Strategic Challenges America's Global Security Agenda

edited by Stephen J. Flanagan and James A. Schear

This volume is the flagship publication of National Defense University's Institute for National Strategic Studies (INSS), one of the most prominent and authoritative research organizations in the national security community. It represents the collective wisdom of INSS expert analysts as they survey the global security situation in the coming decade.

Chapter one sets the scene by describing enduring geostrategic, military-technical, and regional trends, as well as strategic wildcards or disruptive events that could alter the calculus. Succeeding chapters address the seven challenges one by one: countering global terrorism, combating WMD threats, protecting the homeland, defusing regional conflicts, engaging other major powers, adapting alliances and partnerships, and transforming defense strategy and posture.

Congress at War The Politics of Conflict Since 1789

by Charles A. Stevenson

The author reviews the historical record of the U.S. Congress in authorizing, funding, overseeing, and terminating major military operations. Refuting arguments that Congress cannot and should not set limits or conditions on the use of the U.S. Armed Forces, this book catalogs the many times when previous Congresses have enacted restrictions—often with the acceptance and compliance of wartime Presidents. While Congress has formally declared war only 5 times in U.S. history, it has authorized the use of force 15 other times. In recent decades, however, lawmakers have weakened their constitutional claims by failing on several occasions to enact measures either supporting or opposing military operations ordered by the President.

103 pp.
ISBN: 978-1-59797-181-2

Dr. Charles A. Stevenson teaches at the Nitze School of Advanced International Studies of The Johns Hopkins University. A former professor at the National War College, he also draws upon his two decades as a Senate staffer on national security matters to illustrate the political motivations that influence decisions on war and peace.

Concise, dramatically written, and illustrated with summary tables, this book is a must-read for anyone interested in America's wars—past or present.
