CODING AND PUNCHING

SECTION C

GEOGRAPHIC CODE—FINAL

BIRTHS, DEATHS, AND FETAL DEATHS

OCCURRING IN 1960-61

WASHINGTON

FEBRUARY 1961

Abbreviations

A F - Air Force	N - north
BAL - balance	NAT PK - National Park
BOR - borough	NW - northwest
C - city	N Y - New York
CO - county	PK - park
COEXT - coextensive	PT - part
CON - continued	S - south
CT - court	SE - southeast
CTR - center or centre	SPRGS - springs
DIST - district	ST - Saint
E - east	STA - station
FT - fort	STE - Sainte
HGHTS - heights	SW - southwest
INC - including	TWP - township
IND - independent	U S - United States
IS - island	V - village
JCT - junction	VET - Veterans
MET - metropolitan	W - west
MT - mount, mountain

27 Montana-----	135	53 Virgin Islands-----	289

Appendix lists:

Cities with populations of 100,000 or more in 1960-----	291
Unincorporated places classified as urban under special rule, 1960-----	295
Independent cities-----	297
Coextensive cities-----	297

GEOGRAPHIC CODE

INTRODUCTION

The geographic codes shown in this manual are those now in use in the National Office of Vital Statistics (NOVS). They are based on figures published by the U.S. Bureau of the Census in "Final Population Counts," Advance Reports, 1960 Census of Population, Series PC(A1).

The manual is designed to provide for the identification and classification of geographic areas for processing at the national level and to permit the mechanical reproduction of punched cards in State offices for use by NOVS. The manual lists by State all counties; all incorporated urban places in the United States having populations of 2,500 or more according to advance final 1960 census figures; inclusions—certain areas included within the corporate limits of urban places; and unincorporated areas classified as urban under special rule by the Bureau of the Census. The manual also lists municipalities (county equivalents) and principal urban places in Puerto Rico and the Virgin Islands.

CODE STRUCTURE FOR THE UNITED STATES, EXCLUDING ALASKA

The geographic code consists of seven digits arranged as follows:

	<u>No. of digits</u>
State code-----	2
County code-----	2
Population-size group code-----	1
City or other geographic unit code----	2

State codes (first and second digits).—The States are numbered in alphabetical sequence from 01 through 51. However, in the coding operation gaps occur in this sequence for one of two reasons. The six States which have more than 100 counties each have been assigned two or more codes. The counties within the State are then numbered in an 01-99 sequence within each of the codes for the State. Virginia has an additional code assigned to its independent cities. The gaps created by these States in the alphabetical-numerical sequence are listed with the State codes as follows:

<u>State</u>	<u>Gaps in alphabetical- numerical sequence</u>	<u>Geographic codes</u>
Georgia-----	11	60,61
Illinois-----	14	62,63
Kansas-----	17	64,65
Kentucky-----	18	66,67
Missouri-----	26	68,69
Texas-----	44	70,71,72
Virginia-----	47	73,74

GEOGRAPHIC CODE

This provides for recoding the States in proper sequence for tabulating vital statistics by State. Thus in NOVS summary punched cards for Illinois will carry State code 14, which places Illinois cards in normal sorting operations between Idaho (13) and Indiana (15).

States codes 52 and 53 are used for Puerto Rico and the Virgin Islands respectively.

County codes (third and fourth digits).—Counties are numbered in alphabetical sequence within States, following the order appearing in U.S. Census tables. In States having more than 100 counties, the use of a third digit in the county code is avoided by employing more than one State code. In these States, numbering beyond the first 99 counties begins again with a second sequence (01-99), and the county code must be read in conjunction with the State code to identify a specific county. North Carolina and Virginia each contain exactly 100 counties, which are numbered from 00 through 99.

Population-size code (fifth digit).—Codes for the population-size classifications are as follows:

	<u>Code</u>
Places of 1,000,000 or more-----	0
Places of 500,000 to 1,000,000-----	1
Places of 250,000 to 500,000-----	2
Places of 100,000 to 250,000-----	3
Places of 50,000 to 100,000-----	4
Places of 25,000 to 50,000-----	5
Places of 10,000 to 25,000-----	6
Places of 2,500 to 10,000-----	7
All other areas-----	9

City codes (sixth and seventh digits).—These codes serve to identify each city with a population of 10,000 or more according to advance final 1960 census figures. The last two digits of the code for a city are repeated for every inclusion of that city.

CODE STRUCTURE FOR ALASKA

State code (first and second digits).—The code is in alphabetic sequence with those for other States.

Judicial district codes (third and fourth digits).—The judicial districts are identified by grouping the third and fourth-digit codes that have been assigned to the recording districts. For example, the First Judicial District includes recording districts 01 (Haines) through 08 (Wrangell) and the Second Judicial District includes recording districts 21 through 24.

Population-size group codes (fifth digit).—Codes for the population-size classifications are as follows:

	<u>Code</u>
Incorporated places of 2,500 or more-----	1
Spenard village (unincorporated)-----	5
Unincorporated places of less than 2,500 and other specified areas-----	6,7,8,9
Entire recording district or balance of recording district-----	X

Election district codes (sixth and seventh digits).—Beginning with 1960, the election district is the county equivalent. The last two digits of the seven-digit code identify the election districts as follows:

01 Prince of Wales ¹	13 Kodiak
02 Ketchikan ¹	14 Aleutian Islands
03 Wrangell-Petersburg	15 Bristol Bay
04 Sitka	16 Bethel
05 Juneau	17 Kuskokwim
06 Lynn Canal-Icy Straits	18 Yukon-Koyukuk
07 Cordova-McCarthy	19 Fairbanks
08 Waldez-Chitina-Whittier	20 Upper Yukon
09 Palmer-Wasilla-Talkeetna	21 Barrow
10 Anchorage	22 Kobuk
11 Seward	23 Nome
12 Kenai-Cook Inlet	24 Wade Hampton

¹Election district 01 (Prince of Wales) is not separately identified in the code classification. It is included with election district 02 (Ketchikan).
