# Water Resources Development by the U.S. Army Corps of Engineers in Oregon

## Foreword

The Portland, Walla Walla, San Francisco, and Sacramento districts administer the water resource activities assigned to the U.S. Army Corps of Engineers for the state of Oregon.

Portland and Walla Walla districts are in the Northwestern Division. San Francisco and Sacramento are in the South Pacific Division. The division offices report to the Office of the Chief of Engineers in Washington, D.C. Projects and activities in Oregon are defined by river basins rather than by political boundaries. Thus, work throughout the state is under the jurisdiction of the Corps district assigned to each specific area, as indicated on the state map on page 20. The following chapters contain short descriptions of civil works projects assigned to the districts for Oregon. For more complete information regarding any project, inquiries should be directed to the division or district engineer of the appropriate office.

U.S. Army Corps of Engineers  
**NORTHWESTERN DIVISION**  
North Pacific Region  
P.O. Box 2870  
Portland, OR 97208-2870
