

Mustang Roundup

Below is a chart showing the number of wild horses and burros found in some of the western states as of 1998. (As you can imagine, it's not always easy to count wild horses and burros, so these are estimates.) But the names of the states are scrambled. Can you help? First, unscramble the state names and then put them in the proper blanks on the accompanying map. Then, color the states according to the map key.

States (scrambled) with the number of wild horses and burros in that state.

- | | | |
|--------------------|------------------|-----------------|
| devana — 22,463 | naarozzi — 3,170 | hodia — 680 |
| myongiw — 5,659 | gonero — 2,548 | antoman — 161 |
| raicnilofa — 5,090 | drolocao — 1,031 | ewn oxecim — 55 |
| athu — 3,638 | | |

Color Key

- < 1,000 — yellow
- between 1,000 and 4,999 — blue
- between 5,000 and 10,000 — green
- > 10,000 — red

—Did You Know...?—

... that wild ponies can also be found on the East Coast of the United States? They live on islands off the coast of Maryland, Virginia, and North Carolina. To find out more about the ponies and to learn the names of the islands, check out the following National Park Service websites:
