

# Nonemployer Statistics: 2002

Issued April 2005

NS02-00A-1

## 2002 Economic Census

*Core Business Statistics Series*

**USCENSUSBUREAU**

*Helping You Make Informed Decisions*

U.S. Department of Commerce  
Economics and Statistics Administration  
U.S. CENSUS BUREAU

## ACKNOWLEDGMENTS

This report was prepared under the general direction of **Franklin Winters**, Assistant Division Chief for Research and Methodology, Economic Planning and Coordination Division. **Paul Hanczaryk**, Chief, Register Analysis Branch, supervised the preparation of this report and was assisted by **Philip Thompson** and **Alan Pines**. **Gerald Feuer** and **Mary Green** contributed in resolving establishment processing problems and in analyzing the data, and were assisted in this process by **Stefan Belliveau**, **Joel Fowler**, **Lavelle Lee**, **Tracy Palmer**, and **Jon Youngman**. Under the direction of **Michael Kornbau**, Chief of the Program Research and Methods Branch, statistical methodology and quality assurance operations were performed by **Michelle Vile**, **Sonya Peacock**, and **Anne Kearney**. **David Chapman** contributed significant computer processing assistance.

**Diane Conley**, Chief, Register Support Branch, Economic Statistical Methods and Programming Division (ESMPD), assisted by **Richard Cusic**, supervised computer processing operations. **William Sandusky** and **Sumit Khaneja** were responsible for the programming of establishment data. **Nancy Ngoc Nguyen** provided additional operational support.

Under the supervision of **Gary Sheridan**, Chief of the Macro Analytical Branch, **Carol Blatt** was responsible for the programming of the tabulations. **Edward Johnson** prepared the tables that appear in this report, with **Apparao V. Katikineni** and **Jenny Hua** assisting.

The Systems Support Division provided the table composition system. **Robert Joseph Brown**, Table Image Processing System (TIPS) Senior Software Engineer, was responsible for the design and development of the TIPS, under the supervision of **Robert J. Bateman**, Assistant Division Chief, Information Systems.

**Donna L. Hambric**, Chief of the Economic Planning Staff, was responsible for overseeing the systems and information for dissemination. **Douglas J. Miller**, Chief, Tables and Dissemination Branch, assisted by **Lisa Aispuro**, **Jamie Fleming**, **Keith Fuller**, **Andrew W. Hait**, and **Kathy G. Padgett** were responsible for developing the data dissemination systems and procedures. **Paul Zeisset** provided programming for the Internet applications.

**Wanda Cevis**, **Margaret A. Smith**, **Bernadette J. Beasley**, and **Michael T. Browne** of the Administrative and Customer Services Division, **Walter C. Odom**, Chief, provided publication and printing management, graphics design and composition, and editorial review for print and electronic media. General direction and production management were provided by **James R. Clark**, Assistant Division Chief, and **Susan L. Rappa**, Chief, Publications Services Branch.

# Introduction

---

## **PURPOSE AND USE OF NONEMPLOYER STATISTICS**

Nonemployer Statistics provide U.S. and subnational economic data by industry for businesses that have no paid employees and are subject to federal income tax. This series is useful for studying the economic activity of small businesses at various geographic levels. Businesses use the data for analyzing market potential, measuring the effectiveness of sales and advertising programs, and developing budgets. Government agencies use the data for administration and planning.

Most types of businesses covered by the Census Bureau economic statistics programs are included in the Nonemployer Statistics. All of the Agriculture, Forestry, Fishing, and Hunting sector, except crop and animal production, are covered in Nonemployer Statistics. These industries typically are not covered in other Census Bureau economic programs. Most nonemployers are self-employed individuals operating very small unincorporated businesses, which may or may not be the owner's principal source of income. Although nonemployers constitute a large part of the business universe in terms of the number of establishments, they contribute a relatively small portion of the overall sales and receipts data. Tax-exempt businesses are excluded from the nonemployers tabulations.

Nonemployer Statistics have been released every 5 years since 1972, for years ending in "2" and "7" for selected industries in conjunction with Economic Census publications. Comparability of data over time may be affected by definitional changes for establishments, activity status, industrial classifications, and processing methodology. For more details on these changes, see the section "Comparability With Other Data" below. The 2002 Nonemployer Statistics is part of the 2002 Economic Census Core Business Statistics Series. Nonemployer Statistics was first released as an annual series beginning with the 1998 report.

## **SOURCES OF DATA**

Nonemployer Statistics data originate chiefly from administrative records of the Internal Revenue Service (IRS). Data are primarily comprised of sole proprietorship businesses filing IRS Form 1040, Schedule C, although some of the data is derived from filers of partnership and corporation tax returns that report no paid employees. These data undergo complex processing, editing, and analytical review at the Census Bureau to distinguish nonemployers from employers, correct and complete data items, and form the final nonemployer universe.

## **INDUSTRY, GEOGRAPHY, AND LEGAL FORM OF ORGANIZATION CLASSIFICATIONS**

**Industry Classifications.** The Nonemployer Statistics is published based on the North American Industry Classification System (NAICS). The 1997 NAICS codes are the basis of industry classification for the nonemployer data tabulated for reference years 1997 through 2001. Starting with 2002, Nonemployer Statistics are classified and tabulated based on the 2002 NAICS codes, which contain several significant revisions from the 1997 codes. Detailed information about NAICS, including changes for 2002, and comparability with 1997 codes, is available at [www.census.gov/epcd/www/naics.html](http://www.census.gov/epcd/www/naics.html)

---

The Nonemployer Statistics series includes the following NAICS sectors:

<b>Sector</b>	<b>Description</b>
11(pt)	Agricultural Support, Forestry, Fishing, and Hunting
21	Mining
22	Utilities
23	Construction
31-33	Manufacturing
42	Wholesale Trade
44-45	Retail Trade
48-49	Transportation and Warehousing
51	Information
52	Finance and Insurance
53	Real Estate and Rental and Leasing
54	Professional, Scientific, and Technical Services
56	Administrative and Support and Waste Management and Remediation Services
61	Educational Services
62	Health Care and Social Assistance
71	Arts, Entertainment, and Recreation
72	Accommodation and Foodservices
81	Other Services (except Public Administration)

The following NAICS industries are excluded from Nonemployer Statistics:

- Crop Production (NAICS subsector 111)
- Animal Production (NAICS subsector 112)
- Investment Funds, Trusts, and Other Financial Vehicles (NAICS subsector 525)
- Management of Companies and Enterprises (NAICS sector 55)

Additionally, establishments coded to the NAICS industries below are assumed to be misclassified, and are reclassified as follows:

<b>If coded to:</b>	<b>Reclassified as:</b>
New Car Dealers (NAICS industry 44111)	Used Car Dealers (NAICS industry 44112)
Department Stores (NAICS industry group 4521)	General Merchandise Stores (NAICS subsector 452)
Rail Transportation (NAICS industry 48211)	Support Activities for Transportation (NAICS subsector 488)
Hospitals (NAICS subsector 622)	Other Ambulatory Health Care Services (NAICS industry group 6219)
Oil and Gas Extraction (NAICS industry group 2111) in areas without oil and gas production	Other Financial Investment Activities (NAICS industry group 5239)

Sources for assigning Nonemployer Statistics industry classifications are the Social Security Administration, the Internal Revenue Service (IRS), and the Bureau of Labor Statistics. Industry classifications derived from the IRS are self-classified by tax filers.

The industry titles used in this series are the short NAICS titles. Information on NAICS and recent changes are at [www.census.gov/epcd/www/naics.html](http://www.census.gov/epcd/www/naics.html). Nonemployer Statistics are limited to approximately 300 industries that are available through administrative-record sources, and are common to all three legal forms of organization applicable to nonemployer businesses. Because of this, data for nonemployers generally are provided at broader levels of industry detail than data for employers.

For those nonemployer businesses that were unclassified, NAICS classifications were imputed by assigning the code of a nonemployer business with comparable receipts located in the same county. Nearly four percent of the 2002 nonemployer universe have imputed NAICS values. For more information, refer to the section on Coverage and Methodology.

**Geography Classification.** The Nonemployer Statistics data series provides summary tabulations for the United States, each state, the District of Columbia, each county (and county equivalent), and metropolitan areas.

---

Most geography codes are derived from the business owner's mailing address identified from administrative records. Because the owner's mailing address may not be the same as the physical location of the business, the resulting geography codes do not always represent where business is actually conducted.

The nonemployer tabulations exclude records with invalid, foreign, or military geographic locations. The independent cities in Virginia and the cities of Baltimore, MD, Carson City, NV, and St. Louis, MO, are treated as separate counties. Puerto Rico and Island Areas are not included in the nonemployer tabulations.

**Legal Form of Organization Classification.** The legal form of organization for nonemployer businesses is derived from administrative record sources. Nonemployer Statistics presents U.S.-level data by the following three legal forms of organization:

- Individual proprietorships (also referred to as “sole proprietorships”)
- Partnerships
- Corporations

## **DEFINITIONS OF BASIC DATA ITEMS**

**Establishments.** Generally, an establishment is a single physical location where business is conducted or services or industrial operations are performed. However, for nonemployers we count each distinct business income tax return filed by a nonemployer business as an establishment. A nonemployer business may operate from its owner's home address or from a separate business location. Most geography codes are derived from the business owner's mailing address, which may not be the same as the physical location of the business.

**Receipts.** Includes gross receipts, sales, commissions, and income received from trades and businesses, as reported on annual business income tax returns. Business income consists of all payments received for services rendered by nonemployer businesses, such as payments received as independent agents and contractors.

The composition of nonemployer receipts may differ from receipts data published for employer establishments. For example, for wholesale agents and brokers without payroll (nonemployers), the receipts item contains commissions received or earnings. In contrast, for wholesale agents and brokers with payroll (employers), the sales and receipts item published in the 2002 Economic Census represents the value of the goods involved in the transactions.

## **COMPARABILITY WITH OTHER DATA**

The comparability of data with previous Nonemployer Statistics series may be effected by the following:

- Change in NAICS industries within Sectors 23, 42, 44-45, and 51, starting with 2002.
- The change from SIC to NAICS codes in 1997.
- The change to imputing industry classifications (see “Industry Classifications” section, above) for unclassified nonemployer businesses. Prior to 1997, unclassified businesses were excluded from the nonemployer tabulations.
- The inclusion of all industry sectors, except as noted in the “Industry Classifications” section, above. Prior to 1997, previous nonemployer tabulations covered businesses in the Services, Retail, Finance, Insurance, Real Estate, Transportation, Communications, Utilities, and Construction sectors.
- The change to providing county- and metropolitan area-level data for all industry sectors in 1997.

---

## DATA WITHHELD FROM PUBLICATION

In accordance with U.S. Code, Title 13, Section 9, no data are published that would disclose the operations of an individual business. Because the preponderance of Nonemployer Statistics data items originate with the IRS, we adhere to both Census Bureau and IRS disclosure guidelines. For U.S.- and state-level data, we publish the number of establishments and receipts in a data cell only if it contains three or more nonemployer businesses. For county- and metropolitan area-level data, we publish the number of establishments and receipts in a data cell only if it contains ten or more nonemployer businesses. According to Census Bureau disclosure rules, when a small number of nonemployer businesses have a dominant share of receipts in a data cell, establishments and receipts are suppressed to protect the dominant businesses. These suppressions are assigned a flag of "D".

If more than 40 percent of either receipts or establishments in a published data cell are imputed, we suppress both items because the data do not meet publication standards. These suppressions are assigned a flag of "S". The "D" and "S" flags indicate that there are establishments engaged in economic activity for that industry level, but that the number of establishments and receipts cannot be shown. Data cells that fail both conditions are assigned a flag of "D".

## DATA PRODUCTS

**Data Formats.** Nonemployer Statistics series data are available in DVD-ROM and hypertext table (html) formats for U.S., state, county, and metropolitan area levels and in portable document format (pdf) at the U.S. and state level only. No printed publications of Nonemployer Statistics are available. However, our Customer Service Branch will print and bind the pdf version for a fee. See contact information below.

Only the NAICS classifications common to all three legal form of organization classifications assigned to nonemployer businesses are shown in the tabulations. Only those NAICS classifications with economic activity are displayed.

The 2002 Economic Census DVD-ROM (which includes these Nonemployer Statistics data) contains menu-driven access software. The DVD-ROM also includes software for creating nonemployer data files compatible with popular database and spreadsheet software. The DVD-ROM is a powerful software tool to search and manipulate nonemployer data.

The Nonemployer Statistics data products on html and pdf can be accessed at [www.census.gov/epcd/nonemployer/index.html](http://www.census.gov/epcd/nonemployer/index.html). In order to view the pdf files, you will need the Adobe Reader, which is available for free from the Adobe Web site at [www.adobe.com](http://www.adobe.com). Two tabulations are presented in pdf. The U.S.-level tabulation presents the number of establishments and receipts by NAICS industry and by legal form of organization. The state-level tabulation presents number of establishments and receipts by NAICS industry for each state and the District of Columbia.

**ABBREVIATIONS AND SYMBOLS**

The following abbreviations and symbols are used in this data series:

(D) - Withheld to avoid disclosing data for individual businesses; data are included in broader industry totals.

(S) - Withheld to avoid releasing data that do not meet publication standards; data are included in broader industry totals.

NAICS - North American Industry Classification System

Combined Area - Combined Statistical Area

Metro Area - Metropolitan Statistical Area

Micro Area - Micropolitan Statistical Area

Metro Division - Metropolitan Division

<sup>1</sup>Receipts include the net total of all receipts, sales, revenue, shipments, and nonemployee compensation, such as commissions. Data users should exercise caution in adding nonemployer receipts to the related data item that is published for employer establishments because data content may not be the same. For example, for wholesale agents and brokers without payroll, the receipts item contains commissions received or earnings. In contrast, for wholesale agents and brokers with payroll, the published sales item represents the value of goods involved in the transactions.

<sup>2</sup>Data do not include large certificated passenger carriers that report to the Office of Airline Information, U.S. Department of Transportation. Railroad transportation and U.S. Postal Service are out of scope for the 2002 Economic Census.

81211	Hair, nail, and skin care services	944	17 027
812111	Barber shops	97	1 817
812112	Beauty salons	761	13 976
812113	Nail salons	86	1 234
81219	Other personal care services	206	2 930
8122	Death care services	20	755
81221	Funeral homes and funeral services	14	443
81222	Cemeteries and crematories	6	312
8123	Drycleaning and laundry services	59	1 792
81231	Coin-operated laundries and drycleaners	36	1 497
81232	Drycleaning and laundry services (except coin-operated)	D	D
81233	Linen and uniform supply	D	D

See footnotes at end of table.

**Table 2. Nonemployer Statistics for States: 2002—Con.**

[Includes only establishments without payroll, subject to federal income tax. For meaning of abbreviations and symbols, see introductory text. For explanation of terms, see Appendix A]

NAICS code	Description	Establishments (number)	Receipts <sup>1</sup> (\$1,000)
<b>WYOMING—Con.</b>			
<b>81</b>	<b>Other services (except public administration)—Con.</b>		
812	Personal and laundry services—Con.		
8129	Other personal services .....	1 934	30 310
81291	Pet care (except veterinary) services .....	131	2 010
81292	Photofinishing .....	D	D
81293	Parking lots and garages .....	D	D
81299	All other personal services .....	1 779	27 843
813	Religious, grantmaking, civic, professional, and similar organizations .....	308	3 763

<sup>1</sup>Receipts include the net total of all receipts, sales, revenue, shipments, and nonemployee compensation, such as commissions. Data users should exercise caution in adding nonemployer receipts to the related data item that is published for employer establishments because data content may not be the same. For example, for wholesale agents and brokers without payroll, the receipts item contains commissions received or earnings. In contrast, for wholesale agents and brokers with payroll, the published sales item represents the value of goods involved in the transactions.

<sup>2</sup>Data do not include large certificated passenger carriers that report to the Office of Airline Information, U.S. Department of Transportation. Railroad transportation and U.S. Postal Service are out of scope for the 2002 Economic Census.

# Appendix A.

## Explanation of Terms

---

### **NONEMPLOYERS**

A nonemployer business is one that has no paid employees, has annual business receipts of \$1,000 or more (\$1 or more in the construction industries), and is subject to federal income taxes. Most nonemployers are self-employed individuals operating very small unincorporated businesses, which may or may not be the owner's principal source of income.

### **RECEIPTS**

Includes gross receipts, sales, commissions, and income from trades and businesses, as reported on annual business income tax returns. Business income consists of all payments received for services rendered by nonemployer businesses, such as payments received as independent agents and contractors.

The composition of nonemployer receipts may differ from receipts data published for employer establishments. For example, for wholesale agents and brokers without payroll (nonemployers), the receipts item contains commissions received or earnings. In contrast, for wholesale agents and brokers with payroll (employers), the sales and receipts item published in the economic census represents the value of the goods involved in the transactions.

### **NUMBER OF ESTABLISHMENTS**

Generally, an establishment is a single physical location where business is conducted or services or industrial operations are performed. However, for nonemployers we count each distinct business income tax return filed by a nonemployer business as an establishment. A nonemployer business may operate from its owner's home address or from a separate physical location. Most geography codes are derived from the business owner's mailing address, which may not be the same as the physical location of the business.

### **LEGAL FORM OF ORGANIZATION (LFO)**

The legal form of organization for nonemployer businesses is derived from administrative record sources. The following three legal forms of organization are included in this report:

- **Individual proprietorship.** Also referred to as a "sole proprietorship." This is an unincorporated business owned by an individual. Also included in this category are self-employed persons.
- **Partnership.** An unincorporated business owned by two or more persons having a shared financial interest in the business.
- **Corporation.** A legally incorporated business under state laws.

### **REFERENCE YEAR**

The reference year is the year for which the data are reported. In Economic Census years, the data are part of the Economic Census Core Business Statistics Series. Beginning with reference year 1998, the Nonemployer Statistics tabulations have been released as an annual data series.

### **NORTH AMERICAN INDUSTRY CLASSIFICATION SYSTEM (NAICS)**

The North American Industry Classification System was developed by representatives from the United States, Canada, and Mexico, and replaced each country's separate classification systems with one uniform system for classifying industries. For more information, go to [www.census.gov/epcd/www/naics.html](http://www.census.gov/epcd/www/naics.html).

# Appendix B.

## NAICS Codes, Titles, and Descriptions

---

### **SECTOR 21 MINING**

The Mining sector comprises establishments that extract naturally occurring mineral solids, such as coal and ores; liquid minerals, such as crude petroleum; and gases, such as natural gas. The term mining is used in the broad sense to include quarrying, well operations, beneficiating (e.g., crushing, screening, washing, and flotation), and other preparation customarily performed at the mine site, or as a part of mining activity.

The Mining sector distinguishes two basic activities: mine operation and mining support activities. Mine operation includes establishments operating mines, quarries, or oil and gas wells on their own account or for others on a contract or fee basis. Mining support activities include establishments that perform exploration (except geophysical surveying) and/or other mining services on a contract or fee basis (except mine site preparation and construction of oil/gas pipelines).

Establishments in the Mining sector are grouped and classified according to the natural resource mined or to be mined. Industries include establishments that develop the mine site, extract the natural resources, and/or those that beneficiate (i.e., prepare) the mineral mined. Beneficiation is the process whereby the extracted material is reduced to particles that can be separated into mineral and waste, the former suitable for further processing or direct use. The operations that take place in beneficiation are primarily mechanical, such as grinding, washing, magnetic separation, and centrifugal separation. In contrast, manufacturing operations primarily use chemical and electrochemical processes, such as electrolysis and distillation. However, some treatments, such as heat treatments, take place in both the beneficiation and the manufacturing (i.e., smelting/refining) stages. The range of preparation activities varies by mineral and the purity of any given ore deposit. While some minerals, such as petroleum and natural gas, require little or no preparation, others are washed and screened, while yet others, such as gold and silver, can be transformed into bullion before leaving the mine site.

Mining, beneficiating, and manufacturing activities often occur in a single location. Separate receipts will be collected for these activities whenever possible. When receipts cannot be broken out between mining and manufacturing, establishments that mine or quarry nonmetallic minerals, beneficiate the nonmetallic minerals into more finished manufactured products are classified based on the primary activity of the establishment. A mine that manufactures a small amount of finished products will be classified in Sector 21, Mining. An establishment that mines whose primary output is a more finished manufactured product will be classified in Sector 31-33, Manufacturing.

### **22 UTILITIES**

The Utilities sector comprises establishments engaged in the provision of the following utility services: electric power, natural gas, steam supply, water supply, and sewage removal. Within this sector, the specific activities associated with the utility services provided vary by utility: electric power includes generation, transmission, and distribution; natural gas includes distribution; steam supply includes provision and/or distribution; water supply includes treatment and distribution; and sewage removal includes collection, treatment, and disposal of waste through sewer systems and sewage treatment facilities.

Excluded from this sector are establishments primarily engaged in waste management services classified in Subsector 562, Waste Management and Remediation Services. These establishments also collect, treat, and dispose of waste materials; however, they do not use sewer systems or sewage treatment facilities.

---

## 42 WHOLESALE TRADE

The Wholesale Trade sector comprises establishments engaged in wholesaling merchandise, generally without transformation, and rendering services incidental to the sale of merchandise.

The wholesaling process is an intermediate step in the distribution of merchandise. Wholesalers are organized to sell or arrange the purchase or sale of —

1. goods for resale (i.e., goods sold to other wholesalers or retailers),
2. capital or durable nonconsumer goods, or
3. raw and intermediate materials and supplies used in production.

Wholesalers sell merchandise to other businesses and normally operate from a warehouse or office. These warehouses and offices are characterized by having little or no display of merchandise. In addition, neither the design nor the location of the premises is intended to solicit walk-in traffic. Wholesalers do not normally use advertising directed to the general public. Customers are generally reached initially via telephone, in-person marketing, or by specialized advertising that may include Internet and other electronic means. Follow-up orders are either vendor-initiated or client-initiated, generally based on previous sales, and typically exhibit strong ties between sellers and buyers. In fact, transactions are often conducted between wholesalers and clients that have long-standing business relationships.

This sector comprises two main types of wholesalers: those that sell goods on their own account and those that arrange sales and purchases for others generally for a commission or fee.

4. Establishments that sell goods on their own account are known as wholesale merchants, distributors, jobbers, drop shippers, and import/export merchants. Also included as wholesale merchants are sales offices and sales branches (but not retail stores) maintained by manufacturing, refining, or mining enterprises apart from their plants or mines for the purpose of marketing their products. Merchant wholesale establishments typically maintain their own warehouse, where they receive and handle goods for their customers. Goods are generally sold without transformation, but may include integral functions, such as sorting, packaging, labeling, and other marketing services.
5. Establishments arranging for the purchase or sale of goods owned by others or purchasing goods, generally on a commission basis, are known as business to business electronic markets, agents and brokers, commission merchants, import/export agents and brokers, auction companies, and manufacturers' representatives. These establishments operate from offices and generally do not own or handle the goods they sell.

Some wholesale establishments may be connected with a single manufacturer and promote and sell the particular manufacturers' products to a wide range of other wholesalers or retailers. Other wholesalers may be connected to a retail chain or a limited number of retail chains and only provide a variety of products needed by the retail operation(s). These wholesalers may obtain the products from a wide range of manufacturers. Still other wholesalers may not take title to the goods, but act as agents and brokers for a commission.

Although wholesaling normally denotes sales in large volumes, durable nonconsumer goods may be sold in single units. Sales of capital or durable nonconsumer goods used in the production of goods and services, such as farm machinery, medium and heavy duty trucks, and industrial machinery, are always included in wholesale trade.

## 44-45 RETAIL TRADE

The Retail Trade sector comprises establishments engaged in retailing merchandise, generally without transformation, and rendering services incidental to the sale of merchandise.

The retailing process is the final step in the distribution of merchandise; retailers are, therefore, organized to sell merchandise in small quantities to the general public. This sector comprises two main types of retailers: **store** and **nonstore retailers**.

---

**Store retailers** operate fixed point-of-sale locations, located and designed to attract a high volume of walk-in customers. In general, retail stores have extensive displays of merchandise and use mass-media advertising to attract customers. They typically sell merchandise to the general public for personal or household consumption, but some also serve business and institutional clients. These include establishments, such as office supply stores, computer and software stores, building materials dealers, plumbing supply stores, and electrical supply stores. Catalog showrooms, gasoline service stations, automotive dealers, and mobile home dealers are treated as store retailers.

In addition to retailing merchandise, some types of store retailers are also engaged in the provision of after-sales services, such as repair and installation. For example, new automobile dealers, electronics and appliance stores, and musical instrument and supplies stores often provide repair services. As a general rule, establishments engaged in retailing merchandise and providing after-sales services are classified in this sector.

The first eleven subsectors of retail trade are store retailers. The establishments are grouped into industries and industry groups typically based on one or more of the following criteria:

1. The merchandise line or lines carried by the store; for example, specialty stores are distinguished from general-line stores.
2. The usual trade designation of the establishments. This criterion applies in cases where a store type is well recognized by the industry and the public, but difficult to define strictly in terms of merchandise lines carried; for example, pharmacies, hardware stores, and department stores.
3. Capital requirements in terms of display equipment; for example, food stores have equipment requirements not found in other retail industries.
4. Human resource requirements in terms of expertise; for example, the staff of an automobile dealer requires knowledge in financing, registering, and licensing issues that are not necessary in other retail industries.

**Nonstore retailers**, like store retailers, are organized to serve the general public, but their retailing methods differ. The establishments of this subsector reach customers and market merchandise with methods, such as the broadcasting of "infomercials," the broadcasting and publishing of direct-response advertising, the publishing of paper and electronic catalogs, door-to-door solicitation, in-home demonstration, selling from portable stalls (street vendors, except food), and distribution through vending machines. Establishments engaged in the direct sale (nonstore) of products, such as home heating oil dealers and home delivery newspaper routes are included here.

The buying of goods for resale is a characteristic of retail trade establishments that particularly distinguishes them from establishments in the agriculture, manufacturing, and construction industries. For example, farms that sell their products at or from the point of production are not classified in retail, but rather in agriculture. Similarly, establishments that both manufacture and sell their products to the general public are not classified in retail, but rather in manufacturing. However, establishments that engage in processing activities incidental to retailing are classified in retail. This includes establishments, such as optical goods stores that do in-store grinding of lenses, and meat and seafood markets.

Wholesalers also engage in the buying of goods for resale, but they are not usually organized to serve the general public. They typically operate from a warehouse or office and neither the design nor the location of these premises is intended to solicit a high volume of walk-in traffic. Wholesalers supply institutional, industrial, wholesale, and retail clients; their operations are, therefore, generally organized to purchase, sell, and deliver merchandise in larger quantities. However, dealers of durable nonconsumer goods, such as farm machinery and heavy duty trucks, are included in wholesale trade even if they often sell these products in single units.

## **48-49 TRANSPORTATION AND WAREHOUSING**

The Transportation and Warehousing sector includes industries providing transportation of passengers and cargo, warehousing and storage for goods, scenic and sightseeing transportation,

---

and support activities related to modes of transportation. Establishments in these industries use transportation equipment or transportation related facilities as a productive asset. The type of equipment depends on the mode of transportation. The modes of transportation are air, rail, water, road, and pipeline.

The Transportation and Warehousing sector distinguishes three basic types of activities: subsectors for each mode of transportation, a subsector for warehousing and storage, and a subsector for establishments providing support activities for transportation. In addition, there are subsectors for establishments that provide passenger transportation for scenic and sightseeing purposes, postal services, and courier services.

A separate subsector for support activities is established in the sector because, first, support activities for transportation are inherently multimodal, such as freight transportation arrangement, or have multimodal aspects. Secondly, there are production process similarities among the support activity industries.

One of the support activities identified in the support activity subsector is the routine repair and maintenance of transportation equipment (e.g., aircraft at an airport, railroad rolling stock at a railroad terminal, or ships at a harbor or port facility). Such establishments do not perform complete overhauling or rebuilding of transportation equipment (i.e., periodic restoration of transportation equipment to original design specifications) or transportation equipment conversion (i.e., major modification to systems). An establishment that primarily performs factory (or shipyard) overhauls, rebuilding, or conversions of aircraft, railroad rolling stock, or a ship is classified in Subsector 336, Transportation Equipment Manufacturing according to the type of equipment.

Many of the establishments in this sector often operate on networks, with physical facilities, labor forces, and equipment spread over an extensive geographic area.

Warehousing establishments in this sector are distinguished from merchant wholesaling in that the warehouse establishments do not sell the goods.

Excluded from this sector are establishments primarily engaged in providing travel agent services that support transportation and other establishments, such as hotels, businesses, and government agencies. These establishments are classified in Sector 56, Administrative and Support, Waste Management, and Remediation Services. Also, establishments primarily engaged in providing rental and leasing of transportation equipment without operator are classified in Subsector 532, Rental and Leasing Services.

## **51 INFORMATION**

The Information sector comprises establishments engaged in the following processes: (a) producing and distributing information and cultural products, (b) providing the means to transmit or distribute these products as well as data or communications, and (c) processing data.

The main components of this sector are the publishing industries, including software publishing, and both traditional publishing and publishing exclusively on the Internet; the motion picture and sound recording industries; the broadcasting industries, including traditional broadcasting and those broadcasting exclusively over the Internet; the telecommunications industries; the industries known as Internet service providers and Web search portals, data processing industries and the information services industries.

The expressions "information age" and "global information economy" are used with considerable frequency today. The general idea of an "information economy" includes both the notion of industries primarily producing, processing, and distributing information, as well as the idea that every industry is using available information and information technology to reorganize and make themselves more productive.

For the purpose of developing NAICS, it is the transformation of information into a commodity that is produced and distributed by a number of growing industries that is at issue. The Information sector groups three types of establishments: (1) those engaged in producing and distributing information and cultural products; (2) those that provide the means to transmit or distribute these

---

products as well as data or communications; and (3) those that process data. Cultural products are those that directly express attitudes, opinions, ideas, values, and artistic creativity; provide entertainment; or offer information and analysis concerning the past and present. Included in this definition are popular, mass-produced, products as well as cultural products that normally have a more limited audience, such as poetry books, literary magazines, or classical records.

The unique characteristics of information and cultural products, and of the processes involved in their production and distribution, distinguish the Information sector from the goods-producing and service-producing sectors. Some of these characteristics are:

1. Unlike traditional goods, an "information or cultural product," such as a newspaper on-line or television program, does not necessarily have tangible qualities, nor is it necessarily associated with a particular form. A movie can be shown at a movie theater, on a television broadcast, through video-on-demand or rented at a local video store. A sound recording can be aired on radio, embedded in multimedia products, or sold at a record store.
2. Unlike traditional services, the delivery of these products does not require direct contact between the supplier and the consumer.
3. The value of these products to the consumer lies in their informational, educational, cultural, or entertainment content, not in the format in which they are distributed. Most of these products are protected from unlawful reproduction by copyright laws.
4. The intangible property aspect of information and cultural products makes the processes involved in their production and distribution very different from goods and services. Only those possessing the rights to these works are authorized to reproduce, alter, improve, and distribute them. Acquiring and using these rights often involves significant costs. In addition, technology is revolutionizing the distribution of these products. It is possible to distribute them in a physical form, via broadcast, or on-line.
5. Distributors of information and cultural products can easily add value to the products they distribute. For instance, broadcasters add advertising not contained in the original product. This capacity means that unlike traditional distributors, they derive revenue not from sale of the distributed product to the final consumer, but from those who pay for the privilege of adding information to the original product. Similarly, a directory and mailing list publisher can acquire the rights to thousands of previously published newspaper and periodical articles and add new value by providing search and software and organizing the information in a way that facilitates research and retrieval. These products often command a much higher price than the original information.

The distribution modes for information commodities may either eliminate the necessity for traditional manufacture, or reverse the conventional order of manufacture-distribute: A newspaper distributed on-line, for example, can be printed locally or by the final consumer. Similarly, it is anticipated that packaged software, which today is mainly bought through the traditional retail channels, will soon be available mainly on-line. The NAICS Information sector is designed to make such economic changes transparent as they occur, or to facilitate designing surveys that will monitor the new phenomena and provide data to analyze the changes.

Many of the industries in the NAICS Information sector are engaged in producing products protected by copyright law, or in distributing them (other than distribution by traditional wholesale and retail methods). Examples are traditional publishing industries, software and directory and mailing list publishing industries, and film and sound industries. Broadcasting and telecommunications industries and information providers and processors are also included in the Information sector, because their technologies are so closely linked to other industries in the Information sector.

## **52 FINANCE AND INSURANCE**

The Finance and Insurance sector comprises establishments primarily engaged in financial transactions (transactions involving the creation, liquidation, or change in ownership of financial assets) and/or in facilitating financial transactions. Three principal types of activities are identified:

- 
1. Raising funds by taking deposits and/or issuing securities and, in the process, incurring liabilities. Establishments engaged in this activity use raised funds to acquire financial assets by making loans and/or purchasing securities. Putting themselves at risk, they channel funds from lenders to borrowers and transform or repackage the funds with respect to maturity, scale and risk. This activity is known as financial intermediation.
  2. Pooling of risk by underwriting insurance and annuities. Establishments engaged in this activity collect fees, insurance premiums, or annuity considerations; build up reserves; invest those reserves; and make contractual payments. Fees are based on the expected incidence of the insured risk and the expected return on investment.
  3. Providing specialized services facilitating or supporting financial intermediation, insurance, and employee benefit programs.

In addition, monetary authorities charged with monetary control are included in this sector.

The subsectors, industry groups, and industries within the NAICS Finance and Insurance sector are defined on the basis of their unique production processes. As with all industries, the production processes are distinguished by their use of specialized human resources and specialized physical capital. In addition, the way in which these establishments acquire and allocate financial capital, their source of funds, and the use of those funds provides a third basis for distinguishing characteristics of the production process. For instance, the production process in raising funds through deposit-taking is different from the process of raising funds in bond or money markets. The process of making loans to individuals also requires different production processes than does the creation of investment pools or the underwriting of securities.

Most of the Finance and Insurance subsectors contain one or more industry groups of (1) intermediaries with similar patterns of raising and using funds and (2) establishments engaged in activities that facilitate, or are otherwise related to, that type of financial or insurance intermediation. Industries within this sector are defined in terms of activities for which a production process can be specified, and many of these activities are not exclusive to a particular type of financial institution. To deal with the varied activities taking place within existing financial institutions, the approach is to split these institutions into components performing specialized services. This requires defining the units engaged in providing those services and developing procedures that allow for their delineation. These units are the equivalents for finance and insurance of the establishments defined for other industries.

The output of many financial services, as well as the inputs and the processes by which they are combined, cannot be observed at a single location and can only be defined at a higher level of the organizational structure of the enterprise. Additionally, a number of independent activities that represent separate and distinct production processes may take place at a single location belonging to a multilocation financial firm. Activities are more likely to be homogeneous with respect to production characteristics than are locations, at least in financial services. The classification defines activities broadly enough that it can be used both by those classifying by location and by those employing a more top-down approach to the delineation of the establishment.

Establishments engaged in activities that facilitate, or are otherwise related to, the various types of intermediation have been included in individual subsectors, rather than in a separate subsector dedicated to services alone because these services are performed by intermediaries, as well as by specialist establishments, and the extent to which the activity of the intermediaries can be separately identified is not clear.

The Finance and Insurance sector has been defined to encompass establishments primarily engaged in financial transactions; that is, transactions involving the creation, liquidation, or change in ownership of financial assets or in facilitating financial transactions. Financial industries are extensive users of electronic means for facilitating the verification of financial balances, authorizing transactions, transferring funds to and from transactors' accounts, notifying banks (or credit card issuers) of the individual transactions, and providing daily summaries. Since these transaction processing activities are integral to the production of finance and insurance services, establishments that principally provide a financial transaction processing service are classified to this sector, rather than to the data processing industry in the Information sector.

---

Legal entities that hold portfolios of assets on behalf of others are significant and data on them are required for a variety of purposes. Thus for NAICS, these funds, trusts, and other financial vehicles are the fifth subsector of the Finance and Insurance sector. These entities earn interest, dividends, and other property income, but have little or no employment and no revenue from the sale of services. Separate establishments and employees devoted to the management of funds are classified in Industry Group 5239, Other Financial Investment Activities.

### **53 REAL ESTATE AND RENTAL AND LEASING**

The Real Estate and Rental and Leasing sector comprises establishments primarily engaged in renting, leasing, or otherwise allowing the use of tangible or intangible assets, and establishments providing related services. The major portion of this sector comprises establishments that rent, lease, or otherwise allow the use of their own assets by others. The assets may be tangible, as is the case of real estate and equipment, or intangible, as is the case with patents and trademarks.

This sector also includes establishments primarily engaged in managing real estate for others, selling, renting and/or buying real estate for others, and appraising real estate. These activities are closely related to this sector's main activity, and it was felt that from a production basis they would best be included here. In addition, a substantial proportion of property management is self-performed by lessors.

The main components of this sector are the real estate lessors industries; equipment lessors industries (including motor vehicles, computers, and consumer goods); and lessors of nonfinancial intangible assets (except copyrighted works).

Excluded from this sector are real estate investment trusts (REITS) and establishments primarily engaged in renting or leasing equipment with operators. REITS are classified in Subsector 525, Funds, Trusts, and Other Financial Vehicles, because they are considered investment vehicles. Establishments renting or leasing equipment with operators are classified in various subsectors of NAICS depending on the nature of the services provided (e.g., transportation, construction, agriculture). These activities are excluded from this sector because the client is paying for the expertise and knowledge of the equipment operator, in addition to the rental of the equipment. In many cases, such as the rental of heavy construction equipment, the operator is essential to operate the equipment.

### **54 PROFESSIONAL, SCIENTIFIC, AND TECHNICAL SERVICES**

The Professional, Scientific, and Technical Services sector comprises establishments that specialize in performing professional, scientific, and technical activities for others. These activities require a high degree of expertise and training. The establishments in this sector specialize according to expertise and provide these services to clients in a variety of industries and, in some cases, to households. Activities performed include: legal advice and representation; accounting, bookkeeping, and payroll services; architectural, engineering, and specialized design services; computer services; consulting services; research services; advertising services; photographic services; translation and interpretation services; veterinary services; and other professional, scientific, and technical services.

This sector excludes establishments primarily engaged in providing a range of day-to-day office administrative services, such as financial planning, billing and record keeping, personnel, and physical distribution and logistics. These establishments are classified in Sector 56, Administrative and Support and Waste Management and Remediation Services.

### **55 MANAGEMENT OF COMPANIES AND ENTERPRISES**

The Management of Companies and Enterprises sector comprises (1) establishments that hold the securities of (or other equity interests in) companies and enterprises for the purpose of owning a controlling interest or influencing management decisions or (2) establishments (except government establishments) that administer, oversee, and manage establishments of the company or enterprise and that normally undertake the strategic or organizational planning and decision making role of the company or enterprise. Establishments that administer, oversee, and manage may hold the securities of the company or enterprise.

---

Establishments in this sector perform essential activities that are often undertaken, in-house, by establishments in many sectors of the economy. By consolidating the performance of these activities of the enterprise at one establishment, economies of scale are achieved.

Government establishments primarily engaged in administering, overseeing, and managing governmental programs are classified in Sector 92, Public Administration. Establishments primarily engaged in providing a range of day-to-day office administrative services, such as financial planning, billing and record keeping, personnel, and physical distribution and logistics are classified in Industry 56111, Office Administrative Services.

## **56 ADMINISTRATIVE AND SUPPORT AND WASTE MANAGEMENT AND REMEDIATION SERVICES**

The Administrative and Support and Waste Management and Remediation Services sector comprises establishments performing routine support activities for the day-to-day operations of other organizations. These essential activities are often undertaken in-house by establishments in many sectors of the economy. The establishments in this sector specialize in one or more of these support activities and provide these services to clients in a variety of industries and, in some cases, to households. Activities performed include: office administration, hiring and placing of personnel, document preparation and similar clerical services, solicitation, collection, security and surveillance services, cleaning, and waste disposal services.

The administrative and management activities performed by establishments in this sector are typically on a contract or fee basis. These activities may also be performed by establishments that are part of the company or enterprise. However, establishments involved in administering, overseeing, and managing other establishments of the company or enterprise, are classified in Sector 55, Management of Companies and Enterprises. These establishments normally undertake the strategic and organizational planning and decision making role of the company or enterprise. Government establishments engaged in administering, overseeing, and managing governmental programs are classified in Sector 92, Public Administration.

## **61 EDUCATIONAL SERVICES**

The Educational Services sector comprises establishments that provide instruction and training in a wide variety of subjects. This instruction and training is provided by specialized establishments, such as schools, colleges, universities, and training centers. These establishments may be privately owned and operated for profit or not for profit, or they may be publicly owned and operated. They may also offer food and accommodation services to their students.

Educational services are usually delivered by teachers or instructors that explain, tell, demonstrate, supervise, and direct learning. Instruction is imparted in diverse settings, such as educational institutions, the workplace, or the home through correspondence, television, or other means. It can be adapted to the particular needs of the students, for example sign language can replace verbal language for teaching students with hearing impairments. All industries in the sector share this commonality of process, namely, labor inputs of instructors with the requisite subject matter expertise and teaching ability.

## **62 HEALTH CARE AND SOCIAL ASSISTANCE**

The Health Care and Social Assistance sector comprises establishments providing health care and social assistance for individuals. The sector includes both health care and social assistance because it is sometimes difficult to distinguish between the boundaries of these two activities. The industries in this sector are arranged on a continuum starting with those establishments providing medical care exclusively, continuing with those providing health care and social assistance, and finally finishing with those providing only social assistance. The services provided by establishments in this sector are delivered by trained professionals. All industries in the sector share this commonality of process, namely, labor inputs of health practitioners or social workers with the requisite expertise. Many of the industries in the sector are defined based on the educational degree held by the practitioners included in the industry.

---

Excluded from this sector are aerobic classes in Subsector 713, Amusement, Gambling and Recreation Industries, and nonmedical diet and weight reducing centers in Subsector 812, Personal and Laundry Services. Although these can be viewed as health services, these services are not typically delivered by health practitioners.

### **71 ARTS, ENTERTAINMENT, AND RECREATION**

The Arts, Entertainment, and Recreation sector includes a wide range of establishments that operate facilities or provide services to meet varied cultural, entertainment, and recreational interests of their patrons. This sector comprises: (1) establishments that are involved in producing, promoting, or participating in live performances, events, or exhibits intended for public viewing; (2) establishments that preserve and exhibit objects and sites of historical, cultural, or educational interest; and (3) establishments that operate facilities or provide services that enable patrons to participate in recreational activities or pursue amusement, hobby, and leisure time interests

Some establishments that provide cultural, entertainment, or recreational facilities and services are classified in other sectors. Excluded from this sector are: (1) establishments that provide both accommodations and recreational facilities, such as hunting and fishing camps and resort and casino hotels, are classified in Subsector 721, Accommodation; (2) restaurants and night clubs that provide live entertainment in addition to the sale of food and beverages are classified in Subsector 722, Food Services and Drinking Places; (3) motion picture theaters, libraries and archives, and publishers of newspapers, magazines, books, periodicals, and computer software are classified in Sector 51, Information; and (4) establishments using transportation equipment to provide recreational and entertainment services, such as those operating sightseeing buses, dinner cruises, or helicopter rides, are classified in Subsector 487, Scenic and Sightseeing Transportation

### **72 ACCOMMODATION AND FOOD SERVICES**

The Accommodation and Food Services sector comprises establishments providing customers with lodging and/or preparing meals, snacks, and beverages for immediate consumption. The sector includes both accommodation and food services establishments because the two activities are often combined at the same establishment.

Excluded from this sector are civic and social organizations; amusement and recreation parks; theaters; and other recreation or entertainment facilities providing food and beverage services.

### **81 OTHER SERVICES (EXCEPT PUBLIC ADMINISTRATION)**

The Other Services (except Public Administration) sector comprises establishments engaged in providing services not specifically provided for elsewhere in the classification system. Establishments in this sector are primarily engaged in activities such as equipment and machinery repairing, promoting or administering religious activities, grantmaking, advocacy, and providing dry-cleaning and laundry services, personal care services, death care services, pet care services, photofinishing services, temporary parking services, and dating services.

Private households that engage in employing workers on or about the premises in activities primarily concerned with the operation of the household are included in this sector.

Excluded from this sector are establishments primarily engaged in retailing new equipment and also performing repairs and general maintenance on equipment. These establishments are classified in Sector 44-45, Retail Trade.

## Methodology

---

### **THE NONEMPLOYER UNIVERSE**

The universe of nonemployer establishments is created annually in conjunction with identifying the Census Bureau's employer business universe. If the Census Bureau receives information through administrative records that a business has no paid employees, then the business becomes part of the potential nonemployer universe. Name, address, industry classification, and receipts are available for each potential nonemployer establishment. These data are obtained chiefly from the annual business income tax returns filed with the Internal Revenue Service (IRS) and maintained in the Census Bureau's Business Register.

The potential nonemployer universe is edited and reviewed to detect and remove establishments that are not true nonemployers. Among the largest group of removed establishments are those that are associated with large, multiunit companies, but that were not properly linked to the company. Another group consists of income records for regulated investment companies, representing mutual fund income. The Census Bureau does not include these as nonemployer establishments because their income is generally not viewed as being nonemployer income. The Census Bureau also excludes establishments with receipts above a predetermined cutoff, assuming that they are really employers and that their data are included in the employer database. For corporations and partnerships this cutoff is \$1 million, except for service-type industries, where the cutoff is \$2 million. For sole proprietorships, the cutoffs vary widely depending upon industrial classification. For some nonemployer sole proprietorships, such as those engaged in investment and entertainment, it may be possible to have well over \$1 million in receipts. However, it is unlikely that a sole proprietorship restaurant, for example, would have over \$1 million in receipts and have no paid employees.

Potential nonemployer businesses with less than \$1,000 in receipts are excluded in all sectors except construction. The small receipts of these nonconstruction establishments indicate that they may represent hobbies, as opposed to normal business activities.

A certain amount of undercoverage in the universe occurs as a result of processing deadlines. If the Census Bureau receives information on a potential nonemployer business more than 1 year after the end of the reference year, it is excluded in nonemployer tabulations. The estimated undercount of nonemployer corporation and partnership establishments because of late reporting is around 5 percent. This accounts for about 1 to 2 percent of receipts. The estimated undercount for sole proprietorship establishments because of late reporting is much less.

### **INDUSTRY CLASSIFICATION OF ESTABLISHMENTS**

Industry classification of businesses obtained from the IRS are self-classified by tax filers. Codes used for classification are NAICS-based industries. The NAICS system is comprised of nearly 1,200 industries, but nonemployer statistics are limited to approximately 300 codes that are available through administrative-record sources, and are common to all three legal forms of organization applicable to nonemployer businesses. For the 1997 thru 2001 data series, each establishment was classified in accordance with the industry definitions in the 1997 North American Industry Classification System (NAICS) manual. For the 2002 data year, nonemployer establishments are classified according to the 2002 NAICS manual, which contains several major revisions from 1997. For more information on the 2002 NAICS codes, as well as comparisons between the 1997 and 2002 codes, go to [www.census.gov/epcd/www/naics.html](http://www.census.gov/epcd/www/naics.html).

There is a small percentage (nearly 4 percent for 2002) of nonemployers that are unclassified. The percentage is at its lowest in economic census years. For these cases, an industry classification is assigned, or imputed, from a classified establishment within the same county with a similar value

---

of receipts and the same legal form of organization. This imputation procedure has the effect of preserving the distribution of establishments and receipts by industry, while eliminating an unclassified component that varies in size each year. To control the contribution of imputed classifications, we have adopted the rule that if establishments with an imputed classification account for more than 40 percent of either receipts or number of establishments in a published row, both items are suppressed and assigned a flag of "S." However, if the cell will also be suppressed to prevent a disclosure, a flag of "D" will be shown instead of "S." At the national level, less than 10 percent of nonemployer establishments have an imputed classification, accounting for 2 to 4 percent of receipts.

### **PRECAUTIONS IN ANALYZING AND INTERPRETING NONEMPLOYER DATA**

There are several considerations that must be recognized when analyzing or interpreting nonemployer data. The first is that the Census Bureau equates a business mailing address with a business establishment. Under the usual definition, an establishment or business is a fixed physical location or permanent structure where some form of business activity is conducted. Stores, offices, and manufacturing plants are examples of establishments, but mobile vending vehicles or temporary stands are not. However, for Nonemployer Statistics, a business that sells from a mobile vehicle, temporary stand, or even one that has a separate store for conducting business, will be considered as an establishment and assigned geographically to an owner's mailing address.

A second consideration is that many businesses use leased or contract employees. In cases where all employees are leased or contracted, the payroll for the business is zero, placing it in the potential nonemployer universe. If the establishment's receipts are large, it may be dropped from nonemployer tabulations because its receipts exceed the cutoffs. Otherwise, it appears in the tabulations. Currently, the Census Bureau does not have a method to identify the universe of establishments that lease all their employees.

### **RELIABILITY OF DATA**

The nonemployer data are tabulated from administrative records data only, and are not subject to sampling error. No survey data are collected. These data undergo complex processing, editing, and analytical review at the Census Bureau to distinguish nonemployers from employers, correct and complete data items, and form the final nonemployer universe. Despite extensive review, the data compiled for Nonemployer Statistics are subject to nonsampling errors, which can be attributed to many sources: inability to identify all cases that should be in the universe; definition and classification difficulties; errors in recording or coding the data obtained; and other errors of coverage, processing, and estimation for missing or misreported data.

The accuracy of these tabulated data is determined by the joint effects of the various nonsampling errors. No direct measurement of these effects has been obtained, except for estimation for missing or misreported industry classifications; however, precautionary steps were taken in all phases of the processing to minimize the effects of nonsampling errors.

The improper inclusion of possible employer establishments in the nonemployer universe is a primary source of nonsampling error. The Census Bureau takes several steps to identify and remove these establishments from the nonemployer universe. The most significant cases were identified, but the size of the universe, limited resources, and limited data on which to make a determination do not achieve the complete identification and removal of all employer establishments.

The assignment or imputation of an industry classification to nonemployer establishments with missing classification is another source of nonsampling error. The effect of this imputation is to preserve the overall distribution of totals by industry at the county and higher geographic levels, but certain data cells may be adversely effected in counties or industries with a small number of establishments. Data cells with a high level of imputation are identified in the tabulations as not meeting publication standards.
