# Public Notice for General Permit

Regulatory Branch  
CEPOA-CO-R  
Post Office Box 6898  
Elmendorf AFB, Alaska 99506-0898

PUBLIC NOTICE DATE: June 7, 2006  
EXPIRATION DATE: July 7, 2006  
REFERENCE NUMBER: POA-2006-1035  
GENERAL PERMIT NUMBER: GP 1991-7-P

---

## Notice of Intent to Re-issue and Modify General Permit 91-7 Aquatic Farm Structures Within the State of Alaska

The permit is utilizing modification letter P and skipping the letter O for administrative purposes and to avoid potential confusion.

The public is hereby notified that the Alaska District, U.S. Army Corps of Engineers (Corps), is proposing to re-issue "General Permit (GP) 91-7, Aquatic Farm Structures Within the State of Alaska", for five years. The GP includes research and/or experimental projects related to aquatic farming. The existing GP expired May 31, 2006. We are extending GP 91-7-N, for no longer than a period of six months (November 30, 2006) while we make a formal decision regarding re-issuance of the GP. Those activities covered under previous authorizations of the GP would continue to be covered under the proposed reauthorization. **The re-issuance of the GP is being considered for statewide use.** The General and Special Conditions are essentially the same, though editing was done for updating contact information. A copy of the proposed modification of GP 91-7-P is attached.

Other non-structural activities such as seeding and harvesting for aquaculture /mariculture purposes will require additional authorization under Nationwide 4, Fish and Wildlife Harvesting, Enhancement and Attraction Devices and Activities.

We are soliciting and accepting comments for the next 30 days on our intent to re-issue the GP. GP 91-7 was issued under authority of Section 10 of the Rivers and Harbors Act of 1899, (30 Stat 1151; 33 U.S.C. 403). It would authorize the placement of aquatic farm structures<sup>1</sup>, including associated floathouses and mooring buoys in navigable waters within the State of Alaska, for the purpose of commercial and/or experimental aquatic plant and/or shellfish farming. **This re-authorization would not include fin-fish related activities.** Navigable waters of the Alaska are defined as those marine and estuarine waters subject to the ebb and flow of the tide, within the limits of the Territorial Seas of Alaska, and certain inland waters. This GP excludes inland navigable waterways. The Corps, Regulatory Branch, maintains a list of the navigable waters that are not covered by this GP. Additional navigable waters that are excluded from authorization are specified in Conditions 5, 14, 17, and 18 of

<sup>1</sup> Aquatic Farm structures are: work rafts, processing, storage, elevated predatory netting and caretaker facilities.

this GP. This GP does not authorize any dredging or discharge of any dredged or fill materials into waters of the United States, including adjacent wetlands. Uses landward of mean high water associated with the placement (anchorage) or operation of aquatic farm structures are not authorized by this GP.

Purpose: The GP was initially issued on February 14, 1992, for a period of five years, and was re-issued on November 29, 1994, November 31, 1999 and May 31, 2001. The GP was developed to streamline the Corps permitting process for placement of structures associated with Aquaculture/Mariculture activities. Additionally, the GP had been expanded to include research and/or experimental projects related to aquatic farming.

Coastal Zone Management Act Consistency Determination: Section 307(c)(3) of the Coastal Zone Management Act of 1972, as amended by 16 U.S.C. 1456(c)(3), requires the applicant to certify that the described activity affecting land or water uses in the Coastal Zone complies with the Alaska Coastal Management Program (**11 AAC 110 / 11 AAC 112 standards**). The Department of Army's authorization by this General Permit will not be issued until the Alaska Department of Natural Resources, Office of Project Management and Permitting, has concurred with the applicant's certification. GP 91-7N was found conditionally consistent with the Alaska Coastal Management Program (State I.D. No AK 0102-05JJ) for projects east of Cape Resurrection.

Public Hearing: Any person may request, in writing, within the comment period specified in this notice, that a public hearing be held to consider this application. Requests for public hearings shall state, with particularity, reasons for holding a public hearing as this proposed reauthorization is essentially the same as the previous authorizations for this GP.

Endangered Species: Preliminarily, the described activity will not affect threatened or endangered species, or their designated critical habitat, under the Endangered Species Act of 1973 (87 Stat. 844). Special conditions would apply to all verifications/use of this GP, to ensure the authorized activities would not affect listed threatened and/or endangered species or modify designated critical habitat. This application is being coordinated with the U.S. Fish and Wildlife Service and the National Marine Fisheries Service (NMFS). Any comments they may have concerning endangered or threatened wildlife or plants or their critical habitat will be considered in our final assessment of the described work.

Essential Fish Habitat: The proposed work is being evaluated for possible effects to Essential Fish Habitat (EFH) pursuant to the Magnuson Stevens Fishery Conservation and Management Act of 1996 (MSFCMA), 16 U.S.C. *et seq* and associated federal regulations found at 50 CFR 600 Subpart K. The Alaska District includes areas of EFH as Fishery Management Plans. We have reviewed the January 20, 1999, North Pacific Fishery Management Council's Environmental Assessment to locate EFH area as identified by the NMFS. We have determined that the described activity, with the inclusion of conditions within the GP, such activities would not adversely affect EFH, including anadromous fish and federally managed fishery resources.

Evaluation: The decision whether to re-issue GP 91-7 for another five years will be based on an evaluation of the probable impacts including cumulative impacts of the proposed activity and its intended use on the public interest. Evaluation of the probable impacts, which the proposed activity may have on the public interest, requires a careful weighing of all the factors that become relevant in each particular case. The benefits, which reasonably may be expected to accrue from the proposal, must be balanced against its reasonably foreseeable detriments. The decision whether to authorize a proposal, and if so, the conditions under which it will be allowed to occur, are therefore determined by the outcome of the general balancing process. That decision should reflect the national concern for both protection and utilization of important resources. All factors, which may be relevant to the proposal, must be considered including the cumulative effects

thereof. Among those are conservation, economics, aesthetics, general environmental concerns, wetlands, cultural values, fish and wildlife values, flood hazards, floodplain values, land use, navigation, shore erosion and accretion, recreation, water supply and conservation, water quality, energy needs, safety, food and fiber production, mineral needs, considerations of property ownership, and, in general, the needs and welfare of the people. Subject to the preceding sentence and any other applicable guidelines or criteria (see 33 CFR 320.2 and 320.3), a permit will be granted unless the District Engineer determines that it would be contrary to the public interest.

The Corps of Engineers is soliciting comments from the public; Federal, State, and local agencies and officials; Indian Tribes; and other interested parties in order to consider and evaluate the impacts of this proposed activity. Any comments received will be considered by the Corps of Engineers to determine whether to issue, modify, condition or deny a permit for this proposal. To make this decision, comments are used to assess impacts on endangered species, historic properties, water quality, general environmental effects, and the other public interest factors listed above. Comments are used in the preparation of an Environmental Assessment and/or an Environmental Impact Statement pursuant to the National Environmental Policy Act. Comments are also used to determine the overall public interest of the proposed activity.

Comments on the described work, with the reference number, should reach this office no later than the expiration date of this Public Notice to become part of the record and be considered in the decision. Please contact Mr. John Klutz at (907) 753-2712, toll free from within Alaska at (800) 478-2712, or by email at [john.r.klutz@poa02.usace.army.mil](mailto:john.r.klutz@poa02.usace.army.mil) if further information is desired concerning this notice.

Authority: This permit will be issued or denied under the following authority:

Perform work in or affecting navigable waters of the United States - Section 10 Rivers and Harbors Act 1899 (33 U.S.C. 403).

**NOTICE OF APPLICATION  
FOR  
CERTIFICATION OF CONSISTENCY WITH THE  
ALASKA COASTAL MANAGEMENT PROGRAM**

Notice is hereby given that a request is being filed with the Office of Project Management and Permitting for a consistency determination, as provided in Section 307(c)(3) of the Coastal Zone Management Act of 1972, as amended [16 U.S.C. 1456(c)(3)], that the project described in the Corps of Engineers' **General Permit 91-7-P, Aquatic Farm Structures Within the State of Alaska**, for five more years, complies with the Alaska Coastal Management Program and that work verified under GP 91-7 will be conducted in a manner consistent with that program.

The Office of Project Management and Permitting requests your comments, particularly on the proposed project's consistency with the affected local coastal district management program. For more information on the consistency review contact OPMP at (907) 269-7470 or (907) 465-3562, or visit the ACMP web site at <http://www.gov.state.ak.us/gdc/Projects/projects.html>.

Of Engineers

## GENERAL PERMIT 91-7-P

### Aquatic Farm Structures Within the State of Alaska

**EFFECTIVE DATE:** Date Of GP Issuance  
**EXPIRATION DATE:** 5 Years From Date Of Issuance

Under the authority of Section 10 of the Rivers and Harbors Act of 1899 (30 Stat. 1151; 33 U.S.C. 403), and in accordance with Department of the Army Regulations (33 CFR Parts 320-330), this General Permit (GP) is re-issued to authorize the placement of aquatic farm structures, including associated floathouses and mooring buoys in certain navigable waters within the State of Alaska. Navigable waters of Alaska are defined as those marine and estuarine waters subject to the ebb and flow of the tide, within the limits of the Territorial Seas of Alaska, and certain inland waters. This GP excludes inland navigable waterways; the Alaska District, Corps of Engineers (Corps), Regulatory Branch, maintains a list of the navigable waters, which can be found on the Corps website at [www.poa.usace.army.mil/reg](http://www.poa.usace.army.mil/reg). Additional navigable waters which are excluded from authorization are specified in Conditions 5, 14, 17, and 18 of this GP. This authorization does not include fin-fish related activities. This GP does not authorize any dredging or discharge of any dredged or fill material into waters of the United States, including adjacent wetlands. Uses landward of mean high water associated with the placement (anchorage) or operation of aquatic farm structures are not authorized by this GP.

This GP would convey full authorization to place and maintain aquatic farm structures and associated equipment, including floathouses and mooring buoys in certain navigable waters provided the conditions specified below are met. Any applicant seeking authorization under this GP is responsible for ensuring compliance with all of its terms and conditions. Written confirmation of whether a proposed aquatic farm structure would be authorized by this GP is not necessary, but may be requested by an applicant (see the Additional Information section below).

#### TERM:

This GP shall be effective for a period of five years from the date of issuance. At the end of the five-year period, an evaluation of the GP shall be made and at that time it would be decided whether or not this permit should be renewed. The District Engineer (DE) or his authorized representative may, at any time during this five-year period, alter, modify, or revoke this permit, if he deems such action to be in the public interest.

#### PROCEDURES AND REPORTING REQUIREMENTS:

Aquatic farm structures shall be authorized for placement in specified navigable waters within Alaska provided the appropriate permits listed below are obtained from the State of Alaska and the pertinent Federal land manager, if applicable, in addition to any other permits required by State or Federal agencies, and that all portions of the proposed project are covered by those permits:

a. Alaska Department of Natural Resources (ADNR) Division of Mining, Land and Water, Aquatic Farm Lease.

b. Alaska Department of Fish and Game (ADFG), Division of Commercial Fisheries, Aquatic Farm Operations Permit and, where applicable, a Special Area Permit.

c. A permit and an Alaska National Interest Lands Conservation Act (ANILCA) Section 810 determination may be required and performed by the Federal land manager if the proposed project is located within areas subject to a Federal land manager's jurisdiction. Additional information can be obtained by contacting the appropriate Federal land manager's office at the addresses and telephone numbers listed in Conditions 1 through 4.

d. ADNR, Office of Project Management and Permitting (OPMP) Alaska Coastal Management Program (ACMP) Consistency Determination in favor of the project.

A copy of this GP will be distributed with each Aquatic Farmsite Permit application by the appropriate State office. To initiate the state review process, any person who wishes to perform work under this GP must submit an application for an Aquatic Farm Operations Permit along with the attached Applicability Certification for General Permit 91-7-P, to the appropriate regional office of the ADNR for projects located on State-owned tide and submerged lands or located on privately owned tide and submerged lands.

The State of Alaska will provide the Corps with correspondence related to aquatic farming applications, including start-up packets, decision documents, and quarterly and annual reports during the review process. These documents will provide a means for the Corps to determine if the work proposed is in conformance with the parameters of the GP the need (if any) for a nationwide permit and will constitute notification to the DE.

Upon receipt of the State's Final ACMP Consistency Determination, the Corps will advise the State within 30 days if the applicant does not meet the terms and conditions of the GP. However, at any time during the State's permit review, the DE may, at his discretion, determine that this GP will not be applicable to a specific mariculture proposal. In such cases, the procedures for processing an individual permit in accordance with 33 CFR 325 will be available.

At the end of the State review period, the State shall provide the Corps with an Aquatic Farm Final Decision report. This report shall include the name, location, species and acreage for each Aquatic Farm Permit issued and shall be sent to:

U.S. Army Engineer District, Alaska, Regulatory Branch, CEPOA-CO-R, PO Box 6898, Elmendorf AFB, Alaska 99506-0898, or emailed to the recipients below for the following areas:

For projects east of Resurrection Bay email:  
[john.c.leeds@poa02.usace.army.mil](mailto:john.c.leeds@poa02.usace.army.mil)

For projects including and west of Resurrection Bay email:  
[jack.j.hewitt@poa02.usace.army.mil](mailto:jack.j.hewitt@poa02.usace.army.mil)

This report shall be made available to the public upon request.

Issuance of the required State and Federal permits and approvals listed above will constitute Federal authorization under this GP unless the Corps has determined that an individual permit is required for a specific proposal as noted in the preceding paragraph. If it is determined by ADNR during the initial review of a project potentially covered by this GP, that the proposed activity would have impacts of a scope not typical of projects authorized under this GP, they will inform the Corps that the Coastal Zone Certification originally issued for the GP does not apply for the specific project.

If any of the required State or Federal authorizations are denied, the ADNR, OPMP will inform the Corps and the Corps will inform the applicant that Federal authorization under this GP is denied without prejudice.

CONDITIONS:

The applicant shall be responsible for fulfilling the following conditions:

1. The appropriate National Park Service (NPS) Park Superintendent shall be notified in writing 90 days in advance prior to commencement of any proposed activity that would occur within three miles of a unit of the National Park System. The NPS shall also be consulted 90 days in advance prior to commencement of any proposed activity that would occur within, or could affect a National Historic Landmark or a National Natural Landmark. NPS contact information is attached to this GP.
2. The U.S. Department of the Interior (DOI), Fish and Wildlife Service (USFWS), Regional Director, 1011 East Tudor Road, Anchorage, Alaska 99503, telephone (907) 786-3542, shall be contacted regarding the need for a Special Use Permit prior to any activities within National Wildlife Refuges of Alaska.
3. When adjacent to National Forest system lands, aquatic farm structures shall be located consistent with the existing forest land use management direction. The appropriate National Forest Supervisor's office shall be contacted prior to any activity within one mile of Chugach or Tongass National Forest lands. If the mariculture operation includes a floathouse that would be sited within one mile of National forest lands, written verification that the floathouse is consistent with the existing Forest land use management direction is required. You may contact the Chugach National Forest office at 3301 C Street, Suite 300, Anchorage, Alaska 99503, telephone (907) 743-9500 or one of the three Tongass National Forest offices at the Federal Building, Ketchikan, Alaska 99901 telephone (907) 228-6201 for the Tongass National Forest, Ketchikan Area; 204 Siginaka Way, Sitka, Alaska 99835, for the Tongass National Forest, Chatham Area, telephone (907) 747-4295; or 15 North 12th Street, Post Office Box 309, Petersburg, Alaska 99833, telephone (907) 772-5801 for the Tongass National Forest, Stikine Area.
4. The DOI, Bureau of Land Management office, 222 W. 7th Avenue, Room 148, Anchorage, Alaska 99513, telephone (907) 271-5960, shall be contacted prior to any activity within one mile of Federal lands under its management/ownership.
5. This GP will not apply adjacent to or within one half mile of a designated wilderness or wilderness study area administered by the U.S. Forest Service, NPS, or USFWS, unless permission is obtained from the Federal land manager. Contact the appropriate Federal land manager's office listed under Conditions a, b, or c for further information.

6. The United States Coast Guard (USCG) shall be contacted prior to the construction or placement of any aquaculture structure, floathouse, or mooring buoy under this permit. The permittee must install and maintain, at the permittee's expense, any safety lights and markings prescribed by the USCG, through regulations or otherwise, on the authorized facilities. The USCG may be reached at the following address and telephone number: Commander (oan), 17th Coast Guard District, POST OFFICE Box 25517, Juneau, Alaska 99802-5517; (907) 463-2269.

7. Use of the permitted activity must not interfere with the public's right to free navigation around the aquatic farm structure on all navigable waters of the United States nor be placed in such a fashion as to create a hazard to navigation. Aquatic farm structures, floathouses, or mooring buoys shall not be placed in locations that would hinder safe access to, or use of, existing ports, docks, piers, harbors, boat launch ramps, buoys, floats, piles, or any other existing structures or facilities within navigable waters.

8. Aquatic farm structures shall be constructed and maintained to avoid attracting or entangling marine birds, mammals, or other wildlife. The operation of aquatic farms may subject you to provisions of (1) the Marine Mammal Protection Act (MMPA) of 1972, 16 U.S.C. Sections 1361-1407, and amendments, and; (2) the Migratory Bird Treaty Act (MBTA), 16 U.S.C. Sections 701-718h. Instances of predation by marine birds or sea otters should be reported to the Corps and USFWS. A violation of the MMPA or the MBTA (in either case, confirmed by a judicial determination, or administrative determination having the force of law) shall be grounds to suspend, modify, or revoke this authorization.

a. The MMPA prohibits non-natives from taking (harassing, hunting, capturing, collecting or killing; or attempting to harass, hunt, capture, collect or kill) marine mammals without a permit from the DOI or Department of Commerce.

b. The agencies responsible for enforcing the MMPA and implementing regulations are the USFWS and the National Marine Fisheries Service (NMFS).

c. NMFS regulations at 50 CFR Part 229.7(b) require that all lethal incidental takes of marine mammals must be reported to the nearest NMFS office, in person, by phone or by letter, within 10 days of when the taking occurred.

d. The NMFS may be reached at the following address and phone number: NMFS, Regional Office, Post Office Box 21668, Juneau, Alaska 99802, telephone (907) 586-7235.

e. Should you have any questions regarding the requirements or provisions of the MMPA or implementing regulations, please contact the USFWS at (907) 786-3800, or the NMFS at the above telephone number.

f. To prevent predator entanglement, vertical ropes, lines, wires, etc., shall not be connected by more than one horizontal lead line, long line, rope wire, etc., excluding culture gear constructed of mesh, such as lantern nets or bags.

g. The MBTA prohibits the take of migratory birds, their parts, nests and eggs outside of established legal seasons, limits, and limitations. The agency responsible for enforcing the MBTA and implementing regulations is the USFWS.

9. Aquatic farm structures, excluding structures such as racks and bags used in intertidal areas for beach culture and hardening, shall be located in waters of sufficient depth and secured in a manner to preclude grounding at any tidal stage.

10. All aquatic farm structures shall be sufficiently anchored to hold in storm conditions and/or in swift current.

11. Geoduck tubes are not authorized under this GP. Aquatic Farms associated with installation of geoduck tubes require separate Section 10 authorization. Aquatic Farms requiring seeding and harvesting operations require separate Section 404 authorization. Nationwide 4, Fish and Wildlife Harvesting, Enhancement and Attraction Devices and Activities, authorizes both these types of Section 10 and Section 404 activities.

12. The activity authorized by this GP must be maintained in good condition and in conformance with the terms and condition of this GP. Removal of the structures associated with the authorized activity is required if the site is abandoned. Should the permittee wish to abandon the activity, this office, and all appropriate state and local agencies, must be notified. Abandoned is defined as, "a discontinuance of activity at the site for a period of one year or more". In addition, this office must be notified if the permitted facility is being transferred to a new party.

13. If any previously unknown historic or archeological artifacts or remains are discovered while accomplishing the activity authorized by this permit, the permittee must notify this office immediately of what has been found. The Corps will initiate the Section 106 process to determine if the remains warrant a recovery effort or if the site is eligible for listing in the National Register of Historic Places.

14. Representatives from this office must be allowed to inspect the authorized activity at any time to ensure that it is being or has been accomplished in accordance with the terms and conditions of this GP.

15. Aquatic farm structures and associated floathouses and mooring buoys shall be located to avoid sites where the project could cause detrimental impacts on concentrations of marine mammals, waterfowl and shorebirds, hard-shell clams, eelgrass and kelp beds, fish spawning or migration routes, large wildlife populations, or adjacent to brown and black bear concentration areas and know bear travel corridors. Specifically, avoid siting:

a. Within a 300-foot radius of the mouths of anadromous fish streams at Mean Lower Low Water; these streams are listed in the State's "Catalog of Waters Important for Spawning, Rearing or Migration of Anadromous Fishes".

b. Within fish hatchery Special Harvest Areas or Terminal Harvest Areas established by the Alaska Department of Fish and Game.

Information concerning paragraphs 1 and 2 above can be obtained from one of the two Alaska Department of Fish and Game offices, Habitat Division, 333 Raspberry Road, Anchorage, Alaska 99518-1599, telephone (907) 267-2284; or Habitat Division, Post Office Box 2526, Juneau, Alaska 99802-5526, telephone (907) 465-4105.

c. Within one mile of harbor seal haulout concentration areas or pupping areas.

d. Within three miles of Steller sea lion haulout concentration areas or pupping areas.

Information concerning paragraphs c. and d. above can be obtained from the NMFS, Regional Office, Post Office Box 21668 Juneau, Alaska 99802, telephone (907) 586-7235;

- e. Within one mile of seabird colonies.
- f. Within one mile of walrus haulouts.
- g. Within 330 feet of the base of the tree or structures supporting bald eagle nests.
- h. If within sight of an active bald eagle nest, no work rafts on which equipment is worked on shall be present and no equipment haulouts shall occur within 660 feet of the nest.
- i. Within 3 miles of National Wildlife Refuges only weathervane scallops (*Patinopecten caurinus*), rock scallop (*Crassodoma giaantea*) pink scallop (*Chalamys hericia*), Pacific oysters (*Crassostrea gigas*), blue mussels (*Mvtilus edulis*), and various kelp (*Macrocystis* spp., *Laminaria* spp., and *Porphyra* spp.) may be grown.

Information concerning paragraphs (a) through (i) above can be obtained from the USFWS, Ecological Services Anchorage, 605 West Fourth Avenue, Room 62, Anchorage, Alaska 99501-2249, telephone (907) 271-2888 if the proposed project is located west of Cape Suckling; or the USFWS, Ecological Services Juneau, 3000 Vintage Park Boulevard, Suite 201, Juneau, Alaska 99801-7100, telephone (907) 780-1160, if the proposed project is located east of Cape Suckling.

16. No mariculture operation shall use any chemicals that are not approved by the Food and Drug Administration. Aquatic farm structures (i.e., rafts, booms, long lines) shall not be treated with any preservatives, as these toxic chemicals may be absorbed and accumulated within the shellfish, which are to be sold for human consumption. For additional information contact the Alaska Department of Environmental Conservation, South-central Regional office, 555 Cordova Street, Anchorage, Alaska 99503, telephone (907) 269-7638.

17. The harvesting operations associated with aquaculture activities have the potential to generate waste which attracts birds (gulls) that are potentially hazardous to flying aircraft. Proposed sites within 5 miles of a public airport runway shall be coordinated with the Federal Aviation Administration, Alaskan Region, Airports Division, 222 W. Seventh Avenue, #14, Anchorage, Alaska 99513-7587, telephone (907) 271-5438.

18. Aquatic farm structures or associated floathouses or mooring buoys shall not be placed in any unacceptable areas specified by the State of Alaska.

19. Aquatic farm structures or associated floathouses or mooring buoys shall not be placed in areas prohibited by Federal, State, or local law.

20. Floathouses associated with mariculture operations are authorized by this GP, subject to the preceding conditions, and shall be:

- a. Sited a minimum of 300 feet outside of the aquatic farmsite boundary.
- b. Limited to occupancy by no more than 4 persons.
- c. Shall be equipped with USCG approved marine sanitation devices.

21. Mooring buoys associated with mariculture operations and authorized by this GP shall be colored white with a three to five-inch wide blue horizontal band. The blue band shall be separated from the water's surface by a minimum of three inches of white so that the blue band is distinguishable from the water.

LIMITS OF THIS AUTHORIZATION:

- a. This permit does not obviate the need to obtain other Federal, State, or local authorizations required by law.
- b. This permit does not grant any property rights or exclusive privileges.
- c. This permit does not authorize any injury to the property or rights of others.
- d. This permit does not authorize interference with any existing or proposed Federal project.

LIMITS OF FEDERAL LIABILITY:

In issuing this permit, the Federal Government does not assume any liability for the following:

- Damages to the permitted project or uses thereof as a result of other permitted or unpermitted activities or from natural causes.
- Damages to the permitted project or uses thereof as a result of current or future activities undertaken by or on behalf of the United States in the public interest.
- Damages to persons, property, or to other permitted or unpermitted activities or structures caused by the activity authorized by this permit.
- Design or construction deficiencies associated with the permitted work.
- Damage claims associated with any future modification, suspension, or revocation of this permit.

REEVALUATION OF PERMIT DECISION:

This office may reevaluate its decision on this permit at any time the circumstances warrant. Circumstances that could require a reevaluation includes, but are not limited to the following:

- The general permittee fails to comply with the terms and conditions of this permit.
- The information provided by the permittee in support of the permit application proves to have been false, incomplete, or inaccurate.
- Significant new information surfaces which this office did not consider in reaching the original public interest decision.
- Such a reevaluation may result in a determination that it is appropriate to use, on an individual or generic basis, the suspension, modification, and revocation procedures contained in 33 CFR 326.7 or enforcement procedures, such as those contained in 33 CFR 326.4 and 326.5. The referenced enforcement procedures provide for the issuance of an

administrative order requiring the permittee to comply with the terms and conditions of the permit and for the initiation of legal action where appropriate. The permittee will be required to pay for any corrective measures ordered by this office, and if the permittee fails to comply with such directive, this office may in certain situations (such as those specified in 33 CFR 209.170) accomplish the corrective measures by contract or otherwise and bill the permittee for the cost.

ADDITIONAL INFORMATION:

This GP does not require direct written notification to the DE prior to commencement of the authorized activity. This GP does not require written verification from the DE that the proposed activity is authorized. Nevertheless, a general permittee may choose to request in writing a verification that their proposed activity is authorized by a specific GP. To request written verification check the appropriate box(es) on the Applicability Certification for GP 91-7-P form. Alternatively, the request can be submitted in writing directly to: U.S. Army Engineer District, Alaska, Regulatory Branch, CEPOA-CO-R, Post Office Box 6898, Anchorage, Alaska 99506-0898.

To the extent that the Corps' limited resources will allow, the Alaska District office will attempt to respond to such a request for verification in a timely manner. If the general permittee's written request for verification is complete (including all required state authorizations), accurate, and made in good faith, and the Alaska District does not respond to such inquiry within 30 days of the receipt of the request and copies of the required state authorizations, the general permittee may proceed with the activity. In such a case, the general permittee's authorization can only be suspended, modified, or revoked in accordance with the procedure set forth in 33 CFR 325.7.

On the other hand, if the Corps later determines that the general permittee's written request for verification was inaccurate, incomplete or not made in good faith, and that the activity was not in fact authorized by the GP, the Federal Government may bring an appropriate enforcement action against the general permittee. Section 12 of the Rivers and Harbors Act provides civil penalties of not less than \$500, and not more than \$2,500 per day of violation or by imprisonment of up to one year, or both.
