

## **REPORT TO CONGRESS**

### **DEPARTMENT OF DEFENSE FISCAL YEAR 2007 PURCHASES OF SUPPLIES MANUFACTURED OUTSIDE THE UNITED STATES**

**July 2008**

**Deputy Under Secretary of Defense (Acquisition and Technology)**

#### **Background**

Section 8306 of the U.S. Troop Readiness, Veterans' Care, Katrina Recovery, and Iraq Accountability Appropriations Act for Fiscal Year 2007 (Pub.L. 110-028), modified the Buy American Act (41 U.S.C. 10a) by adding a requirement for the head of each Federal Agency to submit a report to Congress on the amount of acquisitions made by the agency from entities that manufacture the articles, materials, or supplies outside of the United States in each of the fiscal year 2007 through 2011. The report shall separately identify (1) the dollar value of any articles, materials, or supplies purchased that were manufactured outside the United States; (2) provide an itemized list of all waivers granted with respect to such articles, materials or supplies under the Buy American Act (BAA); (3) the specific exception under this section that was used to purchase such articles, materials, or supplies; and (4) a summary of the total procurement funds spent on goods manufactured in the United States versus funds spent on goods manufactured outside the United States.

#### **Discussion**

This report includes four sections: (1) all procurements from foreign entities and more specifically, purchases of articles, materials, or supplies/manufactured goods from such foreign entities; (2) waivers granted with respect to such articles, materials or supplies under the Buy American Act (BAA); and (3) a comparison of procurement funds spent on goods manufactured in the U.S. versus funds spent on goods manufactured outside the U.S; and for general information purposes,

The information presented in this report addresses Fiscal Year 2007 and is based on data from the Federal Procurement Data System – New Generation (FPDS-NG), data compiled and distributed by DoD's Defense Manpower Data Center, Statistical Analysis Information Division, and data published by the Defense Security Cooperation Agency (DSCA). DSCA data include commercial export data from the State Department's Office

of Defense Trade Controls. The FPDS-NG data addresses contracting procedures, competition, financing, statutory requirements, socioeconomic programs and other information relating to DoD acquisitions. In some instances, all of the information required by section 8306 is not available. The capability of FPDS-NG to capture the information on waivers was implemented in October 2007. However, additional adjustments are required to enable the system to more fully and accurately capture the data. The necessary changes are not scheduled for implementation until later this year. We are hopeful that these additional changes will allow us to respond more fully to the requirements of section 8306 in future reports. As a result, the data presented in this report represents only what we have been able to capture at this time.

## **Section 1 - Procurements from foreign entities**

**1(a) All procurements.** DoD procurement actions recorded in FPDS-NG during FY 2007 totaled approximately \$316 billion. Of that amount, approximately \$18.6 billion or 5.9 percent was expended on purchases from foreign entities. Of this amount, \$17.9 billion is for contracts with a place of performance outside the U.S. and the remainder, \$.7 billion, is for contracts with a place of performance within the U.S. A detailed breakout of the dollars by country is contained in **Table 1**.

The \$18.6 billion covers military hardware, subsistence, fuel, construction, services, and other miscellaneous items that are for use outside the U.S. Defense equipment constitutes approximately 10 percent of the purchases from foreign entities. Fuel, services, construction and subsistence account for approximately 26.6 percent, 6.74 percent, 6.38 percent, and .5 percent, respectively, or approximately 40 percent of the total purchases from foreign entities. **Table 2** provides a breakout of the \$18.6 billion by category and percentage of total.

For purposes of context, Defense Security Cooperation Agency data on foreign purchases of U.S. defense articles and services in Fiscal Year 2007, totaled approximately \$19.5 billion in FMS and \$3.8 billion in non-FMS for a combined total of \$23.3 billion in Security Assistance Sales (SAS). In addition, data provided directly by the State Department reflect that in Fiscal Year 2007, U.S. Commercial Exports of hardware sales totaled \$24.5 billion and sales of defense services totaled \$64.3 billion

**1(b) Procurement of manufactured articles.** This section focuses on defense articles provided by foreign entities that are manufactured outside the U.S. Of the approximately \$18.6 billion that was expended on **all** purchases from foreign entities defined by the Defense Claimant Program (DCP), **Table 3** notes that approximately \$11.1 billion was expended on contractual actions for the procurement of articles manufactured outside the U.S. **Table 3** removes the data in **Table 2** that are associated with petroleum, other fuels and lubricants, subsistence, construction and services (DCPs A8A, A8B, B2, C3, and S1) to derive the \$11.1 billion for articles manufactured outside

the U.S. **Table 3** further refines this data to exclude all activities/services included in the \$11.1 billion in DoD procurements from foreign entities that are not actually associated with manufactured goods. For example, Column 1 in **Table 3** reflects a total of \$209,749,775 for DCP A1A. However, after removal of costs associated with various aircraft related services including R&D and maintenance, the adjusted figure for A1A is only \$99,262,847 as reflected in column 2. Similar adjustments were made to the remaining DCPs, resulting in an adjusted total of \$10.3 billion for procurement of articles manufactured outside the U.S. by foreign entities. **Table 4** provides a detailed breakout of DoD purchases by foreign country, dollars, and number of actions. **Table 5** refines the data even further to provide visibility into this information by DCPs, country, dollars and the number of actions.

### **Section 2 - Waivers of the Buy American Act (BAA) granted with respect to such articles, materials or supplies**

Until the change to FPDS-NG, the Department had no central repository for waivers of the BAA. With the change that became effective in October 2007, DoD now can identify the number of waivers of the BAA that have been granted and under which exception the waivers have been made. However, since the change was not in effect for the entire fiscal year and additional adjustments were required as explained above, the data is somewhat limited and in general, understated. However, as noted above, we expect future reports to be more accurate and complete.

FPDS-NG data reflect that 14,159 waivers of the BAA were granted for articles manufactured outside the U.S. during Fiscal Year 2007. The value of these waivers totals approximately \$5.8 billion. These exceptions utilized included: (1) manufactured outside the U.S. for use outside the U.S.; (2) manufactured outside the U.S. – Resale; (3) manufactured outside the U.S. – Trade Agreements; (4) manufactured outside the U.S. – Commercial IT; (5) manufactured outside the U.S. – Public Interest Determinations; (6) manufactured outside the U.S. – Unreasonable Cost of Domestic End Product; and (7) manufactured outside the U.S. – Qualifying Country.

**Table 6** provides a detailed breakout of the actions and dollars by waiver category and an explanation of the authority for each of the waiver categories.

### **Section 3 - Comparison of procurement funds spent on goods manufactured in the U.S. versus funds spent on goods manufactured outside the U.S.**

**Table 7** presents a comparison of contractual actions and dollars for procurement of goods manufactured by U.S. sources versus goods manufactured by foreign sources. As reflected in table 7, DoD's procurement of manufactured goods from U.S. sources

totaled approximately \$129.7 billion as contrasted to DoD purchases of manufactured goods from foreign sources which totaled slightly more than \$10.3 billion, or roughly 8% of all DoD's procurement of manufactured goods in Fiscal Year 2007.

**TABLE 1**

**DEPARTMENT OF DEFENSE PURCHASES FROM FOREIGN ENTITIES - FY 2007**

C9E	All other Supplies & Equipment	\$ 9,151,984,572	\$ 8,772,677,316
<b>Total</b>		<b>\$ 11,108,385,751</b>	<b>\$ 10,324,412,445</b>

**Note (1):** The Department has developed "express" reporting for high volume and contingency contracting in support of Afghanistan and Iraq. Under express reporting, details of the data are not reported. Instead, the data is rolled up and summarized in the miscellaneous category of C9E - a reflection of why the dollar value in this category is so high.

Column 1 is a dollar summary of all DoD procurement actions, both obligations & deobligations, during FY 2006 for the DCP's shown above. Not included in column 1 are the costs associated with petroleum, other fuels and lubricants, subsistence, construction and services (DCP's A8A, A8B, B2, C2 and S1. These dollar values are the same values shown in DoD's annual report to Congress on purchases from foreign entities for these specific DCPs.

Column 2 is a dollar summary of the dollar value of defense articles provided by foreign entities that are manufactured outside the U.S. The difference between column 1 and 2 is that the value of services associated with this hardware has been removed. For example, R&D, Professional Services, Maintenance, Repair & Refurbishment, transportation, housekeeping services, etc. have been excluded. Column 2 is our estimate of the value of articles, materials, and supplies manufactured outside the US by foreign entities.
