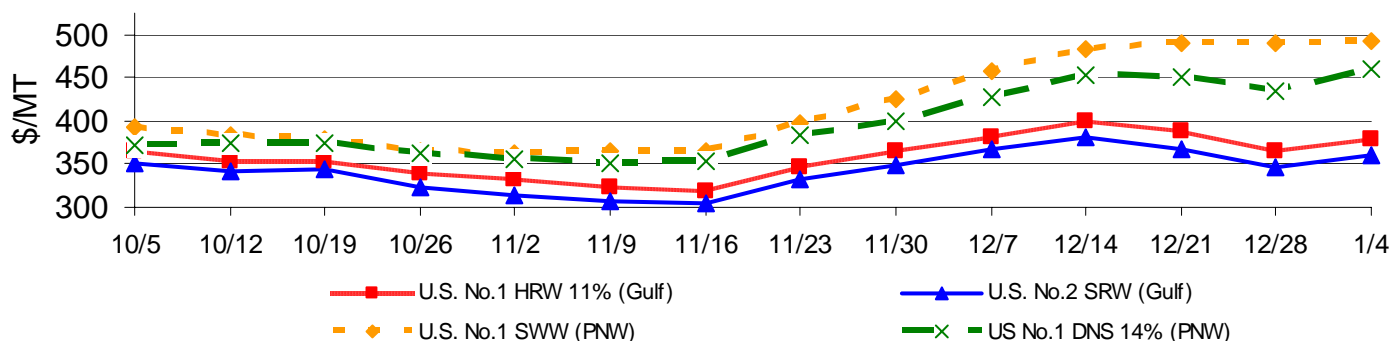

MONTHLY HIGHLIGHTS:

Argentina's Wheat Shipments Benefit From Closed Corn Registrations: In the near term, Argentina's ports will handle a large flow of wheat exports as a result of the government's requirement that all sales be shipped within 90 days. Registrations reached 7 million tons at the beginning of December 2007 before the government closed registrations indefinitely to assess the condition of the current crop. Because of the time restriction on shipping registrations, wheat exports will reach levels of at least 2.3 million tons per month from December 2007 through February 2008. However, since corn registrations are currently closed, sufficient port capacity is available to handle the expected increased wheat export pace. Historical shipments of wheat, corn, and soybeans have been as high as 7 million tons, set in May of 2005. If the government opens and places time restrictions on corn and wheat registrations, then logistical constraints could follow, especially since soybeans ship during the same period.

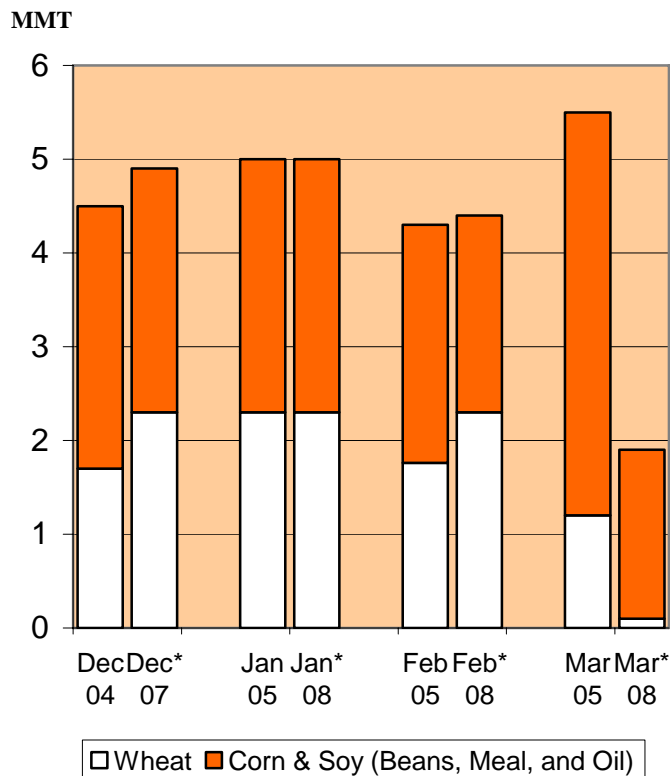

PRICES:

Domestic: For December, wheat prices were mixed despite reports of Argentina's decision to keep the export registry closed indefinitely, China's export restrictions, Russia's implementation of a 40 percent export tax effective at the end of January, and fresh tenders from Pakistan. For the month, Hard Red Winter (HRW) fell \$17 per ton, Hard Red Spring (HRS) rose \$8, Soft Red Winter (SRW) fell \$20, and Soft White (SWW) rose \$33.

TRADE CHANGES IN 2007/2008

Selected Exporters

- **China** is down 500,000 tons to 2.5 million on the institution of export taxes and the elimination of VAT rebates.
- **Pakistan** is up 400,000 tons to 1.0 million due to strong flour exports to Afghanistan.

Selected Importers

- **Pakistan** is up 500,000 tons to 1.0 million on unfavorable weather in newly planted areas and unexpected strong demand.
- **Ukraine** is up 240,000 tons to 250,000 because of large shipments from Russia.

COARSE GRAINS: WORLD MARKETS AND TRADE

PRICES:

Domestic: U.S. corn export prices averaged \$201 per ton in December, up over \$16 from November prices. Strong demand for U.S. corn and tight exportable supplies of foreign feed grains have kept prices firm. Sorghum prices averaged \$205 per ton, up \$15 from November prices, due to continued strong demand, sales, and shipments to the EU-27.

TRADE CHANGES IN 2007/2008

Selected Exporters

- **Brazil corn** is boosted 500,000 tons to a record 9.0 million because of extraordinary demand from the EU-27 for feed grains.
- **Canada corn** is doubled to 400,000 tons, the highest in 8 years, because of a record crop, slowing domestic use, and strong foreign demand. (Imports are cut by 300,000 tons to 2.0 million.)
- **China corn** is slashed by 500,000 tons to 1.0 million, the lowest in 12 years. Recent government actions to curb food price inflation--cancellation of VAT rebates for exports and initiation of an export tax--together with the lack of export quotas for 2008 will severely limit additional trade this year.
- **Paraguay corn** is raised by 400,000 tons to 1.6 million, the second highest ever, based on strong early-season exports to Brazil and the region. (Similarly, **Brazil corn** imports are boosted by 200,000 tons to 950,000.)
- **United States sorghum** is up 200,000 tons to 7.2 million, the highest in 16 years, on the EU-27 demand for GMO-free feed and the pace of commitments.

Selected Importers

- **EU-27 corn** is raised 500,000 tons to 10.0 million, the highest in almost a quarter-century, as shipments continue to be strong in the face of a major feed grain deficit.
- **Israel barley** is cut 100,000 tons to 250,000 after 2 years of diminished imports and evidence of increased use of corn in feed rations.
- **EU-27 sorghum** is up 200,000 tons to a record 3.9 million based on the pace of sales and shipments from the United States.

TRADE CHANGES IN 2006/2007

Selected Exporters

- **Mexico corn** is raised to 200,000 tons (from zero) with updated trade data.

Selected Importers

- Updated trade data boosts two countries to record imports: **Iran corn** at 3.2 million tons (up 200,000 tons) and **Peru corn** at 1.5 million tons (up 228,000 tons).
- **Jordan barley** is bolstered 204,000 tons to 804,000 and **Tunisia barley** is raised 166,000 tons to a record 866,000 showing that high barley prices did not dampen demand.

OTHER NOTES

Stocks: Unless otherwise stated, stock data are based on an aggregate of differing local marketing years and should not be construed as representing world stock levels at a fixed point in time.

Consumption: World totals for consumption reflect total utilization, including food, seed, industrial, feed, and waste; as well as differences in local marketing year imports and local marketing year exports. Consumption statistics for regions and individual countries, however, reflect food, seed, industrial, feed, and waste only.

Trade: All PSD tables are balanced on the different local marketing years. All trade tables contain Trade Year (TY) data which puts all countries on a uniform, 12-month period for analytical comparisons: wheat is July/June; coarse grains, corn, barley, sorghum, oats, and rye

are Oct/Sept; and rice is calendar year. For a complete list of local marketing years, please see the FAS website (<http://www.fas.usda.gov/psdonline/psdAvailability.aspx>).

EU Consolidation: The trade figures starting from 1999/00 represent EU-27 and exclude all intra-trade. For the years 1960/61 through 1998/99, figures are the EU-15 and also exclude all intra-trade. EU-15 member states' data for grains are no longer maintained in the official USDA database. Data for the individual NMS-10, plus Bulgaria and Romania, exists only prior to 1999/00.

Statistics: (1) Wheat trade statistics include wheat, flour, and selected pasta products on a grain equivalent basis. (2) Rice trade statistics include rough, brown, milled, and broken on a milled equivalent basis. (3) Coarse grains statistics include corn, barley, sorghum, oats, rye, millet, and mixed grains but exclude trade in barley malt, millet, and mixed grains.

Unaccounted: This term includes grain in transit, reporting discrepancies in some countries, and trade to countries outside the USDA database.
