

commenter urged APHIS to complete its review of the data supporting a cold treatment-only option for treating cherries. The commenter did not, however, question the efficacy of the combination treatment or otherwise suggest that the overall conclusions of the analysis and the Administrator's determination of risk should be changed.

Therefore, in accordance with the regulations in § 319.56–4(c)(2)(ii), we are announcing our decision to begin issuing permits for the importation into the continental United States and Hawaii of sweet cherries from Australia subject to the following conditions:

- The fruit must be part of a commercial consignment as defined in 7 CFR 319.56–2.

- The fruit must either originate from an APHIS-approved fruit fly free area or be treated in accordance with the phytosanitary treatments regulations in 7 CFR part 305. This may entail treatment with T108-a-1/2/3 [fumigation with methyl bromide followed by cold treatment as provided in 7 CFR 305.10(a)] or irradiation using 150 Gy as the minimum absorbed dose and meeting all other relevant requirements in 7 CFR 305.31.

- Each consignment must be accompanied by a phytosanitary certificate issued by the Australian National Plant Protection Organization (NPPO) certifying that the fruit either received the required treatment or originated from a fruit fly free area. The NPPO must also include an additional declaration in the phytosanitary certificate that states: "The fruit in this shipment was inspected and found free of *Epiphyas postvittana*."

- The fruit will also be subject to inspection at the port of entry should inspectors determine that such inspection is necessary.

These conditions will be listed in the fruits and vegetables manual (available at <http://www.aphis.usda.gov/>

import_export/plants/manuals/ports/downloads/fv.pdf). In addition to these specific measures, the sweet cherries will be subject to the general requirements listed in § 319.56–3 that are applicable to the importation of all fruits and vegetables.

Done in Washington, DC, this 25th day of January 2008.

Kevin Shea,

Acting Administrator, Animal and Plant Health Inspection Service.
