

NOTES ON DATA
This map shows the shaded relief of Mercury that was derived from data obtained by the Mariner 10 spacecraft during its mission in 1974. The shaded relief was derived from altimetric data obtained by the Mariner 10 altimeter. The shaded relief is based on the altimetric data obtained by the Mariner 10 altimeter. The shaded relief is based on the altimetric data obtained by the Mariner 10 altimeter. The shaded relief is based on the altimetric data obtained by the Mariner 10 altimeter.
