FINDING OF NO SIGNIFICANT

IMPACT

WATER CONTROL PLAN

SEPULVEDA FLOOD CONTROL BASIN

LOS ANGELES COUNTY, CALIFORNIA

APRIL 1987

I have reviewed the attached environmental assessment that has been prepared for the Water Control Plan, Sepulveda Flood Control Basin, Los Angeles County, California. The significant resources potentially affected by this project are biological resources, cultural resources, water quality and land use, including flood control, recreation and agriculture.

Although the proposed Water Control Plan permits deviations from the operation schedule for Sepulveda Dam, these deviations are not discernibly different from existing conditions and, therefore, should not have any effect on the extent and duration of inundation within the flood control basin. The impacts on the quality of the human environment due to these changes are not considered significant. Therefore, an environmental impact statement is not required for this project.
