

participating in the National Flood Insurance Program (NFIP), in accordance with section 110 of the Flood Disaster Protection Act of 1973, 42 U.S.C. 4104, and 44 CFR 67.4(a).

These proposed BFEs and modified BFEs, together with the floodplain management criteria required by 44 CFR 60.3, are the minimum that are required. They should not be construed to mean that the community must change any existing ordinances that are more stringent in their floodplain management requirements. The community may at any time enact

stricter requirements of its own, or pursuant to policies established by other Federal, State, or regional entities. These proposed elevations are used to meet the floodplain management requirements of the NFIP and are also used to calculate the appropriate flood insurance premium rates for new buildings built after these elevations are made final, and for the contents in these buildings.

**Correction**

In the proposed rule published at 73 FR 65815, in the November 5, 2008 issue of the **Federal Register**, FEMA

published a table under the authority of 44 CFR 67.4. The table, entitled “St. Clair County, Michigan and Incorporated Areas” addressed flooding source “Belle River.” That table contained inaccurate information as to the location of referenced elevation, effective and modified elevation in feet, or communities affected for these flooding sources. In this notice, FEMA is publishing a table containing the accurate information, to address these prior errors. The information provided below should be used in lieu of that previously published.

Flooding source(s)	Location of referenced elevation	* Elevation in feet (NGVD) + Elevation in feet (NAVD) # Depth in feet above ground		Communities affected
		Effective	Modified	
<b>St. Clair County, Michigan and Incorporated Areas</b>				
Belle River .....	At confluence with St. Clair River ..... Approximately 475 feet upstream of Broadway Street	+580 +580	+581 +581	City of Marine City.

Dated: December 18, 2008.

**Proposed Flood Elevation Determinations**  
**AGENCY:** Federal Emergency Management Agency, DHS.  
**ACTION:** Proposed Rule; correction.

**SUMMARY:** On February 22, 2008, FEMA published in the **Federal Register** a proposed rule that contained an erroneous table. This notice provides corrections to that table, to be used in lieu of the information published at FR Doc. E8-3362. The table provided here

represents the flooding source, location of referenced elevation, effective and modified elevation, and communities affected for Trinity County, California. Specifically, it addresses Hayfork Creek.  
**FOR FURTHER INFORMATION CONTACT:**  
 William R. Blanton, Jr., Chief, Engineering Management Branch, Mitigation Directorate, Federal Emergency Management Agency, 500 C Street, SW., Washington, DC 20472, (202) 646-3151 or (e-mail) [bill.blanton@dhs.gov](mailto:bill.blanton@dhs.gov).

**SUPPLEMENTARY INFORMATION:** The Federal Emergency Management Agency (FEMA) publishes proposed determinations of Base (1% annual-chance) Flood Elevations (BFEs) and modified BFEs for communities participating in the National Flood Insurance Program (NFIP), in accordance with section 110 of the Flood Disaster Protection Act of 1973, 42 U.S.C. 4104, and 44 CFR 67.4(a).

These proposed BFEs and modified BFEs, together with the floodplain management criteria required by 44 CFR 60.3, are the minimum that are required. They should not be construed to mean that the community must change any existing ordinances that are more stringent in their floodplain

management requirements. The community may at any time enact stricter requirements of its own, or pursuant to policies established by other Federal, State, or regional entities. These proposed elevations are used to meet the floodplain management requirements of the NFIP and are also used to calculate the appropriate flood insurance premium rates for new buildings built after these elevations are made final, and for the contents in these buildings.

**Correction**

In the proposed rule published at FR Doc. E8-3362 in the February 22, 2008, issue of the **Federal Register**, FEMA published a table under the authority of 44 CFR 67.4. The table, entitled “Trinity County, California, and Incorporated Areas” addressed Hayfork Creek. That table contained inaccurate information as to the location of referenced elevation, effective and modified elevation in feet, or communities affected for these flooding sources. In this notice, FEMA is publishing a table containing the accurate information, to address these prior errors. The information provided below should be used in lieu of that previously published.

Flooding source(s)	Location of referenced elevation	*Elevation in feet (NGVD) + Elevation in feet (NAVD) # Depth in feet above ground		Communities affected
		Effective	Modified	
<b>Trinity County, California and Incorporated Areas</b>				
Hayfork Creek .....	Approximately 260 feet downstream of the confluence of Salt Creek. Approximately 300 feet upstream of Bridge Street .....	None	* 2,280	Unincorporated Areas of Trinity County.
		None	* 2,322

**Proposed Flood Elevation Determinations; Correction**  
**AGENCY:** Federal Emergency Management Agency, DHS.  
**ACTION:** Proposed rule; correction.

**SUMMARY:** This document corrects the table to a proposed rule published in the **Federal Register** of December 9, 2008. This correction clarifies the table representing the flooding source(s),

location of referenced elevation, the effective and modified elevation in feet and the communities affected for Madison County, Mississippi, and Incorporated Areas; specifically, for flooding source “Reunion Lake #1,” than was previously published.  
**FOR FURTHER INFORMATION CONTACT:** William R. Blanton, Jr., Engineering Management Branch, Mitigation Directorate, Federal Emergency Management Agency, 500 C Street, SW., Washington, DC 20472, (202) 646-2903.  
**SUPPLEMENTARY INFORMATION:** The Federal Emergency Management Agency (FEMA) publishes proposed determinations of Base (1-percent-annual-chance) Flood Elevations (BFEs) and modified BFEs for communities participating in the National Flood Insurance Program (NFIP), in accordance with section 110 of the Flood Disaster Protection Act of 1973, 42 U.S.C. 4104, and 44 CFR 67.4(a). These proposed BFEs and modified BFEs, together with the floodplain management criteria required by 44 CFR 60.3, are the minimum that are required. They should not be construed to mean that the community must change any existing ordinances that are more

stringent in their floodplain management requirements. The community may at any time enact stricter requirements of its own, or pursuant to policies established by other Federal, State, or regional entities. These proposed BFEs are used to meet the floodplain management requirements of the NFIP and are also used to calculate the appropriate flood insurance premium rates for new buildings built after these elevations are made final, and for the contents in these buildings.

**Correction**

In proposed rule FR Doc. E8-29068, beginning on page 74669 in the issue of December 9, 2008, make the following corrections, in the table published under the authority of 44 CFR 67.4. On page 74669, in § 67.4, in the table with center heading Madison County, Mississippi, and Incorporated Areas, the flooding source, location of referenced elevation, the effective and modified elevation in feet and the communities affected for flooding source “Reunion Lake #1”, needs to be corrected to read as follows:

Flooding source(s)	Location of referenced elevation**	*Elevation in feet (NGVD) + Elevation in feet (NAVD) # Depth in feet above ground		Communities affected
		Effective	Modified	
<b>Madison County, Mississippi, and Incorporated Areas</b>				
* Reunion Lake #1 .....	* Reunion Lake #1 .....	* None	* + 327	* Unincorporated Areas of Madison County.
