

**Table 2.3 Annual Shipments of Solar Thermal Collectors by Type, 1998 - 2007**  
 (Thousand Square Feet)

| Year | Low-Temperature              |                          | Medium-Temperature |                          | High-Temperature             | Other                        |
|------|------------------------------|--------------------------|--------------------|--------------------------|------------------------------|------------------------------|
|      | Total Shipments <sup>1</sup> | Average per Manufacturer | Total Shipments    | Average per Manufacturer | Total Shipments <sup>2</sup> | Total Shipments <sup>2</sup> |
| 1998 | 7,292                        | 607                      | 443                | 23                       | 21                           | -                            |
| 1999 | 8,152                        | 627                      | 427                | 21                       | 4                            | -                            |
| 2000 | 7,948                        | 723                      | 400                | 25                       | 5                            | -                            |
| 2001 | 10,919                       | 1,092                    | 268                | 16                       | 2                            | -                            |
| 2002 | 11,126                       | 856                      | 535                | 31                       | 2                            | -                            |
| 2003 | 10,877                       | 906                      | 560                | 33                       | 7                            | -                            |
| 2004 | 13,608                       | 1,512                    | 506                | 30                       | -                            | -                            |
| 2005 | 15,224                       | 1,522                    | 702                | 41                       | 115                          | -                            |
| 2006 | 15,546                       | 1,413                    | 1,346              | 38                       | 3,852                        | -                            |
| 2007 | 13,323                       | 1,025                    | 1,797              | 35                       | 33                           | -                            |

<sup>1</sup>Includes shipments of solar thermal collectors to the government, including some military, but excluding space applications.

<sup>2</sup>For high-temperature and other collectors, average annual shipments per manufacturer are not disclosed.

- = No data reported.
