Hurricane Rita
Agricultural Areas Affected by High Winds
Data Sources:
- Agricultural areas are delineated using NASS county-level crop data
- Wind information obtained from the NOAA National Hurricane Center
- Tropical cyclone positions and intensities provided by the NOAA National Hurricane Center
About this product:
Areas potentially affected by sustained winds of tropical storm force and hurricane force are based upon NOAA National Hurricane Center estimates. These areas represent the maximum possible extent of a given wind speed, some locations falling within the wind swaths may not have experienced sustained tropical storm or hurricane force winds, respectively.
