

Biomass Resources Available in the United States

Thousand Tonnes/Year	
Red	Above 500
Blue	250 - 500
Cyan	150 - 250
Green	100 - 150
Yellow	50 - 100
Grey	Less than 50

This study estimates the technical biomass resources currently available in the United States by county. It includes the following feedstock categories:

- Agriculture residues (crops and animal manure);
- Wood residues (forest, primary mill, secondary mill, and urban wood);
- Municipal discards (methane emissions from landfills and domestic wastewater treatment);
- Dedicated energy crops (on Conservation Reserve Program and Abandoned Mine Lands).
