Subject: INEEL High-Level Waste Draft EIS

Dear Mr. Wichmann:

Some members of the Hanford Advisory Board (HAB) attended the February 3 presentation conducted by staff of the U.S. Department of Energy on the Idaho High-Level Waste and Facilities Disposition Draft Environmental Impact Statement (EIS). On behalf of the HAB, we are submitting the following statement to be considered by DOE.

The HAB is not prepared at this time to provide specific comments on the EIS. The Hanford vitrification plant has not been constructed and thus will not be available for several years. In addition, when it becomes operational, it will take many years to vitrify Hanford tank wastes. Thus, it would be premature at this time for us to comment on the EIS alternative that would send INEEL high-level wastes to Hanford for vitrification.

However, three consistent positions of our Board relate to the issue.

- 39-1
11.E(6) 39-5 11.E(2)
In Advice #13 and subsequent pieces of advice, we have stated that if another site sends waste to Hanford for treatment, it should not be sent until a treatment facility is built and operating. Once treated, the waste must be returned to the sending site.
- 39-2
11.E(5)
We cannot support Idaho's waste coming to Hanford until all of Hanford's high-level waste has been treated. We emphasized in our recent statement on tank wastes that the Hanford tanks are one of the most urgent environmental threats to the country. We have three types of tanks: those that have leaked, those that will leak, and those that will leak again. The single-shell tanks are already beyond their design life and the double-shell tanks will reach that point before the vitrification process is completed. Vitrification of these wastes must proceed expeditiously and be completed before a major accident occurs with the aging tanks.
- 39-3
11.E(4) 39-6 11.E(3)
We have indicated in several pieces of advice that if any wastes come to Hanford for treatment or disposition "the sending site should cover all costs." The Hanford budget is not adequate to cover even the costs of our own cleanup efforts in

accordance with our Tri-Party Agreement and regulatory requirements. The impact of offsite wastes on the inadequate budget of Hanford and the environmental impacts of any diversion of Hanford cleanup funds must be factored into decisions on offsite wastes and should be thoroughly analyzed in this EIS. The Hanford cleanup dollars should not be used to subsidize the receipt, treatment, and/or storage of offsite wastes.

39-4 We would appreciate being consulted as this process continues forward, particularly when a preferred alternative or other decisions are being considered which might impact Hanford.

(6)
Very truly yours,

Marilyn B. Reeves, Chair
Hanford Advisory Board

Project: Idaho High-Level Waste and Facilities Disposition DEIS

Dear Mr. Wichmann:

Enclosed are the comments from the Nevada Division of Water Resources and Department of Transportation concerning the above referenced report. These comments constitute the State Clearinghouse review of this proposal as per Executive Order 12372. Please address these comments or concerns in your final decision. If you have questions, please contact me at 684-0209.

Sincerely,

Heather K. Elliott

DEAR SIRS,
PLEASE HELP ME WITH THIS!
DOES NOT MEET E.P.A. STANDARDS!
WHY IS IT ALLOWED TO RUN ANYWAY?
NOT SURE IF IT CAN BE UPGRADED?
THEN YOU BETTER NOT OVE IT!
BUILD NEW LINES THAT WONT LEAK OR FIX YOUR LINES THAT DO LEAK!
EPA WONT LET US SNOWMOBILES YELLOW STONE!
EPA WONT LET OUR ON-INCREASING WASTE GO TO IPT??!!
EPA ALWAYS HAS TO LOOK THE OTHER WAY!!?

'Hot' waste on fire now at INEEL
Calciner used to treat high-level waste until June 1.
By Rachel Odell
Officials at the Idaho National Engineering and Environmental Laboratory began Saturday feeding "hot," or radioactive, high-level waste into a calciner at the site. They will continue using the calciner to treat high-level waste until June 1 as they measure the amount of emissions released by the machine, INEEL spokesman Brad Bugger said. The calciner is used to turn liquid high-level waste into a solid for long-term storage. It works by heating a dolomite base and spraying that base with the liquid waste, Bugger said. The calciner at INEEL does not meet current Environmental Protection Agency emission standards. In order to decide whether to upgrade the facility, INEEL officials are doing this series of test runs to determine how polluting the facility actually is, Bugger said. "We have to run it and see what kind of emissions we are putting out," he said. "We have to decide if we are going to upgrade and before we make a decision we want to know if we can really meet the standards." Upgrading the calciner is one alternative in an environmental impact statement on managing high-level waste. To order a copy of the draft environmental impact statement call (888) 891-5100. The document is also available on the Internet at <http://tis.eh.doe.gov/nepa/docs/docs.htm>. Comments on the draft EIS are due April 19. Comments should be sent to Tom Wichmann, document manager, US DOE, Idaho Operations Office, 850 Energy Drive, Mail Stop 1108, Idaho Falls, ID, 83401-1563. They can also be faxed to (208) 526-1184 or registered electronically at <http://www.jacobs.com/htw/eis>.

Clover look
You need to stop what you are doing. Meet the money to do it right!
Tom Stoner
