

SQANet

Definition: SQANet – (S•Q•A Net)
n. S•Q•A•Net; NextGen's Reporting Tool

Simple and Quick Access Net (SQANet) is a Web-based, Business Intelligence (BI) reporting tool that enables access to National Flood Insurance Program (NFIP) data. SQANet is a FEMA-owned application developed under the NextGen Project, and will be the future flood insurance reporting tool.

SQANet has a secure, user-friendly dashboard where users can access a variety of useful flood insurance reports, lookups, and data to help stakeholders make informed decisions. Each dashboard is customized based on the individual's role.

An Introduction to NFIP Business Intelligence and Reports NextGen Modernization

FEMA

NextGen SQANet

NextGen SQANet (Simple and Quick Access Net) is a secure, Web-based application that provides online access to flood insurance information for NFIP stakeholders. The ability to make informed decisions based on quality data is critical for issuing policies, analyzing trends and monitoring other vital NFIP operations. The purpose of SQANet is to provide the right data to the right people at the right time.

SQANet provides personalized dashboards, based on each individual's authorized access level. Users are able to access reports and data that are relevant to their role. Many of the reports are offered in multiple formats, including online (HTML), print-friendly (Adobe PDF) and spreadsheets (Microsoft Excel). NFIP stakeholders have the opportunity to use and test SQANet during its pilot program.

Intended Users

SQANet is intended for use by FEMA employees (Headquarters and Regions), NFIP Bureau and Statistical Agent (Bureau) personnel, NFIP State Coordinators, State Hazard Mitigation Officers (SHMO), NFIP Servicing Agent personnel, and WYO company flood insurance personnel and their vendors.

Getting Started

The NextGen project is conducting a pilot program for users to test SQANet and other NextGen applications. Intended users may request a NextGen Account. All requests go through an approval process by FEMA and, if applicable, a company. The approval process takes approximately ten business days. Individuals can request participation online at www.nfipnextgen.com.

Authorized users will receive an e-mail with NextGen Account information, which provides access to their approved NextGen pilot programs at www.nfipnextgen.com. NextGen QuickStarts are user guides to help users get started with the applications. The location for the SQANet QuickStart is www.nfipnextgen.com/help.html.

The NextGen Project

The NFIP Modernization Project, known as the NextGen Project, is a full lifecycle technology modernization effort focused on providing business-driven solutions for the Bureau using state-of-the-art, industry-proven technologies.

The principal NextGen Project goals are to improve Bureau and WYO company processes to benefit all

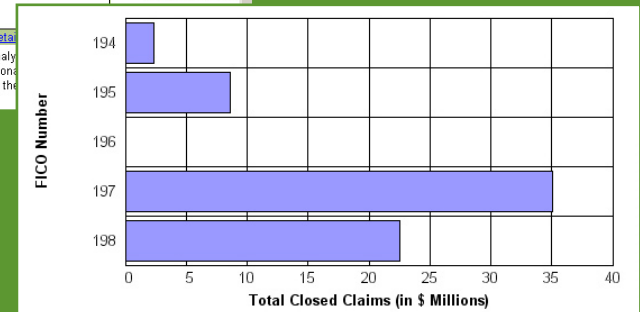

NextGen Application	Stakeholder Involvement				Transmission Methods		
	WYO Companies/ Vendors	States, Communities, Regions	NFIP Bureau/ Contractors	Frequency	Real-Time Person-to-Ma- chine	Batch Machine-to- Machine	Web Services Machine-to- Machine
SQANet	Optional	Optional	Optional	As Needed	+	-	-

NFIP stakeholders, while achieving more efficient and effective program operations. Modernization is critical to ensuring the continued success of the NFIP's insurance and mitigation functions. For more information on the NextGen Project, explore the NextGen Portal at www.nfipnextgen.com. The About NextGen link contains a wealth of information on the modernization effort.

Feedback

NextGen is continuing to enhance and improve its applications based on pilot program feedback. We encourage you to explore all of the pilot applications. Feel free to provide feedback by sending e-mail to nextgen@ostglobal.com or calling our pilot program coordinator at (202) 467-7602.
