

**Environmental Policy
Memphis District
US Army Corps of Engineers**

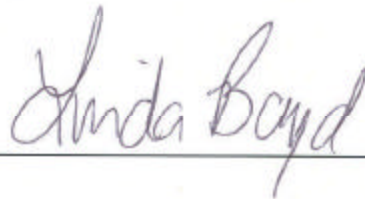

U.S. Army Corps of Engineers, Memphis District is committed to continual improvement and the prevention of pollution.

U.S. Army Corps of Engineers, Memphis District is committed to complying with all applicable environmental legislation and regulations and any other requirements to which we subscribe. The Memphis District is committed to continual improvement of its environmental management system and for the reduction or prevention of pollution throughout the Memphis District and the Mississippi River.

To achieve this, U.S. Army Corps of Engineers, Memphis District will:

- Strive to ensure safe working conditions to minimize employee injury;
- Train all employees in safe handling of biohazards, chemical hazards, explosives (as applicable), hazardous waste management, proper lab safety techniques, and spill control methods;
- Strive to conserve natural resources used in, or affected by, our processes and seek out and develop more environmentally friendly means and methods;
- Establish and review environmental objectives and targets for the reduction of solid waste through recycling programs, and increasing employee awareness of environmental aspects and impacts;
- Strive to comply with federal, state, and local laws and regulations, as well as environmental requirements of our customers and outside interested parties;
- Communicate its environmental policy to all employees and persons working on behalf of the Memphis District, and make this policy available to other interested parties; and,
- Encourage our suppliers and vendors to suggest more environmentally friendly substitutes, as well as utilize recycled or recyclable materials when available.
