Corps issues Public Notice on LIPA Offshore Wind Park

The U.S. Army Corps of Engineers, New York District, today issued a Public Notice regarding a permit application submitted by the Long Island Power Authority and Long Island Offshore Wind Park, LLC.

The proposals would place 40 wind turbine generators 3.6 miles off Jones Beach Island. The work would include placement of an offshore electrical substation platform, buried cables between the turbine array, and a transmission cable from the offshore substation to an existing LIPA substation in West Amityville, N.Y.

Interested persons may submit written comments until July 22, when the public comment period will close. Additional information about the Public Notice and application are available at

<http://www.nan.usace.army.mil/business/buslinks/regulat/lipa/index.htm>

The complete Public Notice is available at
