SPECIAL PUBLIC NOTICE 06-445-REVISION

CORRECTION AND CLARIFICATION TO THE
ALASKA INTERIM REGIONAL SUPPLEMENT TO THE 1987 WETLAND DELINEATION MANUAL

On March 20, 2006 the U.S. Army Corps of Engineers, Alaska District, announced the publication and trial implementation period of the Alaska Interim Regional Supplement (Supplement) to the 1987 Wetland Delineation Manual (1987 Manual) in Special Public Notice (SPN) 2006-445. The Supplement, which was developed by wetland delineation experts from state and Federal agencies and academe with experience within Alaska, was published with errors in Table 2 "Bryophytes That Are Highly Associated with Wetlands In Interior and Southcentral Alaska" found on page 9. You may download the corrected version from our Regulatory Headquarters' website at <http://www.usace.army.mil/inet/functions/cw/cecwo/reg/erdc-el-tr-06-3-web.pdf> Specifically, the species Bryum psuedotriquetrum and Rhizomnium punctatum has been deleted, Calypogeia spp. (hepatic) was changed to Calypogeia sphagnicola (hepatic), Polytrichum strictum was added to the list, and the second entry of Sphagnum squarrosum was removed.

We are developing an interactive data form that will be placed on the Alaska District website, but until it is available you may download a .pdf version of the new data form at <http://www.poa.usace.army.mil/reg/NeedPermit#htm.Delineating>

As stated in the original SPN, the entire Supplement, including data forms, and field evaluation questionnaire, as well as the independent peer review report and response document, the Environmental Assessment/Finding of No Significant Impacts prepared under the National Environmental Policy Act, and copies of public comments are available on the Regulatory Homepage Website at http://www.usace.army.mil/inet/functions/cw/cecwo/reg/reg_supp.htm
