Introduction

During the onsite review, each local review team completes a Summary of Findings Form. The Form includes sections for each of the three outcome areas and each of the seven systemic areas being reviewed. For each outcome listed, subsections are provided to record the number of cases reviewed by the team according to the degree to which the outcome was determined by the reviewers to be achieved, followed by a list of each indicator used to evaluate the outcome. For each systemic factor listed, subsections are provided to record the State's substantial conformity, or lack thereof, followed by the State plan requirements used to evaluate each systemic factor.

The form also includes sections used to record areas determined by the review team to be operating in substantial conformity with applicable State plan requirements and those determined not to be in substantial conformity. At the conclusion of the review, the Team Leader compiles the forms from the local sites into one form.

The Summary of Findings Form is designed to:

- Provide a format for each local onsite review team to identify its collective findings based on the activities conducted by the team in a particular review site.
- Provide a format for recording information obtained during the onsite review applicable to the outcomes and systemic factors being reviewed, including information obtained from case reviews and stakeholder interviews.
- Provide a format for all the local review teams to consolidate their information into one comprehensive report to the State agency.
- When completed, following the onsite review, serve as the final report of the review to the State agency that includes the summary of the review findings and the determination of substantial conformity.

Instructions

Each review team member should receive a copy of the form that includes the Preliminary Assessment information. However, each local review team will submit only one completed form that includes the results of the local team's findings of the onsite review as compiled at the local team's final debriefing. The Local Site Leader must ensure that the form is completed and submitted by the end of the onsite review. For each outcome (sections I–III), the team should record the number of cases they reviewed in which that particular outcome was determined to be substantially achieved, partially achieved, or not achieved or addressed by the agency under review. Each systemic factor (sections IV–X) should be marked by the team as in substantial conformity with State plan requirements or not in substantial conformity.

Each performance indicator (items 1–45) following the outcomes and systemic factors should be judged by the team as primarily a strength or primarily an area needing improvement, recognizing there may be some identified strengths and needs within any one indicator. The basis for rating each performance indicator should be specific, should substantiate the rating, and should note the source of the information, i.e., case reviews, stakeholder interviews, or the self-assessment.

In the debriefing of the State Review Team near the conclusion of the onsite review, the team should complete one consolidated form that incorporates the findings of each local team and includes and addresses each section of the Preliminary Assessment. The team should complete the final section of the form (section XI), indicating those areas determined to be operating in substantial conformity with applicable requirements and those areas not in substantial conformity. The team will identify the specific performance indicators needing improvement in each area determined not to be in substantial conformity, to assist the State in developing its Program Improvement Plan. Following the onsite review, the Children's Bureau Regional Office Review Team Leader will refine and supplement the form as needed, verify the areas of nonconformity, and submit the completed form to the State agency as the Final Report of the review.
