[^0]electricity retail sales. See Note 2, "Electrical System Energy Losses," at end of section.
g Beginning in 1978, the small amounts of coal consumed for transportation are reported as industrial sector consumption.

R=Revised. NA=Not available.
Notes: - See Note 1, "Energy Consumption Data and Surveys," at end of section. - Totals may not equal sum of components due to independent rounding.

- Geographic coverage is the 50 States and the District of Columbia.

Web Page: See http://www.eia.doe.gov/emeu/mer/consump.html for all available data beginning in 1973.

Sources: Tables 2.6, 3.8c, 4.3, 6.2, 7.6, 10.2b, A4, A5, and A6.

[^0]:    a See "Primary Energy Consumption" in Glossary.
    b Data are estimates. See Table 10.2b for notes on series components.
    c Natural gas only; does not include supplemental gaseous fuels. See Note 3, "Supplemental Gaseous Fuels," at end of Section 4.
    d Does not include the fuel ethanol portion of motor gasoline-fuel ethanol is included in "Biomass."
    e Electricity retail sales to ultimate customers reported by electric utilities and, beginning in 1996, other energy service providers.

    Total losses are calculated as the primary energy consumed by the electric power sector minus the energy content of electricity retail sales. Total losses are allocated to the end-use sectors in proportion to each sector's share of total
