

Summary Report of Occurrences Reviewed

From July 14 – 21, 2006

Summary: 37 occurrences at 17 sites reviewed during this period.

Significant Occurrences (2)

Near Misses – 2 occurrences at 2 sites

- ***EM – East Tennessee Technology Park (Significance Category 3).*** On July 14, 2006, two electricians were observed working in the K-25 Pipe Gallery without wearing fall protection, as required. The area in question was a permanently installed catwalk with no hand rails. Upon notification of the violation, the workers obtained the required PPE and returned to work.
- ***RW – Yucca Mountain Project (Significance Category 3).*** On July 14, 2006, two employees approached the first floor elevator in Building 14, and unexpectedly found that the elevator doors were fully opened with no elevator car in a position to accept passengers. The doors were open to expose the elevator pit, however, there were no barricades, warning signs, or service personnel in the immediate area. Preliminary indications are that the elevator doors were being held open by a pen jammed into the door, and the bottom of the passenger car was approximately 10 feet above the two employees. There were no injuries.

Other Occurrences (35). See Table (Note: The Table includes the occurrences listed above).
