

Gypsy moths defoliate trees and shrubs. Further introductions of this pest could cause widespread damage to plants on both private and commercial land in the United States. APHIS file photos show a gypsy moth caterpillar and an adult male (top right) and female with egg mass (lower right).

Do-It-Yourself Inspection

Inspect any household article left outdoors, stored in open or exposed areas, or stored indoors but used outdoors.

The checklist included in this leaflet lists common outdoor household articles that could carry insects, snails, or soil. Carefully examine each article, clean it if necessary, and check it off the list.

Be sure to enter the date and place of inspection on the checklist and sign on the bottom. This will be your official certificate of self-inspection. You must include this list with the paperwork accompanying your move.

The giant African snail (top), white garden snail (middle), and brown garden snail (bottom) are destructive pests that can be found on outdoor household goods. (The photograph of the brown garden snail was taken by Joe Zoltowski of the New Jersey Department of Agriculture and is reproduced by permission. The remaining snail shots are APHIS file photographs.)

Agriculture Self-Inspection Checklist

Important: Make sure this checklist goes with your household goods when you move!

Other Items

- Cars or trucks
- Car parts
- Car ramps
- Farm items
- Plant nursery items
- Stored tires/snow tires
- Any item not mentioned that was stored outside
- _____

Signature: _____

What To Do If You Find Soil or Insect Pests or Snails

Wash all soil from outdoor household articles and shoes. An effective way to dispose of insects or snails is to remove them by hand and deposit them in hot water, ammonia, household bleach, or kerosene. Scrape egg masses from their locations with a putty knife or similar flat-edged tool.

Pests and dust may cause skin rashes, difficulty in breathing, or other allergic reactions. If necessary, wear gloves, protective clothing, and a dust mask while inspecting and cleaning your outdoor items.

Once you have completed your inspection of the outdoor items you intend to move, protect them from being reinfested.

Remember, you are the key to preventing the spread of pests on outdoor household articles. You may elect to abandon articles if they are heavily infested and of little value to you. Do your part to prevent the spread of these pests and help keep the homefront pest free.

Many kinds of pests, like khapra beetles, could harm U.S. agriculture if accidentally introduced.

Commercial enterprises and the military are responsible for cleaning all their equipment to ensure it is free of soil and pests before it is brought home from abroad. All tanks and trucks are thoroughly inspected before being returned to the United States.

Soil contaminated with organic materials (e.g., manure, meat scraps, or carcasses) can carry animal diseases into the United States. Straw and hay, which are often used for packing materials, can harbor parasites and ticks that can also carry animal diseases. Make sure all soil is removed from household items and packing materials.

If you find gypsy moth or other egg masses, scrape them into a container of hot water, household bleach, ammonia, or kerosene.

Animal and Plant Health Inspection Service

Program Aid No.1666

Keep the Homefront Pest Free

The U.S. Department of Agriculture (USDA) prohibits discrimination in all its programs and activities on the basis of race, color, national origin, gender, religion, age, disability, political beliefs, sexual orientation, or marital or family status. (Not all prohibited bases apply to all programs.) Persons with disabilities who require alternative means for communication of program information (Braille, large print, audiotape, etc.) should contact USDA's TARGET Center at (202) 720-2600 (voice and TDD).

To file a complaint of discrimination, write USDA, Director, Office of Civil Rights, Room 326-W, Whitten Building, 14th and Independence Avenue, SW, Washington, DC 20250-9410 or call (202) 720-5964 (voice and TDD). USDA is an equal opportunity provider and employer.

Issued October 1999

This brochure supersedes Program Aid 1525, "Don't Bring Home a Bug," issued August 1994.
