

## Production

U.S. production of AD wet natural gas decreased 11 percent from an estimated 2,742 billion cubic feet in 2004 to 2,432 billion cubic feet in 2005 (Table 11). Production of AD wet natural gas in the lower 48 States decreased from 2,467 billion cubic feet in 2004 to 2,174 billion cubic feet in 2005, a decline of 12 percent. The areas of the country with the largest AD wet natural gas production and their percentage of the total were:

Area	Percent of 2005 U.S. AD Gas Production
Gulf of Mexico Federal Offshore	26
Texas	25
Alaska	11
New Mexico	9
California	8
<b>Area Total</b>	<b>79</b>

Again, these areas logically correspond to the areas of the country with the largest volumes of crude oil production.

**Table 12. Coalbed Natural Gas Proved Reserves and Production, 1989–2005**  
(Billion Cubic Feet at 14.73 psia and 60° Fahrenheit)
