

I would like to comment on:

17 USC Section 1201(a)(1)
Circumvention of copyright protection systems

Name: Brian Aljian
Organization: None
Address: 252B Market Street East
Gaithersburg, MD 20878
Phone: (301) 926-7303
E-mail: brian@aljian.com

Comments:

I believe that circumvention of copyright protection systems that control access to copyrighted works should be LEGAL for interoperability purposes.

For example, most people are aware of the recent issues regarding the circumvention of DVD encryption. This should be legal allow DVDs to be played on operating systems or devices for which no DVD player software or hardware exists.

Of course the circumvention of copyright protection should still remain illegal to make copies of works for commercial gain or distribution without a license.

Thank you for your time.
