U.S. CENSUS BUREAU

## ACKNOWLEDGMENTS

This report was prepared under the general direction of **Carl A. Konschnik**, Assistant Division Chief for Research and Methodology, Economic Planning and Coordination Division. **Paul Hanczaryk**, Chief, Register Analysis Branch, supervised the preparation of this report and was assisted by **Carol Comisarow, Philip Thompson, Alan Pines, and Jerome Roth. Joel Fowler and Mary Green** contributed in resolving establishment processing problems and in analyzing the data and were assisted in this process by **Gerald Feuer, Yolanda Funderburk, Lavelle Lee, and Jon Youngman**. Under the direction of **Ken Sausman**, Chief of the Program Research and Methods Branch, statistical methodology and quality assurance operations were performed by **Michael Kornbau, Michelle Vile, Sonya Peacock, Anne Kearney, and Andre L. Williams. Robert Taylor** contributed significant computer processing assistance.

**Diane Conley**, Chief, Register Support Branch, Economic Statistical Methods and Programming Division (ESMPD), assisted by **Erwin Rivera**, supervised computer processing operations. **Pilar Baden and William Sandusky** were responsible for the programming of establishment data. **Nancy Ngoc Nguyen** provided additional programming support.

Under the supervision of **Gary Sheridan**, Chief of the Macro Analytical Branch, **Carol Blatt** was responsible for the programming of the tabulations. **Edward Johnson** prepared the tables that appear in this report, with **Kimmy Nguyen and Jenny Hua** assisting.

The Economic Product Team, under the direction of **Lawrence A. Blum**, Chief of the Economic Planning Staff, with primary contributions from **Andrew Hait and Paul Zeisset**, assisted by **Lisa Aispuro**, was responsible for the development of the system to disseminate this report in interactive analytical software form. **Paul Zeisset** also provided programming for

the Internet applications. **Robert Istvan** and **Edward Johnson** of ESMPD were responsible for its programming.

**Kim D. Ottenstein, Cynthia G. Brooks, and Crystal M. Pate** of the Administrative and Customer Services Division, **Walter C. Odom**, Chief, provided publications and printing management, graphics design and composition, and editorial review for print and electronic media. General direction and production management were provided by **James R. Clark**, Assistant Division Chief.

## PURPOSES AND USES OF NONEMPLOYER STATISTICS

Nonemployer statistics provide U.S. and subnational economic data by industry for businesses without paid employees that are subject to federal income tax. The series is useful for studying the economic activity of small businesses at various geographic levels. Businesses use the data for analyzing market potential, measuring the effectiveness of sales and advertising programs, and developing budgets. Government agencies use the data for administration and planning.

Most types of businesses covered by the Census Bureau economic statistics programs are included in the nonemployer statistics. Tax-exempt businesses are excluded. All of the Agriculture, Forestry, Fishing, and Hunting sector, except crop and animal production, are covered in nonemployer statistics; these industries typically are not covered in other Census Bureau economic programs. Nonemployer businesses are generally small, such as real estate agents and independent contractors. Although nonemployers constitute a large part of the business universe in terms of number of establishments, they contribute a relatively small portion of the overall sales and receipts data.

Nonemployer statistics have been released every 5 years since 1972, for years ending in “2” and “7” for selected industries in conjunction with economic census publications. Comparability of data over time may be affected by definitional changes for establishments, activity status, industrial classifications, and processing methodology. For more details on these changes, see the section “Comparability With Other Data.” The 1997 *Nonemployer Statistics* was part of the 1997 Economic Census Core Business Statistics Series and also was the first release of an annual series. The year of the report represents the reference year for which data are collected.

## SOURCES OF DATA

Nonemployer statistics data originate chiefly from administrative records of the Internal Revenue Service (IRS). Data are primarily comprised of sole proprietorship businesses filing IRS Form 1040, Schedule C, although a small percentage of the data is derived from filers of partnership and corporation tax returns that report no paid employees. These data undergo complex processing, editing, and analytical review at the Census Bureau to distinguish nonemployers from employers, correct and complete data items, and form the final nonemployer universe.

## INDUSTRY, GEOGRAPHY, AND LEGAL FORM OF ORGANIZATION CLASSIFICATIONS

### New Industry Classifications

*Nonemployer Statistics* is published based on the North American Industry Classification System (NAICS). For more information on NAICS, go to <http://www.census.gov/epcd/www/naics.html>

The nonemployer statistics series includes the following NAICS sectors:

Sector	Description
11(pt)	Agricultural Support, Forestry, Fishing, and Hunting
21	Mining
22	Utilities
23	Construction
31-33	Manufacturing
42	Wholesale Trade
44-45	Retail Trade
48-49	Transportation and Warehousing
51	Information
52	Finance and Insurance
53	Real Estate and Rental and Leasing
54	Professional, Scientific, and Technical Services
56	Administrative and Support and Waste Management and Remediation Services
61	Educational Services
62	Health Care and Social Assistance
71	Arts, Entertainment, and Recreation
72	Accommodation and Foodservices
81	Other Services (except Public Administration)

Nonemployer statistics data are tabulated by industry as defined in the manual entitled *North American Industry Classification System: United States, 1997*, with some exceptions. Investment Funds, Trusts, and Other Financial Vehicles (NAICS subsector 525) are excluded from nonemployer statistics. Crop Production (NAICS subsector 111), Animal Production (NAICS subsector 112) and Management of Companies and Enterprises (NAICS sector 55) also are excluded from nonemployer statistics.

Nonemployer establishments coded to Department Stores (NAICS industry group 4521), Hospitals (NAICS subsector 622), New Car Dealers (NAICS industry 44111), and Rail Transportation (NAICS industry 48211) are assumed to be misclassified and are reclassified as General Merchandise

---

Stores (NAICS subsector 452), Other Ambulatory Health Care Services (NAICS industry group 6219), Used Car Dealers (NAICS industry 44112), and Support Activities for Transportation (NAICS subsector 488), respectively. Similarly, nonemployer establishments classified in Oil and Gas Extraction (NAICS industry group 2111) that are located in areas without oil and gas production are reclassified as Other Financial Investment Activities (NAICS industry group 5239).

Sources for assigning nonemployer statistics industry classifications are the Social Security Administration, the Internal Revenue Service (IRS), and the Bureau of Labor Statistics. Industry classifications derived from the IRS are self-classified by tax filers.

The industry titles used in this series are the short NAICS titles; complete descriptions are contained in the manual entitled *North American Industry Classification System: United States, 1997*. A limited number of NAICS classifications are available to administrative-record filers. Thus, nonemployer data are compiled for a subset of NAICS codes. Because of this, data for nonemployers generally are provided at broader levels of industry detail than data for employers.

The NAICS codes identified in nonemployer statistics are further restricted to those NAICS codes that are common to all legal form of organization classifications assigned to nonemployer businesses. For those nonemployer businesses that were unclassified, NAICS classifications were imputed by assigning the code of a nonemployer business with comparable receipts located in the same county. Two to 10 percent of the nonemployer universe have imputed NAICS values. For more information, refer to Appendix C, Coverage and Methodology.

### **Geography Classification**

The nonemployer statistics data series provides summary tabulations for Metropolitan Statistical Areas (MSA), each county (and county equivalent), each state, the District of Columbia, and the United States.

Most geography codes are derived from the business owner's mailing address identified in administrative records. For administrative-record data, the filing address determines the geography code. In some instances, geography codes determined by filing address misrepresent where business is actually conducted.

A record is not included in the nonemployer tabulations if the geographic codes are invalid or represent a military site or foreign location. The independent cities in Virginia and the cities of Baltimore, MD, Carson City, NV, and St. Louis, MO, are treated as separate counties. Puerto Rico and Outlying Areas are not included in the nonemployer tabulations.

### **Legal Form of Organization Classification**

The legal form of organization for nonemployer businesses is determined primarily by the business tax return filed. Nonemployer statistics presents U.S.-level data by the following legal forms:

1. Individual proprietorships
2. Partnerships
3. Corporations

### **DEFINITIONS OF BASIC DATA ITEMS**

#### **Establishments**

Generally, an establishment is a single physical location at which business is conducted or services or industrial operations are performed. However, we count each distinct business income tax return filed by a nonemployer business as an establishment. Nonemployer businesses may operate from a home address or a separate business location. Most geography codes are derived from the business owner's mailing address, which may not be the same as the physical location of the business.

#### **Receipts**

Includes gross receipts, sales, commissions, and income from trades and businesses, as reported on annual business income tax returns. Business income consists of all payments for services rendered by nonemployer businesses, such as payments received as independent agents and contractors.

The composition of nonemployer receipts may differ from that of the related data item that is published for employer establishments. For example, for wholesale agents and brokers without payroll, the receipts item contains commissions received or earnings. In contrast, for wholesale agents and brokers with payroll, the sales item published in the 1997 Economic Census represents the value of the goods involved in the transactions.

### **COMPARABILITY WITH OTHER DATA**

#### **Earlier Nonemployer Statistics**

The comparability of data with previous nonemployer statistics series may be affected by the following changes:

- The change to NAICS codes in 1997.
- The change to imputing industry classifications for unclassified nonemployer businesses. Prior to 1997, unclassified businesses were excluded from the nonemployer tabulations.

- The inclusion of more industry sectors; prior to 1997, nonemployer tabulations covered businesses in the Services, Retail, Finance, Insurance, Real Estate, Transportation, Communications, Utilities, and Construction sectors.
- The change to providing county- and MSA-level data for all industry sectors in 1997.

### DATA WITHHELD FROM PUBLICATION

In accordance with U.S. Code, Title 13, Section 9, no data are published that would disclose the operations of an individual business. Because the preponderance of nonemployer statistics data items originate with the IRS, we adhere to both Census Bureau and IRS disclosure guidelines. For U.S.- and state-level data, we publish the number of establishments and receipts in a data cell only if it contains three or more nonemployer businesses. For county- and MSA-level data, we publish the number of establishments and receipts in a data cell only if it contains ten or more nonemployer businesses. According to Census Bureau disclosure rules, when a small number of nonemployer businesses have a dominant share of receipts in a data cell, establishments and receipts are suppressed to protect the dominant businesses. These suppressions are assigned a flag of “D.”

If more than 40 percent of either receipts or establishments in a published row are imputed, we suppress both items because the data do not meet publication standards. These suppressions are assigned a flag of “S.” The “D” and “S” flags indicate that there are establishments engaged in economic activity for that industry level, but that the number of establishments and receipts cannot be shown. Data cells that fail both conditions are assigned a flag of “D.”

### DATA PRODUCTS

#### Electronic Data Formats

Nonemployer statistics series data are available electronically in CD-ROM and hypertext table (html) formats for U.S., state, county, and MSA levels and in Portable Document Format (PDF) for U.S. and state level only. No printed publications of *Nonemployer Statistics* are available. However, our Customer Service Branch will print and bind the pdf version for a fee. See contact information below.

The NAICS classifications common to all three legal form of organization classifications assigned to nonemployer businesses are shown in the tabulations. Only those NAICS classifications with economic activity are displayed.

The *Nonemployer Statistics* CD-ROM contains menu-driven access software. The CD-ROM also includes software for creating nonemployer data files compatible with popular database and spreadsheet software. The CD-ROM is a powerful software tool to search and manipulate nonemployer data.

The nonemployer statistics data products on html and PDF can be accessed at <http://www.census.gov/epcd/nonemployer/index.html>. In order to view the PDF files, you will need the Adobe® Acrobat® Reader™, which is available for free from the Adobe Web site at <http://www.adobe.com>. Two tabulations are presented in PDF. The U.S.-level tabulation presents the number of establishments and receipts by NAICS industry and by legal form of organization. The state-level tabulation presents number of establishments and receipts by NAICS industry.

%% Data do not include large certified passenger carriers that report to the Office of Airline Statistics, U.S. Department of Transportation.

\*\* Railroad transportation and U.S. Postal Service are out of scope.

<sup>1</sup>Includes gross receipts, sales, commissions, and income from trades and businesses. The composition of nonemployer receipts may differ from that of the related data item that is published for employer establishments. For example, for wholesale agents and brokers without payroll, the receipts item contains commissions received or earnings. In contrast, for wholesale agents and brokers with payroll, the sales item published in the 1997 Economic Census represents the value of the goods involved in the transactions.

**Table 2. Nonemployer Statistics for States: 2001**

<sup>1</sup>% Data do not include large certified passenger carriers that report to the Office of Airline Statistics, U.S. Department of Transportation.  
<sup>2</sup>\*\* Railroad transportation and U.S. Postal Service are out of scope.

<sup>1</sup>Includes gross receipts, sales, commissions, and income from trades and businesses. The composition of nonemployer receipts may differ from that of the related data item that is published for employer establishments. For example, for wholesale agents and brokers without payroll, the receipts item contains commissions received or earnings. In contrast, for wholesale agents and brokers with payroll, the sales item published in the 1997 Economic Census represents the value of the goods involved in the transactions.

# Appendix A.

## Explanation of Terms

---

### **NONEMPLOYER**

A nonemployer business is one that has no paid employees, has annual business receipts of \$1,000 or more (\$1 or more in the construction industries), and is subject to federal income taxes.

### **RECEIPTS**

Includes gross receipts, sales, commissions, and income from trades and businesses, as reported on annual business income tax returns. Business income consists of all payments for services rendered by nonemployer businesses, such as payments received as independent agents and contractors.

The composition of nonemployer receipts may differ from that of the related data item that is published for employer establishments. For example, for wholesale agents and brokers without payroll, the receipts item contains commissions received or earnings. In contrast, for wholesale agents and brokers with payroll, the sales item published in the economic census represents the value of the goods involved in the transactions.

### **NUMBER OF ESTABLISHMENTS**

Generally, an establishment is a single physical location at which business is conducted or services or industrial operations are performed. However for nonemployers, we count each distinct business income tax return filed by a nonemployer business as an establishment. Nonemployer businesses may operate from a home address or a separate physical location. Most geography codes are derived from the business owner's mailing address, which may not be the same as the physical location of the business.

### **LEGAL FORM OF ORGANIZATION (LFO)**

The legal form of organization for nonemployer businesses is derived from administrative record sources. There are other legal forms of organization, but only the following three are included in this report:

1. **Individual proprietorship.** An unincorporated business owned by an individual. Also included in this

category are self-employed persons. The business may be the only occupation of an individual or the secondary activity of an individual who works full-time for someone else.

2. **Partnership.** An unincorporated business owned by two or more persons having a shared financial interest in the business.
3. **Corporation.** A legally incorporated business under state laws.

### **REFERENCE YEAR**

The reference year is the period for which the data are reported. For the 1997 reference year, the data are part of the economic census core series. Beginning with reference year 1998, the nonemployer statistics tabulations will be released as an annual data series.

### **NORTH AMERICAN INDUSTRY CLASSIFICATION SYSTEM (NAICS)**

The North American Industry Classification System was developed by representatives from the United States, Canada, and Mexico, and replaces each country's separate classification systems with one uniform system for classifying industries. In the United States, NAICS replaces the Standard Industrial Classification (SIC), a system that federal, state, and local governments, the business community, and the general public have used since the 1930s.

This new industry classification system enables North American Free Trade Agreement (NAFTA) partners—the United States, Canada, and Mexico—to better compare economic and financial statistics and ensure that such statistics keep pace with the changing economy.

### **NAICS Sectors**

The NAICS sectors represent general categories of economic activities. The sector code equals the first two digits of the NAICS industry code. For a further explanation of the individual NAICS sector codes, please refer to Appendix B, NAICS Sector Titles and Descriptions.

# Appendix B.

## NAICS Sector Titles and Descriptions

---

### **SECTOR 11, FORESTRY, FISHING, HUNTING, & AGRICULTURAL SUPPORT SERVICES**

The nonemployer sector of forestry, fishing, hunting, and agricultural support services is comprised of establishments primarily engaged in only three activities: (1) harvesting timber, (2) harvesting fish and other animals from their natural habitats, and (3) providing support activities for crop, animal, and forestry activities, that do not lead to agricultural production. Examples of support activities include such duties as cotton ginning, soil preparation, planting, breeding services for animals, pedigree record services, boarding horses, dairy herd improvement activities, livestock spraying, sheep dipping and shearing, estimating timber, forest firefighting, forest pest control, and consulting on wood attributes and reforestation.

It is important to realize that this sector EXCLUDES all forms of agricultural production (as they are covered by the Census of Agriculture conducted by the U.S. Department of Agriculture). Therefore, any establishments referred to as farms, ranches, dairies, greenhouses, nurseries, orchards, or hatcheries are considered production-based and eliminated from the totals of this sector.

Also excluded from the Forestry, Fishing, Hunting, and Agricultural Support Services sector are establishments primarily engaged in agricultural research (as they are classified in Industry 5417, Scientific Research and Development Services).

*For more information concerning this sector or its subsectors, please refer to the Census Bureau's Official NAICS page at [www.census.gov/naics](http://www.census.gov/naics).*

### **SECTOR 21, MINING**

The Mining sector comprises establishments that extract naturally occurring mineral solids, such as coal and ores; liquid minerals, such as crude petroleum; and gases, such as natural gas. The term mining is used in the broad sense to include quarrying, well operations, beneficiating (e.g., crushing, screening, washing, and flotation), and other preparation customarily performed at the mine site or as a part of mining activity.

The Mining sector distinguishes two basic activities: (1) mine operation and (2) mining support activities. Mine operation includes establishments operating mines, quarries, or oil and gas wells on their own account or for others on a contract or fee basis. Mining support activities include establishments that perform exploration (except geophysical surveying) and/or other mining services on a contract or fee basis.

Establishments in the Mining sector are grouped and classified according to the natural resource mined or to be mined. Industries include establishments that develop the mine site, extract the natural resources, and /or those that beneficiate (i.e., prepare) the mineral mined. Beneficiation is the process whereby the extracted material is reduced to particles that can be separated into mineral and waste, the former suitable for further processing or direct use. The operations that take place in beneficiation are primarily mechanical, such as grinding, washing, magnetic separation, and centrifugal separation. In contrast, manufacturing operations primarily use chemical and electrochemical processes, such as electrolysis and distillation. However some treatments, such as heat treatments, take place in both the beneficiation and the manufacturing (i.e., smelting/refining) stages. The range of preparation activities varies by mineral and the purity of any given ore deposit. While some minerals, such as petroleum and natural gas, require little or no preparation, others are washed and screened, while yet others, such as gold and silver, can be transformed into bullion before leaving the mine site.

*For more information concerning this sector or its subsectors, please refer to the Census Bureau's Official NAICS page at [www.census.gov/naics](http://www.census.gov/naics).*

### **SECTOR 22, UTILITIES**

The Utilities sector comprises establishments engaged in the provision of the following utility services: electric power, natural gas, steam supply, water supply, and sewage removal. Within this sector, the specific activities associated with the utility services provided vary by utility: electric power includes generation, transmission, and distribution; natural gas includes distribution; steam supply includes provision and/or distribution; water supply includes treatment and distribution; and sewage removal includes collection, treatment, and disposal of waste through sewer systems and sewage treatment facilities.

Excluded from this sector are establishments primarily engaged in waste management services classified in Subsector 562, Waste Management and Remediation Services, which also collect, treat, and dispose of waste materials; however, they do not use sewer systems or sewage treatment facilities.

*For more information concerning this sector or its subsectors, please refer to the Census Bureau's Official NAICS page at [www.census.gov/naics](http://www.census.gov/naics).*

---

## SECTOR 23, CONSTRUCTION

The Construction sector comprises establishments primarily engaged in the construction of buildings and other structures, heavy construction (except buildings), additions, alterations, reconstruction, installation, and maintenance and repairs. Establishments engaged in demolition or wrecking of buildings and other structures, clearing of building sites, and sale of materials from demolished structures are also included. This sector also includes those establishments engaged in blasting, test drilling, landfill, leveling, earth moving, excavating, land drainage, and other land preparation. The industries within this sector have been defined on the basis of their unique production processes. As with all industries, the production processes are distinguished by their use of specialized human resources and specialized physical capital. Construction activities are generally administered or managed at a relatively fixed place of business, but the actual construction work is performed at one or more different project sites.

This sector is divided into three subsectors of construction activities: (1) building construction and land subdivision and land development; (2) heavy construction (except buildings), such as highways, power plants, and pipelines; and (3) construction activity by special trade contractors.

Establishments classified in Subsector 233, Building, Developing, and General Contracting, and Subsector 234, Heavy Construction, usually assume responsibility for an entire construction project and may subcontract some or all of the actual construction work. Operative builders, who build on their own account for sale and land subdividers, and land developers, who engage in subdividing real property into lots for sale, are included in Subsector 233, Building, Developing, and General Contracting. (Special trade contractors are included in Subsector 234, Heavy Construction, if they are engaged in activities primarily relating to heavy construction, such as grading for highways.) Establishments included in these subsectors operate as general contractors, design-builders, engineer-constructors, joint-venture contractors, and turnkey construction contractors. Establishments identified as construction management firms are also included.

Establishments classified in Subsector 235, Special Trade Contractors, are primarily engaged in specialized construction activities, such as plumbing, painting, and electrical work, and work for builders and general contractors under subcontract or directly for project owners. Establishments engaged in demolition or wrecking of buildings and other structures, dismantling of machinery, excavating, shoring and underpinning, anchored earth retention activities, foundation drilling, and grading for buildings are also included in this subsector.

The installation of prefabricated building equipment and materials, such as elevators and revolving doors, is classified in the Construction sector.

*For more information concerning this sector or its subsectors, please refer to the Census Bureau's Official NAICS page at [www.census.gov/naics](http://www.census.gov/naics).*

## SECTOR 31-33, MANUFACTURING

The Manufacturing sector comprises establishments engaged in the mechanical, physical, or chemical transformation of materials, substances, or components into new products. The assembling of component parts of manufactured products is considered manufacturing, except in cases where the activity is appropriately classified in Sector 23, Construction.

Establishments in the Manufacturing sector are often described as plants, factories, or mills and characteristically use power-driven machines and materials-handling equipment. However, establishments that transform materials or substances into new products by hand or in the worker's home and those engaged in selling to the general public products made on the same premises from which they are sold, such as bakeries, candy stores, and custom tailors, may also be included in this sector. Manufacturing establishments may process materials or may contract with other establishments to process their materials for them. Both types of establishments are included in manufacturing.

The materials, substances, or components transformed by manufacturing establishments are raw materials that are products of agriculture, forestry, fishing, mining, or quarrying as well as products of other manufacturing establishments. The materials used may be purchased directly from producers, obtained through customary trade channels, or secured without recourse to the market by transferring the product from one establishment to another under the same ownership.

The new product of a manufacturing establishment may be finished in the sense that it is ready for utilization or consumption, or it may be semifinished to become an input for an establishment engaged in further manufacturing. For example, the product of the alumina refinery is the input used in the primary production of aluminum; primary aluminum is the input to an aluminum wire drawing plant; and aluminum wire is the input for a fabricated wire product-manufacturing establishment.

The boundaries of manufacturing and the other sectors of the classification system can be somewhat blurry. The establishments in the Manufacturing sector are engaged in the transformation of materials into new products. Their output is a new product. However, the definition of what constitutes a new product can be somewhat subjective. As clarification, the following activities are considered manufacturing in NAICS: milk bottling and pasteurizing; water bottling and processing; fresh fish packaging (oyster shucking, fish filleting); apparel jobbing (assigning of materials to contract factories or shops for fabrication or other contract operations) as well as contracting on materials owned by others; printing and related activities;

---

ready-mixed concrete production; leather converting; grinding of lenses to prescription; wood preserving; electroplating, plating, metal heat treating, and polishing for the trade; lapidary work for the trade; fabricating signs and advertising displays; rebuilding or remanufacturing machinery (i.e., automotive parts); ship repair and renovation; machine shops; and tire retreading.

Conversely, there are activities that are sometimes considered manufacturing, but which for NAICS are classified in another sector (i.e., not classified as manufacturing). They include: Logging, classified in Sector 11, Agriculture, Forestry, Fishing, and Hunting, is considered a harvesting operation; Beneficiating of ores and other minerals, classified in Sector 21, Mining, is considered part of the activity of mining; Construction of structures and fabricating operations performed at the site of construction by contractors is classified in Sector 23, Construction; Establishments engaged in breaking of bulk and redistribution in smaller lots, including packaging, repackaging, or bottling products, such as liquors or chemicals; the customized assembly of computers; sorting of scrap; mixing paints to customer order; and cutting metals to customer order, classified in Sector 42, Wholesale Trade or Sector 44-45, Retail Trade, produce a modified version of the same product, not a new product; and Publishing and the combined activity of publishing and printing, classified in Sector 51, Information, perform the transformation of information into a product where the value of the product to the consumer lies in the information content, not in the format in which it is distributed (i.e., the book or software diskette).

*For more information concerning this sector or its subsectors, please refer to the Census Bureau's Official NAICS page at [www.census.gov/naics](http://www.census.gov/naics).*

## **SECTOR 42, WHOLESALE TRADE**

The Wholesale Trade sector comprises establishments engaged in wholesaling merchandise, generally without transformation, and rendering services incidental to the sale of merchandise.

The wholesaling process is an intermediate step in the distribution of merchandise. Wholesalers are organized to sell or arrange the purchase or sale of (1) goods for resale (i.e., goods sold to other wholesalers or retailers), (2) capital or durable nonconsumer goods, and (3) raw and intermediate materials and supplies used in production.

Wholesalers sell merchandise to other businesses and normally operate from a warehouse or office. These warehouses and offices are characterized by having little or no display of merchandise. In addition, neither the design nor the location of the premises is intended to solicit walk-in traffic. Wholesalers do not normally use advertising directed to the general public. Customers are generally reached initially via telephone, in-person marketing, or by specialized advertising that may include Internet and other electronic means. Follow-up orders are either

vendor-initiated or client-initiated, generally based on previous sales, and typically exhibit strong ties between sellers and buyers. In fact, transactions are often conducted between wholesalers and clients that have long-standing business relationships.

Some wholesale establishments may be connected with a single manufacturer and promote and sell the particular manufacturers' products to a wide range of other wholesalers or retailers. Other wholesalers may be connected to a retail chain or a limited number of retail chains and only provide a variety of products needed by that particular retail operation. These wholesalers may obtain the products from a wide range of manufacturers. Still other wholesalers may not take title to the goods, but act as agents and brokers for a commission.

Although, in general, wholesaling normally denotes sales in large volumes, durable nonconsumer goods may be sold in single units. Sales of capital or durable nonconsumer goods used in the production of goods and services, such as farm machinery, medium- and heavy-duty trucks, and industrial machinery, are always included in wholesale trade.

*For more information concerning this sector or its subsectors, please refer to the Census Bureau's Official NAICS page at [www.census.gov/naics](http://www.census.gov/naics).*

## **SECTOR 44-45, RETAIL TRADE**

The Retail Trade sector comprises establishments engaged in retailing merchandise, generally without transformation, and rendering services incidental to the sale of merchandise.

The retailing process is the final step in the distribution of merchandise; retailers are, therefore, organized to sell merchandise in small quantities to the general public. This sector comprises two main types of retailers: store and nonstore.

Store retailers operate fixed point-of-sale locations, located and designed to attract a high volume of walk-in customers. In general, retail stores have extensive displays of merchandise and use mass-media advertising to attract customers. They typically sell merchandise to the general public for personal or household consumption, but some also serve business and institutional clients. These include establishments, such as office supply stores, computer and software stores, building materials dealers, plumbing supply stores, and electrical supply stores. Catalog showrooms, gasoline service stations, automotive dealers, and mobile home dealers are treated as store retailers.

In addition to retailing merchandise, some types of store retailers are also engaged in the provision of after-sales services, such as repair and installation. For example, automobile dealers, electronic and appliance stores, and musical instrument and supply stores often

---

provide repair services. As a general rule, establishments engaged in retailing merchandise and providing after-sales services are classified in this sector.

Nonstore retailers, like store retailers, are organized to serve the general public, but their retailing methods differ. The establishments of this subsector reach customers and market merchandise with methods, such as the broadcasting of “infomercials,” the broadcasting and publishing of direct-response advertising, the publishing of paper and electronic catalogs, door-to-door solicitation, in-home demonstration, selling from portable stalls (street vendors, except food), and distribution through vending machines. Some examples of establishments engaged in the direct sale (nonstore) of products include home heating oil dealers and home delivery newspaper routes.

The buying of goods for resale is a characteristic of retail trade establishments that particularly distinguishes them from establishments in the agriculture, manufacturing, and construction industries. For example, farms that sell their products at or from the point of production are not classified in retail, but rather in agriculture. Similarly, establishments that both manufacture and sell their products to the general public are not classified in retail, but rather in manufacturing. However, establishments that engage in processing activities incidental to retailing are classified in retail. This includes establishments, such as optical goods stores that do in-store grinding of lenses, and meat and seafood markets.

Wholesalers also engage in the buying of goods for resale, but they are not usually organized to serve the general public. They typically operate from a warehouse or office and neither the design nor the location of these premises is intended to solicit a high volume of walk-in traffic. Wholesalers supply institutional, industrial, wholesale, and retail clients; their operations are, therefore, generally organized to purchase, sell, and deliver merchandise in larger quantities. However, dealers of durable nonconsumer goods, such as farm machinery and heavy-duty trucks, are included in wholesale trade even if they often sell these products in single units.

*For more information concerning this sector or its subsectors, please refer to the Census Bureau’s Official NAICS page at [www.census.gov/naics](http://www.census.gov/naics).*

## **SECTOR 48-49, TRANSPORTATION AND WAREHOUSING**

The Transportation and Warehousing sector includes industries providing transportation of passengers and cargo, warehousing and storage for goods, scenic and sightseeing transportation, and support activities related to modes of transportation. Establishments in these industries use transportation equipment or transportation related facilities as a productive asset. The type of equipment depends on the mode of transportation. The modes of transportation are air, rail, water, road, and pipeline.

The Transportation and Warehousing sector distinguishes three basic types of activities: (1) subsectors for each mode of transportation, (2) a subsector for warehousing and storage, and (3) a subsector for establishments providing support activities for transportation. In addition, there are subsectors for establishments that provide passenger transportation for scenic and sightseeing purposes, postal services, and courier services.

A separate subsector for support activities is established in the sector because, first, support activities for transportation are inherently multimodal, such as freight transportation arrangement, or have multimodal aspects. Secondly, there are production process similarities among the support activity industries.

One of the support activities identified in the support activity subsector is the routine repair and maintenance of transportation equipment (e.g., aircraft at an airport, railroad rolling stock at a railroad terminal, or ships at a harbor or port facility). Such establishments do not perform complete overhauling or rebuilding of transportation equipment (i.e., periodic restoration of transportation equipment to original design specifications) or transportation equipment conversion (i.e., major modification to systems). An establishment that primarily performs factory (or shipyard) overhauls, rebuilding, or conversions of aircraft, railroad rolling stock, or a ship is classified in Subsector 336, Transportation Equipment Manufacturing, according to the type of equipment.

Warehousing establishments in this sector are distinguished from merchant wholesaling in that the warehouse establishments do not sell the goods.

Excluded from this sector are establishments primarily engaged in providing travel agent services that support transportation and other establishments, such as hotels, businesses, and government agencies. These establishments are classified in Sector 56, Administrative and Support, Waste Management, and Remediation Services. Also, establishments primarily engaged in providing rental and leasing of transportation equipment without operator are classified in Subsector 532, Rental and Leasing Services.

*For more information concerning this sector or its subsectors, please refer to the Census Bureau’s Official NAICS page at [www.census.gov/naics](http://www.census.gov/naics).*

## **SECTOR 51, INFORMATION**

The Information sector comprises establishments engaged in the following processes: (a) producing and distributing information and cultural products, (b) providing the means to transmit or distribute these products as well as data or communications, and (c) processing data.

The main components of this sector are the publishing industries, including software publishing, the motion picture and sound recording industries, the broadcasting and telecommunications industries, and the information services and data processing services industries.

---

The expressions “information age” and “global information economy” are used with considerable frequency today. The general idea of an “information economy” includes both the notion of industries primarily producing, processing, and distributing information, as well as the idea that every industry is using available information and information technology to reorganize and make themselves more productive.

For the purpose of developing NAICS, it is the transformation of information into a commodity that is produced and distributed by a number of growing industries that is at issue. The Information sector groups three types of establishments: (1) those engaged in producing and distributing information and cultural products; (2) those that provide the means to transmit or distribute these products as well as data or communications; and (3) those that process data. Cultural products are those that directly express attitudes, opinions, ideas, values, and artistic creativity; provide entertainment; or offer information and analysis concerning the past and present. Included in this definition are popular, mass-produced, products as well as cultural products that normally have a more limited audience, such as poetry books, literary magazines, or classical records.

The unique characteristics of information and cultural products, and of the processes involved in their production and distribution, distinguish the Information sector from the goods-producing and service-producing sectors. Some of these characteristics are:

Unlike traditional goods, an “information or cultural product,” such as a newspaper online or television program, does not necessarily have tangible qualities, nor is it necessarily associated with a particular form. A movie can be shown at a movie theater, on a television broadcast, through video-on-demand, or rented at a local video store. A sound recording can be aired on radio, embedded in multimedia products, or sold at a record store.

Unlike traditional services, the delivery of these products does not require direct contact between the supplier and the consumer.

The value of these products to the consumer lies in their informational, educational, cultural, or entertainment content, not in the format in which they are distributed. Most of these products are protected from unlawful reproduction by copyright laws.

The intangible property aspect of information and cultural products makes the processes involved in their production and distribution very different from goods and services. Only those possessing the rights to these works are authorized to reproduce, alter, improve, and distribute them. Acquiring and using these rights often involves significant costs. In addition, technology is revolutionizing the distribution of these products. It is possible to distribute them in a physical form, via broadcast, or online.

Distributors of information and cultural products can easily add value to the products they distribute. For instance, broadcasters add advertising not contained in the original product. This capacity means that unlike traditional distributors, they derive revenue not from sale of the distributed product to the final consumer, but from those who pay for the privilege of adding information to the original product. Similarly, a database publisher can acquire the rights to thousands of previously published newspaper and periodical articles and add new value by providing search and software and organizing the information in a way that facilitates research and retrieval. These products often command a much higher price than the original information.

The distribution modes for information commodities may either eliminate the necessity for traditional manufacture or reverse the conventional order of manufacture-distribute: A newspaper distributed online, for example, can be printed locally or by the final consumer. Similarly, it is anticipated that packaged software, which today is mainly bought through the traditional retail channels, will soon be available mainly online. The NAICS Information sector is designed to make such economic changes transparent as they occur, or to facilitate designing surveys that will monitor the new phenomena and provide data to analyze the changes.

Many of the industries in the NAICS Information sector are engaged in producing products protected by copyright law or in distributing them (other than distribution by traditional wholesale and retail methods). Examples are traditional publishing industries, software and database publishing industries, and film and sound industries. Broadcasting and telecommunications industries and information providers and processors are also included in the Information sector, because their technologies are so closely linked to other industries in the Information sector.

*For more information concerning this sector or its subsectors, please refer to the Census Bureau’s Official NAICS page at [www.census.gov/naics](http://www.census.gov/naics).*

## **SECTOR 52, FINANCE AND INSURANCE**

The Finance and Insurance sector comprises establishments primarily engaged in financial transactions (transactions involving the creation, liquidation, or change in ownership of financial assets) and/or in facilitating financial transactions. Three principal types of activities are identified:

1. Raising funds by taking deposits and/or issuing securities and, in the process, incurring liabilities. Establishments engaged in this activity use raised funds to acquire financial assets by making loans and/or purchasing securities. Putting themselves at risk, they channel funds from lenders to borrowers and transform or repackage the funds with respect to maturity, scale, and risk. This activity is known as financial intermediation.

2. Pooling of risk by underwriting insurance and annuities. Establishments engaged in this activity collect fees, insurance premiums, or annuity considerations; build up reserves; invest those reserves; and make contractual payments. Fees are based on the expected incidence of the insured risk and the expected return on investment.
3. Providing specialized services facilitating or supporting financial intermediation, insurance, and employee benefit programs.

In addition, monetary authorities charged with monetary control are included in this sector.

The subsectors, industry groups, and industries within the NAICS Finance and Insurance sector are defined on the basis of their unique production processes. As with all industries, the production processes are distinguished by their use of specialized human resources and specialized physical capital. In addition, the way in which these establishments acquire and allocate financial capital, their source of funds, and the use of those funds provides a third basis for distinguishing characteristics of the production process. For instance, the production process in raising funds through deposit-taking is different from the process of raising funds in bond or money markets. The process of making loans to individuals also requires different production processes than does the creation of investment pools or the underwriting of securities.

Most of the Finance and Insurance subsectors contain one or more industry groups of (1) intermediaries with similar patterns of raising and using funds and (2) establishments engaged in activities that facilitate, or are otherwise related to, that type of financial or insurance intermediation.

Industries within this sector are defined in terms of activities for which a production process can be specified, and many of these activities are not exclusive to a particular type of financial institution. To deal with the varied activities taking place within existing financial institutions, the approach is to split these institutions into components performing specialized services. This requires defining the units engaged in providing those services and developing procedures that allow for their delineation. These units are the equivalents for finance and insurance of the establishments defined for other industries.

The Finance and Insurance sector has been defined to encompass establishments primarily engaged in financial transactions; that is, transactions involving the creation, liquidation, or change in ownership of financial assets or in facilitating financial transactions. Financial industries are extensive users of electronic means for facilitating the verification of financial balances, authorizing transactions, transferring funds to and from transactors' accounts, notifying banks (or credit card issuers) of the individual transactions, and providing daily summaries. Since these transaction processing activities are integral to the production

of finance and insurance services, establishments that principally provide a financial transaction processing service are classified to this sector, rather than to the data processing industry in the Information sector.

*For more information concerning this sector or its subsectors, please refer to the Census Bureau's Official NAICS page at [www.census.gov/naics](http://www.census.gov/naics).*

## **SECTOR 53, REAL ESTATE AND RENTAL AND LEASING**

The Real Estate and Rental and Leasing sector comprises establishments primarily engaged in renting, leasing, or otherwise allowing the use of tangible or intangible assets, and establishments providing related services. The major portion of this sector comprises establishments that rent, lease, or otherwise allow the use of their own assets by others. The assets may be tangible, as is the case of real estate and equipment, or intangible, as is the case with patents and trademarks.

This sector also includes establishments primarily engaged in managing real estate for others, selling, renting and/or buying real estate for others, and appraising real estate. These activities are closely related to this sector's main activity, and it was felt that from a production basis they would best be included here. In addition, a substantial proportion of property management is self-performed by lessors.

The main components of this sector are the real estate lessors industries; equipment lessors industries (including motor vehicles, computers, and consumer goods); and lessors of nonfinancial intangible assets (except copyrighted works).

Excluded from this sector are establishments primarily engaged in renting or leasing equipment with operators. Establishments renting or leasing equipment with operators are classified in various subsectors of NAICS depending on the nature of the services provided (e.g., transportation, construction, agriculture). These activities are excluded from this sector because the client is paying for the expertise and knowledge of the equipment operator, in addition to the rental of the equipment. In many cases, such as the rental of heavy construction equipment, the operator is essential to operate the equipment.

*For more information concerning this sector or its subsectors, please refer to the Census Bureau's Official NAICS page at [www.census.gov/naics](http://www.census.gov/naics).*

## **SECTOR 54, PROFESSIONAL, SCIENTIFIC, AND TECHNICAL SERVICES**

The Professional, Scientific, and Technical Services sector comprises establishments that specialize in performing professional, scientific, and technical activities for others.

---

These activities require a high degree of expertise and training. The establishments in this sector specialize according to expertise and provide these services to clients in a variety of industries and, in some cases, to households. Activities performed include: legal advice and representation; accounting, bookkeeping, and payroll services; architectural, engineering, and specialized design services; computer services; consulting services; research services; advertising services; photographic services; translation and interpretation services; veterinary services; and other professional, scientific, and technical services.

This sector excludes establishments primarily engaged in providing a range of day-to-day office administrative services, such as financial planning, billing and record-keeping, personnel, and physical distribution and logistics. These establishments are classified in Sector 56, Administrative and Support and Waste Management and Remediation Services.

Industries in the Professional, Scientific, and Technical Services sector group establishments engaged in processes where human capital is the major input. These establishments make available the knowledge and skills of their employees, often on an assignment basis, where an individual or team is responsible for the delivery of services to the client. The individual industries of this subsector are defined on the basis of the particular expertise and training of the services provider.

A distinguishing feature of the Professional, Scientific, and Technical Services sector is the fact that most of the industries grouped in it have production processes that are almost wholly dependent on worker skills. In most of these industries, equipment and materials are not of major importance, unlike health care, for example, where “high tech” machines and materials are important collaborating inputs to labor skills in the production of health care. Thus, the establishments classified in this sector sell expertise. Much of the expertise requires degrees, though not in every case.

*For more information concerning this sector or its subsectors, please refer to the Census Bureau’s Official NAICS page at [www.census.gov/naics](http://www.census.gov/naics).*

## **SECTOR 56, ADMINISTRATIVE AND SUPPORT AND WASTE MANAGEMENT AND REMEDIATION SERVICES**

The Administrative and Support and Waste Management and Remediation Services sector comprises establishments performing routine support activities for the day-to-day operations of other organizations. These essential activities are often undertaken in-house by establishments in many sectors of the economy. The establishments in this sector specialize in one or more of these support activities and provide these services to clients in a variety of industries and, in some cases, to households. Activities performed include: office administration, hiring and placing

of personnel, document preparation and similar clerical services, solicitation, collection, security and surveillance services, cleaning, and waste disposal services.

The administrative and management activities performed by establishments in this sector are typically on a contract or fee basis. These activities may also be performed by establishments that are part of the company or enterprise. However, establishments involved in administering, overseeing, and managing other establishments of the company or enterprise, are classified in Sector 55, Management of Companies and Enterprises, and are not covered as part of the nonemployer statistics series. These establishments normally undertake the strategic and organizational planning and decision making role of the company or enterprise, hence they are a part of a large organization and not a nonemployer. Government establishments engaged in administering, overseeing, and managing governmental programs are classified in Sector 92, Public Administration, and they too are not included in the nonemployer statistics series.

*For more information concerning this sector or its subsectors, please refer to the Census Bureau’s Official NAICS page at [www.census.gov/naics](http://www.census.gov/naics).*

## **SECTOR 61, EDUCATIONAL SERVICES**

The Educational Services sector comprises establishments that provide instruction and training in a wide variety of subjects. This instruction and training is provided by specialized establishments, such as schools, colleges, universities, and training centers. These establishments may be privately owned and operated for profit or not for profit, or they may be publicly owned and operated. They may also offer food and accommodation services to their students.

Educational services are usually delivered by teachers or instructors that explain, tell, demonstrate, supervise, and direct learning. Instruction is imparted in diverse settings, such as educational institutions, the workplace, or the home through correspondence, television, or other means. It can be adapted to the particular needs of the students, for example sign language can replace verbal language for teaching students with hearing impairments. All industries in the sector share this commonality of process, namely, labor inputs of instructors with the requisite subject matter expertise and teaching ability.

*For more information concerning this sector or its subsectors, please refer to the Census Bureau’s Official NAICS page at [www.census.gov/naics](http://www.census.gov/naics).*

## **SECTOR 62, HEALTH CARE AND SOCIAL ASSISTANCE**

The Health Care and Social Assistance sector comprises establishments providing health care and social assistance for individuals. The sector includes both health care and

---

social assistance because it is sometimes difficult to distinguish between the boundaries of these two activities. The industries in this sector are arranged on a continuum starting with those establishments providing medical care exclusively, continuing with those providing health care and social assistance, and finally finishing with those providing only social assistance. The services provided by establishments in this sector are delivered by trained professionals. All industries in the sector share this commonality of process, namely, labor inputs of health practitioners or social workers with the requisite expertise. Many of the industries in the sector are defined based on the educational degree held by the practitioners included in the industry.

Excluded from this sector are aerobic classes in Subsector 713, Amusement, Gambling, and Recreation Industries and nonmedical diet and weight reducing centers in Subsector 812, Personal and Laundry Services. Although these can be viewed as health services, these services are not typically delivered by health practitioners.

*For more information concerning this sector or its subsectors, please refer to the Census Bureau's Official NAICS page at [www.census.gov/naics](http://www.census.gov/naics).*

## **SECTOR 71, ARTS, ENTERTAINMENT, AND RECREATION**

The Arts, Entertainment, and Recreation sector includes a wide range of establishments that operate facilities or provide services to meet varied cultural, entertainment, and recreational interests of their patrons. This sector comprises: (1) establishments that are involved in producing, promoting, or participating in live performances, events, or exhibits intended for public viewing; (2) establishments that preserve and exhibit objects and sites of historical, cultural, or educational interest; and (3) establishments that operate facilities or provide services that enable patrons to participate in recreational activities or pursue amusement, hobby, and leisure time interests.

Some establishments that provide cultural, entertainment, or recreational facilities and services are classified in other sectors. Excluded from this sector are: (1) establishments that provide both accommodations and recreational facilities, such as hunting and fishing camps and resort and casino hotels (classified in Subsector 721, Accommodation); (2) restaurants and night clubs that provide live entertainment in addition to the sale of food and beverages (classified in Subsector 722, Food Services and Drinking Places); (3) motion picture theaters, libraries and archives, and publishers of newspapers, magazines, books, periodicals, and computer software (classified in Sector 51, Information); and (4) establishments using transportation equipment to provide recreational and entertainment services, such as those operating sightseeing buses, dinner cruises, or helicopter rides (classified in Subsector 487, Scenic and Sightseeing Transportation).

*For more information concerning this sector or its subsectors, please refer to the Census Bureau's Official NAICS page at [www.census.gov/naics](http://www.census.gov/naics).*

## **SECTOR 72, ACCOMMODATION AND FOODSERVICES**

The Accommodation and Foodservices sector comprises establishments providing customers with lodging and/or preparing meals, snacks, and beverages for immediate consumption. The sector includes both accommodation and foodservices establishments because the two activities are often combined at the same establishment.

Excluded from this sector are civic and social organizations, amusement and recreation parks, theaters, and other recreation or entertainment facilities providing food and beverage services.

Industries in the Accommodation subsector provide lodging or short-term accommodations for travelers, vacationers, and others. There is a wide range of establishments in these industries. Some provide lodging only; while others provide meals, laundry, and recreational facilities, as well as lodging. Lodging establishments are classified in this subsector even if the provision of complementary services generates more revenue. The type of complementary services provided vary from establishment to establishment.

Industries in the Food Services and Drinking Places subsector prepare meals, snacks, and beverages to customer order for immediate on-premises and off-premises consumption. There is a wide range of establishments in these industries. Some provide food and drink only; while others provide various combinations of seating space, waiter/waitress services, and incidental amenities, such as limited entertainment. The industries in the subsector are grouped based on the type and level of services provided. The industry groups are full-service restaurants; limited-service eating places; special food services, such as food service contractors, caterers, and mobile food services; and drinking places.

*For more information concerning this sector or its subsectors, please refer to the Census Bureau's Official NAICS page at [www.census.gov/naics](http://www.census.gov/naics).*

## **SECTOR 81, OTHER SERVICES (EXCEPT PUBLIC ADMINISTRATION)**

The Other Services (except Public Administration) sector comprises establishments engaged in providing services not specifically provided for elsewhere in the classification system. Establishments in this sector are primarily engaged in activities, such as equipment and machinery repairing, promoting or administering religious activities, grantmaking, advocacy, and providing drycleaning and laundry services, personal care services, death care services, pet care services, photofinishing services, temporary parking services, and dating services.

---

Private households that engage in employing workers on or about the premises in activities primarily concerned with the operation of the household are included in this sector.

Excluded from this sector are establishments primarily engaged in retailing new equipment and also performing repairs and general maintenance on equipment. These establishments are classified in Sector 44-45, Retail Trade.

*For more information concerning this sector or its subsectors, please refer to the Census Bureau's Official NAICS page at [www.census.gov/naics](http://www.census.gov/naics).*

# Appendix C.

## Coverage and Methodology

---

### THE NONEMPLOYER UNIVERSE

The universe of nonemployer establishments is created annually, in part, as a byproduct of identifying the Census Bureau's business employer universe. The business employer universe is known as the Business Register. The Business Register attempts to cover all businesses in the United States with paid employees. If the Census Bureau receives information about a particular business establishment through administrative records, but does not receive any indication that it has paid employees, it becomes part of the potential nonemployer universe. Name, address, industry classification, and receipts are available for each potential nonemployer record. These data are obtained chiefly from the annual business income tax returns filed with the Internal Revenue Service (IRS).

This potential nonemployer universe is edited and reviewed to detect entities or records that do not represent true nonemployer establishments. Among the largest removed components are records associated with large, multiunit companies that were not properly linked to the employer part of the company. Another consists of income records for regulated investment companies, representing mutual fund income. The Census Bureau decided not to include these as nonemployer establishments because their income is generally not viewed as being nonemployer income. The Census Bureau also excludes universe records with receipts above a predetermined cutoff, assuming that they are really employers and that their data are, therefore, represented in the employer database. For corporations and partnerships this cutoff is \$1 million, except for service-type industries, where the cutoff is \$2 million. For sole proprietorships, the cutoffs vary widely depending upon industrial classification. For some nonemployer sole proprietorships, such as those engaged in investment and entertainment, it may be possible to have well over \$1 million in receipts. However, it is not likely that a sole proprietorship restaurant, for example, would have over \$1 million in receipts and have no employees.

Potential nonemployer entities with less than \$1,000 in receipts are excluded in all sectors except construction. The small receipts of these establishments indicate that they may represent hobbies as opposed to normal business activities.

A certain amount of undercoverage in the universe occurs as a result of processing deadlines. If the Census Bureau receives information on a potential nonemployer business

more than 1 year after the end of the reference year, it is excluded in nonemployer tabulations. The estimated undercount of nonemployer corporation and partnership establishments because of late reporting is around 5 percent. This accounts for about 1 to 2 percent of receipts. The estimated undercount for sole proprietorship establishments because of late reporting is much less.

### INDUSTRY CLASSIFICATION OF ESTABLISHMENTS

Each establishment is classified into 1 of 301 possible industries in accordance with the industry definitions in the *1997 North American Industry Classification System* (NAICS) manual. The NAICS system is comprised of 1,170 industries, but nonemployer statistics are limited by the codes available through administrative-record sources.

The Census Bureau first used NAICS to classify industries for 1997 Economic Census data. Prior to this, the Census Bureau used the SIC (Standard Industrial Classification) system for industry classification. The differences between NAICS and SIC are outlined in Appendix A of the 1997 NAICS manual.

In the NAICS system, an industry is generally defined as a group of establishments that use similar processes or have similar business activities. To the extent practical, the system uses supply-based or production-oriented concepts in defining industries. The coding system works in such a way that the definitions progressively become narrower with successive additions of numerical digits. In nonemployer tabulations, the most detailed levels include subsectors (three-digit NAICS), industry groups (four-digit NAICS), and five- and six-digit NAICS industries.

There is a small percentage (2 to 10 percent, depending on data year) of nonemployers that are unclassified. The percentage is at its lowest for economic census years, such as 1997. For these cases, an industry classification is assigned or imputed from a classified establishment within the same county with a similar value of receipts and the same legal form of organization. This imputation procedure has the effect of preserving the distribution of establishments and receipts by industry, while eliminating an unclassified component that varies in size each year. To control the contribution of imputed classifications, we have adopted the rule that if establishments with an imputed classification account for more than 40 percent of either receipts or number of establishments in a published row, both items are suppressed and assigned a flag of "S."

---

However, if the cell will also be suppressed to prevent a disclosure, a flag of “D” will be shown instead of “S.” At the national level, less than 10 percent of nonemployer establishments have an imputed classification, accounting for 2 to 4 percent of receipts.

### **PRECAUTIONS IN ANALYZING AND INTERPRETING NONEMPLOYER ESTIMATES**

There are several considerations that must be recognized when analyzing or interpreting nonemployer estimates. The first is that the Census Bureau equates a business mailing address with a business establishment. Under the usual definition, an “establishment” is a fixed physical location or permanent structure where business is conducted or where services are performed. Stores, offices, and manufacturing plants are examples of establishments, but mobile vending vehicles or temporary stands are not. However, for nonemployer statistics, a business that sells from a mobile vehicle, temporary stand, or even one that has a separate store for conducting business, will be considered as an establishment and assigned geographically to an owner’s mailing address.

A second consideration is that many businesses use leased or contract employees. In cases where all employees are leased or contracted, the payroll for the business is zero, placing it in the potential nonemployer universe. If the establishment’s receipts are large, it may be dropped from nonemployer tabulations because its receipts exceed the cutoffs. Otherwise, it appears in the tabulations. Currently, the Census Bureau does not have a method to distinguish establishments that lease all their employees.

### **RELIABILITY OF DATA**

All data compiled for nonemployer statistics are subject to nonsampling errors. Nonsampling errors can be attributed

to many sources: inability to identify all cases that should be in the universe; definition and classification difficulties; errors in recording or coding the data obtained; and other errors of coverage, processing, and estimation for missing or misreported data.

The data are tabulated from administrative records only and are not subject to sampling error. No survey data are collected.

The accuracy of these tabulated data is determined by the joint effects of the various nonsampling errors. No direct measurement of these effects has been obtained except for estimation for missing or misreported industry classifications; however, precautionary steps were taken in all phases of the processing to minimize the effects of nonsampling errors.

The improper inclusion of units that should not be part of the nonemployer universe is a primary source of nonsampling error. These units may, in fact, be employer establishments. The Census Bureau takes several steps to identify these units and remove them from the universe. The most significant sources were identified, but the size of the universe, limited resources, and limited data on which to make a determination do not achieve the complete identification and removal of all employer units.

The assignment or imputation of an industry classification to nonemployer units with missing classification is another source of nonsampling error. The effect of this imputation is to preserve the overall distribution of totals by industry at the county and higher geographic levels, but certain data cells may be adversely effected in counties or industries with a small number of establishments. Data cells with a high level of imputation are identified in the publication as not meeting publication standards.
