Helping to develop future scientists

Steve Ireland, an Environmental Lead in the environmental section of the Planning and Environmental Branch, Galveston District Corps of Engineers, discusses a project with a 3rd grade student Abigail Martinez at L.A. Morgan Elementary School during its Science Fair on Jan. 28. Ireland was one of several Corps of Engineers personnel who served as judges in the school's third annual Science Fair. Judges looked at projects from Pre-Kindergarten to 5th grade. Abigail's project was on light refraction and dispersal and involved making a rainbow with a glass of water and a mirror. Participation in the Science Fair was part of the District's Community Outreach Initiative.
