

Dear Congressmen Crane

I would urge the passing of H.R. 1786 the MPC bill, as you may already know the unlimited flow of milk protein concentrated in the U.S. has had a tremendous impact on our domestic milk prices in the last year. If nothing is done to limit its use in our country our dairyfarmers will be burdened by lower prices and that will cause many to have to exit the industry. The supply of Non Fat Dry Milk will also continue to grow and the current supply in CCC storage is already to high. With that said, I again urge you to advocate the passage of H.R. 1786. Thank you in advance you for your efforts and concern.

Sincerely John Zonneveld
