Notes applicable to this table:

1. The source for this table is ACF-801 data for FFY 2004.
2. The "adjusted" numbers represent the number funded through CCDF only. The "adjusted" number is the raw or "unadjusted" number reported by the State multiplied by the pooling factor as reported on the ACF-800. A few States have indicated that the pooling factor reported on the ACF-800 is not applicable to the ACF-801. This report takes all these factors into consideration in calculating the "adjusted" numbers.
3. The reported results shown above have been rounded to the nearest 100. The national numbers are simply the sum of the State and Territory numbers.
4. All states provide an actual count of families served. However, the number of children served is not a direct count based on the fact that some States elect to submit sample data versus full population data. For States that submit samples, the ratio of children-to-families is determined and then multiplied by the number of families served to obtain an estimate of the number of children served.
5. Guam and Puerto Rico were unable to report ACF-801 case-level data before report preparation.

Notes applicable to this table:

1. The source for this data is ACF-800 data from FFY 2004.
2. A "0%" indication often means the value is less than 0.5% rather than actually zero.
3. In a few instances, the sum of the categories may not appear to add up to exactly 100% because of rounding.
4. Oklahoma was unable to report FFY 2004 ACF-800 data before report preparation.

Notes applicable to this table:

1. Source for this table is the ACF-800 data for FFY 2004.
2. NA=Not applicable, does not offer grants or contracts for subsidized child care slots.
3. A blank cell indicates that the State did not provide a response.
4. Oklahoma was unable to report FFY 2004 ACF-800 data before report preparation.

**CCDF
Preliminary Estimates
Percentage of Children Served By Age Group (FFY 2004)**

Notes applicable to this chart:

1 The source for this table is ACF-801 data for FFY 2004.

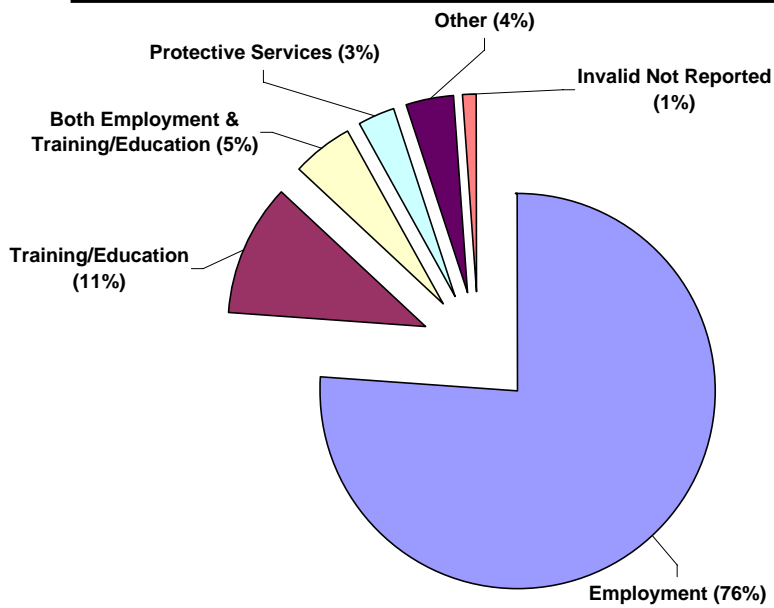

2 National percentages are based on the "adjusted" national numbers unless otherwise indicated. In other words, the national percentages are equivalent to a weighted average of the State percentages, where the weights are the "adjusted" number of families or children served as appropriate.

3 Puerto Rico and the Virgin Islands were unable to report ACF-801 case-level data before report preparation.

4 Alaska's population reported does not accurately reflect the population served due to sampling difficulties the State is trying to resolve.

5 In some instances, the Total may appear to be slightly more or less than 100% because of rounding.

**CCDF
Preliminary Estimates
Percentage of Families Served By Reason for Care (FFY 2004)**

■ Employment (76%)	■ Training/Education (11%)
■ Both Employment & Training/Education (5%)	■ Protective Services (3%)
■ Other (4%)	■ Invalid Not Reported (1%)

Notes applicable to this chart:

1 The source for this table is ACF-801 data for FFY 2004.

2 National percentages are based on the "adjusted" national numbers unless otherwise indicated. In other words, the national percentages are equivalent to a weighted average of the State percentages, where the weights are the "adjusted" number of families or children served as appropriate.

3 The Invalid/Not Reported only includes family records with an invalid or missing ACF-801 data element #6.

4 Several States only capture the primary reason for receiving services and therefore do not report any families in the Both Employment and Training/Education category.

5 Inconsistencies in income reporting appear in several States between ACF-801 element 6 (reason for receiving a subsidy, element 9 (total income for determining eligibility), and elements 10 through 15 (the sources of income). Records containing such inconsistencies are included in the measures above.

6 Puerto Rico and the Virgin Islands were unable to report ACF-801 case-level data before report preparation.

7 Alaska's population reported does not accurately reflect the population served due to sampling difficulties the State is trying to resolve.

8 In some instances, the Total may appear to be slightly more or less than 100% because of rounding.
