## Chapter III. Predictors and Risk Factors Associated with Welfare Receipt

The Welfare Indicators Act challenges the U.S. Department of Health and Human Services to identify and set forth not only indicators of welfare dependence and welfare duration but also predictors and causes of welfare receipt. However, welfare research has not established clear and definitive causes of welfare receipt and dependence. Instead, it has identified a number of risk factors associated with welfare use. For the purposes of this report, the terms "predictors" and "risk factors" are used somewhat interchangeably.

Following the recommendation of the Advisory Board, this chapter includes a wide range of possible predictors and risk factors. As research advances, some of the "predictors" included in this chapter may turn out to be simply correlates of welfare receipt, some may have a causal relationship, some may be consequences, and some may have predictive value.

The predictors/risk factors included in this chapter are grouped into three categories: economic security risk factors, employment-related risk factors, and risk factors associated with nonmarital childbearing.

Economic Security Risk Factors (ECON). The first group includes eight measures associated with economic security. This group encompasses five measures of poverty, as well as measures of child support receipt, food insecurity, and lack of health insurance. The tables and figures illustrating measures of economic security are labeled with the prefix ECON throughout this chapter.

Poverty measures are important predictors of dependence, because families with fewer economic resources are more likely to be dependent on means-tested assistance. In addition, poverty and other measures of deprivation, such as food insecurity, are important to assess in conjunction with the measures of dependence outlined in Chapter II.

Reductions in caseloads and dependence can reduce poverty, to the extent that such reductions are associated with greater work activity and higher economic resources for former welfare families. However, reductions in welfare caseloads can increase poverty and other deprivation measures, to the extent that former welfare families are left with fewer economic resources.

Several aspects of poverty are examined in this chapter. Those that can be updated annually using the Current Population Survey include: overall poverty rates (ECON 1); the percentage of individuals in deep poverty (ECON 2), and poverty rates using alternative definitions of income (ECON 3 and 4). The chapter also includes data on the length of poverty episodes or spells (ECON 5).

This chapter also includes data on child support collections (ECON 6), which can play an important role in reducing dependence on government assistance and thus serve as a predictor of dependence. Household food insecurity (ECON 7) is an important measure of deprivation that, although correlated with general income poverty, provides an alternative measure of tracking the incidence of material hardship and need, and how it may change over time. Finally, health
insurance (ECON 8) is tied to the income level of the family, and may be a precursor to future health problems among adults and children.

Employment and Work-Related Risk Factors (WORK). The second grouping, labeled with the WORK prefix, includes eight factors related to employment and barriers to employment. These measures include data on overall labor force attachment and employment and earnings for low-skilled workers, as well as data on barriers to work. The latter category includes incidence of adult and child disabilities, adult substance abuse, and levels of educational attainment and school drop-out rates.

Employment and earnings provide many families with an escape from dependence. It is important, therefore, to look both at overall labor force attachment (WORK 1), and at employment and earnings for those with low education levels (WORK 2 and WORK 3). The economic condition of the low-skill labor market is a key predictor of the ability of young adult men and women to support families without receiving means-tested assistance.

The next two measures in this group (WORK 4 and WORK 5) focus on educational attainment. Individuals with less than a high school education have the lowest amount of human capital and are at the greatest risk of being poor, despite their work effort.

Measures of barriers to employment provide indicators of potential work limitations, which may be predictors of greater dependence. Substance abuse (WORK 6) and disabling conditions among children and adults (WORK 7) all have the potential of limiting the ability of the adults in the household to work. In addition, debilitating health conditions and high medical expenditures can strain a family's economic resources. The labor force participation of women with children (WORK 8) is also a predictor of dependence.

Nonmarital Birth Risk Factors (BIRTH). The final group of risk factors addresses out-ofwedlock childbearing. The tables and figures in this subsection are labeled with the BIRTH prefix. This category includes long-term time trends in nonmarital births (BIRTH 1), nonmarital teen births (BIRTH 2 and BIRTH 3), and children living in families with never-married parents (BIRTH 4). Children living in families with never-married mothers are at high risk of becoming dependent as adults, and it is therefore important to track changes in the size of this vulnerable population.

As noted above, the predictors/risk factors included in this chapter do not represent an exhaustive list of measures. They are merely a sampling of available data that address in some way the question of how a family is faring on the scale of deprivation and well-being. Such questions are a necessary part of the dependence discussion as researchers assess the effects of welfare reform.

## ECONOMIC SECURITY RISK FACTOR 1. POVERTY RATES

Figure ECON 1. Percentage of Persons in Poverty, by Age: 1959-2004

Source: U.S. Bureau of the Census, "Income, Poverty, and Health Insurance Coverage in the United States: 2004," Current Population Reports, Series P60-229 and data published online at http://www.census.gov/prod/2005pubs/p60-229.pdf .

- The official poverty rate was 12.7 percent in 2004, a small increase over the rate of 12.5 percent in 2003. Even so, the percentage of persons living in poverty in 2004 was below the poverty rates experienced in most of the 1980s and 1990s.
- Children under 18 had a poverty rate of 17.8 percent in 2004, up slightly from 17.6 percent in 2003. As in past years, the child poverty rate is considerably higher than the overall poverty rate.
- The poverty rate for the elderly (persons ages 65 and over) was 9.8 percent in 2004, down slightly for the second year in a row. This was a far lower poverty rate than the 17.8 percent rate for persons under 18 and below the 11.3 percent rate for adults ages 18 to 64, as shown in Table ECON 1.
- The poverty rate for persons in female-headed households was 30.5 percent, as shown in Table ECON 1. While about one third of persons in female-headed households lived in poverty in 2004, this was below the poverty rates experienced in the 1980s and most of the 1990s.

Table ECON 1. Percentage of Persons in Poverty, by Age and Marital Status: Selected Years

| Calendar <br> Year | Related Children |  | All Persons |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Ages 0-5 | Ages 6-17 | Total | Under $18{ }^{1}$ | 18 to 64 | 65 \& over | Married <br> Families | Female ${ }^{3}$ Householder |
| 1959 | NA | NA | 22.4 | 27.3 | 17.0 | 35.2 | $18.2{ }^{2}$ | 49.4 |
| 1963 | NA | NA | 19.5 | 23.1 | NA | NA | $14.9{ }^{2}$ | 47.7 |

## ECONOMIC SECURITY RISK FACTOR 2. DEEP POVERTY RATES

Figure ECON 2. Percentage of Total Population below 50, 100 and 125 Percent of Poverty Level 1975-2004

Source: U.S. Bureau of the Census, "Income, Poverty, and Health Insurance Coverage in the United States: 2004," Current Population Reports, Series P60-229 and data published online at http://www.census.gov/prod/2005pubs/p60-229.pdf .

- The percentage of the population in "deep poverty" (with incomes below 50 percent of the federal poverty level) was 5.4 percent in 2004, compared to an overall poverty rate of 12.7 percent. Only 4.4 percent of the population was "near-poor" (had incomes at or above 100 percent but below 125 percent of the federal poverty level).
- In general, the percentage of the population with incomes below 50 percent of the poverty threshold has followed a pattern that reflects the trend in the overall poverty rate, as shown in Figure ECON 2. The percentage of people below 50 percent of poverty rose in the late 1970s and early 1980s, but then, after falling slightly, rose to a second peak in 1993. The rates for 100 percent of poverty and 125 percent of poverty followed a somewhat similar pattern with more pronounced peaks and valleys.
- Over the past two decades, there has been an overall increase in the proportion of the poverty population in deep poverty. From a low of 28 percent of the poverty population in 1976, this population rose to just over 42 percent in 2004, down slightly from 2003.
- The total number of poor people in 2004 was 37 million, as shown in Table ECON 2. While higher than the previous year, this number was 2.3 million lower than the peak of 39.3 million in 1993.

Table ECON 2. Number and Percentage of Total Population below 50, 75, 100 and 125 Percent of Poverty Level: Selected Years

| Year | Total <br> Podulation (thousands) | Below 50 Percent |  | Below 75 Percent |  | Below 100 Percent |  | Below 125 Percent |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  | Number (thousands) | Percent | Number (thousands) | Percent | Number (thousands) | Percent | Number (thousands) | Percent |

Figure ECON 3. Percentage of Persons in Poverty Using Various Experimental Poverty Measures by Age: 2003

Source: U.S. Bureau of the Census, "Alternative Poverty Estimates in the United States: 2003," Current Population Reports, Series P60-227, available online at http://www.census.gov/prod/2005pubs/p60-227.pdf, and unpublished CPS data from the U.S. Census Bureau.

- Three experimental measures of poverty (developed by the Census Bureau in response to the recommendation of a 1995 panel of the National Academy of Sciences) yield poverty rates that are similar to the official poverty measure overall, but differ by age and other characteristics.
- Experimental measures generally show lower poverty rates among children than the official measure, partly because they take into account non-cash benefits that many children receive. Conversely, experimental measures show higher rates of poverty among the elderly than the official measure, in part due to the inclusion of certain out-of-pocket health costs in these measures.
- All three alternative measures shown in Figure Econ 3 do not take into account geographic adjustments (NGA) in housing costs; the measures can be calculated with geographic adjustment (GA), as shown in Tables ECON 3a and 3b. See note to Table ECON 3a.

## Table ECON 3a. Percentage of Persons in Poverty Using Various Experimental Poverty Measures, by Race/Ethnicity and Age: 2003

|  | Official | No Geographic Adjustment |  |  | Geographic Adjustment |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  | Alternative 1 (MSI-NGA) | Alternative 2 (MIT-NGA) | Alternative 3 (CMB-NGA) | Alternative 1 (MSI-GA) | Alternative 2 <br> (MIT-GA) | Alternative 3 (CMB-GA) |
| All Persons | 12.5 | 12.4 | 12.7 | 13.0 | 12.3 | 12.7 | 12.9 |
| Racial/Ethnic Categories |  |  |  |  |  |  |  |
| Non-Hispanic White | 8.2 | 9.0 | 9.1 | 9.4 | 8.4 | 8.4 | 8.8 |
| Non-Hispanic Black | 24.3 | 21.2 | 21.9 | 22.1 | 20.3 | 20.7 | 21.1 |
| Hispanic | 22.6 | 21.0 | 22.6 | 22.2 | 23.6 | 25.3 | 25.0 |
| Age Categories |  |  |  |  |  |  |  |
| Children Ages 0-17 | 17.6 | 13.9 | 15.0 | 14.7 | 14.0 | 15.0 | 14.8 |
| Adults Ages 18-64 | 10.8 | 11.0 | 11.6 | 11.5 | 10.9 | 11.6 | 11.5 |
| Adults Ages 65 and over | 10.2 | 16.3 | 13.9 | 17.3 | 15.7 | 13.2 | 16.5 |

Note: These experimental poverty measures implement changes recommended by a 1995 NAS panel, including: counting noncash income as benefits; subtracting from income certain work-related, health and child care expenses; and adjusting poverty thresholds for family size and geographic differences in housing costs. The three alternative measures are similar, except that each account for medical out-of-pocket expenses (MOOP) differently. The first alternative ("MOOP subtracted from income" or MSI) subtracts out-of-pocket medical expenses from income. The second alternative, ("MOOP in the threshold" or MIT) increases the poverty thresholds to take MOOP expenses into account. The third measure, CMB for combined methods, combines attributes of the previous two measures. Each of the three measures is calculated with and without accounting for geographic adjustments (GA and NGA).

Persons of Hispanic ethnicity may be of any race. Beginning in 2002, estimates for Whites and Blacks are for persons reporting a single race only. Persons who reported more than one race are included in the total for all persons but are not shown under any race category. Due to small sample size, American Indians/Alaska Natives, Asians and Native Hawaiians/Other Pacific Islanders are included in the total for all persons but are not shown separately.

## ECONOMIC SECURITY RISK FACTOR 4. POVERTY RATES WITH VARIOUS MEANS-TESTED BENEFITS INCLUDED

Figure ECON 4. Percentage of Total Population in Poverty with Various Means-Tested Benefits Added to Total Cash Income: 1979-2004

Source: Unpublished tabulations from the Current Population Survey, Annual Social and Economic Supplement, 1980-2005, by the Congressional Budget Office.

- The official poverty rate - the definition of which includes means-tested cash assistance (primarily TANF and SSI) in addition to pre-tax cash income and social insurance - was 12.7 percent in 2004, as shown in the bold line with empty boxes in Figure ECON 4. Without cash welfare, the 2004 poverty rate would be 13.5 percent, as shown by the top line in the figure above.
- Adding other non-cash, public assistance benefits to this definition has the effect of lowering the percentage of people who have incomes below the official poverty line. Including the value of food and housing benefits in total income reduces the poverty rate to 11.5 percent in 2004.
- When income is defined as including the Earned Income Tax Credit (EITC) and federal taxes, the percentage of the total population in poverty decreases to 10.5 percent in 2004. Federal taxes and tax credits have had a net effect of reducing poverty rates following the EITC expansions in 1993 and 1995.
- The combined effect of means-tested cash assistance, food and housing benefits, EITC and taxes was to reduce the poverty rate in 2004 by 3.0 percentage points, as shown in Table ECON 4. Net reductions in poverty rates were somewhat lower during the recession of the early 1980s, and somewhat higher in the mid-1990s, largely due to expansions in the EITC.

Table ECON 4. Percentage of Total Population in Poverty with Various Means-Tested Benefits Added to Total Cash Income: Selected Years

|  | 1983 | 1986 | 1989 | 1992 | 1995 | 1998 | 2000 | 2002 | 2003 | 2004 |
| :--- | ---: | ---: | ---: | ---: | ---: | ---: | ---: | ---: | ---: | ---: |
| Cash Income Plus All Social Insurance | 16.0 | 14.5 | 13.8 | 15.6 | 14.9 | 13.5 | 12.0 | 12.8 | 13.2 | 13.5 |
| Plus Means-Tested Cash Assistance | 15.2 | 13.6 | 12.8 | 14.5 | 13.8 | 12.7 | 11.3 | 12.1 | 12.5 | 12.7 |
|  |  |  |  |  |  |  |  |  |  |  |
| Plus Food and Housing Benefits | 13.7 | 12.2 | 11.2 | 12.9 | 12.0 | 11.3 | 10.1 | 10.9 | 11.2 | 11.5 |
| Plus EITC and Federal Taxes | 14.7 | 13.1 | 11.8 | 13.0 | 11.5 | 10.4 | 9.5 | 10.0 | 10.4 | 10.5 |
| Reduction in Poverty Rate | 1.3 | 1.4 | 2.0 | 2.6 | 3.4 | 3.1 | 2.5 | 2.8 | 2.8 | 3.0 |

Note: The four measures of income are as follows: (1) "Cash Income Plus All Social Insurance" is earnings and other private cash income, plus social security, workers compensation and other social insurance programs. It does not include means-tested cash transfers; (2) "Plus Means-Tested Cash Assistance" shows the official poverty rate, which takes into account means-tested assistance, primarily AFDC/TANF and SSI; (3) "Plus Food and Housing Benefits" shows how poverty would be lower if the cash value of food and housing benefits were counted as income; and (4) "Plus EITC and Federal Taxes" is the most comprehensive poverty rate shown. EITC refers to the refundable Earned Income Tax Credit, which is always a positive adjustment to income whereas federal payroll and income taxes are a negative adjustment. The fungible value of Medicare and Medicaid is not included.

Source: Unpublished tabulations from the Current Population Survey, Annual Social and Economic Supplement, 1984-2005, by the Congressional Budget Office.

## ECONOMIC SECURITY RISK FACTOR 5. POVERTY SPELLS

Figure ECON 5. Percentage of Poverty Spells for Individuals Entering Poverty during the 1993 and 2001 SIPP Panels, by Length of Spell

Source: Unpublished tabulations from the Survey of Income and Program Participation, 1993 and 2001 panels.

- About half of all poverty spells that began during the 2001 SIPP panel ended within four months, and 77 percent ended within one year. Only 15 percent of all such spells were longer than 20 months.
- Spells of poverty that began between 1993 and 1995 were similar to those between 2001 and 2003; 47 percent ended within four months and 16 percent were longer than 20 months.
- Poverty spells among adults ages 65 and older were more likely to last longer than 20 months (21 percent) than spells among other age groups, as shown in Table ECON 5a.

Table ECON 5a. Percentage of Poverty Spells for Individuals Entering Poverty during the 2001 SIPP Panel, by Length of Spell, Race/Ethnicity and Age

|  | Spells $<=4$ <br> Months | Spells 5-12 <br> Months | Spells 13-20 <br> Months | Spells >20 <br> Months |
| :--- | :---: | :---: | :---: | ---: |
| All Persons | 49.2 |  |  |  |
| Racial/Ethnic Categories |  | 27.7 | 7.7 | 15.5 |
| Non-Hispanic White | 52.3 | 27.1 |  |  |
| Non-Hispanic Black | 42.1 | 27.4 | 7.1 | 13.5 |
| Hispanic | 45.7 | 29.7 | 9.4 | 21.1 |
| Age Categories |  |  | 7.8 | 16.8 |
| Ages 0-5 Years | 48.0 | 29.6 |  |  |
| Ages 6-10 Years | 48.0 | 28.5 | 7.3 | 14.2 |
| Ages 11-15 Years | 50.3 | 27.8 | 8.5 | 15.8 |
| Women Ages 16-24 | 49.4 | 28.6 | 7.6 | 13.4 |
| Men Ages 16-64 Years | 52.0 | 28.3 | 7.6 | 14.4 |
| Adults Ages 65 Years and over | 47.7 | 23.7 | 7.4 | 12.1 |

Note: Spell length categories are mutually exclusive. Spells separated by only 1 month are not considered separate spells. Due to the length of the observation period, actual spell lengths for spells that lasted more than 20 months cannot be observed.

Persons of Hispanic ethnicity may be of any race. Due to small sample size, American Indians/Alaska Natives, Asians and Native Hawaiians/Other Pacific Islanders are included in the total for all persons but are not shown separately.

## ECONOMIC SECURITY RISK FACTOR 6. CHILD SUPPORT

Figure ECON 6. Child Support Collections Received by Families, by Receipt of IV-D Services and Other Assistance (Billions of 2003 Dollars): 1993-2003

Source: Unpublished tabulations from the Current Population Survey, Child Support Supplement, 1994-2004.

- In 2003 families reported receiving $\$ 25.6$ billion in child support payments from the nonresident parent. This amount represents current year support received for a twelve-month period and does not include amounts paid for prior periods (arrearages) or amounts retained by the federal and state government to recoup welfare costs. Total child support collections have increased by 24 percent since 1993, after adjusting for inflation.
- The amount of payments received by families who also received AFDC/TANF cash assistance at some point in the year has declined, from $\$ 3.1$ billion in 1993 (in inflationadjusted dollars) to $\$ 2.6$ billion in 2003. This partly reflects the decline in the AFDC/TANF caseloads. In addition, some states no longer "pass-through" any payments to families receiving TANF. Prior to the enactment of PRWORA in 1996, states were required to pass-through the first $\$ 50$ of any child support collected.
- Child support payments to families who did not receive TANF, but received another form of public assistance (SSI, food stamps, Medicaid or housing assistance) increased significantly between 1993 and 2003, from $\$ 2.1$ to $\$ 5.3$ billion (in 2003 dollars). This group of families includes former TANF recipients, as well as families at risk of turning to cash assistance. The increased collections for this group more than offset the decline in payments to TANF families.
- The total amount reported received by families through the child support enforcement system (Title IV-D of the Social Security Act) was $\$ 16.2$ billion, or 63 percent of all child support payments received by families, as shown in Table ECON 6.

Table ECON 6. Child Support Collections Received by Families, by Receipt of IV-D Services and Other Assistance: 1993-2003

| 2003 | Receiving Title IV-D Child Support Services and: | Collections (billions) |  | $\begin{gathered} \text { Total } \\ \text { (percent) } \end{gathered}$ |

|  | Families Not Receiving IV-D Child Support Services | 8.8 | 9.7 | $\underline{44}$ |
|  | Total Families | 20.1 | 22.2 | 100 |
| 1997 | Families Receiving Title IV-D Child Support Services and: |  |  |  |
|  | AFDC/TANF | 2.5 | 2.9 | 12 |
|  | Food Stamps, SSI, Medicaid or Housing | 2.8 | 3.2 | 14 |
|  | Child Support Services Only | 5.9 | 6.8 | $\underline{29}$ |
|  | Subtotal IV-D Families | 11.2 | 12.8 | 55 |
|  | Families Not Receiving IV-D Child Support Services | 9.3 | 10.7 | $\underline{45}$ |
|  | Total Families | 20.6 | 23.5 | 100 |
| 1995 | Families Receiving Title IV-D Child Support Services and: |  |  |  |
|  | AFDC | 2.4 | 2.9 | 12 |
|  | Food Stamps, SSI, Medicaid or Housing | 2.0 | 2.4 | 10 |
|  | Child Support Services Only | 6.7 | 8.1 | $\underline{34}$ |
|  | Subtotal IV-D Families | 11.1 | 13.3 | 56 |
|  | Families Not Receiving IV-D Child Support Services | 8.8 | 10.5 | $\underline{44}$ |
|  | Total Families | 19.9 | 23.8 | 100 |
| 1993 | Families Receiving Title IV-D Child Support Services and: |  |  |  |
|  | AFDC | 2.5 | 3.1 | 15 |
|  | Food Stamps, SSI, Medicaid or Housing | 1.7 | 2.1 | 10 |
|  | Child Support Services Only | 4.7 | 5.9 | $\underline{28}$ |
|  | Subtotal IV-D Families | 8.8 | 11.0 | 53 |
|  | Families Not Receiving IV-D Child Support Services | 7.7 | 9.7 | $\underline{47}$ |
|  | Total Families | 16.5 | 20.7 | 100 |

Note: AFDC/TANF families are families who have reported receiving cash assistance for any month during the 12-month period. Therefore, not all the child support reported received was necessarily received while the family received cash assistance. Data limitations do not allow a month-by-month breakdown.

Families receiving SSI, food stamps, Medicaid or housing assistance are limited to families not receiving AFDC/TANF.
Families receiving services through the IV-D system are estimated according to the methodology described in technical appendices to the ASPEpublished report Characteristics of Families Using Title IV-D Services in 1999 and 2001, available at: http://aspe.hhs.gov/hsp/CSE-
Char04/index.htm and previous reports. Due to a slight change in methodology, estimates for 1993 through 2001 differ slightly from estimates in previously published reports.

Source: Unpublished tabulations from the Current Population Survey, Child Support Supplement, 1994-2004.

## ECONOMIC SECURITY RISK FACTOR 7. FOOD INSECURITY

Figure ECON 7. Percentage of Households Classified by Food Security Status: 2004

$\square$ Food Secure $\quad$ Food Insecure without Hunger $\square$ Food Insecure with Hunger

Source: U.S. Department of Agriculture, Economic Research Service, Household Food Security in the United States, 2004.

- A large majority (88 percent) of American households was food secure in 2004 - that is, showed little or no evidence of concern about food supply or reduction in food intake.
- The prevalence of food insecurity with hunger in 2004 was estimated to be 3.9 percent. During the twelve months ending in December 2004, one or more members of these households experienced reduced food intake and hunger at times during the year as a result of financial constraints. An additional 8 percent of households experienced food insecurity, but were without hunger, during the twelve months ending in December 2004. Food insecurity would be lower if measured over a monthly basis.
- Poor households and persons in female-headed households have higher rates of food insecurity with hunger (13.6 and 9.2 percent, respectively) than the 3.9 percent rate among the general population, as shown in Table ECON 7a.
- After decreasing between 1998 and 1999, the percentage of households with food insecurity has increased slightly between 1999 and 2004 (10.1 and 11.9 percent, respectively), as shown in Table ECON 7b.

|  | Food Secure | Food Insecure Total | Food Insecure without Hunger | Food Insecure with Hunger |
| :---: | :---: | :---: | :---: | :---: |
| All Households | 88.1 | 11.9 | 8.0 | 3.9 |
| Racial/Ethnic Categories |  |  |  |  |
| Non-Hispanic White | 91.4 | 8.6 | 5.7 | 2.9 |
| Non-Hispanic Black | 76.3 | 23.7 | 15.6 | 8.1 |
| Hispanic | 78.3 | 21.7 | 15.8 | 5.9 |
| Households, by Age |  |  |  |  |
| Households with Children under 6 | 81.5 | 18.5 | 14.4 | 4.1 |
| Households with Children under 18 | 82.4 | 17.6 | 13.3 | 4.3 |
| Households with Elderly | 93.5 | 6.5 | 4.7 | 1.8 |
| Household Categories |  |  |  |  |
| Married-Couple Households | 88.4 | 11.6 | 9.3 | 2.3 |
| Female-Headed Households | 67.0 | 33.0 | 23.8 | 9.2 |
| Male-Headed Households | 77.8 | 22.2 | 15.9 | 6.3 |
| Household Income-to-Poverty Ratio |  |  |  |  |
| Under 1.00 | 63.2 | 36.8 | 23.2 | 13.6 |
| Under 1.30 | 66.0 | 34.0 | 21.7 | 12.3 |
| Under 1.85 | 70.2 | 29.8 | 19.4 | 10.5 |
| 1.85 and over | 94.6 | 5.4 | 3.8 | 1.6 |

Note: Food secure households show little or no evidence of concern about food supply or reduction in food intake. Households classified as food insecure without hunger report food-related concerns, adjustments to household food management, and reduced variety and desirability of diet, but report little or no reduction in food intake. Households classified as food insecure with hunger report recurring reductions in food intake or hunger by one or more persons in the household. Spouses are not present in the Female-Headed and Male-Headed household categories.

Race and ethnicity categories for households are determined by the race and ethnicity of the reference person for the household. Persons of Hispanic ethnicity may be of any race. Beginning in 2002, estimates for Whites and Blacks are for persons reporting a single race only. Persons who reported more than one race are included in the total for all persons but are not shown under any race category. Due to small sample size, American Indians/Alaska Natives, Asians and Native Hawaiians/Other Pacific Islanders are included in the total for all persons but are not shown separately.

Source: U.S. Department of Agriculture, Economic Research Service, Household Food Security in the United States, 2004. Data are from the Current Population Survey, Food Security Supplement.

Table ECON 7b. Percentage of Households Classified by Food Security Status: 1998-2004

|  | Food Secure | Food Insecure <br> Total | Food Insecure <br> without Hunger | Food Insecure <br> with Hunger |
| :--- | ---: | ---: | ---: | ---: |
|  |  | 88.2 | 11.8 | 8.1 |
| 1998 | 89.9 | 10.1 | 3.1 | 3.7 |
| 2000 | 89.5 | 10.5 | 7.3 | 3.0 |
| 2001 | 89.3 | 10.7 | 7.4 | 3.3 |
| 2002 | 88.9 | 11.1 | 7.6 | 3.5 |
| 2003 | 88.8 | 11.2 | 7.7 | 3.5 |
| 2004 | 88.1 | 11.9 | 8.0 | 3.9 |

[^2]
## ECONOMIC SECURITY RISK FACTOR 8. LACK OF HEALTH INSURANCE

Figure ECON 8. Percentage of Persons without Health Insurance, by Income: 2004

Source: Unpublished tabulations from the Current Population Survey, Annual Social and Economic Supplement, 2005.

- Poor persons were almost twice as likely as all persons to be without health insurance in 2004 (31 percent compared to 16 percent). While the ratio varied across categories, persons with family income at or below the poverty line were more likely to be without health insurance regardless of race/ethnicity, gender, educational attainment or age.
- Hispanics were the ethnic group least likely to have health insurance in 2004, among both the general population and those with incomes below the poverty line. Hispanic individuals were three times more likely to be uninsured than non-Hispanic white individuals.
- Among all persons, education levels were inversely related to health insurance coverage. However, among poor persons, only college graduates have higher rates of insurance coverage, as shown in Table ECON 8.
- As shown in Table ECON 8, more than half of poor people ages 25 to 34 are without health insurance. Among the general population, individuals ages 18 to 24 are the most likely to be without health insurance.

## Table ECON 8. Percentage of Persons without Health Insurance, by Income and Selected Characteristics: 2004

|  | All Persons | Poor Persons |
| :---: | :---: | :---: |
| All Persons | 15.7 | 30.8 |
| Men | 17.2 | 33.3 |
| Women | 14.4 | 28.9 |
| Non-Hispanic White | 11.3 | 26.9 |
| Non-Hispanic Black | 19.5 | 26.2 |
| Hispanic | 32.7 | 42.1 |
| No High School Diploma | 29.5 | 38.6 |
| High School Graduate, No College | 20.0 | 38.8 |
| College Graduate | 8.6 | 31.8 |
| Ages 17 and under | 11.2 | 19.4 |
| Ages 5 and under | 10.1 | 15.9 |
| Ages 6-11 | 11.0 | 20.1 |
| Ages 12-17 | 12.5 | 23.1 |
| Ages 18-24 | 31.4 | 44.7 |
| Ages 25-34 | 25.9 | 51.4 |
| Ages 35-44 | 18.7 | 45.1 |
| Ages 45-54 | 14.9 | 38.1 |
| Ages 55-64 | 13.3 | 28.6 |
| Under 65 years | 17.8 | 33.7 |
| Ages 65 and over | 0.8 | 2.9 |

Note: "Poor persons" are defined as those with total family incomes at or below the poverty rate. Health insurance rates for the education categories include only adults age 18 and over.

Persons of Hispanic ethnicity may be of any race. Beginning in 2002, estimates for Whites and Blacks are for persons reporting a single race only. Persons who reported more than one race are included in the total for all persons but are not shown under any race category. Due to small sample size, American Indians/Alaska Natives, Asians and Native Hawaiians/Other Pacific Islanders are included in the total for all persons but are not shown separately. Some of the race categories presented for ECON 8 have been changed slightly from prior year reports to provide more internal consistency throughout this report; in prior reports, the race categories for "Black" and "White" included people of Hispanic origin.

Source: Unpublished tabulations from the Current Population Survey, Annual Social and Economic Supplement, 2005.

## EMPLOYMENT AND WORK-RELATED RISK FACTOR 1. LABOR FORCE ATTACHMENT

Figure WORK 1. Percentage of Individuals in Families with Labor Force Participants by Race/Ethnicity: 2004

Source: Unpublished tabulations from the Current Population Survey, Annual Social and Economic Supplement, 2005.

- In 2004, 72 percent of the total population lived in families with at least one person working on a full-time, full-year basis (FT/FY), as shown in Table WORK 1a. While slightly lower than the peak in 2000, the percentage of individuals living with full-time, full year workers has generally increased since the early 1990s, as shown in Table WORK 1b.
- Overall, 14 percent of the population lived in families with no labor force participants and 14 percent lived in families with part-time and/or part-year labor force participants in 2004.
- Persons of Hispanic origin were less likely than non-Hispanic whites or non-Hispanic blacks to live in families with no one in the labor force in 2004 (10 percent compared to 15 and 17 percent, respectively).
- Working-age women in 2004 were more likely than working-age men to live in families with no one in the labor force ( 8 percent compared to 6 percent), as shown in Table Work 1a. Men were more likely than women to live in families with at least one full-time, full-year worker (81 percent compared to 77 percent).

# Table WORK 1a. Percentage of Individuals in Families with Labor Force Participants, by 

 Race/Ethnicity and Age: 2004|  | No One in LF <br> During Year | At Least One in LF <br> No One FT/FY | At Least One <br> FT/FY Worker |
| :--- | ---: | ---: | ---: |
| All Persons | 13.9 | 14.4 | 71.7 |
| Racial/Ethnic Categories |  |  |  |
| Non-Hispanic White | 14.6 | 13.6 | 71.8 |
| Non-Hispanic Black | 17.0 | 18.7 | 64.3 |
| Hispanic | 9.5 | 14.4 | 76.1 |
| Age Categories |  |  |  |
| Children Ages 0-5 | 7.0 | 16.0 | 76.4 |
| Children Ages 6-10 | 6.3 | 14.7 | 79.0 |
| Children Ages 11-15 | 6.8 | 14.0 | 79.2 |
|  |  |  |  |
| Women Ages 16-64 | 7.9 | 14.9 | 77.2 |
| Men Ages 16-64 | 6.0 | 12.7 | 81.3 |
| Adults Ages 65 and over | 64.7 | 15.7 | 19.6 |

Note: Full-time, full-year workers are defined as those who usually worked for 35 or more hours per week, for at least 50 weeks in a given year. Part-time and part-year labor force participation includes part-time workers and individuals who are unemployed, laid off, and/or looking for work for part or all of the year. This indicator represents annual measures of labor force participation, and thus cannot be compared to monthly measures of labor force participation in Indicator 2.

Persons of Hispanic ethnicity may be of any race. Beginning in 2002, estimates for Whites and Blacks are for persons reporting a single race only. Persons who reported more than one race are included in the total for all persons but are not shown under any race category. Due to small sample size, American Indians/Alaska Natives, Asians and Native Hawaiians/Other Pacific Islanders are included in the total for all persons but are not shown separately.

## EMPLOYMENT AND WORK-RELATED RISK FACTOR 2. EMPLOYMENT AMONG THE LOW-SKILLED

Figure WORK 2. Percentage of All Persons Ages 18 to 65 with No More than a High School Education Who Were Employed at Any Time during Year: 1968-2004

Source: Unpublished tabulations from the Current Population Survey, Annual Social and Economic Supplement, 1969-2005.

- Employment rates for women with a high school education or less generally increased during the 1980s and 1990s, although this trend has shown some modest reversal since 2000. Employment levels have been higher among low-skilled non-Hispanic white and black women (66 and 63 percent, respectively, in 2004) than among low-skilled Hispanic women (56 percent).
- In contrast, employment levels for non-Hispanic men with a high school education or less have decreased over the past three decades, especially for non-Hispanic black men (67 percent in 2004 compared to 90 percent in 1968). Hispanic men with a high school education or less have had only slight variation in employment levels over the past three decades.
- As shown in Figure and Table WORK 2, employment levels for non-Hispanic black men with a high school education or less were 4 percentage points higher than those of similarly educated non-Hispanic black women in 2004. In contrast, there was a 15 percentage point difference in employment levels of non-Hispanic white men and women with a high school education or less, and a 29 percentage point difference between similarly educated Hispanic men and women.

Table WORK 2. Percentage of All Persons Ages 18 to 65 with No More than a High School Education Who Were Employed: 1968-2004

|  | Women |  |  | Men |  |  |

## EMPLOYMENT AND WORK-RELATED RISK FACTOR 3. EARNINGS OF LOW-SKILLED WORKERS

Figure WORK 3. Mean Weekly Wages of Women and Men Working Full-Time, Full-Year with No More than a High School Education, by Race (2004 Dollars): Selected Years

Source: Unpublished tabulations from the Current Population Survey, Annual Social and Economic Supplement, 1981-2005.

- Average weekly wages of low-skilled women have been consistently lower than those of low-skilled men. For example, the average weekly wages of non-Hispanic black women without a high school education who worked full-time, full-year were 80 percent of those of men of the same race, education, and work status in 2004 (\$465 compared to \$583).
- Non-Hispanic white women have had the highest average weekly wages among low-skilled women working full-time, full-year reaching $\$ 563$ in 2004. This level is a 21 percent increase over their mean weekly wages in 1980. Over the same time period, non-Hispanic black women and Hispanic women's weekly wages increased at slower rates (10 percent and 7 percent, respectively).
- Average weekly wages for all low-skilled workers, except Hispanic men, decreased from 2003 to 2004. Wages for non-Hispanic black men decreased the most during this time period (\$619 compared to \$583), while low-skilled non-Hispanic white men had the smallest drop in wages ( $\$ 784$ compared to $\$ 779$ ).
- Over the past two decades, both Hispanic women and men's wages have lagged behind nonHispanic whites and blacks among low-skilled full-time workers. In 2004, Hispanic women's wages were 25 percent lower than non-Hispanic white women and 9 percent lower than non-Hispanic black women. Hispanic men trailed non-Hispanic white men by 32 percent and non-Hispanic black men by 9 percent.

Table WORK 3. Mean Weekly Wages of Women and Men Working Full-Time, Full-Year with No More than a High School Education, by Race (2004 Dollars): Selected Years

|  | Women |  |  | Men |  |  |

## EMPLOYMENT AND WORK-RELATED RISK FACTOR 4. EDUCATIONAL ATTAINMENT

Figure WORK 4. Percentage of Adults Ages 25 and over, by Level of Educational Attainment: 1960-2004

Source: U.S. Bureau of the Census, "Educational Attainment in the United States, 2005," Current Population Reports, P20-550, and earlier reports.

- There has been a notable decline over the past 40 years in the percentage of the population that has not received a high school education. This percentage fell from 59 percent in 1960 to 15 percent in 2004.
- The percentage of the population receiving a high school education only (with no subsequent college education) was 25 percent in 1960 and rose to 39 percent in 1988. Since then this figure has fallen to 32 percent in 2004, although some of this decline is a result of a change in the survey methodology in 1992 (see note to Table WORK 4).
- Between 1960 and 1990, the percentage of the population with some college (one to three years) doubled, from 9 percent to 18 percent. The apparent jump in 1992 is a result of a change in the survey methodology (see note to Table WORK 4), but the trend continued upward, reaching 25 percent in 2004.
- The percentage of the population completing four or more years of college has more than tripled from 1960 to 2004, rising steadily from 8 percent to 28 percent.

Table WORK 4. Percentage of Adults Ages 25 and over, by Level of Educational Attainment Selected Years

|  | Not a High School Graduate | Finished High School, No College | One to Three Years of College | Four or More Years of College |
| :---: | :---: | :---: | :---: | :---: |
| 1940 | 76 | 14 | 5 | 5 |
| 1950 | 67 | 20 | 7 | 6 |

| 1965 | 51 | 31 | 9 | 9 |
| 1970 | 45 | 34 | 10 | 11 |
| 1975 | 37 | 36 | 12 | 14 |
| 1980 | 31 | 37 | 15 | 17 |
| 1981 | 30 | 38 | 15 | 17 |
| 1982 | 29 | 38 | 15 | 18 |
| 1983 | 28 | 38 | 16 | 19 |
| 1984 | 27 | 38 | 16 | 19 |
| 1985 | 26 | 38 | 16 | 19 |
| 1986 | 25 | 38 | 17 | 19 |
| 1987 | 24 | 39 | 17 | 20 |
| 1988 | 24 | 39 | 17 | 20 |
| 1989 | 23 | 38 | 17 | 21 |
| 1990 | 22 | 38 | 18 | 21 |
| 1991 | 22 | 39 | 18 | 21 |
| 1992 | 21 | 36 | 22 | 21 |
| 1993 | 20 | 35 | 23 | 22 |
| 1994 | 19 | 34 | 24 | 22 |
| 1995 | 18 | 34 | 25 | 23 |
| 1996 | 18 | 34 | 25 | 24 |
| 1997 | 18 | 34 | 24 | 24 |
| 1998 | 17 | 34 | 25 | 24 |
| 1999 | 17 | 33 | 25 | 25 |
| 2000 | 16 | 33 | 25 | 26 |
| 2001 | 16 | 33 | 26 | 26 |
| 2002 | 16 | 32 | 25 | 27 |
| 2003 | 15 | 32 | 25 | 27 |
| 2004 | 15 | 32 | 25 | 28 |

Note: Completing the GED is not considered completing high school for this table. Beginning with data for 1992, a new survey question results in different categories than for prior years. Data shown as Finished High School, No College were previously from the category "High School, 4 Years" and are now from the category "High School Graduate." Data shown as One to Three Years of College were previously from the category "College 1 to 3 Years" and are now the sum of the categories: "Some College" and two separate "Associate Degree" categories. Data shown as Four or More Years of College were previously from the category "College 4 Years or More," and are now the sum of the categories: "Bachelor's Degree," "Master's Degree," "Doctorate Degree," and "Professional Degree."

## EMPLOYMENT AND WORK-RELATED RISK FACTOR 5. HIGH-SCHOOL DROPOUT RATES

Figure WORK 5. Percentage of Students Enrolled in Grades 10 to 12 in the Previous Year Who Were Not Enrolled and Had Not Graduated in the Survey Year, by Race/Ethnicity: Selected Years

Source: U.S. Department of Education, National Center for Education Statistics, Dropout Rates in the United States: 2001 and earlier years (based on Current Population Survey data from the October supplement).

- Dropout rates for teens in grades 10 to 12 (all races) generally declined during the 1980s, from a high of 6.7 percent in the late 1970s to a low of 4.0 percent in the early 1990s. The rate then began rising in the early 1990s, reaching as high as 5.7 percent in 1995. Since then, it has fallen and remained relatively stable, at or below 5.0 percent since 1996.
- Dropout rates among Hispanic and non-Hispanic black teens have fluctuated considerably over this period. Still, dropout rates are generally highest for Hispanic teens and lowest for non-Hispanic white teens. In 2001, the dropout rate was 8.8 percent for Hispanic teens, compared to 6.3 percent for non-Hispanic black teens and 4.1 percent for non-Hispanic white teens.

Table WORK 5. Percentage of Students Enrolled in Grades 10 to 12 in the Previous Year Who Were Not Enrolled and Had Not Graduated in the Survey Year, by Race/Ethnicity: Selected Years

|  | Total | Non-Hispanic White | Non-Hispanic Black | Hispanic |
| :---: | :---: | :---: | :---: | :---: |
| 1972 | 6.1 | 5.3 | 9.5 | 11.2 |

| 1998 | 4.8 | 3.9 | 5.2 | 9.4 |
| 1999 | 5.0 | 4.0 | 6.5 | 7.8 |
| 2000 | 4.8 | 4.1 | 6.1 | 7.4 |
| 2001 | 5.0 | 4.1 | 6.3 | 8.8 |

Note: Beginning in 1987, the Bureau of the Census instituted new editing procedures for cases with missing data on school enrollment. Beginning in 1992, the data reflect new wording of the educational attainment item in the CPS.

Persons of Hispanic ethnicity may be of any race. Due to small sample size, American Indians/Alaska Natives and Asian/Pacific Islanders are included in the total but are not shown separately.

Source: U.S. Department of Education, National Center for Education Statistics, Dropout Rates in the United States: 2001 and earlier years (based on Current Population Survey data from the October supplement).

## EMPLOYMENT AND WORK-RELATED RISK FACTOR 6. ADULT ALCOHOL AND SUBSTANCE ABUSE

Figure WORK 6. Percentage of Adults Who Used Cocaine or Marijuana or Abused Alcohol, by Age: 2004

Source: U.S. Department of Health and Human Services, National Survey on Drug Use and Health, 2004.

- In 2004, young adults (ages 18 to 25 ) were more likely than older adults to report alcohol abuse, marijuana use, or cocaine use in the past month. For example, about one in six (16 percent) adults 18 to 25 reported using marijuana in the past month during 2004, compared with 8 percent of adults 26 to 34 and 3 percent of adults 35 and older.
- The percentage of persons reporting binge alcohol use was significantly larger than the percentages for all other reported behaviors across all age groups, as shown in Table WORK 6.
- The use of both cocaine and marijuana decreased between 2003 and 2004 among all adult age categories. Alcohol abuse showed less of a decline and actually increased slightly for adults ages 35 and over, as shown in Table WORK 6.

Table WORK 6. Percentage of Adults Who Used Cocaine or Marijuana or Abused Alcohol by Age: 1999-2004

|  | 1999 | 2000 | 2001 | 2002 | 2003 | 2004 |

## EMPLOYMENT AND WORK-RELATED RISK FACTOR 7. ADULT AND CHILD DISABILITY

Figure WORK 7. Percentage of the Non-Elderly Population Reporting an Activity Limitation by Race/Ethnicity and Age: 2004

Source: Unpublished tabulations from the National Health Interview Survey, 2005.

- In 2004, non-elderly adults were more likely than children to have an activity limitation, 10.9 percent compared to 7.5 percent.
- While non-elderly adults were more likely than children to report an activity limitation, a higher percentage of children than adults were actually recipients of disability program benefits in 2004 ( 6.3 percent compared to 4.5 percent), as shown in Table WORK 7.
- The percentage of non-Hispanic black adults and children with an activity limitation was higher than the percentages for non-Hispanic white and Hispanic adults and children. NonHispanic black adults and children also were more likely to receive disability program benefits than non-Hispanic white and Hispanic adults and children in 2004, as shown in Table WORK 7.
- Among both non-elderly adults and children, rates of activity limitation were somewhat similar for non-Hispanic whites and non-Hispanic blacks in 2004, but lower for Hispanics, as shown in Table WORK 7.

## Table WORK 7. Percentage of the Non-Elderly Population Reporting a Disability, by Race/Ethnicity and Age: 2004

|  | Activity <br> Limitation | Work <br> Disability | Long-Term <br> Care Needs | Disability <br> Program <br> Recipient |
| :--- | ---: | ---: | ---: | ---: |
|  |  |  |  |  |
| All Persons | 10.9 | 8.2 | 2.1 | 4.5 |
| Adults Ages 18-64 | 7.5 | NA | NA | 6.3 |
| Children Ages 0-17 |  |  |  |  |
| Racial/Ethnic Categories (Adults Ages 18-64) | 11.5 | 8.7 | 2.1 | 4.4 |
| Non-Hispanic White | 14.2 | 10.5 | 2.8 | 7.4 |
| Non-Hispanic Black | 6.9 | 5.1 | 1.4 | 3.1 |
| Hispanic |  |  |  |  |
| Racial/Ethnic Categories (Children Ages 0-17) | 7.9 | NA | NA | 6.5 |
| Non-Hispanic White | 9.4 | NA | NA | 8.2 |
| Non-Hispanic Black | 5.2 | NA | NA | 4.3 |
| Hispanic |  |  |  |  |

Note: Respondents were defined as having an activity limitation if they answered positively to any of the questions regarding: (1) work disability (see definition below); (2) long-term care needs (see definition below); (3) difficulty walking; (4) difficulty remembering; (5) for children under 5, limitations in the amount of play activities they can participate in because of physical, mental or emotional problems; (6) for children 3 and over, receipt of Special Educational or Early Intervention Services; and, (7) any other limitations due to physical, mental or emotional problems. Work disability is defined as limitations in or the inability to work as a result of a physical, mental or emotional health condition. Individuals are identified as having long-term care needs if they need the help of others in handling either personal care needs (eating, bathing, dressing, getting around the home) or routine needs (household chores, shopping, getting around for business or other purposes). Disability program recipients include persons covered by Supplemental Security Income (SSI), Social Security Disability Insurance (SSDI), Special Education Services, Early Intervention Services and/or disability pensions.

Persons of Hispanic ethnicity may be of any race. Due to small sample size, American Indians/Alaska Natives, Asians and Native Hawaiians/Other Pacific Islanders are included in the total for all persons but are not shown separately.

## EMPLOYMENT AND WORK-RELATED RISK FACTOR 8. LABOR FORCE PARTICIPATION OF WOMEN WITH CHILDREN UNDER 18

Figure WORK 8. Labor Force Participation of Women with Children under 18: 1975-2004

Source: U.S. Department of Labor, Bureau of Labor Statistics, unpublished tabulations from the Current Population Survey, Annual Social and Economic Supplement, 1976-2005.

- The labor force participation rate for all women with children under 18 years of age decreased between 2003 and 2004. While the employment to population ratio also decreased for married and never-married mothers during this time period, the ratio for divorced, separated or widowed mothers increased slightly, as shown in Table WORK 8.
- Since 1992, the labor force participation rate of never-married mothers with children under 18 has increased dramatically from 53 percent to 73 percent. Since 1998, the participation rate for never-married mothers has exceeded the rate for married mothers. Similarly, the employment to population ratio for never-married mothers increased from 43 percent in 1992 to 63 percent in 2004, as shown in Table WORK 8.
- Historically, mothers who are divorced, separated or widowed have always had the highest rates of labor force participation. By 1994, the gap between these women and married mothers had narrowed considerably; however, over the past 10 years this gap has again widened. In 2004, the labor force participation rate of divorced, separated or widowed mothers was 81 percent, compared to 68 percent for married mothers.
- The labor force participation rate of married mothers with children under 18 followed an upward trend from 1950 until 1997 when it peaked at 71 percent. Since 1997 it has edged downward slowly.

Table WORK 8. Employment Status of Women with Children under 18 Years of Age: 1975-2004

|  | Labor Force Participation Rate (percent of population) |  |  | Employment/Population Ratio |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Married, Spouse Present | Divorced, Separated or Widowed | Never-Married | Married, Spouse Present | Divorced, Separated or Widowed | Never-Married |
| 1975 | 44.9 | 62.8 | 42.2 | 40.5 | 54.9 | 32.1 |
| 1976 | 46.1 | 64.3 | 46.2 | 42.4 | 56.9 | 36.3 |
| 1977 | 48.2 | 66.4 | 43.4 | 44.6 | 58.7 | 29.6 |
| 1978 | 50.2 | 68.1 | 51.1 | 47.0 | 61.2 | 38.9 |
| 1979 | 51.9 | 67.8 | 54.4 | 48.6 | 61.4 | 42.6 |
| 1980 | 54.1 | 69.9 | 52.0 | 50.9 | 63.4 | 39.9 |
| 1981 | 55.7 | 70.5 | 52.3 | 52.1 | 63.0 | 38.3 |
| 1982 | 56.3 | 71.1 | 50.4 | 51.6 | 62.3 | 36.2 |
| 1983 | 57.2 | 70.1 | 49.8 | 52.4 | 58.5 | 34.5 |
| 1984 | 58.8 | 72.7 | 50.7 | 54.9 | 63.4 | 36.3 |
| 1985 | 60.8 | 72.9 | 51.6 | 56.8 | 64.0 | 39.3 |
| 1986 | 61.3 | 74.1 | 52.9 | 57.6 | 66.3 | 37.8 |
| 1987 | 63.8 | 74.0 | 54.1 | 60.4 | 66.5 | 40.2 |
| 1988 | 65.0 | 72.8 | 51.6 | 61.9 | 66.9 | 40.0 |
| 1989 | 65.6 | 72.0 | 54.7 | 63.1 | 66.0 | 43.1 |
| 1990 | 66.3 | 74.2 | 55.3 | 63.5 | 67.9 | 45.1 |
| 1991 | 66.8 | 72.7 | 53.6 | 63.2 | 66.1 | 44.0 |
| 1992 | 67.8 | 73.2 | 52.5 | 63.9 | 65.3 | 43.4 |
| 1993 | 67.5 | 72.1 | 54.4 | 64.2 | 65.9 | 44.0 |
| 1994 | 69.0 | 73.1 | 56.9 | 65.6 | 65.9 | 45.8 |
| 1995 | 70.2 | 75.3 | 57.5 | 67.1 | 69.1 | 47.9 |
| 1996 | 70.0 | 77.0 | 60.5 | 67.6 | 72.1 | 49.3 |
| 1997 | 71.1 | 79.1 | 68.1 | 68.6 | 72.0 | 56.6 |
| 1998 | 70.6 | 79.7 | 72.5 | 68.0 | 74.3 | 61.5 |
| 1999 | 70.1 | 80.4 | 73.4 | 68.0 | 75.4 | 64.8 |
| 2000 | 70.6 | 82.7 | 73.9 | 68.5 | 78.5 | 65.8 |
| 2001 | 70.4 | 83.1 | 73.5 | 68.0 | 78.7 | 64.6 |
| 2002 | 69.6 | 82.1 | 75.3 | 66.7 | 75.6 | 65.8 |
| 2003 | 69.2 | 82.0 | 73.1 | 66.3 | 74.7 | 63.2 |
| 2004 | 68.2 | 80.7 | 72.6 | 65.4 | 75.0 | 63.1 |

Notes: The Labor Force Participation Rate includes all women who are employed, laid off or unemployed but looking for work. The Employment/Population Ratio includes only those women who are employed. The population of mothers with children under age 18 includes those 16 years of age and older.

## NONMARITAL BIRTH RISK FACTOR 1. NONMARITAL BIRTHS

Figure BIRTH 1. Percentage of Births that are Nonmarital, by Age Group: 1940-2004

Source: National Center for Health Statistics, "Nonmarital Childbearing in the United States, 1940-1999," National Vital Statistics Reports, Vol. 48 (16), 2000; "Births: Final Data for 2003," National Vital Statistics Reports, Vol. 54 (2), September 2005 and preliminary data for 2004 published at http://www.cdc.gov/nchs/births.htm.

- The percentage of children born outside of marriage to women of all ages has increased over the past six decades, from 4 percent in 1940 to 36 percent in 2004. This increase reflects changes in several factors: the rate at which unmarried women have children, the rate at which married women have children, and the rate at which women marry.
- The percentage of children born outside of marriage is especially high among teen women and women ages 20 to 24. A little more than four-fifths (83 percent) of all births to teens and over half ( 55 percent) of all births to women ages 20 to 24 took place outside of marriage in 2004.
- After reaching a peak of 33 percent in 1994, the percentage of births that are nonmarital had remained fairly steady. However, the percentage has continued to drift up since then, with notable increases in both 2003 and 2004. Similarly, the growth in the percentage of nonmarital teen births also has slowed since 1994, but is still rising (from 76 percent in 1994 to 83 percent in 2004). The steepest growth since 1994 is among the 20 to 24 year-old age group, where the percentage of births that are nonmarital has increased from 45 to 55 percent.
- In contrast, the percentage of births that are nonmarital continues to remain steady since 1994 among black teens and all black women. Among white teens and all white women, the trend continues upward (see Table C-1 in Appendix C for nonmarital birth data by age and race).

Table BIRTH 1. Percentage of Births that are Nonmarital, by Age Group: Selected Years

| Year | Under 15 | 15-17 Years | 18-19 Years | All Teens | 20-24 Years | All Women |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| 1940 | 64.5 | NA | NA | 14.0 | 3.7 | 3.8 |
| 1945 | 70.0 | NA | NA | 18.2 | 4.7 | 4.3 |
| 1950 | 63.7 | 22.6 | 9.4 | 13.9 | 3.8 | 4.0 |
| 1955 | 66.3 | 23.2 | 10.3 | 14.9 | 4.4 | 4.5 |
| 1960 | 67.9 | 24.0 | 10.7 | 15.4 | 4.8 | 5.3 |
| 1965 | 78.5 | 32.8 | 15.3 | 21.6 | 6.8 | 7.7 |
| 1970 | 80.8 | 43.0 | 22.4 | 30.5 | 8.9 | 10.7 |
| 1975 | 87.0 | 51.4 | 29.8 | 39.3 | 12.3 | 14.3 |
| 1980 | 88.7 | 61.5 | 39.8 | 48.3 | 19.4 | 18.4 |
| 1981 | 89.2 | 63.3 | 41.4 | 49.9 | 20.4 | 18.9 |
| 1982 | 89.2 | 65.0 | 43.0 | 51.4 | 21.4 | 19.4 |
| 1983 | 90.4 | 67.5 | 45.7 | 54.1 | 22.9 | 20.3 |
| 1984 | 91.1 | 69.2 | 48.1 | 56.3 | 24.5 | 21.0 |
| 1985 | 91.8 | 70.9 | 50.7 | 58.7 | 26.3 | 22.0 |
| 1986 | 92.5 | 73.3 | 53.6 | 61.5 | 28.7 | 23.4 |
| 1987 | 92.9 | 76.2 | 55.8 | 64.0 | 30.8 | 24.5 |
| 1988 | 93.6 | 77.1 | 58.5 | 65.9 | 32.9 | 25.7 |
| 1989 | 92.4 | 77.7 | 60.4 | 67.2 | 35.1 | 27.1 |
| 1990 | 91.6 | 77.7 | 61.3 | 67.6 | 36.9 | 28.0 |
| 1991 | 91.3 | 78.7 | 63.2 | 69.3 | 39.4 | 29.5 |
| 1992 | 91.3 | 79.2 | 64.6 | 70.5 | 40.7 | 30.1 |
| 1993 | 91.3 | 79.9 | 66.1 | 71.8 | 42.2 | 31.0 |
| 1994 | 94.5 | 84.1 | 70.0 | 75.9 | 44.9 | 32.6 |
| 1995 | 93.5 | 83.7 | 69.8 | 75.6 | 44.7 | 32.2 |
| 1996 | 93.8 | 84.4 | 70.8 | 76.3 | 45.6 | 32.4 |
| 1997 | 95.7 | 86.7 | 72.5 | 78.2 | 46.6 | 32.4 |
| 1998 | 96.6 | 87.5 | 73.6 | 78.9 | 47.7 | 32.8 |
| 1999 | 96.5 | 87.7 | 74.0 | 79.0 | 48.5 | 33.0 |
| 2000 | 96.5 | 87.7 | 74.3 | 79.1 | 49.5 | 33.2 |
| 2001 | 96.3 | 87.8 | 74.6 | 79.2 | 50.4 | 33.5 |
| 2002 | 97.0 | 88.5 | 75.8 | 80.2 | 51.6 | 34.0 |
| 2003 | 97.1 | 89.7 | 77.3 | 81.6 | 53.2 | 34.6 |
| 2004 prel. | 97.4 | 90.3 | 78.7 | 82.6 | 54.7 | 35.7 |

Note: Trends in nonmarital births may be affected by changes in the reporting of marital status on birth certificates and in procedures for inferring nonmarital births when marital status is not reported.

Source: National Center for Health Statistics, "Nonmarital Childbearing in the United States, 1940-1999," National Vital Statistics Reports, Vol. 48 (16), 2000; "Births: Final Data for 2003," National Vital Statistics Reports, Vol. 54 (2), September 2005. Additional computations by ASPE staff of percentages for all teens (this age category not reported by NCHS) and preliminary data for 2004 published at http://www.cdc.gov/nchs/births.htm .

## NONMARITAL BIRTH RISK FACTOR 2. NONMARITAL TEEN BIRTHS

Figure BIRTH 2. Percentage of All Births that are Nonmarital Teen Births, by Race and Ethnicity 1940-2003

Source: National Center for Health Statistics, "Nonmarital Childbearing in the United States, 1940-1999," National Vital Health Statistics Reports, Vol. 48 (16), 2000; "Births: Final Data for 2003," National Vital Statistics Reports, Vol. 54 (2), September 2005.

- In contrast to the earlier Figure BIRTH 1, which showed nonmarital teen births as a percentage of all teen births, Figure BIRTH 2 shows births to unmarried teens as a percentage of births to all women. This percentage fell in the last five years, from 9.5 to 8.2 percent, reversing a long upward trend since 1940. This rate may be affected by several factors: the age distribution of women, the marriage rate among teens, the birth rate among unmarried teens and the birth rate among all other women.
- The percentage of all births that were nonmarital teen births has also dropped among white women over the past five years, declining to 7.1 percent in 2003. This drop is in contrast to the long upward trend, from less than 1 percent in 1960 to nearly 8 percent in 1998.
- Among black women, the percentage of all births that were nonmarital teen births fell to 16.2 percent in 2003, the lowest percentage since 1969. This rate has varied greatly over time, peaking at 24 percent in 1975, and then gradually declining over most of the past three decades. The sharp increase in the late 1960s and early 1970s reflects a 30 percent rise in nonmarital teen births among black women concurrent with a 6 percent decline in total black births from 1969 to 1975.

Table BIRTH 2. Percentage of All Births that are Nonmarital Teen Births, by Race and
Ethnicity: Selected Years

| Year | All Races | White | Black | Hispanic |
| :---: | :---: | :---: | :---: | :---: |
| 1940 | 1.7 | 0.8 | NA | NA |
| 1945 | 1.8 | 0.8 | NA | NA |
| 1950 | 1.6 | 0.6 | NA | NA |
| 1955 | 1.7 | 0.7 | NA | NA |
| 1960 | 2.0 | 0.9 | NA | NA |
| 1965 | 3.3 | 1.6 | NA | NA |
| 1970 | 5.1 | 2.6 | 18.8 | NA |
| 1975 | 7.1 | 3.7 | 24.2 | NA |
| 1980 | 7.3 | 4.4 | 22.2 | NA |
| 1981 | 7.1 | 4.5 | 21.5 | NA |
| 1982 | 7.1 | 4.5 | 21.2 | NA |
| 1983 | 7.2 | 4.6 | 21.2 | NA |
| 1984 | 7.1 | 4.6 | 20.7 | NA |
| 1985 | 7.2 | 4.8 | 20.3 | NA |
| 1986 | 7.5 | 5.1 | 20.1 | NA |
| 1987 | 7.7 | 5.3 | 20.0 | NA |
| 1988 | 8.0 | 5.6 | 20.3 | NA |
| 1989 | 8.3 | 5.9 | 20.6 | NA |
| 1990 | 8.4 | 6.1 | 20.4 | 9.8 |
| 1991 | 8.7 | 6.4 | 20.4 | 10.3 |
| 1992 | 8.7 | 6.5 | 20.2 | 10.3 |
| 1993 | 8.9 | 6.8 | 20.2 | 10.6 |
| 1994 | 9.7 | 7.5 | 21.1 | 12.1 |
| 1995 | 9.6 | 7.6 | 21.1 | 11.7 |
| 1996 | 9.6 | 7.7 | 20.9 | 11.5 |
| 1997 | 9.7 | 7.8 | 20.5 | 11.9 |
| 1998 | 9.7 | 7.9 | 19.9 | 12.1 |
| 1999 | 9.5 | 7.8 | 19.1 | 11.9 |
| 2000 | 9.1 | 7.6 | 18.3 | 11.6 |
| 2001 | 8.7 | 7.3 | 17.5 | 11.0 |
| 2002 | 8.5 | 7.2 | 16.7 | 10.8 |
| 2003 | 8.2 | 7.1 | 16.2 | 10.7 |

Note: Trends in nonmarital births may be affected by changes in the reporting of marital status on birth certificates and in procedures for inferring nonmarital births when marital status is not reported. Beginning in 1980, data are tabulated by the race of the mother. Prior to 1980, data are tabulated by the race of the child. Teens are defined as people ages 15 to 19 .

Race categories include those of Hispanic ethnicity. Persons of Hispanic ethnicity may be of any race. Due to small sample size, American Indians/Alaska Natives, Asians and Native Hawaiians/Other Pacific Islanders are included in the total for all persons but are not shown separately.

Source: National Center for Health Statistics, "Nonmarital Childbearing in the United States, 1940-1999," National Vital Health Statistics Reports, Vol. 48 (16), 2000; "Births: Final Data for 2003," National Vital Statistics Reports, Vol. 54 (2), September 2005.

## NONMARITAL BIRTH RISK FACTOR 3. NONMARITAL TEEN BIRTH RATES WITHIN AGE GROUPS

Figure BIRTH 3a. Births per 1,000 Unmarried Teens Ages 15 to 17, by Race: 1960-2003

Figure BIRTH 3b. Births per 1,000 Unmarried Teens Ages 18 and 19, by Race: 1960-2003

Source: National Center for Health Statistics, "Nonmarital Childbearing in the United States, 1940-1999," National Vital Statistics Reports, Vol. 48 (16), 2000; "Births: Final Data for 2003," National Vital Statistics Reports, Vol. 54 (2), September 2005.

- The birth rate per 1,000 unmarried teens fell again in 2003 for both black and white teens and for both younger ( 15 to 17 years) and older age groups (18 and 19 years). The rate for black teens ages 15 to 17 has been cut by more than half from 80 per thousand in 1991 to 38 per thousand in 2003, and for blacks ages 18 and 19, the rate fell from 148 per thousand in 1991 to 100 per thousand in 2003.
- Prior to 1994, birth rates among unmarried white teens in both age groups rose steadily for over four decades (from 4 to 24 percent among 15 to 17 year-olds and from 11 to 56 percent among 18 and 19 year-olds). Since then the rates for both age groups have followed a downward trend.
- The birth rate among unmarried black teens in both age groups was lower in 2003 than it has been in over four decades. While birth rates among unmarried black teens remain high compared to rates for unmarried white teens, the gap between black and white teens narrowed considerably during the 1990s and 2000s.

Table BIRTH 3. Births per 1,000 Unmarried Teen Women within Age Groups, by Race: 1950-2003

Note: Rates are per 1,000 unmarried women in specified group. Trends in nonmarital births may be affected by changes in the reporting of marital status on birth certificates and in procedures for inferring nonmarital births when marital status is not reported. Beginning in 1980, data are tabulated by the race of the mother. Prior to 1980, data are tabulated by the race of the child.

Race categories include those of Hispanic ethnicity. Due to small sample size, American Indians/Alaska Natives, Asians and Native Hawaiians/Other Pacific Islanders are included in the total for all persons but are not shown separately.

Source: National Center for Health Statistics, "Nonmarital Childbearing in the United States, 1940-1999," National Vital Statistics Reports, Vol. 48 (16), 2000; "Births: Final Data for 2003," National Vital Statistics Reports, Vol. 54 (2), September 2005. Birthrates for 1950 to 1965 computed by ASPE staff from NCHS birth data and Census population estimates.

## NONMARITAL BIRTH RISK FACTOR 4. NEVER-MARRIED FAMILY STATUS

Figure BIRTH 4. Percentage of All Children Living in Families with a Never-Married Female Head by Race/Ethnicity: 1982-2005

Source of CPS data: U.S. Bureau of the Census, "Marital Status and Living Arrangements," Current Population Reports, Series P20-212, 287, 365, 380, 399, 418, 423, 433, 445, 450, 461, 468, 478, 484, 491, 496, 506, 514 and "America's Families and Living Arrangements," Current Population Reports, Series P20-537, 547, 553 and ASPE tabulations of the CPS for 2005.

Source of 1960 data: U.S. Bureau of the Census, 1960 Census of Population, PC(2)-4B, "Persons by Family Characteristics," Tables 1 and 19.

- The percentage of children living in families with never-married female heads increased from under 5 percent in 1982 to 11 percent in 2005.
- The percentage of white children living in families headed by never-married women has steadily increased over the past twenty years, from less than 2 percent in 1982 to 6 percent in 2005.
- Among Hispanics, the percentage of children living with never-married female heads more than doubled over the past two decades, going from less than 6 percent in 1982 to 12 percent in 2005.
- The percentage of black children living in families headed by never-married women has been much higher than the percentages for other groups throughout the time period.

Table BIRTH 4. Number and Percentage of All Children Living in Families with a Never-Married Female Head, by Race/Ethnicity: Selected Years

| Year | Number of Children (thousands) |  |  |  | Percentage |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | All Races | White | Black | Hispanic | All Races | White | Black | Hispanic |

| 2000 | 6,591 | 2,881 | 3,413 | 1,255 | 9.5 | 5.3 | 32.9 | 11.4 |
| 2001 | 6,736 | 3,002 | 3,381 | 1,397 | 9.8 | 5.5 | 33.2 | 11.9 |
| 2002 | 6,872 | 3,048 | 3,573 | 1,400 | 9.9 | 5.6 | 33.4 | 11.5 |
| 2003 | 7,006 | 3,029 | 3,451 | 1,495 | 10.0 | 5.6 | 33.3 | 11.9 |
| 2004 | 7,218 | 3,113 | 3,541 | 1,577 | 10.3 | 5.8 | 34.1 | 12.0 |
| 2005 | 7,412 | 3,278 | 3,609 | 1,622 | 10.6 | 6.0 | 35.4 | 12.0 |

Note: Data are for all children under 18 who are not family heads (excludes householders, subfamily reference persons and their spouses). Also excludes inmates of institutions. Children who are living with neither of their parents are excluded from the denominator. Based on Current Population Survey (CPS) except 1960, which is based on decennial census data. In 1982, improved data collection and processing procedures helped to identify parent-child subfamilies. (See Current Population Reports, P-20, 399, Marital Status and Living Arrangements: March 1984.)

Race categories include those of Hispanic ethnicity. Persons of Hispanic ethnicity may be of any race. Beginning in 2002, estimates for Whites and Blacks are for persons reporting a single race only. Persons who reported more than one race are included in the total for all persons but are not shown under any race category. Due to small sample size, American Indians/Alaska Natives, Asians and Native Hawaiians/Other Pacific Islanders are included in the total for all persons but are not shown separately. Nonwhite data are shown for Black in 1960.

Source of CPS data: U.S. Bureau of the Census, "Marital Status and Living Arrangements," Current Population Reports, Series P20-212, 287, 365, 380, 399, 418, 423, 433, 445, 450, 461, 468, 478, 484, 491, 496, 506, 514 and "America's Families and Living Arrangements," Current Population Reports, Series P20-537, 547, 553 and ASPE tabulations of the CPS for 2005.

Source of 1960 data: U.S. Bureau of the Census, 1960 Census of Population, PC(2)-4B, "Persons by Family Characteristics," Tables 1 and 19.

[^0]:    ${ }^{1}$ All persons under 18 include related children (own children, including stepchildren and adopted children, plus all other children in the household who are related to the householder by birth, marriage or adoption), unrelated individuals under 18 (persons who are not living with any relatives) and householders or spouses under age 18.
    ${ }^{2}$ In 1959-1987, the married families category includes a small number of persons in male-headed families, no spouse present. In 1988, poor persons in male-headed families, no spouse present, comprised just over 8 percent of the combined total of both groups of persons below the poverty level.
    ${ }^{3}$ No spouse present.

[^1]:    See above for note and source.

[^2]:    Source: U.S. Department of Agriculture, Economic Research Service, Household Food Security in the United States, 2004.

[^3]:    Note: Cocaine and marijuana use is defined as use during the past month. "Binge Alcohol Use" is defined as drinking five or more drinks on the same occasion on at least one day in the past 30 days. Occasion refers to the same time or within a couple hours of each other. "Heavy Alcohol Use" is defined as drinking five or more drinks on the same occasion on each of five or more days in the past 30 days; all Heavy Alcohol Users are also Binge Alcohol Users.
