Office of the National Coordinator for
Health Information Technology

U.S. DEPARTMENT OF HEALTH & HUMAN SERVICES
OFFICE OF THE NATIONAL COORDINATOR FOR
HEALTH INFORMATION TECHNOLOGY

Nationwide Health Information Network Third Public Forum

***Prototypes and
Business Models***

***John W. Loonsk, M.D.
January 25, 2007***

Agenda

U.S. DEPARTMENT OF HEALTH & HUMAN SERVICES
NATIONAL CENTER FOR MEDICAL RESEARCH & STATISTICS

- Nationwide Health Information Network
 - Where we are
 - Where we are going
- Forum Agenda
 - Demonstrations
 - Business models

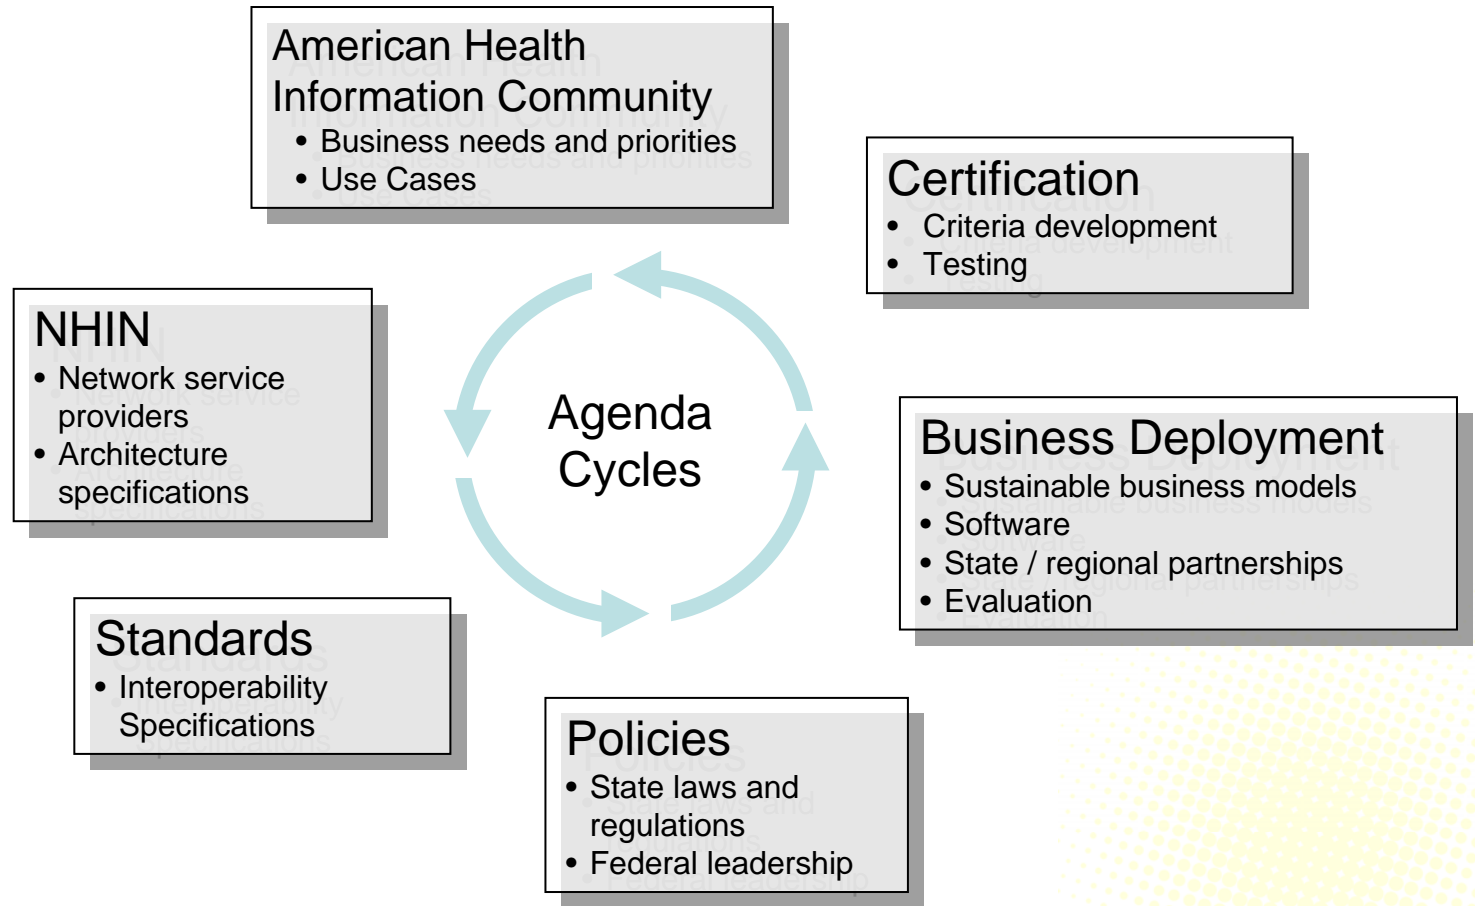

Nationwide Health Information Network Initiative

From the National HIT Agenda:

- ...foster widely available services that facilitate the accurate, appropriate, timely, and secure exchange of health information
- ...information that follows the consumer and supports clinical decision making

The NHIN and the National Health IT Agenda

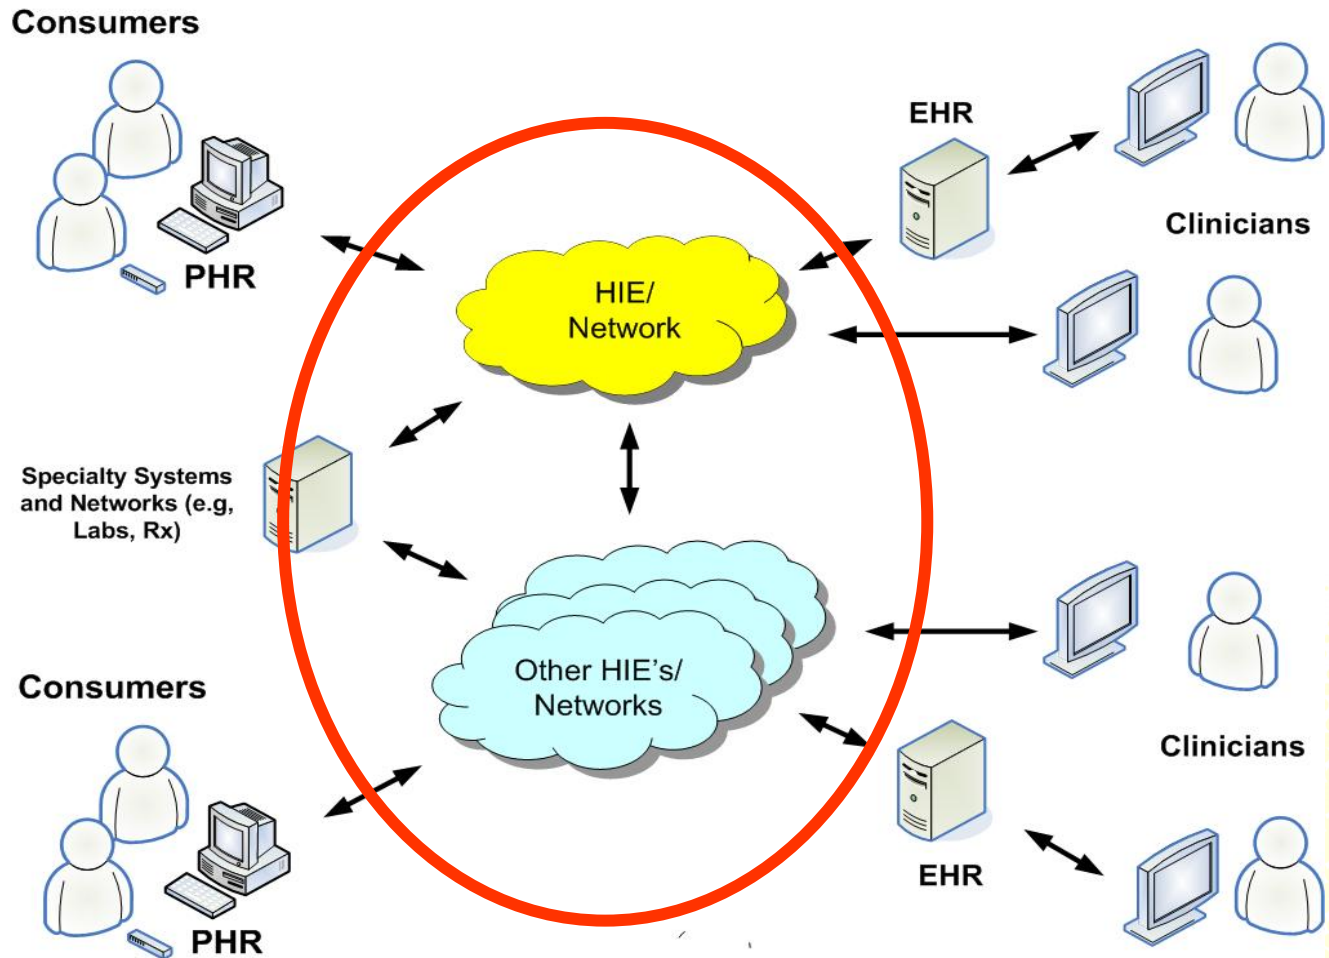

A Common Inter-Network Architecture

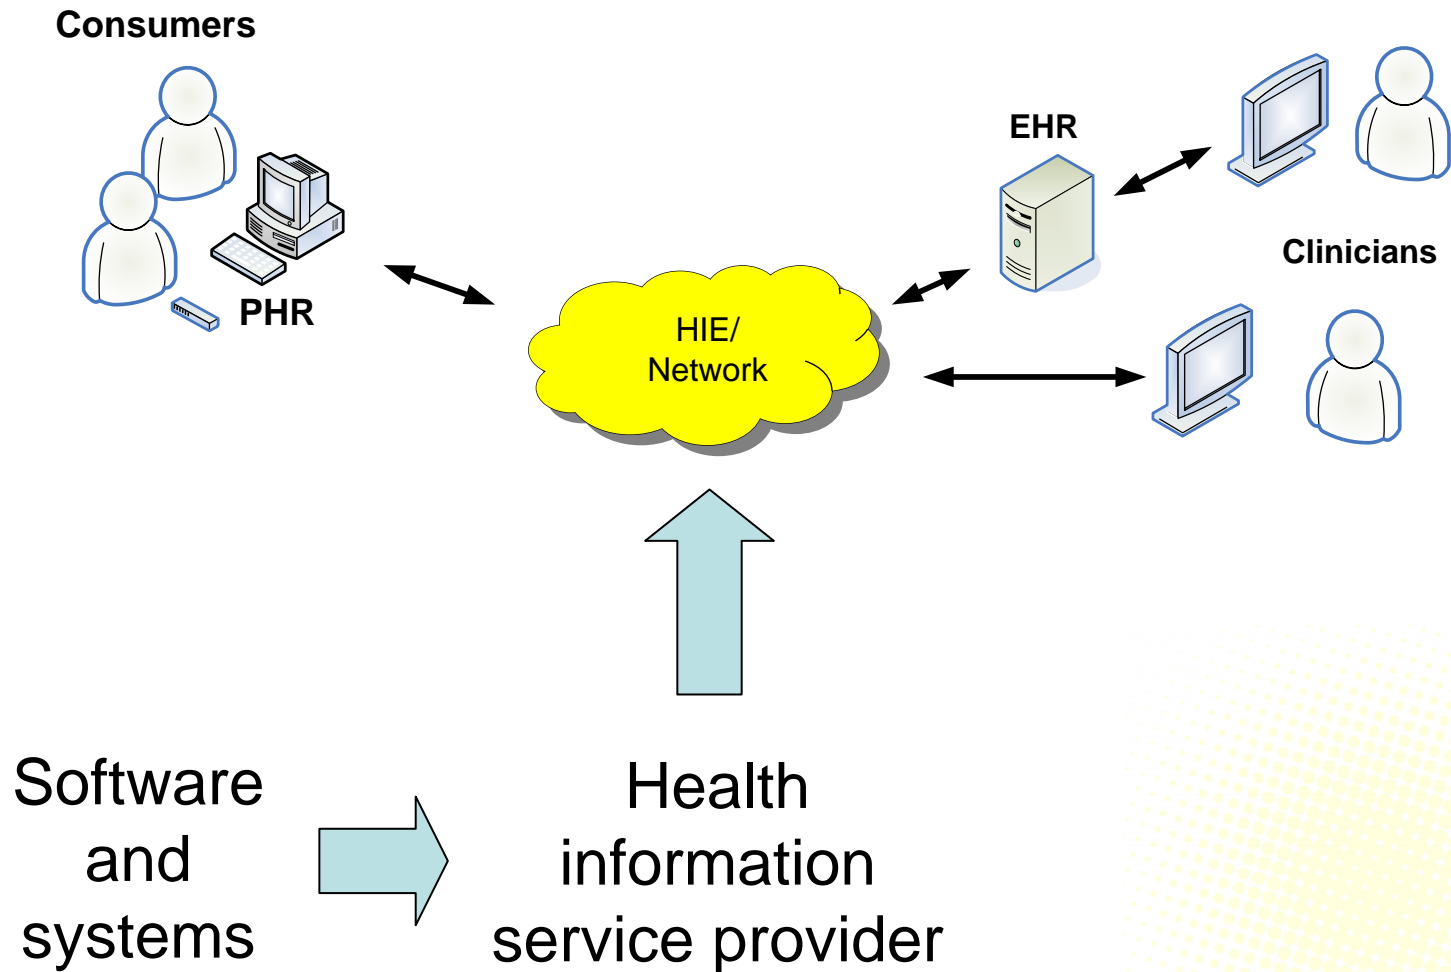

A network of networks

- Connect:
 - Providers (EHR's)
 - Consumers (PHR's)
- Interconnect:
 - State, regional, and non-geographic health information exchanges
 - Networks oriented to specific functions
- Develop market for network services providers
- Provide a secure foundation for growth and innovation

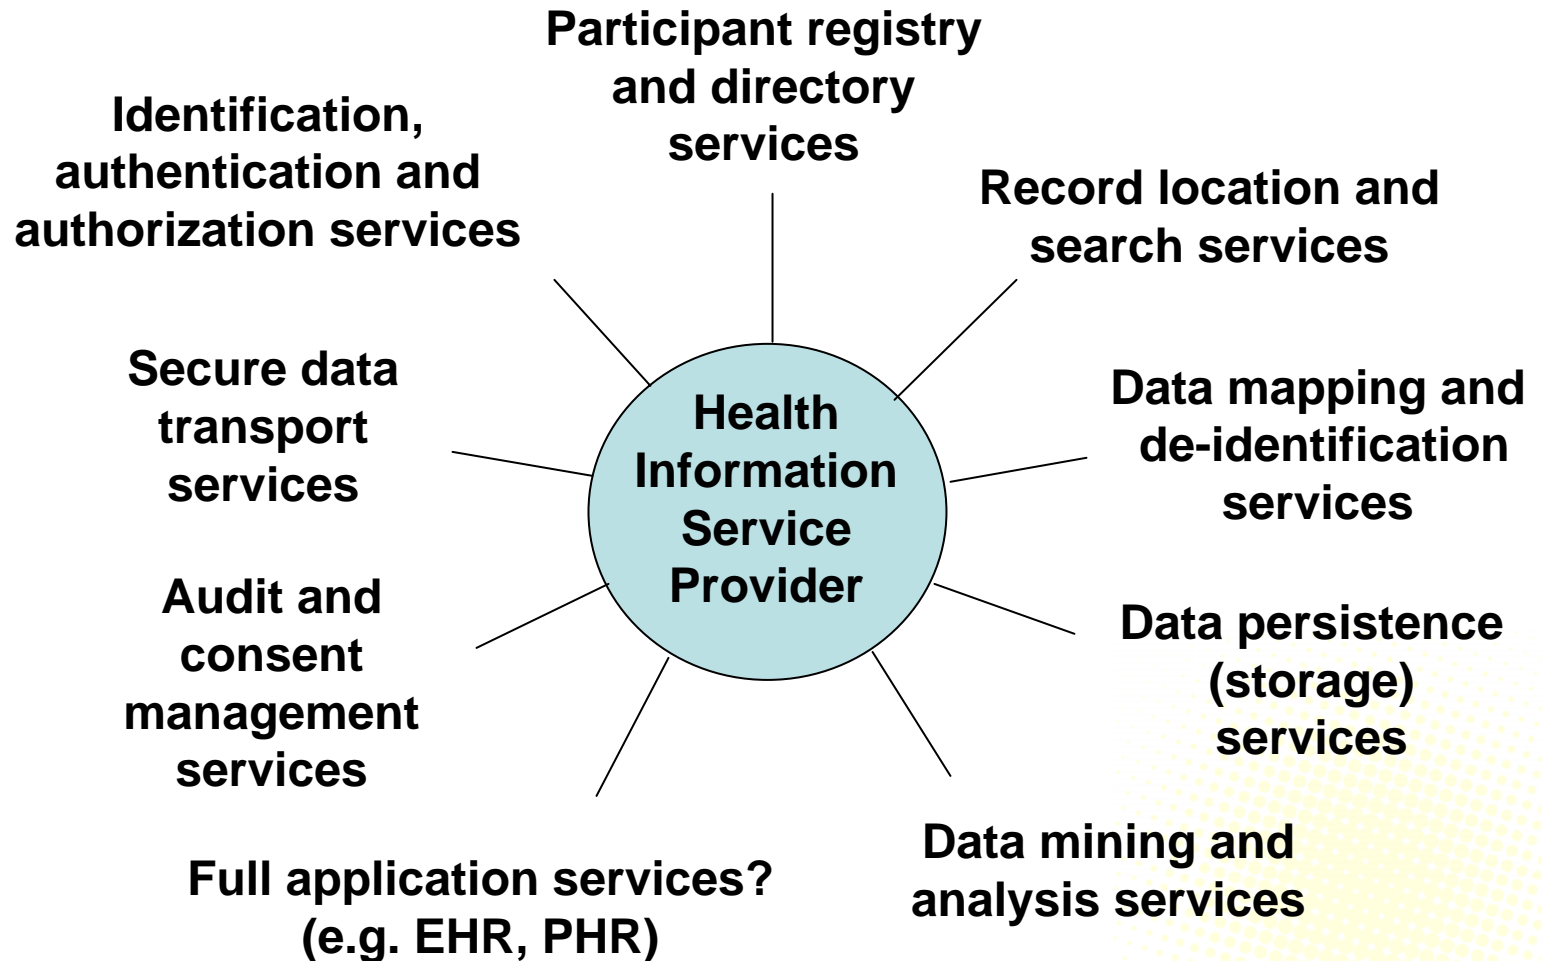

Network of Networks

Health information service providers

Health information service provider - services

“Steps” to the NHIN

U.S. DEPARTMENT OF HEALTH & HUMAN SERVICES
NATIONAL HEALTH INFORMATION STANDARDS

NHIN vision and breakthroughs / use cases

- Initial architecture
 - Validating prototypes
 - Standards needs
 - Policy implications

More business needs / use cases

- Refined architecture
 - Trial implementations
 - Standards needs
 - Policy implications
 - » Certification criteria

More business needs / use cases

- Initial NHIN Services
 - ...

2006 Products become 2007 Guidance

- Standards
 - Three HITSP Interoperability Specifications
 - 30 standards and over 800 pages of implementation guidance
- Security models and considerations
 - Prototype architectures
 - National Committee on Vital and Health Statistics recommendations
 - AHIC Confidentiality, Privacy and Security WG recommendations
- Public input and discussion
 - NHIN Forum #1 - Functional Requirements
 - NHIN Forum #2 - Security and Services
 - NHIN Forum #3 - Prototypes and Business Models

2006 Products become 2007 Guidance (Use Cases)

Consumer

Existing Use Cases

- Consumer Empowerment - Registration and Medication History

New Use Case

- **Consumer Access to Clinical Information**

Provider

Existing Use Cases

- EHR – Labs

New Use Case

- **Emergency Responder EHR**
- **Medication Management**

Population

Existing Use Cases

- Biosurveillance

New Use Case

- **Quality**

2006 Products become 2007 Guidance

- **Functional requirements**
 - Consortia and National Committee on Vital and Health Statistics
- **Certification Criteria and Testing**
 - Ambulatory Care
 - Inpatient
 - Network
- **Business models**
 - Cost and revenue
 - Deployment
 - Operations
- **Gartner report on technical architectures**
 - March 2007
 - Focus on common interfaces

Elements of the health information exchange challenge

- Engage providers and systems
- Advance HIT adoption
- Involve consumers
- Provide security
- Have open “governance”
- Establish trust
- Develop sustainable funding
- Provide capable business services and operations
- Develop technical capabilities and operations

2007 – “Trial Implementations”

- Next “step” to this formula
- Bring together:
 - 2006 Products
 - Technical expertise and accomplishments of the consortia
 - State and regional health information exchanges
 - Focus on interfaces:
 - Between health information service providers
 - Linking health information service providers and provider organizations/systems
 - With specialty networks and systems
 - To government health systems
 - A collaboration of awardees
- RFP available in March/April
- Awards made in June/July

Demonstration Objectives / What to Expect

- NHIN Prototype architectures
 - Core network services
 - Consumer Empowerment
 - Electronic Health Record
 - Biosurveillance
- Put a “face” on NHIN and breakthroughs
 - Asked to use live or test systems - not simulations
 - Specificity and possibilities
- Prototypes represent part of the NHIN effort
 - Software validation of the architectures
 - “Applications” are not the architectures

Key Issues In the Demonstrations

- Connection of commercial and “tethered” PHR’s to the NHIN
- Opportunities for consumer management of PHR data
- Consideration for how consumer’s could manage the exchange of data on the NHIN
- Needs for tracking providers associated with patients
- Routing of lab data to the appropriate EHR
- Portal and EHR based retrieval of historical results
- Notifications of when new data are available
- Result routing to “non-ordering” providers of care
- Comparability of data across provider sites

Forum Agenda - Thursday

Opening Plenary

Introduction to Consortia Prototype
Demonstrations

Prototype Demonstrations

Accenture

Northrop Grumman

Lunch

Prototype Demonstrations

Computer Sciences Corporation

IBM

***Informal, interactive demonstration sessions
with the Consortia (4 concurrent sessions)***

Forum Agenda - Friday

U.S. DEPARTMENT OF HEALTH & HUMAN SERVICES
NATIONAL HEALTH INFORMATION STANDARDS BOARD

Business Model Plenary Session

- Overview and Context of Business Models for NHIN
- Consortia Presentations of Business Models
- Business Models from the State/Regional Health Information Exchange Perspective
- Reactor Panel

Closing Remarks
