

Dear Mr. Carson,

Also, the fact that innocent citizens are being bullied by big business because they "Link" to the DeCSS source code is appalling. That is like arresting a grad student for citing references, or arresting ANYBODY for saying anything. I know that goes off well in a dictatorship. But certainly in the united states of america we have the right to say whatever we right. I remember a crumbly piece of parchmnet signed a couple millenia ago.. what was the name of it?

Oh yeah.. the bill of rights.. I used to have to recite it in elementary school, that as well as the constitution. SHall I go into further detail?

Sincerely,

Michael T. Halligan
