

**NOTICE OF NEED FOR EMERGENCY WORK**

*Version 1-8-09*

ORM Number: \_\_\_\_\_ Date: \_\_\_\_\_ Time: \_\_\_\_\_  
(Entered by Corps Project Manager only)

Proponent's Name: \_\_\_\_\_ Tel: \_\_\_\_\_

Address: \_\_\_\_\_

FAX: \_\_\_\_\_ Email: \_\_\_\_\_

Location of Proposed Work (Waterway, River Mile, address, City/County, driving directions):  
\_\_\_\_\_  
\_\_\_\_\_

Latitude \_\_\_\_\_ Longitude \_\_\_\_\_

Explain why the proposed work is of an emergency nature: \_\_\_\_\_  
\_\_\_\_\_  
\_\_\_\_\_  
\_\_\_\_\_

Are photos available of the site?  Yes (Please provide)  No

Are drawings of the proposed work available?  Yes (Please provide)  No

Has work been completed or is work ongoing?  No  Yes

Date and Times Work Started and/or Completed: \_\_\_\_\_

Describe Proposed Work including relation to OHW, MHW, MHHW, or wetlands, including the items listed below, as applicable:

- Describe the work that will take place landward and waterward of the Corps' line of jurisdiction.
- Describe the nature of the work to be performed.
- Describe the type and volume of material to be discharged into waters of the US.
- Explain the relationship between the proposed work and any existing structures/fill – are existing structures/fill being replaced or are new structures/fill being added?
- Describe the dimensions of the existing structure/fill to be repaired or new structure/fill to be installed (length, width, depth).
- Describe the equipment that will be used and how the work will be performed. Also describe supporting equipment such as front loaders or dump trucks that a backhoe or excavator will need to accomplish the work.
- Explain how the site will be accessed, from where equipment will operate (on land or from water), and indicate where equipment and materials will be staged.
- Describe any temporary fill or structures that will be used, including the purpose, materials, location, dimensions, duration it will be in place, how it will be placed and removed.

- If water is to be diverted, explain how that will be accomplished, where water will divert to, and where it will re-enter the waterbody.
