

Dear Sirs:

I am writing to let you know that I have been affected by the DMCA. This legislation has given the MPAA grounds (although not very solid grounds) to harass me about distributing DeCSS, a program which allows the playing of DVD's under the Linux operating system. My school and personal life has been disrupted because of the MPAA's harassment, and I can't help but think that the DMCA is somewhat to blame. I ask you to review and disseminate all of the information that I have been told you are collecting regarding the DMCA. People need to know about these gross violations of civil rights!
