

International Energy Annual 1995

December 1996

Energy Information Administration
Office of Energy Markets and End Use
U.S. Department of Energy
Washington, DC 20585-0660

This report was prepared by the Energy Information Administration, the independent statistical and analytical agency within the Department of Energy. The information contained herein should not be construed as advocating or reflecting any policy position of the Department of Energy or any other organization.

Contacts

The *International Energy Annual* is prepared by the Energy Information Administration (EIA). General direction is provided by W. Calvin Kilgore, Director, Office of Energy Markets and End Use (202/586-1617) and Mark E. Rodekohr, Director, Energy Markets and Contingency Information Division (202/586-1130); with supervision by Louis D. DeMouy, Chief of the International Statistics Branch (202/586-8994).

Questions concerning the contents of this report may be referred to the following analysts:

Project Manager	Michael J. Grillot	(mgrillot@eia.doe.gov,	202/586-6577)
World Energy Overview	Michael J. Grillot	(mgrillot@eia.doe.gov,	202/586-6577)
Petroleum			
Production of Crude Oil and Natural Gas Plant Liquids, Crude Oil Refining Capacity, and Crude Oil Reserves	Patricia A. Smith	(psmith@eia.doe.gov,	202/586-6925)
Consumption and Output of Refined Petroleum Products and Imports and Exports of Crude Oil and Refined Petroleum Products

Electronic Access and Related Database

The *International Energy Annual 1995 (IEA95)* will be available on EIA's CD-ROM, *Energy InfoDisc*, and on the EIA Home Page on the Internet at (<http://www.eia.doe.gov/emeu/iea95/contents.html>) subsequent to the release of the report. The *IEA95* displays on the EIA Home Page will include text and tables. To download the tables or the entire publication, go to the EIA FTP Site (<ftp://ftp.eia.doe.gov/pub/pdf/international/021995.pdf>).

For information on accessing and downloading EIA's more detailed World Energy database, please see the Electronic Access box at the end of the Preface on the next page.

Preface

The *International Energy Annual* presents an overview of key international energy trends for production, consumption, imports, and exports of primary energy commodities in over 220 countries, dependencies, and areas of special sovereignty. Also included are population and gross domestic product data, as well as prices for crude oil and petroleum products in selected countries. Renewable energy reported in the *International Energy Annual* includes hydroelectric power, geothermal, solar and wind electric power and alcohol for fuel.

This report is published to keep the public and other interested parties fully informed of primary energy supplies on a global basis. The data presented have been largely derived from published sources. The data have been converted to units of measurement and thermal values familiar to the American public.

Although EIA has mandatory data collection authority for collecting energy information within the United States, it has no authority to require reporting of data from foreign countries. Data for the *International Energy Annual* must be researched and collected from the most authoritative available sources outside EIA. Because EIA does not have access to the statistical surveys in other countries, it is not able to develop error estimates or revision errors such as might be developed in EIA's domestic surveys.

EIA attempts to identify and collect the best data available for foreign countries. The most authoritative sources are usually the official national statistical reports of a country. However, data from official sources are not always available. Therefore, EIA also uses data from reputable secondary sources such as the international organizations—the United Nations, the International Energy Agency, the World Bank, and others. In addition, EIA uses industry reports, academic studies, trade publications, and other sources.

Many factors beyond EIA's control affect the reliability and integrity of foreign country data. These include a country's level of economic development, commitment to statistical programs, openness with information, and other considerations.

Publication of this report is in keeping with responsibilities given the Energy Information Administration (EIA) in Public Law 95-91/Section 205(a) that states:

The Administrator shall be responsible for carrying out a central, comprehensive, and unified energy data and information program which will collect, evaluate, assemble, analyze, and disseminate data and information....

Electronic Access

The World Energy database for the Energy Information Administration *International Energy Annual*, together with a system for accessing the data, can be downloaded to most personal computers, via the Internet. The database information is more detailed and may be more timely than the information in the printed publication. The printed tables show the most important countries in each category, typically 85 to 125 countries per table. Many of these tables are for 1994. The database has data for over 220 countries, and for 1990 through 1994, with estimates for 1995. Internet access can be obtained through the EIA Home Page on the World Wide Web. The Internet address is: <http://www.eia.doe.gov/emew/world/contents.html>. To use the database, users need Microsoft Windows 3.1 or higher and 8 megabytes of free disk space on their hard drive. The personal computer should be an IBM type, with a 386, 486, or Pentium processor with at least 8 megabytes of random-access memory. Any questions about the EIA Home Page or the World Energy database can be handled by the EIA National Energy Information Center, by telephone at (202)586-8800, or by Internet E-mail at infoctr@eia.doe.gov.

This is a blank page.

WORLD ENERGY OVERVIEW

The *International Energy Annual* presents information and trends on world energy production and consumption for petroleum, natural gas, coal, and electricity. Production and consumption data are reported in standard units as well as British thermal units (Btu). Trade and reserves are shown for petroleum, natural gas, and coal. Data are provided on crude oil refining capacity and electricity installed capacity by type. Prices are included for selected crude oils and for refined petroleum products in selected countries. Population and Gross Domestic Product data are also provided.

World Primary Energy Production Trends

Between 1986 and 1995, the world's total output of primary energy--petroleum, natural gas, coal, and electric power (hydro, nuclear, geothermal, solar, and wind)--increased at an average annual rate of 1.6 percent (Table 2.9). World production increased from 314 quadrillion Btu in 1986 to 361 quadrillion Btu in 1995.

In 1995, petroleum (crude oil and natural gas plant liquids) continued to be the world's primary energy source, accounting for 39.2 percent, or 142 quadrillion Btu, of world primary energy production (Table 2.9). Between 1986 and 1995, petroleum production increased by 7.5 million barrels per day, or 12.5 percent, rising from 60.4 to 67.9 million barrels per day (Tables 2.2 and 2.3). The Middle East had the largest production gain, followed by Western Europe, and Africa. Their combined gains over the period from 1986 to 1995 were 11 million barrels per day. In North America, and in the Eastern Europe and Former U.S.S.R. region, average daily production fell by 1.0 and 5.4 million barrels per day, respectively.

Coal ranked second as a primary energy source in 1995, accounting for 25.3 percent of world primary energy production (Table 2.9). World coal production totaled 5.1 billion short tons--91 quadrillion Btu--in 1995, but it was up only 1.4 percent from the 1986 level of 5.0 billion short tons (Tables 2.1 and 2.9).

Dry natural gas ranked third as a primary energy source, accounting for 21.4 percent of world primary energy

production in 1995 (Table 2.9). Production of dry natural gas was 78.3 trillion cubic feet, or 77 quadrillion Btu, in 1995 (Tables 2.1 and 2.9). Production increased by 14.7 trillion cubic feet from 63.6 trillion cubic feet in 1986, a gain of 23.1 percent

Hydro, nuclear, and other (geothermal, solar, and wind) electric power generation ranked fourth, fifth, and sixth, respectively, as primary energy sources in 1995, accounting for 7.1, 6.5, and 0.4 percent, respectively, of world primary energy production (Table 2.9). Together they accounted for a combined total of 4.8 trillion kilowatthours--51 quadrillion Btu--in 1995 (Tables 2.1 and 2.9). Nuclear electric power generation increased significantly between 1986 and 1995, rising from 1.5 trillion kilowatthours to 2.2 trillion kilowatthours, a 45.1-percent increase. Geothermal, solar, and wind electric power generation also increased significantly over the same period, rising from 34.2 billion kilowatthours to 111.2 billion kilowatthours, a 225-percent increase. Hydroelectric power continued to represent the largest share of primary electric power generation contributing 2.5 trillion kilowatthours in 1995, up 22.8 percent from 2.0 trillion kilowatthours in 1986.

Major Energy Producers and Consumers

In 1995, three countries--the United States, Russia, and China--were the leading producers and consumers of world energy (Tables F1 and E1). These three countries produced 40 percent and consumed 42 percent of the world's total energy.

The United States, Russia, China, Saudi Arabia, and Canada were the world's five largest producers of energy in 1995, supplying 50.3 percent of the world's total energy (Table F1). The next five leading producers of primary energy were the United Kingdom, Iran, Norway, India, and Venezuela, and together they supplied an additional 12.4 percent of the world's total energy. The United States supplied 69.1 quadrillion Btu of primary energy, significantly more than the 39.9 quadrillion Btu produced by Russia, and almost twice as much as the 35.5 quadrillion Btu produced by China.

The United States, China, Russia, Japan, and Germany were the world's five largest consumers of primary energy in 1995, accounting for 51.3 percent of world energy consumption (Table E1). They were followed by Canada, India, the United Kingdom, France, and Italy, which together accounted for an additional 13.5 percent of world energy consumption. The United States consumed 88.3 quadrillion Btu, almost two and a half times the 35.7 quadrillion Btu consumed by China, while Russia consumed 26.8 quadrillion Btu.

Regional Energy Production and Consumption

Comparisons of energy production and consumption by region help to highlight key energy trends since 1986. In North America, the overall production of energy rose by about 10.6 quadrillion Btu between 1986 and 1995 (Table F1). The supply of natural gas, nuclear electric power generation, and coal increased significantly, by 5.9, 3.1, and 3.0 quadrillion Btu, respectively, more than offsetting a 3.4 quadrillion Btu decrease in crude oil production (Tables F4, F7, F5, and F2). Energy consumption in North America increased by 16.9 quadrillion Btu between 1986 and 1995, the second largest increase for any region (Table E1). The largest North American increases occurred in the consumption of natural gas, 6.6 quadrillion Btu, petroleum, 3.4 quadrillion Btu, nuclear electric power, 3.1 quadrillion Btu, and coal, 2.8 quadrillion Btu (Tables E3, E2, E6, and E4).

Overall production of energy in the Central and South America region increased by 7.1 quadrillion Btu between 1986 and 1995, led by increases in crude oil production, 3.7 quadrillion Btu, and hydroelectric power generation, 1.7 quadrillion Btu (Tables F1, F2, and F6). Energy consumption in the Central and South America region increased by 4.3 quadrillion Btu over the same period (Table E1). The largest increases occurred in the consumption of hydroelectric power, 1.7 quadrillion Btu, petroleum, 1.4 quadrillion Btu, and natural gas, 1.0 quadrillion Btu (Tables E5, E2, and E3).

Energy production in Western Europe which had fluctuated in a narrow range between 1986 and 1993, finally began to grow in 1994 (Table F1). In 1995, the level was 3.1 quadrillion Btu higher than in 1986. Gains between 1986 and 1995 were greatest for crude oil, 3.9 quadrillion Btu, nuclear electric power generation, 1.8 quadrillion Btu, and natural gas, 1.7 quadrillion Btu (Tables F2, F7, and F4). These increases more than offset a decrease of 5.4 quadrillion Btu in coal production (Table F5). Western European energy consumption

increased by 4.8 quadrillion Btu between 1986 and 1995 (Table E1). The increase was led by natural gas, 3.5 quadrillion Btu, petroleum, 2.7 quadrillion Btu, and nuclear electric power, 1.8 quadrillion Btu, which together more than offset a sharp, 3.9-quadrillion-Btu drop in coal consumption (Tables E3, E2, E6, and E4).

Between 1986 and 1995, energy production and energy consumption in the Eastern Europe and Former U.S.S.R. region both declined by more than 19 quadrillion Btu (Tables F1 and E1). As a result, this was the only region to experience declines in either energy production or consumption over the period. The decline in energy production was concentrated in crude oil, 11.2 quadrillion Btu, and coal, 7.5 quadrillion Btu, but even natural gas production decreased by 1.1 quadrillion Btu (Tables F2, F5, and F4). Trends in energy consumption in this region were similar to those for energy production (Tables E1, E2, E4, and E3).

Since 1986, energy production in the Middle East increased by almost 17.7 quadrillion Btu, the second largest increase for any region (Table F1). The increase was concentrated in crude oil, 14.3 quadrillion Btu, and natural gas, 2.6 quadrillion Btu (Tables F2 and F4). The increase in energy consumption in the Middle East between 1986 and 1995 was much smaller, only 5.0 quadrillion Btu (Table E1). Natural gas experienced the largest increase, 2.5 quadrillion Btu, followed by petroleum, 2.3 quadrillion Btu (Tables E3 and E2).

Energy production in Africa increased by 6 quadrillion Btu between 1986 and 1995, led by increases in the production of crude oil, 3.7 quadrillion Btu, and natural gas, 1.2 quadrillion Btu (Tables F1, F2, and F4). Energy consumption in Africa grew slowly over the same period, rising by only 2.6 quadrillion Btu, with coal consumption accounting for 1.1 quadrillion Btu of the increase (Tables E1 and E4).

The largest regional increase in primary energy production between 1986 and 1995 occurred in the Far East and Oceania region, where production increased by 21.5 quadrillion Btu (Table F1). Over 59 percent of this increase, 12.8 quadrillion Btu, was accounted for by coal production, with smaller contributions from natural gas, 3.2 quadrillion Btu, and crude oil, 2.3 quadrillion Btu (Tables F5, F4, and F2). Consumption in this region increased by 35.0 quadrillion Btu over the same period, also the largest increase for any region (Table E1). Almost 81 percent of this increase occurred in the consumption of coal, 14.2 quadrillion Btu, and petroleum, 14.1 quadrillion Btu (Tables E4 and E2).

Petroleum

Global production of petroleum (crude oil and natural gas plant liquids) increased by 7.5 million barrels per day between 1986 and 1995, an average annual rate of growth of 1.3 percent (Tables 2.2 and 2.3). Saudi Arabia, the United States, and Russia were the three largest producers of petroleum in 1995. Together, they produced 34.5 percent of the world's petroleum. Production from Iran and Mexico accounted for an additional 10 percent.

In 1995, the United States consumed 17.7 million barrels per day of petroleum--almost 26 percent of world consumption (Table 1.2). Japan ranked a distant second in consumption, with 5.7 million barrels per day, followed by China, Russia, and Germany.

Natural Gas

World production of dry natural gas increased by 14.7 trillion cubic feet, or at an average annual rate of 2.3 percent, over the period from 1986 to 1995 (Table 2.4). Russia was the leading producer in 1995 at 21.0 trillion cubic feet, followed by the United States at 18.8 trillion cubic feet. Together these two countries produced about 51 percent of the world total.

In 1995, the United States, which was the leading consumer of dry natural gas at 21.6 trillion cubic feet, and Russia, which ranked second at 14.5 trillion cubic feet, together accounted for 46 percent of world consumption (Table 1.3). Germany ranked a distant third in consumption, with 3.2 trillion cubic feet, followed by the Ukraine and Canada.

Coal

Coal production experienced the lowest average annual rate of growth of any primary energy source between 1986 and 1995 (Table 2.5). Production only increased by 69 million short tons, or at an average annual rate of less than 0.2 percent, over the period. China was the leading producer in 1995 at 1.478 billion short tons--equivalent to 26.6 quadrillion Btu (Tables 2.5 and F5). The United States was the second leading producer in 1995 with 1.033 billion short tons--equivalent to 22.0 quadrillion Btu. India ranked a distant third at 311 million short tons--equivalent to 5.3 quadrillion Btu, followed closely by Russia, at 310 million short tons--equivalent to 4.9 quadrillion Btu, and Germany at 274 million short tons--equivalent to 2.9 quadrillion Btu. Together, these five

countries accounted for 67 percent of world coal production in 1995 (Table 2.5).

China was also the largest consumer of coal in 1995, using almost 1.5 billion short tons, followed by the United States, India, Russia, and Germany (Table 1.4). These five countries together accounted for 65 percent of world coal consumption.

Hydroelectric Power

The generation of hydroelectric power increased by 458 billion kilowatthours between 1986 and 1995, or at an average annual rate of 2.3 percent (Table 2.6). Canada, the United States, Brazil, Russia, and China were the five largest producers of hydroelectric power in 1995. Their combined hydroelectric power generation accounted for 51 percent of the world total. Canada led the world with 330 billion kilowatthours or 3.4 quadrillion Btu (Tables 2.6 and F6). The United States was a close second with 324 billion kilowatthours or 3.3 quadrillion Btu. Brazil ranked third with 245 billion kilowatthours or 2.6 quadrillion Btu. Russia was fourth with 179 billion kilowatthours or 1.9 quadrillion Btu, just 4 billion kilowatthours more than fifth-ranked China.

Nuclear Electric Power

The generation of nuclear electric power increased by 685 billion kilowatthours between 1986 and 1995, or at an average annual rate of 4.2 percent (Table 2.7). The United States led the world in nuclear electric power generation in 1995 with 674 billion kilowatthours or 7.2 quadrillion Btu (Tables 2.7 and F7). France was second with 359 billion kilowatthours or 3.7 quadrillion Btu and Japan ranked third with 275 billion kilowatthours or 2.8 quadrillion Btu. In 1995, these three countries generated over 59 percent of the world's nuclear electric power (Table 2.7).

Geothermal, Solar, and Wind Electric Power

The generation of geothermal, solar, and wind electric power increased by 77 billion kilowatthours between 1986 and 1995, or at an average annual rate of 14 percent (Table 2.8). The United States led the world in geothermal, solar, and wind electric power generation in 1995 with 76.9 billion kilowatthours. Brazil was second with 7.0 billion kilowatthours, followed by the Philippines with 5.6 billion kilowatthours, Mexico with

5.4 billion kilowatthours, and Italy with 3.6 billion kilowatthours. These five countries accounted for almost 89 percent of the world's geothermal, solar, and wind electric power generation in 1995.

¹ Preliminary.

² The Organization for Economic Cooperation and Development (OECD) includes Australia, Austria, Belgium, Canada, Denmark (including data for Faroe Islands and Greenland), Finland, France, Germany, Greece, Iceland, Ireland, Italy, Japan, Luxembourg, Mexico, Netherlands, New Zealand, Norway, Portugal, Spain, Sweden, Switzerland, Turkey, United Kingdom, and the United States (including data for Guam, Hawaiian Trade Zone, Puerto Rico, and Virgin Islands, U.S.). Refer to Appendix A for a listing of OECD Europe.

³ The Organization of Petroleum Exporting Countries (OPEC) includes Algeria, Indonesia, Iran, Iraq, Kuwait, Libya, Nigeria, Qatar, Saudi Arabia, the United Arab Emirates, and Venezuela.

⁴ European Union (EU) includes Austria, Belgium, Denmark (including data for Faroe Islands), Finland, France, Germany, Greece, Ireland, Italy, Luxembourg, Netherlands, Portugal, Spain, Sweden, and United Kingdom.

⁵ International Energy Agency (IEA) includes Australia, Austria, Belgium, Canada, Denmark (including data for Faroe Islands and Greenland), Finland, France, Germany, Greece, Ireland, Italy, Japan, Luxembourg, Netherlands, New Zealand, Norway, Portugal, Spain, Sweden, Switzerland, Turkey, United Kingdom, and the United States (including data for Guam, Hawaiian Trade Zone, Puerto Rico, and Virgin Islands, U.S.).

Notes: For consistency data reflect 1995 membership (as of December 31, 1995) for all years. The country groups OECD, OECD Europe, EU, and IEA include unified Germany. Sum of components may not equal total due to independent rounding.

Sources: See sources at the end of Sections 3, 4, 5, and 6.

¹ Preliminary.

² United States apparent coal consumption is calculated as: production+imports-exports-stock builds. A different methodology for deriving coal consumption is used in the Monthly Energy Review.

-- Not applicable.

(s) = Value less than 5 thousand short tons.

Notes: Sum of components may not equal total due to independent rounding.

See Glossary for definition of apparent coal consumption.

Sources: See sources at the end of Section 5.

¹ Preliminary.

² There is a discontinuity in this time series between 1988 and 1989; beginning in 1989, pumped storage is removed, and expanded coverage of industrial use of hydroelectric power and of electricity generated from non-electric utilities is included.

--= Not applicable.

(s) = Value less than 50 million kilowatthours.

Notes: Sum of components may not equal total due to independent rounding.

Consumption does not account for thermal equivalent conversion losses.

Data are reported as net consumption as opposed to gross. Net consumption excludes the energy consumed by the generating units.

Sources: See sources at the end of Section 6.

¹ Preliminary.

² There is a discontinuity in this time series between 1988 and 1989 due to the expanded coverage of non-electric utility use of renewable energy beginning in 1989.

-- Not applicable.

(s) = Value less than 50 million kilowatthours.

Notes: Sum of components may not equal total due to independent rounding.

Consumption does not account for thermal equivalent conversion losses.

Data are reported as net consumption as opposed to gross. Net consumption excludes the energy consumed by the generating units.

Sources: See sources at the end of Section 6.

¹ Preliminary.

² The Organization for Economic Cooperation and Development (OECD) includes Australia, Austria, Belgium, Canada, Denmark (including data for Faroe Islands and Greenland), Finland, France, Germany, Greece, Iceland, Ireland, Italy, Japan, Luxembourg, Mexico, Netherlands, New Zealand, Norway, Portugal, Spain, Sweden, Switzerland, Turkey, United Kingdom, and the United States (including data for Guam, Hawaiian Trade Zone, Puerto Rico, and Virgin Islands, U.S.). Refer to Appendix A for a listing of OECD Europe.

³ The Organization of Petroleum Exporting Countries (OPEC) includes Algeria, Indonesia, Iran, Iraq, Kuwait, Libya, Nigeria, Qatar, Saudi Arabia, the United Arab Emirates, and Venezuela.

⁴ European Union (EU) includes Austria, Belgium, Denmark (including data for Faroe Islands), Finland, France, Germany, Greece, Ireland, Italy, Luxembourg, Netherlands, Portugal, Spain, Sweden, and United Kingdom.

⁵ International Energy Agency (IEA) includes Australia, Austria, Belgium, Canada, Denmark (including data for Faroe Islands and Greenland), Finland, France, Germany, Greece, Ireland, Italy, Japan, Luxembourg, Netherlands, New Zealand, Norway, Portugal, Spain, Sweden, Switzerland, Turkey, United Kingdom, and the United States (including data for Guam, Hawaiian Trade Zone, Puerto Rico, and Virgin Islands, U.S.).

⁶ Total energy consumption, as reported here, includes electricity imports and excludes electricity exports. The consumption of electric power by type, as reported in this table, is not adjusted for electricity imports and exports, except for hydroelectric power in the United States. (Consistent with the Monthly Energy Review, net imports of electricity by the United States are assumed to be hydroelectricity and are included in hydroelectric power consumption.) As a result, total energy consumption may not be equal to the sum of the individual fuel types reported in this table.
(s) = Value less than 5 trillion Btu.

Notes: For consistency data reflect 1995 membership (as of December 31, 1995) for all years. The country groups OECD, OECD Europe, EU, and IEA include unified Germany. Sum of components may not equal total due to independent rounding.

Primary energy consumption includes petroleum, natural gas, coal, and net hydroelectric, nuclear, geothermal, solar, and wind electric power. Data for United States also include electricity generated from wood and waste. United States apparent coal consumption is calculated as: production+imports-exports-stock builds. A different methodology for deriving coal consumption is used in the Monthly Energy Review.

Sources: See sources at the end of Sections 3, 4, 5, and 6.

IEA ⁶	17.4	18.4	18.4	60.8	69.3	75.4	82.1	85.7	88.4	89.5

¹ Preliminary.

² Data include the production of crude oil, natural gas plant liquids, refinery gain, and other liquid fuels.

³ The Organization for Economic Cooperation and Development (OECD) includes Australia, Austria, Belgium, Canada, Denmark (including data for Faroe Islands and Greenland), Finland, France, Germany, Greece, Iceland, Ireland, Italy, Japan, Luxembourg, Mexico, Netherlands, New Zealand, Norway, Portugal, Spain, Sweden, Switzerland, Turkey, United Kingdom, and the United States (including data for Guam, Hawaiian Trade Zone, Puerto Rico, and Virgin Islands, U.S.). Refer to Appendix A for a listing of OECD Europe.

⁴ The Organization of Petroleum Exporting Countries (OPEC) includes Algeria, Indonesia, Iran, Iraq, Kuwait, Libya, Nigeria, Qatar, Saudi Arabia, the United Arab Emirates, and Venezuela.

⁵ European Union (EU) includes Austria, Belgium, Denmark (including data for Faroe Islands), Finland, France, Germany, Greece, Ireland, Italy, Luxembourg, Netherlands, Portugal, Spain, Sweden, and United Kingdom.

⁶ International Energy Agency (IEA) includes Australia, Austria, Belgium, Canada, Denmark (including data for Faroe Islands and Greenland), Finland, France, Germany, Greece, Ireland, Italy, Japan, Luxembourg, Netherlands, New Zealand, Norway, Portugal, Spain, Sweden, Switzerland, Turkey, United Kingdom, and the United States (including data for Guam, Hawaiian Trade Zone, Puerto Rico, and Virgin Islands, U.S.).

Notes: For consistency data reflect 1995 membership (as of December 31, 1995) for all years. The country groups OECD, OECD Europe, EU, and IEA include unified Germany. Sum of components may not equal total due to independent rounding.

Sources: See sources at the end of Sections 3, 4, 5, and 6.

¹ Preliminary.

--= Not applicable.

(s) = Value less than 5 billion cubic feet.

Note: Sum of components may not equal total due to independent rounding.

Sources: See sources at the end of Section 4.

¹ Preliminary.

--= Not applicable.

(s) = Value less than 5 thousand short tons.

Notes: Sum of components may not equal total due to independent rounding.

Coal includes anthracite, subanthracite, bituminous, subbituminous, lignite, and brown coal.

Sources: See sources at the end of Section 5.

¹ Preliminary.

² There is a discontinuity in this time series between 1988 and 1989; beginning in 1989, pumped storage is removed, and expanded coverage of industrial use of hydroelectric power and of electricity generated from non-electric utilities is included.

--= Not applicable.

(s) = Value less than 50 million kilowatthours.

Notes: Sum of components may not equal total due to independent rounding.

Generation data consist of both utility and nonutility sources. Data are reported as net generation as opposed to gross. Net generation excludes the energy consumed by the generating unit and excludes generation from pumped storage.

Sources: See sources at the end of Section 6.

¹ Preliminary.

² Data include the production of crude oil and natural gas plant liquids.

³ The Organization for Economic Cooperation and Development (OECD) includes Australia, Austria, Belgium, Canada, Denmark (including data for Faroe Islands and Greenland), Finland, France, Germany, Greece, Iceland, Ireland, Italy, Japan, Luxembourg, Mexico, Netherlands, New Zealand, Norway, Portugal, Spain, Sweden, Switzerland, Turkey, United Kingdom, and the United States (including data for Guam, Hawaiian Trade Zone, Puerto Rico, and Virgin Islands, U.S.). Refer to Appendix A for a listing of OECD Europe.

⁴ The Organization of Petroleum Exporting Countries (OPEC) includes Algeria, Indonesia, Iran, Iraq, Kuwait, Libya, Nigeria, Qatar, Saudi Arabia, the United Arab Emirates, and Venezuela.

⁵ European Union (EU) includes Austria, Belgium, Denmark (including data for Faroe Islands), Finland, France, Germany, Greece, Ireland, Italy, Luxembourg, Netherlands, Portugal, Spain, Sweden, and United Kingdom.

⁶ International Energy Agency (IEA) includes Australia, Austria, Belgium, Canada, Denmark (including data for Faroe Islands and Greenland), Finland, France, Germany, Greece, Ireland, Italy, Japan, Luxembourg, Netherlands, New Zealand, Norway, Portugal, Spain, Sweden, Switzerland, Turkey, United Kingdom, and the United States (including data for Guam, Hawaiian Trade Zone, Puerto Rico, and Virgin Islands, U.S.).

Notes: For consistency data reflect 1995 membership (as of December 31, 1995) for all years. The country groups OECD, OECD Europe, EU, and IEA include unified Germany. Sum of components may not equal total due to independent rounding.

Primary energy production includes petroleum, natural gas, coal, and net hydroelectric, nuclear, geothermal, solar, and wind electric power. Data for United States also include electricity generated from wood and waste.

Sources: See sources at the end of Sections 3, 4, 5, and 6.

¹ Oil production includes crude oil, natural gas plant liquids, other liquids, and refinery processing gains.

² Apparent consumption includes internal consumption, refinery fuel and loss, and bunkering. Also included, where available, are liquefied petroleum gases sold directly from natural gas processing plants for fuel or chemical uses.

(s)=Value less than 500 barrels per day.

Note: Sum of components may not equal total due to independent rounding.

Sources: See sources at the end of this Section.

¹ Jet Fuel includes naphtha-type jet fuel and kerosene-type jet fuel.

² Includes asphalt, coke, aviation gasoline, naphthas, paraffin wax, petrochemical feedstocks, unfinished oils, white spirits, and blending components.

³ Refinery fuel and loss reported in this column as a memo item has been included in the output of the individual petroleum products and should not be added to "Total Output of Refined Petroleum Products".

(s)=Value less than 500 barrels per day.

Note: Sum of components may not equal total due to independent rounding.

Sources: See sources at the end of this Section.

¹ Jet Fuel includes naphtha-type jet fuel and kerosene-type jet fuel.

² Includes asphalt, coke, aviation gasoline, naphthas, paraffin wax, petrochemical feedstocks, unfinished oils, white spirits, and blending components.

³ Apparent consumption includes internal consumption, refinery fuel and loss, and bunkering. Also included, where available, are liquefied petroleum gases sold directly from natural gas processing plants for fuel or chemical uses.

(s)=Value less than 500 barrels per day.

Note: Sum of components may not equal total due to independent rounding.

¹Calendar day basis.

²United States data are as of January 1, 1995. Refinery cracking and reforming data for the United States are available only on a stream day basis. These figures have been converted to calendar days by reducing the stream day data by 5 percent. Thus, the United States cracking and reforming data are estimated.

--=Not applicable.

Note: Sum of components may not equal total due to independent rounding.

¹ Includes liquefied natural gas.

² Includes stock changes.

(s) = Value less than 500 million cubic feet.

Note: Sum of components may not equal total due to independent rounding.

¹ Primary coal includes all coal mined and, when necessary, washed and sorted.

² Secondary coal (e.g. coke, briquets), is derived from primary coal.

Note: Sum of components may not equal total due to independent rounding.

Sources: See sources at the end of this Section.

¹ Includes coke.

² Sum of production plus imports minus exports (from this Table) minus stock change.

³ United States apparent coal consumption differs from that published in the Monthly Energy Review (MER). Consumption was 19,614 trillion Btu in the October 1996 issue of the MER.

(s) = Value less than 0.5 trillion btu.

Note: Sum of components may not equal total due to independent rounding.

¹ Preliminary.

² U.S. data include purchases from nonutilities.

--= Not applicable.

(s) = Value less than 50 million kilowatthours.

Notes: Sum of components may not equal total due to independent rounding.

Thermal generation consist of electricity generated from coal, oil, and gas.

Generation data consist of both utility and nonutility sources.

Sources: See sources at the end of this Section.

¹ Preliminary.

² There is a discontinuity in this time series between 1988 and 1989 due to the expanded coverage of non-electric utility use of renewable energy beginning in 1989.

--= Not applicable.

(s) = Value less than 50 million kilowatthours.

Notes: Sum of components may not equal total due to independent rounding.

Consumption equals generation plus imports minus exports minus distribution losses.

Sources: See sources at the end of this Section.

¹ Percentage of sulfur contained by gross weight.

--=Not applicable.

(s)=No significant volume of exports.

Note: Most foreign crude oil prices are for the available date that is closest to January 1 of the year. The prices for crude oils from Brunei and Malaysia and the United States prices are averages for the month of January. The foreign crude oils are free on board (f.o.b.) at the port of lading. The United States refiner acquisition cost of imported crude oil includes all charges associated with the acquisition, transportation, and storage of imported crude oil up to the time that the oil is booked into the United States refineries.

¹Data are for the available time period that is closest to 1/1/96. Daily, monthly, quarterly, and annual data are averages. (1Q=first quarter)

²Liquefied petroleum gas (LPG) prices refer to residential propane or a mixture of propane and butane.

³Price is for regular gasoline.

--=Not applicable.

Note: Comparisons between prices and price trends in different countries require care. They are of limited validity because of fluctuations in exchange rates; differences in product quality, marketing practices, and market structures; and the extent to which the standard categories of sales are representative of total national sales for a given period.

¹ Data for the United States are from the Energy Information Administration.

² World Oil has data for the Czech Republic and Slovakia. The Oil and Gas Journal only presents data for Former Czechoslovakia.

³ The Oil and Gas Journal and World Oil did not present disaggregated data for the Other Republics of the Former U.S.S.R.. World Oil presented data for Russia (158 billion barrels of crude oil and 1.7 trillion cubic feet of natural gas) and aggregated data for the Other Republics of the Former U.S.S.R. (32 billion barrels of crude oil and 0.2 trillion cubic feet of natural gas).

⁴ Includes one-half of the reserves in the Neutral Zone.

NA = Not Available

(s) = Value less than 50 million barrels of crude oil or less than 50 billion cubic feet of natural gas.

Notes: Sum of components may not equal total due to independent rounding. All reserve data except those for the Former U.S.S.R. and natural gas reserves in Canada are proved reserves. Former U.S.S.R. data are "explored reserves," which include proved, probable, and partially possible reserves.

¹ World Energy Council definition of "Proved Recoverable Reserves": Proved Recoverable Reserves are the tonnage of Proved Amount in Place that can be recovered (extracted from the earth in raw form) under present and expected local economic conditions with existing available technology.

² Data represent both measured and indicated tonnage, as of January 1, 1996 (equated to December 31, 1995). The U.S. term "measured" approximates the term "proved" used by the World Energy Council. The U.S. "measured and indicated" data have been combined prior to depletion adjustments and cannot be recaptured as "measured"

³ This excludes estimates for Croatia of 7 million short tons of recoverable anthracite and bituminous and 36 million short tons of recoverable lignite for total recoverable coal of 43 million short tons.

⁴ This includes an estimate for Kyrgyzstan of 895 million short tons of recoverable lignite.

⁵ No data are available for subbituminous reserves. This quantity is not included.

⁶ No data available.

- = Not applicable

(s) = Value less than 500,000 short tons.

Notes: Formerly entitled "World Estimated Recoverable Reserves of Coal." The estimates in this table are dependent on the judgment of each reporting country to interpret local economic conditions and its own mineral assessment criteria in terms of specified standards of the World Energy Council. Consequently, the data may not all meet the same standards of reliability and some data, including the Energy Information Administration's (EIA)'s, may not represent reserves of coal that are known to be recoverable under current economic conditions and regulations. Some data, including the EIA's, represent estimated recovery rates for highly reliable estimates of coal quantities in the ground that have physical characteristics like those of coals currently being profitably mined. Further, data in this table may represent different base years. Data for the U.S. represent recoverable coal estimates as of December 31, 1995. Data for other countries are as of December 31, 1993, the most recent period for which they are available. The Energy Information Administration does not certify the international reserves data but reproduces the information as a matter of convenience for the reader. Sum of components may not equal total due to independent rounding.

-- Not applicable.

Notes: The data presented in this table are obtained by converting the gross domestic product (GDP) for each country measured in 1987 foreign currency units to U.S. dollars using 1987 annual average foreign currency market exchange rates. GDP figures theoretically should be converted by using purchasing power parity (PPP) rates to avoid the problem that the market exchange rate for a foreign currency is not a precise reflection of the purchasing power of that currency. In practice, it is often difficult to find generally agreeable PPP rates for some countries.

Conversion Factors and Heat Contents

Table C1 General Conversion Factors

Product Unit	Equivalent
Refined Petroleum Products	
Barrels per Metric Ton	
Asphalt	6.06
Distillate Fuel Oil	7.46
Gasoline, Aviation	8.90
Gasoline, Motor	8.53
Greases	6.30
Jet Fuel, Kerosene-Type	7.93
Jet Fuel, Naphtha-Type	8.27
Kerosene	7.73
Liquefied Petroleum Gas (LPG)	11.60
Lubricants	7.00
Miscellaneous Products	8.04
Naphthas	8.22
Natural Gas Liquids (NGL)	10.40
Natural Gasoline	10.00
Paraffin Oil	7.14
Paraffin Wax	7.87
Petrolatum	7.87
Petroleum Coke	5.51
Residual Fuel Oil	6.66
White Spirits	8.50
Crude Oil	
Barrels per Metric Ton	See Table C2 on next page.
Liquid Fuels	
42 U.S. gallons	1 barrel
1 cubic meter	6.289 barrels
159 liters	1 barrel
Gaseous Fuels	
35.315 cubic feet	1 cubic meter
Solid Fuels	
1 Long Ton	1.120 short tons
1 Metric Ton	1.102 short tons
Heat	
1 Exa (10 ¹⁸) Joule9478 Quadrillion (10 ¹⁵) Btu
1 Quadrillion (10 ¹⁵) Btu	1.055056 Exa (10 ¹⁸) Joules

--= Not applicable.

Note: There is no generally accepted practice for evaluating the thermal conversion rates for power plants that generate electricity from hydroelectric sources. Therefore, estimates of the prevailing annual average heat content for fossil-fueled, steam-electric power plants are used to evaluate the heat content for hydroelectric power. By using that factor, it is possible to evaluate fossil fuel requirements for replacing those sources during periods of interruption such as droughts.

Sources: See sources at the end of Section 6.

Note: The average heat content of electricity generated by nuclear electric power plants is calculated by dividing the heat content of electricity consumed in nuclear generating units (3,412 Btu per kilowatthour) by the estimated efficiency factor (the ratio of output to input) for each nuclear power plant.

Sources: See sources at the end of Section 6.

Note: There is no generally accepted practice for evaluating the thermal conversion rates for power plants that generate electricity from wind and solar thermal sources. Therefore, estimates of the prevailing annual average heat content for fossil-fueled, steam-electric power plants are used to evaluate the heat content for wind and solar thermal power.

Appendix D

**Oil and Gas Market
Chronology: 1995**

Oil and Gas Market Chronology: 1995

The following chronology lists international events of significance to the world oil and natural gas markets in 1995. Sources include: *Dallas Morning News (DMN)*; *Dow Jones (DJ)*; *Energy Compass (EC)*; *Financial Times (FT)*; *New York Times (NYT)*; *Petroleum Intelligence Weekly (PIW)*; *Platt's Oilgram News (PON)*; *Wall Street Journal (WSJ)*; *Washington Post (WP)*; *Washington Times (WT)*; and *Weekly Petroleum Argus (WPA)*.

- Jan. 1** Almost 70 percent of Petroperu's work force strikes to protest the government's planned privatization of the state-owned oil company. Petroperu's gradual privatization is scheduled to begin with the sale of the 102,000-barrel-per-day Pampilla refinery near Lima. (*DJ*)
- Jan. 14** Mexico pledges profits from state-owned Pemex's \$7-billion-per-year oil revenues in an effort to secure U.S. congressional approval of \$40-billion worth of loan guarantees. Subsequently, President Clinton approved a \$20-billion U.S. aid package for Mexico. (*DMN*)
- Jan. 17** An Iranian press report states that Iran will sign a contract to supply Pakistan with 1.6 billion cubic feet per day of natural gas. In another agreement, Qatar will supply a similar amount of gas to Pakistan starting in 1998 through a new pipeline which will connect to the proposed Iranian-Pakistani line. (*DJ*)
- Jan. 17** In the Japanese port city of Kobe, an earthquake measuring 7.2 on the Richter scale kills over 5,000 people. Three major oil refineries with a combined capacity of roughly 400,000 barrels per day are damaged. (*EC, DJ*)
- Jan. 18** Press reports state that Iraqi President Saddam Hussein survived a January 5 coup attempt. Approximately 20 senior Iraqi air force and army officers reportedly were executed on January 7 for their participation in the plot, which had targeted Saddam and his eldest son. (*DJ*)
- Jan. 18** The military-backed Algerian government rejects a peace proposal submitted by the militant Islamic Salvation Front (FIS). The rejection is followed by the assassination of a government lawmaker and two car bomb explosions in Algiers, which kill 4 people and injure dozens more. (*DJ*)
- Jan. 19** Enron Corporation signs a letter of intent with Qatar to work on a \$4-billion liquefied natural gas (LNG) project. Starting in 1998, a projected 5 million tons of LNG per year from Qatar's large North Dome gas field would be shipped under contract to India and Israel. (*DJ*)
- Jan. 19** The Ukraine's parliament approves construction of the controversial \$3.4-billion, 800,000-barrel-per-day Odessa oil terminal. Plans were halted in 1993 because of criticism of the terminal's expense and potential environmental impact. If completed, the Ukraine will use the Odessa terminal to receive oil imports from the Middle East and the Black Sea in an effort to end its dependence on Russian oil imports. (*DJ*)
- Jan. 26** Colombian Finance Minister Guillermo Perry announces that new oil wells drilled in 1995 will be exempt from the government-imposed \$1-per-barrel "war tax." The tax is used to pay for military protection of the country's oil industry infrastructure. In the past, some foreign oil company officials criticized the tax on the grounds that it discouraged foreign investment. (*DJ*)
- Jan. 27** Ecuadorean President Sixto Duran-Ballen declares a national state of emergency after Peru allegedly stages cross-border attacks in the jungle-covered Cordillera del Condor region. The mountainous area borders oil-rich land lost by Ecuador during a 1941 war with Peru. (*DJ*)
- Jan. 30** Norway's Statoil announces that a newly-formed consortium of 11 oil companies will develop a plan to supply Norwegian natural gas to the European continent. Three Norwegian companies recently signed a contract with Gaz de France to bring 1.4 trillion cubic feet of Norwegian gas to France between 2001 and 2027. (*DJ*)

- Feb. 8** In Nigeria, General Sani Abacha dissolves his 30-member Cabinet in an apparent effort to increase support for the military dictatorship which was installed during a November 1993 coup. *(DJ)*
- Feb. 8** British Petroleum agrees to pay \$3.9 million to settle state and federal claims which arose from a 1990 oil tanker accident. The resulting spill dumped almost 10,000 barrels of oil into California coastal waters. *(DJ)*
- Feb. 13** Royal Dutch/Shell Group, Texaco, and Danish Maersk announce plans to redevelop Dan Felt, Denmark's oldest and largest oil field. The companies expect to invest close to \$1 billion over a five-year period in order to boost the field's current 60,000-barrel-per-day output. *(WSJ)*
- Feb. 14** Norway offers 56 oil blocks during the start of the country's second largest concession round ever. Some of the blocks are in water depths of 5,000 feet. *(FT)*
- Feb. 17** Peru and Ecuador agree to a cease-fire in an attempt to end their three-week-old border dispute, but, shortly thereafter, fighting resumes. Peru is forced to suspend its oil exports of 27,000 barrels per day following the cutoff of 36,000 barrels per day of Oriente crude oil normally supplied to Peru by Ecuador. *(DJ, WPA)*
- Feb. 20** Ecopetrol, Colombia's state-owned oil company, announces the discovery of a large oil field in central Colombia. Preliminary estimates of the new field's reserves are around 3.9 billion barrels. The next day, Colombian President Ernesto Samper inaugurates production at the Cusiana and Cupiagua fields, which contain an estimated 2 billion barrels of oil. *(DJ)*
- Feb. 21** British Petroleum announces its first oil discovery in Vietnam. The find, which is described as being potentially commercial, is located in the offshore South Con Son Basin. The announcement follows recent oil discoveries by Japan's Mitsubishi, Malaysia's Petronas, and France's Total. *(DJ)*
- Feb. 23** In Angola, an international consortium of companies, including Chevron, Italy's Agip, and France's Total, sign an agreement to conduct offshore, deep-water, oil exploration. *(DJ)*
- Feb. 23** British Petroleum and Norway's Statoil, the largest members of the Caspian Sea development consortium, reject Iran's bid to acquire a 5 percent share offered by the State Oil Company of Azerbaijan (SOCAR). *(DJ)*
- Feb. 26** Saudi Arabia and Yemen announce that their 60-year-old border dispute over potentially oil-rich land will be solved by a joint committee which will demarcate the 1,300-mile border. The process is expected to take up to a year and will include establishing mutually acceptable boundaries in the Red Sea. *(DJ)*
- Feb. 27** The U.S. Government announces its support for a Caspian Sea oil export pipeline route which bypasses Russia and Iran. The U.S. State Department says that the U.S. Government supports a pipeline route through Armenia, Georgia, and Turkey. *(DJ)*
- Feb. 28** The Pentagon announces that it monitored Iranian installation of surface-to-air Hawk missiles in the Strait of Hormuz. The Iranians also have taken possession of and fortified the nearby Abu Musa and the Tunb Islands, which are claimed by both Iran and the United Arab Emirates (UAE). *(DJ)*
- March 1** Argentina's Yacimientos Petroliferos Fiscales SA (YPF) announces that it will acquire Dallas-based Maxus Energy for \$745 million. *(WSJ)*
- March 7** Armenia's Defense Ministry states that Azerbaijan has broken an eight-month cease-fire agreement by attacking four villages in northeastern Armenia with artillery and tanks. Armenia's Defense Ministry also says that Azerbaijan has moved from 'border provocations to full-scale war.' Azerbaijan's Defense Ministry denies the charges and accuses Armenia of initiating the skirmish. *(DJ)*
- March 10** Nigeria's military government arrests almost 3 dozen military officers and civilians for their participation in a March 1 coup attempt. *(DJ, FT)*

- March 14** In Azerbaijan, a coup attempt led by Deputy Interior Minister Rovshan Dzhavadov's 3,000-man special police force (OMON) begins. President Haydar Aliyev states that "Azerbaijan is again on the brink of civil war." Subsequently, Dzhavadov is killed after three days of fighting. This is the second OMON coup attempt since October 1994. (*DJ, FT*)
- March 15** President Clinton signs an Executive Order which blocks Conoco's recent \$1-billion deal to develop the Iranian Sirri A and E offshore oil fields. Under current regulations, U.S. companies are allowed to purchase Iranian crude oil as long as it is not imported into the U.S. (*FT*)
- March 15** Ireland announces that Chevron, Phillips, Occidental, and Marathon were awarded exploration blocks in the country's first bidding round in the offshore Porcupine basin. The basin holds an estimated 80 million barrels of oil. (*FT, DJ*)
- March 18** Approximately 500 Kuwait Oil Company workers begin a strike to demand promotions and pay increases for Kuwaiti oil workers. About 68 percent of all Kuwaiti oil industry jobs are held by Kuwaitis. The strike lasts 7 days, during which oil production is cut by about 50,000 barrels per day. (*FT, NYT*)
- March 20** About 35,000 Turkish troops invade northern Iraq in search of suspected Kurdish Workers Party (PKK) bases which, according to Turkey, contain an estimated 2,000 to 3,000 PKK terrorists. The Iraqi territory which Turkey invaded is presently under U.N. protection from potential Iraqi attacks on Kurds. (*FT*)
- March 20** About 10,000 Venezuelan and Colombian troops begin massing in an effort to secure the 1,400-mile border between the two countries. The military action follows a recent cross-border raid by Colombian terrorists which killed 8 Venezuelan marines. (*FT*)
- March 20** Nigerian dictator Sani Abacha appoints new cabinet ministers six weeks after his February 8 dissolution of his previous cabinet. Dan Etete replaces Don Etiebet as the country's new oil minister. (*FT*)
- March 22** Leftist rebels bomb a section of Colombia's 230,000-barrel-per-day Cano Limon-Covenas pipeline. Roughly 10,000 barrels per day of oil is spilled into the Magdalena River. Analysts estimate that the pipeline has spilled over 1.2 million barrels of oil as a result of 350 terrorist attacks since 1986. (*DJ*)
- March 24** Chevron and the Nigerian National Petroleum Corporation begin their \$569-million gas gathering project at Escravos. Production is anticipated to reach 170 million cubic feet of gas per day after the project comes on stream in mid-1997. (*FT*)
- March 25** In Algeria, roughly 800 members of the Armed Islamic Group (GIA) are killed during an ambush by government troops. The GIA is one of the main terrorist groups fighting the military-backed government in a civil war which has claimed over 30,000 lives since 1992. (*FT*)
- March 26** Iraqi Foreign Minister Tariq Aziz rejects a U.S. and British proposal which would have allowed Iraq to sell \$2-billion worth of oil in order to obtain money for humanitarian relief efforts. Aziz says that the monetary restriction represents a violation of Iraqi sovereignty. (*FT*)
- March 27** Territorial disputes over the potentially oil-rich Spratly Islands flare as the Philippines seizes four Chinese fishing vessels and destroys Chinese marker buoys. Taiwan states that it will increase its military presence in the Islands, which are claimed by Vietnam, Malaysia, the Philippines, China, Taiwan, and Brunei. This announcement comes after Vietnam recently accused Taiwan of firing on a Vietnamese cargo vessel. (*FT*)
- March 28** Jordan's Minister of Energy and Mineral Resources Samih Darwazah announces the formation of a new national oil company. The company's primary goal will be to raise Jordan's natural gas production to 60 million cubic feet per day and optimize the country's use of gas imports from Egypt, which are expected to begin in 1999. (*FT*)
- March 30** Peru and Ecuador begin demilitarizing the mountainous Cordillera del Condor region after a March 2 cease-fire agreement ends a month-long border dispute. (*DJ, FT*)

- March 30** During the United Nations (U.N.) Security Council's periodic review of Libyan sanctions, the U.S. seeks support for an international embargo on purchases of Libyan crude oil. The U.S. effort is a response to continued Libyan refusals to extradite two men suspected of carrying out the 1988 Pan Am bombing in which 270 people died. *(WP, FT)*
- April 3** Azerbaijan's state-owned oil company, SOCAR, offers to sell Exxon a quarter of its remaining 20 percent share in the \$8-billion Caspian Sea development project. SOCAR recently had promised the stake to Iran, but was forced to abrogate its agreement with Iran under pressure from other members of the development consortium. *(FT, WSJ)*
- April 6** A \$102-million demercaptanization plant built by the Kazak and Chevron joint venture, Tengizchevroil, begins operation. The plant removes noxious sulfur compounds which adversely affected oil shipments from the \$40-billion Tengiz oil project through Russian export pipelines. *(DJ)*
- April 11** Iran's government-run radio states that "Tehran reserves its ... rights on the basis of the legal status of the Caspian Sea. Caspian coastal states cannot unilaterally exploit its resources because the oil fields are interconnected." National Iranian Oil Company executive Mehdi Hosseini subsequently says that Iran will not allow a swap deal for early Caspian Sea oil production unless it holds equity in the development project. *(FT, PON)*
- April 16** Egypt signs an agreement in principle to construct a pipeline to carry natural gas from Egypt's offshore Timsah and Balantim non-associated gas fields to Israel via the northern Sinai Peninsula. *(FT)*
- April 17** In Ecuador, a two-day national strike involving workers of state-owned Petroecuador begins. The strike is in protest of government plans to privatize numerous state-owned companies and to contract out an expansion of the 300,000-barrel-per-day Transecuadorean pipeline to 450,000 barrels per day. The \$600-million expansion of the Trans-Ecuadorean pipeline would eliminate Ecuador's reliance on the 40,000-barrel-per-day Colombian Trans-Andean pipeline, which carries crude oil from Ecuador's Oriente fields to Colombia's Pacific port at Balao. *(DJ)*
- April 18** The Iraqi parliament formally rejects a U.N. proposal which would have allowed Iraq to sell up to \$2-billion worth of oil every 6 months for humanitarian purposes. Iraq's rejection is based on the grounds that the proposal violates Iraqi sovereignty. The U.N. had insisted that its representatives be on-site to hand out food and other humanitarian items paid for by the oil revenues. *(DJ)*
- April 20** In Colombia, leftist National Liberation Army (ELN) rebels kidnap two Italian oil engineers. This follows a similar occurrence in December 1994 in which two Swedish oil engineers were kidnapped. On many occasions, the ELN has kidnapped the expatriate employees of foreign multinationals and held them for ransom. *(DJ)*
- April 24** Jordan and Iraq announce plans to build a 370-mile, 100,000-barrel-per-day pipeline which would transport Iraqi crude oil to Jordan's refinery at Zarqa. A 200-mile extension to Jordan's Red Sea port at Aqaba also is planned. Jordanian officials state that pipeline construction may begin in 1995, but that the pipeline will not become operational until after U.N. sanctions against Iraq are lifted. *(WPA)*
- April 24** In Ecuador, Huaorani Indians peacefully take over oil wells operated by U.S.-based Maxus Energy. The Indians and Maxus had reached an earlier agreement in which the Indians would provide labor for the wells in exchange for economic and development assistance from Maxus. The takeover apparently is part of a dispute with the company as to the terms of the agreement. *(DJ)*
- April 24** Nigeria's government decides to pay \$16.67 million per month until its total \$600-million debt to the Nigerian National Petroleum Corporation's (NNPC) foreign partners is paid off. The NNPC's foreign partners include Agip, Chevron, Elf, Mobil, and Shell. The government also states that it will promptly pay over half of its \$40-million debt owed to domestic tanker owners who transport crude oil to refineries within Nigeria. *(DJ)*
- April 27** Russia signs an agreement with Iraq to help develop Iraq's large Rumaila and Kurna oil fields. The two fields have the potential to produce over 1 million barrels per day. Recently, Russia has called for an easing of U.N. sanctions on Iraq, which still owes Russia an estimated \$10 billion for defense-related purchases in the 1980s. The new accord calls for the creation of upstream joint ventures, refinery construction, and the expansion of Iraq's downstream oil and gas transportation networks. *(FT, DJ)*

- April 28** A large gas pipeline explosion occurs in Russia's northern Komi Republic. Russia's state-owned natural gas company, Gazprom, states that the explosion, which was caused by a leaking gas pipeline, engulfed almost 175 million cubic feet of gas, resulting in a fireball reaching 25,000 feet. Gazprom recently reported that 34 gas pipeline accidents occurred in 1994. Most of these were related either to corrosion or mechanical failure. *(FT, DJ)*
- May 2** Vietnam's first natural gas-fired electric power plant begins operation. The Ba Ria station, near Ho Chi Minh City, is powered by associated gas from the Bach Ho oil field, located 80 miles offshore. Vietnam eventually plans to create a national gas grid comprising other offshore oil and gas fields. *(DJ)*
- May 4** In the central Algerian town of Ghardaia, five foreign pipeline specialists are killed in an attack by Islamic militants. The attack comes despite increased military security in the country's main oil producing areas. The murdered workers were helping to build the \$2.5-billion Gazoduc Maghreb Europe natural gas pipeline, which is anticipated to ship natural gas to Spain and Portugal by mid-1996. *(DJ, FT)*
- May 4** Through the end of 1995, Russia and Cuba agree to swap 60,000 barrels per day of oil for 1 million tons of raw sugar. Russian oil swaps for Cuban sugar began during the Soviet era. *(DJ)*
- May 6** Angolan President Jose Eduardo dos Santos and Jonas Savimbi, the rebel leader of the National Union for the Total Liberation of Angola (UNITA), sign a peace treaty formally ending the country's 20-year-old civil war. Both sides agree to form a "working partnership" which keeps dos Santos as President, but allows for power-sharing in other areas of government. *(DJ)*
- May 8** President Clinton signs an executive order imposing economic trade sanctions on Iran. The order, which takes effect in one month, prohibits U.S. citizens from trading goods or services with Iran. U.S. companies recently had been selling approximately \$150-million worth of oil equipment annually to Iran. Crude oil purchases by U.S. companies and their overseas subsidiaries also are affected by the order. *(DJ, FT)*
- May 10** In the North Sea's Norwegian sector, Conoco inaugurates the world's largest floating oil production platform. The facility will be used at the Heidrun field, which contains an estimated 750 million barrels of oil and 1.6 trillion cubic feet of natural gas. *(FT, PON)*
- May 11** The U.S. Navy, during its enforcement of the U.N.-backed blockade of Iraq, discovers an attempt by a Honduran-flagged ship to smuggle Iraqi oil to international markets. The ship is stopped as it sails from the Iraqi port at Khor Zubayr with roughly 21,000 barrels of diesel oil. Since October 1994, the U.S. Navy has stopped 13 other ships involved in smuggling efforts. *(DJ)*
- May 11** In Ecuador, Texaco agrees to "social compensations" involving the clean-up of environmental damage from the company's oil operations in Ecuador's Amazon Basin. Texaco currently faces a related \$1-billion lawsuit filed by two indigenous Ecuadorean Indian groups. *(FT)*
- May 12** In an Iranian demonstration of the country's potential oil production capacity, officials boost output to just under 4.1 million barrels per day during a one-week test. Production is raised primarily through increased gas injection at onshore fields. *(DJ, PON)*
- May 15** An estimated 25,000 Venezuelan oil workers stage a one-day strike in the western state of Zulia, which accounts for about 1.2 million barrels per day of the country's total 2.7 million barrels per day of crude oil output. The government subsequently agrees to most of the strikers' demands, which include a \$2.94-per-day bonus. The settlement averts a planned national strike which was scheduled for later in the week. *(DJ, PON)*
- May 16** In the South China Sea, Chinese ships block a Philippine warship *en route* to the widely contested Spratly Islands. The Philippine ship was carrying several dozen international journalists to witness Chinese construction on one of the disputed reefs. The incident marks a continuing escalation of tensions among China, the Philippines, Taiwan, Vietnam, Malaysia, and Brunei, all of which lay claim to the potentially oil-rich islands. Also, recent official Chinese maps include Indonesia's 45-trillion-cubic-foot Natuna gas field as part of China's claims. *(DJ, FT)*

- May 18** In Angola, Front for the Liberation of the Enclave of Cabinda (FLEC) rebels stage an attack which kills over a dozen Angolan government soldiers and destroys a military artillery embankment near Chevron's fortified onshore oil facilities. Chevron's 400,000-barrel-per-day production from the Angolan enclave accounts for almost two-thirds of the country's total oil output. FLEC did not participate in the recent peace negotiations between the government and UNITA. *(DJ)*
- May 19** In the United Kingdom sector of the North Sea, over a dozen Greenpeace activists occupy Shell's old Brent Spar oil platform. With the British government's approval, the company had planned to sink the platform at its present site rather than taking the more expensive option of towing the platform onshore for disposal. Shell says the latter option could put fishing areas at risk. Greenpeace states that the platform contains over 100 tons of toxic sludge as well as 30 tons of radioactive material and should be disposed of onshore. *(DJ)*
- May 24** In Yemen, Total signs a \$5-billion natural gas development deal to export associated gas from central Yemen's Marib and Jouf blocks. The project will involve the construction of a \$2-billion LNG plant and \$3-billion worth of pipelines connecting the gas fields to export terminals at Ras Amran and Aden. *(DJ)*
- May 24** Three weeks after the start of a strike at Petrobras, the Brazilian national oil company, the Brazilian army takes control of four of the country's 11 refineries. Petrobras estimates that as of mid-May, crude oil production had fallen to 40 percent of normal and refining to only 19 percent of usual levels. *(DJ, FT, PON)*
- May 28** Following a meeting between Iranian and Omani energy officials, the Iranian Republic News Agency announces that Iran is willing to cooperate with Oman in the development of the estimated 1-trillion-cubic-foot Hengam natural gas and condensate field located in the Strait of Hormuz. *(DJ)*
- May 29** On Russia's Sakhalin Island, a 7.5-magnitude earthquake traps an estimated 2,000 people under debris in the town of Neftegorska. In addition to destroying most buildings in the 3,000-person town, the quake broke a 30,000-barrel-per-day oil pipeline in 17 places. Sakhalin Island is the location of several large, proposed international oil and gas exploration projects. *(DJ)*
- June 2** The hiring of replacement workers leads to a return to work by roughly 45,000 employees of Brazil's state-owned Petrobras ending a four-week-long strike to demand higher wages and to oppose the government's intended privatization plans. Shortly thereafter, the Brazilian congress votes to end Petrobras' monopoly over the country's oil operations. *(WSJ, NYT)*
- June 9** Azerbaijan's SOCAR, Russia's Lukoil, Italy's Agip, and U.S.-based Pennzoil sign an agreement to develop Azerbaijan's Karabakh oil field. The Caspian Sea oil field contains total reserves estimated at 600 million barrels. *(DJ)*
- June 13** Kazakstan and Turkey sign an agreement to build a pipeline which would export roughly 80,000 barrels per day of Kazak crude oil through Turkey. Project financing and a construction timetable remain to be determined. If built, the new pipeline would lessen Kazakstan's reliance on Russia's over-utilized oil pipeline system. *(DJ)*
- June 14** After the semi-annual meeting of the Organization of Petroleum Exporting Countries (OPEC) in Vienna, President Ida Bagus Sudjana discloses the Organization's intention to roll over its present crude oil production ceiling of 24.52 million barrels per day. The announcement is followed by a trip to Norway by Saudi Arabian Oil Minister Hisham M. Nazer. Upon arriving, the Saudi Minister asks Norwegian Minister of Industry and Energy Jens Stoltenberg to restrain his country's oil production in the hopes of stabilizing world oil prices. *(FT, DJ)*
- June 17** In Angola, rebel UNITA leader Jonas Savimbi is offered the position of vice president in the country's new government. Also, the first contingent of over 7,000 U.N. peace keepers arrives to ensure stability. *(DJ)*
- June 19** According to the OPEC News Agency, Iran begins operations at its Abadan oil loading terminal for the first time in 15 years. Prior to its near destruction during the Iran-Iraq War, Abadan served as a key Iranian port in the northern Persian Gulf. *(DJ)*

- June 20** Following international pressure from Greenpeace and the governments and consumers of neighboring countries, Shell abandons its plans for a deep-sea disposal of its 30,000-barrel Brent Spar oil storage platform in the United Kingdom's North Sea. Norway subsequently agrees to store the platform while onshore disposal plans are developed. (DJ)
- June 21** About 3,200 employees of Peruvian state oil company Petroperu stage a two-day strike protesting the government's intended privatization of the company. Through the use of supervisory and technical personnel, oil production is not affected. (DJ)
- June 22** South Korea increases its original commitment to purchase 2.4 million tons of LNG per year from Qatar's Ras Laffan LNG venture to 4 million tons per year, starting in 2000. The Ras Laffan LNG project, known as Rasgas, is a joint venture between Mobil (70 percent) and Qatar General Petroleum Corporation (30 percent). It will utilize gas from the giant, 225-trillion-cubic-foot, North Dome gas field. (DJ)
- June 22** In Jordan, Russian Deputy Foreign Minister Viktor Posovalyuk and Jordanian Foreign Minister Abdul-Karim Kabariti jointly call for an end to U.N. sanctions against Iraq. (DJ)
- June 26** In Bahrain, Sheik Isa Bin Sulman al-Khalifa appoints a new cabinet for the first time in 20 years. The move is seen as an attempt to stem the rise in domestic civil unrest by Bahrain's Shi'ite majority. The personnel reshuffling is not expected to result in any policy changes. (DJ)
- June 27** Qatar's ruler, Sheik Khalifa bin Hamad al-Thani is overthrown in a peaceful coup by his son, Sheik Hamad bin Khalifa al-Thani. Sheik Hamad has had *de facto* control of the country's government since 1992. The Qatari-Saudi border is closed temporarily in what is described as a precautionary measure. Qatar's crude oil output of roughly 450,000 barrels per day remains undisrupted. (DJ)
- June 29** The 15 European Union countries, that are signatories of the Oslo and Paris Convention, pass a moratorium on the offshore disposal of oil rigs in the North Sea until August 1997. However, the decision may not legally bind the United Kingdom or Norway. Norway recently announced plans for offshore disposal of its North East Frigg platform. (DJ)
- June 30** Exxon signs a \$15.2-billion deal to develop oil and gas fields near Russia's Sakhalin Island. The Sakhalin I project will develop the offshore Shayvo, Odoptu, and Arkutun-Dagi fields that together are estimated to contain 2.5 billion barrels of crude oil and 15 trillion cubic feet of natural gas. Exxon has a 30 percent stake in the project. (NYT, DJ)
- July 3** In Vietnam, Australia-based BHP announces that its 200-million-barrel Dai Hung oil field is not "commercially attractive" and that further development plans will be postponed. Dai Hung began production in October 1994 and currently is producing 30,000 barrels per day, far less than the 100,000 barrels per day originally forecast. It is the country's second producing oil field and the first developed by a company based in a Western country. (DJ)
- July 6** In Colombia, leftist insurgents dynamite the 230,000-barrel-per-day Cano Limon-Covenas oil pipeline. This is the 27th attack this year on the 485-mile-long export pipeline. (DJ)
- July 6** Venezuela's Congress approves the country's first investment law allowing for foreign participation in oil exploration and production. The newly-passed "model agreement" authorizes the state-owned oil company Petroleos de Venezuela S.A. (PDVSA) to offer 10 exploration blocks to foreign investors. If oil is discovered, the government will maintain a majority stake in any joint venture formed to develop the new fields. (FT, DJ)
- July 12** In Russia, the Ministry of Fuel and Energy approves a law dividing authority over the country's oil export terminals and domestic crude oil and petroleum products markets between Russia's five largest integrated oil companies and the state-owned pipeline monopoly, Transneft. Rosneft, Lukoil, Neftianaya Kompaniya, Yukos, and Sidanko will have joint responsibility for exports from Ventspils in Latvia as well as from Novorossiisk, Odessa, and Tuapse, on the Black Sea. (DJ)
- July 13** Iran and French-based Total sign a deal to develop the offshore Sirri A and E oil and gas fields. The deal comes after the U.S. government forced Conoco to relinquish its agreement to develop the two Iranian fields. On July 4, Shell

decided not to develop the same fields because of the project's high development costs. Oil production from Sirri A and E is expected to reach a peak of 120,000 barrels per day. (*NYT, DJ*)

- July 17** An official at the state-owned National Iranian Oil Company, Seyed Mehdi Husseini, states that Iran will invite foreign participation in 10 major oil development projects, including construction of an 80,000-barrel-per-day refinery at Bandar Abbas, development of the Kangan gas field, and second-phase development of the offshore South Pars project. Also, Russian and Iranian officials agree to conduct joint oil exploration and drilling operations. (*FT, DJ*)
- July 18** Nigerian Petroleum Minister Dan Etete informs the local directors of British Petroleum and Shell that the two companies may lose their right to conduct business in Nigeria. The meeting follows comments by British government officials warning Nigeria not to implement the harsh sentences on 40 people recently convicted of plotting to overthrow military dictator Sani Abacha. Shell produces approximately 1 million barrels per day, or about half of Nigeria's crude oil production. Oil export revenues account for more than 80 percent of Nigerian government revenues. (*FT*)
- July 20** South Africa agrees to allow Iran to store up to 15 million barrels of crude oil at its 45-million-barrel Saldhana Bay storage facility near Cape Town. The deal comes amidst U.S. attempts to limit Iran's transactions with the international community. Tehran Radio states that the storage deal will speed up oil shipments to Latin America and Europe. Several day later, Iran charts 28 large oil tankers in an apparent effort to maximize its flexibility for exporting oil. (*EC, FT*)
- July 20** In Kazakstan, President Nursultan Nazarbaev officially signs the country's new Petroleum Law. The law clarifies two previously ambiguous areas of foreign investment in the country's oil sector. It also guarantees the validity of previously negotiated agreements and contracts, including Chevron's multi-billion-dollar Tengiz oil field development. (*PON*)
- July 23** Gabonese citizens vote on constitutional reforms which would limit President Omar Bongo's personal powers, provide for international monitoring of new elections, restrict the army's involvement in civilian affairs, and increase the media's freedom. The referendum is the first of its type since the country achieved independence in 1967. Recently, Gabon has threatened to leave OPEC because of high dues. The country did not send a representative to the June 1995 OPEC meeting in Vienna. (*DJ*)
- July 24** Near the South Korean town of Yeosoo, a 140,000-ton Cypriot-registered oil tanker runs aground during the country's worst typhoon in 37 years. The tanker is carrying 640,000 barrels of crude oil and begins to leak, initially creating a slick 3 miles in diameter. (*DJ*)
- July 26** Ecuador's Constitutional Tribunal declares the proposed 350,000-barrel-per-day Transecuadorean pipeline expansion "illegal and unconstitutional because private, and probably foreign capital will be awarded the project." Ecuador's constitution defines the country's crude oil sector as a "strategic area" under exclusive state control. The Tribunal also says that President Sixto Duran-Ballen violated the Constitution by offering the expansion contract to foreign companies whose "sole consideration is profit." (*PON*)
- July 27** In Ecuador, a national strike involving workers from Petroecuador is postponed even though the Ecuadorean Congress adjourns without resolving the conflict with the state-owned company. The Congress had convened a special session to consider a demand from state-owned energy sector workers that Congress nullify its recent decision abrogating the right of public sector workers to unionize. (*DJ*)
- July 27** Saudi Aramco awards the giant Shaybah oil field development project to U.S.-based Parsons Corporation. The \$2.5-billion project will develop the 7-billion-barrel field, including the construction of crude oil production facilities, gas-oil separation plants, and a 372-mile pipeline. The Shaybah field is located on the Saudi-UAE border and is expected to produce 500,000 barrels per day after it comes on line in 1999. (*PON*)
- July 28** Norwegian Finance Minister Sigbjorn Johnsen says that Norway should not lower its crude oil production in an attempt to boost world oil prices. Norwegian Oil Minister Jens Stoltenberg believes production cuts may be necessary if prices begin to fall. Minister Johnsen's remarks follow last month's visit by Saudi Arabian Oil Minister Hisham M. Nazer, who asked Minister Stoltenberg to cut Norway's crude oil production. (*PON*)

- Aug. 2** Saudi Arabia's King Fahd issues a decree replacing all members of the Council of Ministers who do not have blood ties so the royal Family. While most of the Council's top positions are unaffected by the reshuffling, Oil Minister Hisham Nazer is replaced with Ali bin Ibrahim al-Naimi. (*WSJ*)
- Aug. 7** The British Geological Survey releases a report stating that extended offshore oil production could cause earthquakes measuring up to 4 on the 10-point Richter scale. According to the report, quakes could be caused by chemical gel injection during enhanced oil recovery projects. The chemicals could cause corrosion in reservoir rock formations and lead to eventual ruptures. The report notes that earthquakes recently have occurred in the offshore Netherlands sector. However, these can not be directly attributed to oil-related operations. (*FT*)
- Aug. 8** The Jordanian government grants political asylum to Iraqi Major General Hussein Kamel al-Majid and Colonel Saddam Kamel al-Majid. The Iraqi officers headed Iraq's secret weapons program and special security forces, respectively. The men are married to two of Saddam Hussein's daughters and apparently defected after a family argument. After talks with U.S. officials, both Kuwait and Syria offer to replace, if necessary, the 65,000 barrels per day of oil that Iraq currently sells to Jordan. Under U.N. sanctions, Iraq is allowed to sell a limited amount of oil to Jordan in order to earn revenue for humanitarian purposes. (*FT, DJ*)
- Aug. 8** In Azerbaijan, security forces loyal to President Aliyev suppress a coup attempt plotted by ex-president Ayaz Matalibov, who was ousted in May 1992. Aliyev's forces arrest three retired generals who took part in the attempted overthrow. This is the third coup attempt since October 1994. (*DJ*)
- Aug. 9** Egypt decides to increase the Sumed Pipeline's capacity from 1.6 million barrels per day to 2.4 million barrels per day. The 210-mile Sumed pipeline was opened in 1977 and connects the Gulf of Suez to the Mediterranean Sea. It is jointly owned by Egypt (50 percent) and Saudi Arabia, Qatar, Kuwait, and the UAE. The capacity expansion will involve the opening of a pumping station at Dahshur. (*DJ*)
- Aug. 9** Chevron signs a 2-year agreement with China to conduct oil exploration in the South China Sea. The South China Sea is the focus of a territorial dispute between Brunei, China, Indonesia, Malaysia, the Philippines, Taiwan, and Vietnam. Regional tensions eased slightly in mid-1995, however, after China and the Philippines agreed to resolve their dispute diplomatically. (*DJ*)
- Aug. 11** British Petroleum and Texaco form a joint venture to develop the North Sea's first high pressure/high temperature (HP/HT) gas field. The 330-billion-cubic-foot Erskine field has pressures of 14,000 pounds per square inch and temperatures of 350° Fahrenheit. The field is slated to begin production in late 1997. Gas will be shipped through the CATS pipeline to Teesside in northeastern England. Successful development of the Erskine gas field may pioneer the way for development of other HP/HT gas fields in the North Sea. (*PON*)
- Aug. 11** Two Sudanese rebel groups threaten to attack a newly-proposed oil export pipeline which would connect southern Sudan's 280-million-barrel Unity and Heglig oil fields with Port Sudan on the Red Sea. Vancouver-based Arakis Energy recently announced that it had received Saudi Arabian-financing worth \$750 million to develop the two fields and to build an export pipeline. Under Arakis' plan, the fields would begin producing 65,000 barrels per day within 18 months after the start of development. Although a cease-fire is in effect, rebel groups control much of southern Sudan. (*DJ, PIW, PON*)
- Aug. 12** In Iran, two bombs explode damaging oil pipelines in southwestern Iran. The bomb attacks occur near Ahwaz and are blamed by Iran on the Mujahedin Khalq Organization (MKO). The MKO is an Iraq-based opposition group which has previously conducted cross-border attacks. MKO representatives in Paris denied responsibility in the attacks. (*DJ*)
- Aug. 14** Iran's official news agency, IRNA, reports that Iran has been unable to sell 200,000 barrels per day of crude oil since the imposition of a unilateral oil embargo by the U.S. Iran increasingly has sold its crude oil on spot markets as opposed to long-term contracts. Larger purchases by France, Spain, Italy, China, India, Pakistan, and Thailand have failed to offset decreased demand by German and Japanese refiners. Before the U.S. embargo was announced in April 1995, U.S. companies were buying between 400,000 and 450,000 barrels per day, down from roughly 600,000 barrels per day in 1994. (*PON*)

- Aug. 15** In Azerbaijan, employees of the state-owned oil company SOCAR stage an “indefinite” strike to protest the company’s nonpayment of roughly \$12 million in past wages, as calculated at official exchange rates. Salaries have not been paid for up to four months. *(DJ, PON)*
- Aug. 16** Argentinean President Carlos Menem states that his government will take legal measures against any companies participating in oil exploration licensing rounds planned by the Falkland Islands’ government for early October. The proposed legal action could include fines and contract cancellations. President Menem also states that Argentina may conduct its own bidding round. The Falkland Islands contain geology favorable to hydrocarbon deposits, although the Islands have not, as of yet, been shown to contain any proven oil reserves. *(DJ)*
- Aug. 16** The Colombian government declares a state of emergency in order to employ extraordinary measures in its fight against leftist insurgents. The action follows the 30th bombing this year of the Cano Limon-Covenas oil export pipeline. Foreign oil operations in Colombia are not initially affected by the announcement. *(DJ)*
- Aug. 23** Russia’s Gazprom confirms that the Polish government has given approval for the Yamal natural gas export pipeline to run through Poland. When complete, the pipeline will carry natural gas from Russia’s Yamal Peninsula to consumer markets in Germany. The first phase of the \$2.5-billion, 403-mile trans-Polish pipeline is expected to be completed by mid-1996. Construction is already proceeding on connecting segments in Russia and Germany. *(PON)*
- Aug. 28** Kuwaiti Oil Minister Abdul Mohsen al-Medej announces that his country will increase its oil production capacity to as much as 3.5 million barrels per day by 2005. *(DJ)*
- Aug. 31** Vietnam rejects continued Chinese claims that the Wan’An Bei-21 (WAB-21) concession area belongs to China. Vietnam states that WAB-21 lies within Vietnam’s internationally-recognized territorial waters, as does the neighboring exploration acreage awarded by Vietnam to British Petroleum and Mobil. In 1992, China awarded WAB-21 to U.S.-based Crestone Energy. In May 1995, China stated that Crestone would finish a seismic survey in WAB-21 and drill an exploratory well by the end of the year. *(DJ)*
- Sept. 4** In a continuing bid to have oil exports from Azerbaijan’s new Caspian Sea oil fields pass through its territory, Russia offers attractive discounts and guarantees for the passage of initial oil production from the Azeri fields. Russia promises a 20- to 70-percent reduction from its regular rates on crude oil shipped to the Black Sea’s Novorossiisk oil terminal. Russia also promises priority pipeline access for Caspian Sea oil and storage facilities if exports are halted temporarily by bad weather. Russia is competing with an alternative route through Georgia and Turkey for the 70,000 barrels per day of early oil production. *(DJ, FT)*
- Sept. 5** In Vietnam, Total withdraws from a \$1.4-billion refinery project after the Vietnamese government selects Dung Quat as the site for the proposed 130,000-barrel-per-day plant. Dung Quat is located on the country’s central coast and is over 600 miles from the Vung Tau oil terminal and Ho Chi Minh City’s product markets. A consortium, which included Total, had advocated locating the refinery at Khanh Hoa near Ho Chi Minh City. Subsequently, Daewoo, Hyundai, and the LG Group (formerly Lucky Goldstar) express interest in proceeding with the project. *(FT, DJ)*
- Sept. 5** The Colombian government approves construction of a \$2-billion pipeline between the giant Cuisiana and Cupiagua oil fields and the Covenas export terminal on the Caribbean. After scheduled completion in 1997, the 450-mile pipeline will have a capacity of 500,000 barrels per day, which will be equivalent to the fields’ anticipated peak production. British Petroleum, Saipem, Total Pipelines, and Triton are involved in the project. Current output from the Cuisiana field is around 180,000 barrels per day. *(DJ)*
- Sept. 6** In the United Kingdom, Greenpeace concedes that it made false claims during the June 1995 incident surrounding Shell’s proposed offshore disposal of the Brent Spar oil buoy. The organization stated that Brent Spar contained 38,500 barrels of oil and toxic waste when Shell was preparing to sink the platform. However, Greenpeace now admits it did not actually perform any measurements to determine Brent Spar’s contents. Shell states that the storage tank holds only about 250 barrels of crude oil. The dispute between Greenpeace and Shell about the environmental safety of offshore disposal continues. Following public pressure, Brent Spar has been towed to a Norwegian fjord while a decision is made regarding onshore disposal. *(WP)*

- Sept. 11** Iran states that it will start construction of the first 90-mile link on a proposed \$7-billion pipeline to carry natural gas from Turkmenistan to Europe. Under the deal, Iran will receive approximately 800 million cubic feet per day of gas for three years in exchange for financing the pipeline's \$215-million first phase. The Iranian segment of the line is slated for completion by the end of 1997. *(DJ)*
- Sept. 13** The Kuwaiti Oil Ministry states its intention to seek a 200,000-barrel-per-day increase to its current 2-million-barrel-per-day crude oil production quota at the November 1995 OPEC meeting in Vienna. The announcement comes amidst growing non-OPEC oil production and weak oil prices. *(DJ)*
- Sept. 18** The Pakistani government confirms earlier reports that it will not allow a proposed Iran-India natural gas pipeline to run through offshore Pakistani waters. However, the Pakistani government reiterates that it would allow the pipeline to cross onshore Pakistani territory. The Iran-India pipeline would cost an estimated \$7 billion and could transport up to 75 million cubic feet per day of Iranian natural gas to India. *(PON)*
- Sept. 26** The Malaysian government proposes construction of an oil pipeline between Penang, Malaysia and Songkhla, Thailand. The line would lessen dependence on the highly-congested Malacca Strait, which is the transport route for up to 7 million barrels per day of crude oil shipments. The 112-mile oil pipeline and related oil storage facilities would cost an estimated \$2 billion. Tankers would drop off their Middle Eastern cargoes at Penang and pick them up at Songkhla. Opponents argue that the pipeline could hurt Singapore's economy because oil tankers effectively would bypass the Asian refining center. *(DJ, WT)*
- Sept. 27** Argentina and the United Kingdom sign an agreement detailing oil exploration and development rights in the Falkland Islands. The settlement includes the formation of a joint commission to administer operations by private oil companies. Companies will be assessed a 32.5 percent corporate tax and a 9 percent royalty by the Falkland Islands' government. In addition, Argentina states that it will add a 3 percent tax for the use of its onshore oil facilities, which are deemed necessary to any exploration and production activity. Bidding rounds are scheduled for mid-1996. *(FT, WP)*
- Sept. 27** The Angolan government negotiates a 120-day truce with the Front for the Liberation of the Enclave of Cabinda (FLEC), which has been fighting for the independence of the small enclave located between Zaire and the Congo. In the past, FLEC has used Pointe Noire in the Congo as a base for staging attacks in Cabinda. The insurgency also has received active support from Zaire. Negotiations included talks between Angolan President dos Santos and Congolese President Pascal Lissouba. Over one half of Angola's oil production is from offshore Cabinda. The truce follows the Angolan government's May 1995 peace treaty with UNITA. *(DJ)*
- Sept. 27** The Nigerian government states that it has agreed on a rescheduling of its debt to foreign oil companies. In March 1995, Nigeria's debt was estimated at \$625 million, down from almost \$1 billion at the end of 1994. Oil Minister Dan Etete states that his country's repayments have been rescheduled until late 1996. *(DJ)*
- Sept. 28** In Vietnam, Australia-based BHP states that it will withdraw from the Dai Hung oil field project by April 1996 unless its contract terms are revised by the Vietnamese government. The 30,000-barrel-per-day Dai Hung field is Vietnam's only Western-operated oil field. Oil reserve estimates for the field recently were revised downward, and BHP's original plans for boosting output at the field to over 200,000 barrels per day are no longer feasible. *(DJ)*
- Oct. 2** Argentina announces proposed rules for companies wishing to explore for oil in waters around the Falkland (Malvinas) Islands. The government states its intention to charge a levy of up to 3 percent of any oil revenues, as well as to collect exploration fees. Despite a pact signed earlier between Britain and Argentina enabling each country to collect royalties from the disputed waters, uncertainty over the administration of parts of the prospective oil fields remains. *(FT)*
- Oct. 4** Iran's first oil-drilling platform in the Caspian Sea begins operations, according to Tehran Radio. Initial drilling in the Iranian sector of the Caspian has so far yielded little oil, in spite of the widely-held belief that the Sea holds vast quantities of hydrocarbons. *(DJ)*

- Oct. 4** Russian President Boris Yeltsin orders the government to provide financing and tax breaks to pay for rebuilding the oil industry in the war-ravaged republic of Chechnya. The government hopes to more than double current oil production levels in the republic. *(DJ)*
- Oct. 7** The 11-company Azerbaijan International Operating Company (AIOC) decides to export early production from three Caspian Sea oil fields through both Russia and Georgia. The AIOC plans to spend \$55 million on developing the Russian route, which relies heavily on existing infrastructure, and in excess of \$200 million on the western route through Georgia (and ultimately Turkey). *(PON)*
- Oct. 13** Ecuador's oil workers' union, FETRAPEC, stages a one-week work stoppage. Demands include the resignation of Ecuador's Energy Minister Galo Abril; nullification of the tender for expansion of the Transecuadorean crude oil pipeline; and cancellation of plans to privatize Petroproduccion's Oriente marginal fields and the La Libertad refinery. The strike takes place following the flight of Ecuadorean Vice President Alberto Darik to Costa Rica. Darik, the chief architect of the government's privatization and modernization programs (which are opposed by state oil workers) fled following an order for his arrest by the Ecuadorean Supreme Court on charges of corruption, bribery, and embezzlement. *(PON)*
- Oct. 17** Indonesia's Minister of Mines and Energy and current president of OPEC, Ida Bagus Sujana, states his desire that OPEC maintain its current crude oil production ceiling of 24.52 million barrels per day, in order to stabilize world oil prices. He tells a news conference that the Indonesian proposal would be discussed at OPEC's annual meeting in Vienna in November. OPEC decided in November 1994 to extend the ceiling of 24.52 million barrels per day for 12 months. *(DJ)*
- Oct. 20** Unocal announces that it is to sign agreements with the government of Turkmenistan to build multi-billion-dollar natural gas and oil pipelines that would carry Turkmeni hydrocarbons to Pakistan for delivery to domestic and export markets. Both pipelines would transit war-torn Afghanistan. The 800-mile natural gas pipeline would have an estimated throughput of at least 2 billion cubic feet per day and an estimated construction cost of about \$3 billion. The oil pipeline, which would likely follow the same route as the gas pipeline until it reached Pakistan, has an estimated cost of \$5 billion. *(PON)*
- Oct. 21** The state-owned Kuwait Oil Company announces the discovery of new oil reservoirs containing an estimated 350 million barrels of reserves. This marks the first discovery in an area where exploration had begun before the Iraqi invasion in August 1990. Exploration resumed in February 1994, three years after Iraqi forces were driven from Kuwait. *(DJ)*
- Oct. 24** Ecuadorean Energy Minister Galo Abril resigns after protests from state oil workers regarding his support for construction of a new oil pipeline without state participation. *(DJ)*
- Oct. 24** Greece announces the launch of an international tender to grant oil exploration and development rights to six sites in western Greece -- three offshore and three onshore -- including the Kakakolon oil field, which was discovered in 1981. *(DJ)*
- Oct. 26** Venezuela's Energy and Mines Ministry announces that British Petroleum plans to invest \$1 billion in Venezuela's oil industry over the next five years. *(DJ)*
- Oct. 28** U.N. Secretary-General Boutros Boutros-Ghali once again urges Iraq to accept a formula allowing limited oil sales to buy food, medicine and other humanitarian supplies. However, Iraqi Vice President Taha Marouf turns down the proposal during a meeting with Boutros-Ghali at ceremonies marking the U.N.'s 50th anniversary. *(DJ)*
- Oct. 30** Iranian Oil Minister, Gholamreza Agazadeh, and Russian Deputy Prime Minister Alexander Balshakov hold talks in Tehran on oil and gas exploration in the Caspian Sea. The two sides issue a joint call for a legal regime to regulate the division of Caspian Sea resources among littoral states and for continued collaboration between their two countries on oil exploration and drilling in the disputed region. *(DJ)*
- Oct. 31** Lithuania recalls its ambassador from Latvia to protest an oil exploration deal that Latvia signed with Western companies Amoco of the U.S. and Svensk Oljedistribution AB of Sweden. The deal would allow the companies to

explore for oil off Latvia's Baltic coast. Lithuania considers ownership of the exploration area to be in dispute and opposes the deal because of concerns that its sovereignty would be harmed. *(DJ)*

- Oct. 31** The International Finance Company (IFC), the private sector arm of the World Bank, announces that it will invest \$8 million in the India Oil and Gas Finance Facility, a fund that will lend money to small and medium-sized projects in India's oil and gas sector. The IFC funding will be complimented by an additional \$2 million from Creditcapital Venture Fund Ltd., an Indian venture capital company. *(DJ)*
- Nov. 2** After a leading political opposition figure is assassinated in Bogota, Colombian President Samper declares a 90-day state of emergency. *(DJ)*
- Nov. 4** In Azerbaijan, a consortium of foreign oil companies comprising Agip, Lukoil, and Pennzoil, sign a contract to develop the Caspian Sea's Karabakh oil field which could hold reserves of over 500 million barrels. *(DJ)*
- Nov. 6** The Bolivian Workers Confederation and Bolivia's state-owned oil company, YPF, stage a 24-hour strike which closes refineries, hospitals, and schools. The strike is held in protest of the government's plan to privatize YPF. Bolivia has an estimated 4.5 trillion cubic feet of proven natural gas reserves and soon could become a major player in Latin America's gas markets. Currently, a \$2-billion pipeline to transport Bolivian natural gas to Sao Paulo, Brazil is under construction. *(DJ)*
- Nov. 8** In Peru, Chevron signs an agreement with state-owned Petroperu to conduct exploration in Block 52, which is located adjacent to the 13-trillion-cubic-foot Camisea natural gas field. The contract is significant because Chevron agreed to pay royalties three times the legal minimum under Peru's current hydrocarbon law. This could influence terms for future regional oil and gas contracts for Peru's potentially hydrocarbon-rich Amazon basin. Petroperu plans to tie Camisea gas into the Bolivia-Brazil natural gas pipeline, which will form the basis for a future Southern Cone gas grid. *(DJ, PIW)*
- Nov. 8** The Brazilian Senate passes legislation to open up the country's oil sector to foreign investment. The legislation will not take effect until mid-1996 after the government has drafted guidelines for potential investors. In August 1995, Brazilian President Fernando Henrique Cardoso issued a decree prohibiting the privatization of the state-owned oil company, Petrobras. *(DJ)*
- Nov. 10** Many countries express outrage after the Nigerian government's execution of human rights advocate Ken Saro-Wiwa and eight other political activists. The U.S. condemns the executions, which took place shortly after a secret military tribunal found the nine men guilty of murder charges. The European Union states its intention of freezing all aid to Nigeria, while Germany and Sweden call for an international oil embargo against the country. U.S. crude oil and petroleum product imports from Nigeria in the first nine months of 1995 accounted for about 8 percent of total U.S. imports. *(DJ)*
- Nov. 13** In Vietnam, Mitsui pulls out of a \$420-million natural gas development project with British Gas. Mitsui's project was part of a larger Vietnamese plan to use its newly discovered gas reserves to fuel power plants in southern Vietnam, which is experiencing strong economic and electricity demand growth. Mitsui was to have built an offshore gas compression platform, a pipeline to carry gas onshore, and a liquefied petroleum gas facility. *(FT)*
- Nov. 14** In Mexico, Director Adrian Lagous of state-owned Pemex says that the country's oil production has returned to normal after being cut by one-third in October because of Hurricane Roxanne. *(DJ)*
- Nov. 22** OPEC states that it will roll over its current oil production quota of 25.42 million barrels per day. The roll-over was widely anticipated because of slack world oil demand, rising non-OPEC production, and weak prices. *(DJ, PON)*
- Nov. 22** In Kazakstan, Western oil companies form a new consortium to build a \$1.2-billion pipeline to transport crude oil from Chevron's Tengiz oil field to the Black Sea. The consortium includes Agip, British Gas, Chevron, Lukoil, and Mobil. The new group replaces the old Caspian Pipeline Consortium, which had planned to build an export pipeline but which was plagued by financing problems. *(DJ)*

- Nov. 25** The British Broadcasting Corporation reports that Iran plans to hold a sports competition on Abu Musa Island during an upcoming week of events planned to commemorate the Iran-Iraq War. The announcement comes amidst a recent failure of talks between the UAE and Iran to diplomatically resolve a territorial dispute. Iran seized both Abu Musa and the Tunb Islands in the early 1970s. The islands are strategically located in the Strait of Hormuz, which serves as the export route for just over one-fifth of the world's crude oil supply. *(DJ)*
- Nov. 26** Ecuador's citizens vote in a national referendum concerning the major political and economic issues presently facing the country. The vote results in a number of changes, which include allowing oil unions and public sector workers to strike and a rejection of expansion plans for the 325,000-barrel-per-day Transecuadorean oil pipeline. The proposed \$600-million expansion project was deemed necessary by some government officials because the pipeline currently is operating above capacity at 350,000 barrels per day. The rejected 100,000-barrel-per-day expansion plan may be replaced by a smaller spur-link to transport heavy crude oil from the Oriente basin in the Amazon region. *(DJ, NYT)*
- Nov. 28** Albania begins its second onshore oil licensing round in hopes of attracting additional foreign investment. From a peak of around 50,000 barrels per day in the early 1980s, the country's oil production has fallen to around 10,000 barrels per day. Albania hopes that international investment will rehabilitate the country's oil industry and, since the first bidding round in 1991, foreign oil company investment in Albania has reached \$100 million. *(FT)*
- Nov. 29** President Clinton approves legislation lifting a 22-year-old ban on exports of oil from the Alaskan North Slope (ANS). The ban was imposed after the oil embargo by Arab oil producers in 1973. The lifting of the ban opens up about one-quarter of U.S. crude oil production for export. The ANS legislation also waives royalty payments on deep water oil and gas leases in the Gulf of Mexico. *(WP)*
- Dec. 5** In Indonesia, press reports state that the government will allow foreign investment in the country's downstream oil sector. New revisions will allow for marketing and sale of refined petroleum products and possibly tax consolidation for foreign companies which explore in Indonesia's eastern frontier areas. *(DJ)*
- Dec. 5** In Colombia, Texaco signs an agreement with state-owned Ecopetrol to develop and operate three natural gas fields in the northeastern Guajira region. The deal extends a current contract from 2004 to 2016 and calls for doubling the region's current 300-million-cubic-foot-per-day natural gas output through new drilling and infrastructure development. *(DJ)*
- Dec. 5** Indian Petroleum Ministry officials announce the country plans to deregulate its downstream oil sector by 2001. If the federal cabinet approves the proposal, price subsidies will be lifted and import tariffs cut for both crude oil and refined petroleum products. *(PON)*
- Dec. 6** In Colombia, Ecopetrol employees begin a 24-hour strike to protest a modernization program which will automate crude oil production activities and potentially eliminate many jobs. Also, Ecopetrol workers are said to believe that private companies will be contracted to perform jobs currently undertaken by unionized employees. *(DJ)*
- Dec. 7** Chevron's and Texaco's jointly-owned company, Caltex, announces plans to sell its \$1.98-billion stake in Japanese refinery operations to Nippon Oil. The move follows Japan's planned liberalization of the country's downstream sector, which will lift restrictions on refined petroleum product imports on April 1, 1996. At that time, Caltex will be able to supply Japan with refined petroleum products from other parts of Asia with lower operating costs. *(WSJ)*
- Dec. 12** Speaking in New York during a U.S. visit by Angolan President Eduardo dos Santos, Joaquim David, president of the state-owned oil company, Sonangol, states that Angola will increase its crude oil production by 10 percent per year over the next five years, reaching 720,000 barrels per day by the end of 1996 and 1 million barrels per day by 2001. The statement comes amidst sporadic violence involving government forces and the rebel group UNITA, less than a year after a peace accord was signed ending the country's 20-year-old civil war. At the end of 1995, Angola had raised its crude oil production to 690,000 barrels per day. *(PON, DJ)*
- Dec. 14** In Venezuela, Chevron signs a \$2.5-billion contract with Maraven, a subsidiary of state-owned PDVSA, to boost heavy oil production from Lake Maracaibo's 1.6-billion-barrel Boscan field in western Venezuela. The field's current output of 80,000 barrels per day will be raised to 115,000 barrels per day, the majority of which will be used in Chevron's asphalt refining and marketing network in the northeastern and western U.S. *(DJ)*

- Dec. 15** A consortium comprising the Nigerian National Petroleum Corporation, France's Elf, Italy's Agip, and Royal Dutch/Shell sign a construction contract to build a \$4-billion LNG plant in Nigeria. (*PON*)
- Dec. 15** Yemen and Eritrea fight over control of Greater Hanish Island, which is strategically located in the southern Red Sea just north of the Bab el-Mandeb Strait. Ethiopian Prime Minister Meles Zenawi subsequently begins mediation efforts, requesting that both sides withdraw their forces. Shortly thereafter, Eritrea releases 200 captured Yemeni soldiers as a gesture of good faith. In September 1995, Eritrea awarded Houston-based Anadarko Petroleum an exploration block surrounding the nearby Dahlok Archipelago. (*DJ, WT*)
- Dec. 18** British Petroleum and Algeria's state-owned oil and gas company, Sonatrach, agree to a \$3.5-billion deal to develop the In Salah natural gas fields located in the country's southern Sahara Desert region. The agreement culminates two years of negotiations and represents the largest foreign investment deal in Algeria since the start of the country's civil war four years ago. Algeria, which contains the world's eighth-largest gas reserves and is the world's second-largest LNG exporter, has made development of its natural gas reserves a priority. (*FT*)
- Dec. 18** Shell Nigeria officials announce that the company has appointed independent consultants to conduct an environmental survey to ascertain the damage which Shell may have caused in the Niger River Delta. The action follows accusations by ethnic Ogonis and political activists that Shell destroyed productive farmland and supported the military regime. (*FT*)
- Dec. 18** With little opposition, the U.S. Senate passes the Iran Oil Sanctions Act. The U.S. House of Representatives is expected to vote on the legislation in late January 1996. The bill applies secondary sanctions to foreign companies which invest over \$40 million in Iran's oil sector by applying punitive measures to their attempts to conduct business in the U.S. Under a recent revision, the bill also introduces similar measures against foreign companies conducting business in Libya. (*DJ*)
- Dec. 28** Iran's official Islamic Republican News Agency reports that Iran and Russia have agreed to form joint oil exploration and development companies. The agreement comes amidst increased U.S. efforts to isolate Iran's oil sector from foreign investment. (*DJ*)
- Dec. 29** After eight Arab countries issue a statement supporting the UAE in its claim to Abu Musa and the Tunb Islands, the Iranian Foreign Ministry declares that the islands are "an inseparable part of Iran." The Iranian statement follows repeated attempts over the past few months to negotiate a settlement over the islands, which are strategically located in the Strait of Hormuz. Iran seized the islands from the UAE in 1971. (*DJ*)
- Dec. 30** Iraq and Jordan sign a deal to increase Iraqi crude oil supplies to Jordan by 5 percent over the coming year. Recently, Iraq has supplied Jordan with roughly 55,000 barrels per day of crude oil and 25,000 barrels per day of fuel oil. The oil deliveries are conducted with U.N. approval and are allowed as part of a deal to settle Iraq's estimated \$1.1-billion debt incurred from its 1980-1988 war with Iran. (*DJ*)
- Dec. 30** Mexican President Ernesto Zedillo Ponce replaces key members of his cabinet in an apparent effort to advance his political agenda. The reshuffling includes replacing Energy Minister Ignacio Pichardo Pagaza with Jesus Reyes Heróles Gonzalez Garza. (*DJ*)
- Dec. 30** Russian President Boris Yeltsin signs the country's long-awaited production sharing agreement (PSA) legislation, which previously had been rejected by the Russian parliament in October 1995. While the PSA law is designed to encourage investment by foreign oil companies, initial reaction by Western companies is muted. An estimated \$60-to-\$80-billion worth of foreign investment has been waiting for the adoption of new legislation which could provide a precise contractual framework for would-be investors. (*WSJ*)

¹ Preliminary.

-- Not applicable.

(s) = Value less than 5 trillion Btu.

Notes: Sum of components may not equal total due to independent rounding.

Primary energy consumption includes petroleum, natural gas, coal, and net hydroelectric, nuclear, geothermal, solar, and wind electric power. Data for United States also include electricity generated from wood and waste. United States apparent coal consumption is calculated as:

production+imports-exports-stock builds. A different methodology for deriving coal consumption is used in the Monthly Energy Review.

Sources: See sources at the end of Sections 3, 4, 5, and 6.

¹ Preliminary.

--= Not applicable.

(s) = Value less than 5 trillion Btu.

Note: Sum of components may not equal total due to independent rounding.

Sources: See sources at the end of Section 3.

¹ Preliminary.

² United States apparent coal consumption is calculated as: production+imports-exports-stock builds. A different methodology for deriving coal consumption is used in the Monthly Energy Review.

-- Not applicable.

(s) = Value less than 5 trillion Btu.

Notes: Sum of components may not equal total due to independent rounding.

Coal includes anthracite, subanthracite, bituminous, subbituminous, lignite, and brown coal.

Sources: See sources at the end of Section 5.

¹ Preliminary.

² There is a discontinuity in this time series between 1988 and 1989; beginning in 1989, pumped storage is removed, and expanded coverage of industrial use of hydroelectric power and of electricity generated from non-electric utilities is included.

--= Not applicable.

(s) = Value less than 5 trillion Btu.

Notes: Sum of components may not equal total due to independent rounding.

Data are reported as net consumption as opposed to gross. Net consumption excludes the energy consumed by the generating units.

Consumption accounts for thermal equivalent conversion losses.

Sources: See sources at the end of Section 6.

¹ Preliminary.

² There is a discontinuity in this time series between 1988 and 1989 due to the expanded coverage of non-electric utility use of renewable energy beginning in 1989.

-- Not applicable.

(s) = Value less than 5 trillion Btu.

Notes: Sum of components may not equal total due to independent rounding.

Data are reported as net consumption as opposed to gross. Net consumption excludes the energy consumed by the generating units.

Consumption accounts for thermal equivalent conversion losses.

Sources: See sources at the end of Section 6.

¹ Preliminary.

-- Not applicable.

(s) = Value less than 5 trillion Btu.

Notes: Sum of components may not equal total due to independent rounding.

Primary energy production includes petroleum, natural gas, coal, and net hydroelectric, nuclear, geothermal, solar, and wind electric power. Data for United States also include electricity generated from wood and waste.

Sources: See sources at the end of Sections 3, 4, 5, and 6.

¹ Preliminary.

² Includes oil processed from Athabasca Tar Sands.

--- Not applicable.

(s) = Value less than 5 trillion Btu.

Notes: Sum of components may not equal total due to independent rounding.

Crude oil includes lease condensate.

Sources: See sources at the end of Section 3.

¹ Preliminary.

-- Not applicable.

(s) = Value less than 5 trillion Btu.

Note: Sum of components may not equal total due to independent rounding.

Sources: See sources at the end of Section 4.

¹ Preliminary.

-- Not applicable.

(s) = Value less than 5 trillion Btu.

Notes: Sum of components may not equal total due to independent rounding.

Coal includes anthracite, subanthracite, bituminous, subbituminous, lignite, and brown coal.

Sources: See sources at the end of Section 5.

¹ Preliminary.

² There is a discontinuity in this time series between 1988 and 1989; beginning in 1989, pumped storage is removed, and expanded coverage of industrial use of hydroelectric power and of electricity generated from non-electric utilities is included.

--= Not applicable.

(s) = Value less than 5 trillion Btu.

Notes: Sum of components may not equal total due to independent rounding.

Generation data consist of both utility and nonutility sources. Data are reported as net generation as opposed to gross. Net generation excludes the energy consumed by the generating unit and excludes generation from pumped storage.

Sources: See sources at the end of Section 6.

Glossary

Glossary

Alcohol: The family name of a group of organic chemical compounds composed of carbon, hydrogen, and oxygen. The series of molecules vary in chain length and are composed of a hydrocarbon plus a hydroxyl group; $\text{CH}(\text{CH})_n\text{-OH}$. Alcohol includes methanol and ethanol.

Anthracite Coal: Anthracite, or hard coal, is the highest rank of economically usable coal. It is jet black with a high luster. The moisture content generally is less than 15 percent. It usually has a high fixed carbon and ash content and is low in volatile matter. It is a non-coking coal.

API: The American Petroleum Institute, a trade association.

API Gravity: An arbitrary scale expressing the gravity or density of liquid petroleum products. The measuring scale is calibrated in terms of degrees API. A lighter, less dense product has a higher API gravity.

Apparent Consumption (Coal): Primary coal production plus imports of coal and coke, minus exports of coal and coke plus or minus stock changes of coal and coke. Note: In the United States apparent consumption is reported data by major end-use sectors.

Apparent Consumption (Natural Gas): Dry natural gas production plus imports minus exports plus or minus stock changes.

Apparent Consumption (Petroleum): Includes internal consumption, refinery fuel and loss, and bunkering. Also included, where available, are liquefied petroleum gases sold directly from natural gas processing plants for fuel or chemical uses.

Asphalt (Natural): A natural mineral pitch, tar, or bitumen composed principally of hydrocarbons, a natural bituminous rock of dark color comparatively hard and nonvolatile. Does not include asphalt, bitumen, tar, etc., derived from petroleum processing.

Asphalt (Refined): A dark brown to black solid or semi-solid material obtained from petroleum processing in which the predominant component is bitumen. Used mainly in road construction.

Associated Gas: Gas produced in a field containing both oil and gas. The field is developed primarily for extraction of crude oil.

ASTM: The American Society for Testing and Materials.

Barrel (Petroleum): A unit of volume equal to 42 U.S. gallons.

Bitumen: A naturally occurring viscous mixture, mainly of hydrocarbons heavier than pentane, that may contain sulfur compounds and that, in its natural occurring viscous state, is not recoverable at a commercial rate through a well.

Bituminous Coal: Bituminous coal is the most common coal. It is dense, black, often with well defined bands of bright and dull materials. Its moisture content usually is less than 20 percent. It is used for generating electricity, making coke, and space heating.

British Thermal Unit (Btu): The quantity of heat needed to raise the temperature of 1 pound of water by 1 degree Fahrenheit at or near 39.2 degrees Fahrenheit.

Bunkers: Fuels supplied to ships and aircraft in international transportation, irrespective of the flag of the carrier, consisting primarily of residual, distillate, and jet fuel oils.

Butane: A normally gaseous straight-chain or branch-chain hydrocarbon, (C_4H_{10}). It is extracted from natural gas or refinery gas streams. It includes isobutane and normal butane and is covered by ASTM Specification D1835 and Gas Processors Association Specifications for commercial butane.

Coal: A black or brownish-black solid, combustible substance formed by the partial decomposition of vegetable matter without access to air. The rank of coal, which includes anthracite, subanthracite, bituminous, subbituminous, and lignite, is based on fixed carbon, volatile matter, coking and coking properties, and heating value. Coal rank includes the progressive alteration, or coalification, from lignite to anthracite.

Coal Briquets: Anthracite, bituminous, and lignite briquets comprise the secondary solid fuels manufactured from coal by a process in which the coal is partly dried, warmed to expel excess moisture, and then compressed into briquets, usually without the use of a binding substance. In the reduction of briquets to coal equivalent, different conversion factors are applied according to their origin from hard coal, peat, brown coal, or lignite.

Coal Production: The sum of sales, mine consumption, issues to miners, and issues to coking, briquetting, and other ancillary plants at mines. Production data include quantities extracted from surface and underground working, and normally exclude wastes removed at mines or associated preparation plants.

Coke (Coal): In general, coke is made from bituminous coal (or blends of bituminous coal) from which the volatile constituents are driven off by baking in an oven at temperatures as high as 2,000 degrees Fahrenheit, so that the fixed carbon and ash are fused together. Coke is hard and porous, has gray submetallic luster, and is strong enough to support a load of iron ore in a blast furnace. It is used both as a fuel and a reducing agent in smelting iron ore in a blast furnace.

Conventional Thermal Electricity Generation: Electricity generated by an electric power plant using coal, petroleum, or gas as its source of energy.

Conversion Factor: A number that translates units of one system into corresponding values of another system. Conversion factors can be used to translate physical units of measure for various fuels into Btu equivalents.

Crude Oil (including Lease Condensate): A mixture of hydrocarbons that exists in liquid phase in underground reservoirs and remains liquid at atmospheric pressure after passing through surface separating facilities. Included are lease condensate and liquid hydrocarbons produced from tar sands, gilsonite, and oil shale. Drip gases are also included, but topped crude oil (residual) and other unfinished oils are excluded. Liquids produced at natural gas processing plants and mixed with crude oil are likewise excluded where identifiable.

Crude Oil Production: The volume of crude oil produced from oil reservoirs during given periods of time. The amount of such production for a given period is measured as volumes delivered from lease storage tanks (i.e., the point of custody transfer) to pipelines, trucks, or other media for transport to refineries or terminals with adjustments for (1) net differences between opening and closing lease inventories, and (2) basic sediment and water.

Distillate Fuel Oil: A general classification for one of the petroleum fractions produced in conventional

distillation operations. It is used primarily for space heating, on-and-off-highway diesel engine fuel (including railroad engine fuel and fuel for agricultural machinery), and electric power generation. Included are products known as No. 1, No. 2, and No. 4 fuel oils; No. 1, No. 2, and No. 4 diesel fuels.

Domestic Inland Consumption (Petroleum): Domestic inland consumption is the sum of all refined petroleum products supplied for domestic use (excludes international marine bunkers). Consumption is calculated by product by adding production, imports, crude oil burned directly, and refinery fuel and losses, and then subtracting exports and changes in primary stocks (net withdrawals is a plus quantity and net additions is a minus quantity).

Electricity Installed Capacity: The maximum load that a generating unit, generating station, or other electrical apparatus can carry under specified conditions for a given period of time and not limited by existing service conditions.

Ethane: A normally gaseous straight-chain hydrocarbon, (C₂H₆). It is a colorless paraffinic gas that boils at a temperature of -127.48 degrees Fahrenheit. It is extracted from natural gas and refinery gas streams.

Gasohol: A blend of finished motor gasoline (leaded or unleaded) and alcohol (generally ethanol but sometimes methanol) in which 10 percent or more of the product is alcohol.

Gasoline, Aviation: All special grades of gasoline for use in aviation reciprocating engines, as given in ASTM Specification D910 and Military Specification MIL-G5572. Excludes blending components that will be used in blending or compounding into finished aviation gasoline.

Gasoline Blending Components: Finished components in the gasoline range that will be used for blending or compounding into finished aviation or motor gasoline.

Gasoline, Motor (Leaded): Contains more than 0.05 grams of lead per gallon or more than 0.005 grams of phosphorus per gallon. The actual lead content of any given gallon may vary. Premium and regular grades are included, depending on the octane rating. Includes leaded gasohol. Blendstock is excluded until blending has been completed. Alcohol that is to be used in the blending of gasohol is also excluded.

Gasoline, Motor (Unleaded): Contains not more than 0.05 grams of lead per gallon and not more than 0.005 grams of phosphorus per gallon. Premium and regular grades are included, depending on the octane rating. Includes unleaded gasohol. Blendstock is excluded until

blending has been completed. Alcohol that is to be used in the blending of gasohol is also excluded.

Geothermal Electric Power Generation: Electricity derived from heat found under the earth's surface. Within the earth, there are vast amounts of molten rock and metal, covered by succeeding layers of cooler material, up to the crust of the earth's surface. Underground rivers generate steam which is liberated in the form of geysers through fissures in the earth's surface.

Gross Electricity Generation: The total amount of electric energy produced by a generating facility, as measured at the generator terminals.

Hydroelectric Power Generation: Electricity generated by an electric power plant whose turbines are driven by falling water. It includes electric utility and industrial generation of hydroelectricity, unless otherwise specified. Generation is reported on a net basis, i. e., on the amount of electric energy generated after the electric energy consumed by station auxiliaries and the losses in the transformers that are considered integral parts of the station are deducted.

Jet Fuel (Kerosene-type): A quality kerosene product with an average gravity of 40.7 degrees API, and a 10 percent distillation temperature of 400 degrees Fahrenheit. It is covered by ASTM Specification D1655 and Military Specification MIL-T-5G24L (Grades JP-5 and JP-8). A relatively low-freezing point distillate of the kerosene type; it is used primarily for commercial turbojet and turboprop aircraft engines.

Jet Fuel (Naphtha-type): A fuel in the heavy naphtha boiling range with an average gravity of 52.8 degrees API and 20 to 90 percent distillation temperatures of 290 degrees to 470 degrees Fahrenheit, meeting Military Specification MIL-T-5624L (Grade JP-4). JP-4 is used for turbojet and turboprop aircraft engines, primarily by the military. Excludes ram-jet and petroleum rocket fuels.

Joule: The meter-kilogram-second unit of work or energy, equal to the work done by a force of one newton when its point of application moves through a distance of one meter in the direction of the force; equivalent to 10^7 and one watt-second.

Kerosene: Light hydrocarbon distillates in the 150 degrees to 280 degrees Centigrade (300 degrees to 550 degrees Fahrenheit) distillation range. Includes vaporizing oil for use in reciprocating engines (primarily tractors), lamp oil, and kerosene and heating oil.

Kilowatt (kW): One thousand watts.

Kilowatthour (kWh): One thousand watthours.

Lease Condensate: A liquid recovered from natural gas at the well or at small gas/oil separators in the field. Consists primarily of pentanes and heavier hydrocarbons. Also called field condensate. Does not include plant condensate.

Lignite: Lignite, the lowest rank of coal, is a young coal. It is brownish black in color and has a high moisture content, sometimes as high as 45 percent, and a high ash content. It tends to disintegrate when exposed to the weather. The heat content of lignite is one of the lower coals, usually less than 5700 Kcal/kg.

Liquefied Natural Gas (LNG): Conventional natural gas which is liquefied by reducing its temperature to minus 260 degrees Fahrenheit at atmospheric pressure. The volume of the LNG is 1/600 that of the gas in its vapor state.

Liquefied Petroleum Gases (LPG): Ethane, ethylene, propane, propylene, normal butane, butylene, and isobutane produced at refineries or natural gas processing plants, including plants that fractionate raw natural gas plant liquids.

Liquefied Refinery Gases (LRG): Liquefied petroleum fractionated from refinery or still gases. Through compression and/or refrigeration, they are retained in the liquid state. The reported categories are ethane/ethylene, propane/propylene, normal butane/butylene, and isobutane. Excludes still gas used for chemical or rubber manufacture, which is reported as petrochemical feedstock, and also excludes liquefied petroleum gases intended for blending into gasoline, which are reported as gasoline blending components.

Lubricants (Greases): Mixtures of lubricating oils that contain substances that reduce their ability to flow.

Lubricants (Lubricating Oils): Substances used to reduce friction between bearing surfaces. Petroleum lubricants may be produced either from distillates or residues. Other substances may be added to impart or improve certain required properties. "Lubricants" include all grades of lubricating oils from spindle oil to cylinder oil and those used in greases.

Metallurgical Coke: A strong, hard coke produced mainly for use in the iron and steel industry, where it serves as a chemical agent and source of energy. It is used mainly in blast furnaces to absorb the oxygen contained in iron oxides and provide energy for smelting. A portion of its potential energy is captured in the gases generated in the smelting process, then recycled in the form of blast furnace gas to provide additional energy inside or outside the smelting process. Metallurgical coke is also used to some extent as a domestic fuel and as a raw material for the manufacture of gas.

Naphthas: Refined or partly refined light distillates with an approximate boiling point range of 27 degrees to 221 degrees Centigrade. Blended further or mixed with other materials, they make high-grade motor gasoline or jet fuel. Also used as solvents, petrochemical feedstocks, or as raw materials for the production of town gas.

Natural Gas: A mixture of hydrocarbon compounds, primarily methane and small quantities of various nonhydrocarbons existing in gaseous phase or in solution with crude oil in natural underground reservoirs at reservoir conditions.

Natural Gas Dry Production: Gross withdrawals of natural gas from reservoirs less gas used for reinjection into reservoirs for repressuring, gas which is flared or vented, gas lost in transmission, and shrinkage. Derived by subtracting shrinkage or extraction loss from marketed production. It represents the amount of natural gas that can be marketed and consumed as a gas.

Natural Gas Gross Production: Total withdrawals of natural gas from oil/gas and gas reservoirs.

Natural Gas Liquids (NGL): Those portions of reservoir gas which are liquefied at the surface in lease separators, field facilities, or natural gas processing plants. Natural gas liquids include natural gas plant liquids and lease condensate.

Natural Gas Marketed Production: Gross withdrawals of natural gas from reservoirs less gas used for reinjection into reservoirs for repressuring, gas that is flared and/or vented, and gas that is lost in transmission before the natural gas liquids have been extracted.

Natural Gas Plant Liquids (NGPL): Products obtained from processing natural gas at natural gas processing plants, including natural gasoline plants, cycling plants, and fractionators. Products obtained include ethane, liquefied petroleum gases, (propane, butane, propane-butane mixtures, and ethane-propane mixtures), isopentane, natural gasoline, unfractionated streams, plant condensate, and other minor quantities of finished products, such as motor gasoline, special naphthas, jet fuel, kerosene, and distillate fuel oil.

Natural Gasoline: A mixture of hydrocarbons, mostly pentanes and heavier, extracted from natural gas, that meets vapor pressure, end-point, and other specifications for natural gasoline set by the Gas Processors Association. Includes isopentane, which is a saturated branch-chain hydrocarbon, (C₅H₁₂), obtained by fractionation of natural gasoline or isomerization of normal pentane.

Net Electricity Consumption: Consumption of electricity computed as generation, plus imports, minus exports, minus transmission and distribution losses.

Net Electricity Generation: Gross generation less the electric energy consumed at the generating station for station use.

Nuclear Electric Power Generation: Electricity generated by nuclear reactors of various types such as heavy water, light water, and boiling water. Generation is reported on a net basis and excludes energy that is generally used by the electric power plant for its own operating purposes and not for commercial use.

Other Hydrocarbons: Materials received by a refinery and consumed as raw materials. Includes hydrogen, coal tar derivatives, gilsonite, and natural gas received by the refinery for reforming into hydrogen. Natural gas to be used as fuel is excluded.

Paraffin (Oil): A light-colored, wax-free oil obtained by pressing paraffin distillate.

Paraffin (Wax): The wax removed from paraffin distillates by chilling and pressing. When separating from solutions, it is a colorless, more or less translucent, crystalline mass, without odor and taste, slightly greasy to touch, and consisting of a mixture of solid hydrocarbons in which the paraffin series predominates.

Petrochemical Feedstocks: Products from petroleum refineries and natural gas liquids processing plants to be processed further at a petrochemical plant. Includes products primarily in the naphtha range, still gas (refinery gas), and liquefied gases for petrochemical use.

Petroleum: A generic term applied to oil and oil products in all forms, such as crude oil, lease condensate, unfinished oils, refined petroleum products, natural gas plant liquids, and nonhydrocarbon compounds blended into finished petroleum products.

Petroleum Coke: A solid refinery residue; the final product of the condensation process in cracking. Includes green or calcined petroleum coke and coke deposited on catalysts.

Petroleum Jelly: A semi-solid oily product produced from de-waxing lubricating oil basestocks.

Petroleum Products: Products obtained from the processing of crude oil, unfinished oils, natural gas liquids, and other miscellaneous hydrocarbon compounds. Includes aviation gasoline, motor gasoline, naphtha-type jet fuel, kerosene-type jet fuel, kerosene, distillate fuel oil, residual fuel oil, ethane, liquefied petroleum gases, petrochemical feedstocks, special

naphthas, lubricants, paraffin wax, petroleum coke, asphalt and road oil, still gas, and other miscellaneous products.

Petroleum Stocks: Primary stocks of crude oil and petroleum products held in storage at (or in) leases, refineries, natural gas processing plants, pipelines, tankfarms, and bulk terminals that can store at least 50,000 barrels of petroleum products or that can receive petroleum products by tanker, barge, or pipeline. Crude oil that is in-transit by water from Alaska or that is stored on Federal leases or in the Strategic Petroleum Reserve is included. Primary stocks exclude stocks of foreign origin that are held in bonded warehouse storage.

Plant Condensate (Petroleum): Mixture of hydrocarbons, mostly pentanes and heavier hydrocarbons, recovered at natural gas liquids processing plants. Does not include field or lease condensate.

Primary Coal: All coal milled and, when necessary, washed and sorted.

Propane: A normally gaseous straight-chain hydrocarbon, (C₃H₈). It is a colorless paraffinic gas that boils at a temperature of -43.67 degrees Fahrenheit. It is extracted from natural gas or refinery gas streams. It includes all products covered by Gas Processors Association Specifications for commercial propane and HD-5 propane and ASTM Specification D1835.

Proved Reserves of Coal: Proved reserves of coal are the estimated quantities, which analysis of geological and engineering data demonstrate with reasonable certainty to be recoverable in future years from known reservoirs under existing economic and operating conditions.

Proved Reserves of Crude Oil: Proved reserves of crude oil are the estimated quantities of all liquids defined as crude oil, which geological and engineering data demonstrate with reasonable certainty to be recoverable in future years from known reservoirs under existing economic and operating conditions.

Proved Reserves of Natural Gas: Proved reserves of natural gas are the estimated quantities which analysis of geological and engineering data demonstrate with reasonable certainty to be recoverable in future years from known reservoirs under existing economic and operating conditions.

Refinery Fuel: Crude oil and petroleum products consumed at the refinery for all purposes.

Refinery Losses and Gains (Petroleum): Processing gain and loss that takes place during the refining process itself. Excludes losses that do not take place during the refining process, e.g., spills, fire losses, and

contamination during blending, transportation, or storage.

Refinery Processing Gain: The volumetric amount by which total refinery output is greater than input for a given period of time. This difference is due to the processing of crude oil into products which, in total, have a higher specific gravity than the crude oil processed.

Reinjected (Natural Gas): The forcing of gas under pressure into an oil reservoir in an attempt to increase recovery.

Residual Fuel Oil: The topped crude of refinery operations which includes No. 5 and No. 6 fuel oils as defined in ASTM Specification D396 and Federal Specification VV-F-815C, Navy Special fuel oil as defined in Military Specification MIL-F-859E including Amendment 2 (NATO Symbol F-77), and Bunker C fuel oil. Residual fuel oil is used for the production of electric power, space heating, vessel bunkering, and various industrial purposes. Imports of residual fuel oil include "Imported Crude Oil Burned Directly as Fuel."

Road Oil: Any heavy petroleum oil, including residual asphaltic oil used as a dust palliative and surface treatment on roads and highways. It is generally produced in six grades from 0, the most liquid, to 5, the most viscous.

Secondary Coal: (e.g. coke, briquets) is derived from primary coal.

Short Ton (coal): A unit of weight equal to 2,000 pounds.

Shrinkage (Natural Gas): The volume of natural gas that is transformed into liquid products during processing, primarily at natural gas liquids processing plants.

Special Naphthas: All finished products within the gasoline range that are used as paint thinners, cleaners, or solvents. These products are refined to a specified flash point and have a boiling range of 90 degrees to 220 degrees Fahrenheit. "Special Naphthas" include all commercial hexane and cleaning solvents conforming to ASTM Specification D1836 and D484, respectively. Naphthas to be blended or marketed as motor gasoline or aviation gasoline or that are to be used as petrochemical and synthetic natural gas (SNG) feedstocks are excluded.

Still Gas (Refinery Gas): Any form or mixture of gas produced in refineries by distillation, cracking, reforming, and other processes. The principal constituents are methane, ethane, ethylene, normal butane, butylene, propane, propylene, etc. Still gas is reported for petrochemical feedstock use and/or refinery fuel use. The

conversion factor from gas to barrels is 6.000 million Btu per fuel oil equivalent barrel .

Subbituminous Coal: Similar to the poorer grades of bituminous coal; low in carbon, high in volatile matter and moisture. Its energy value is somewhat below that of bituminous coal.

Transmission and Distribution Loss: Electric energy lost due to the transmission and distribution of electricity. Much of the loss is thermal in nature.

Unfinished Oils: Includes all oils requiring further processing, except those requiring only mechanical blending.

Vented/Flared (Natural Gas): The release (venting) or burning (flaring) of associated gas as a means of disposal.

Watt: The electrical unit of power. The rate of energy transfer equivalent to one ampere flowing under a pressure of one volt at unity power factor.

Watt-hour (Wh): An electrical energy unit of measure equal to 1 watt of power supplied to, or taken from, an electric circuit steadily for 1 hour.

Wax: A solid or semi-solid material derived from petroleum distillates or residues by such treatments as chilling, precipitating with a solvent, or de-oiling. It is a light-colored, more-or-less translucent crystalline mass, slightly greasy to the touch, consisting of a mixture of solid hydrocarbons in which the paraffin series predominates. Includes all marketable wax whether crude scale or fully refined. The three grades included are microcrystalline, crystalline fully refined, and crystalline-other.

White Spirit: A highly refined distillate with a boiling point range of about 150 degrees to 200 degrees Centigrade. It is used as a paint solvent and for dry-cleaning purposes.
