

DoD RFID Policy

April 7, 2004

**Mr. Michael W. Wynne
Under Secretary of Defense
(Acquisition Technology & Logistics)**

AT&L Goal 2 - Logistics: Integrated and Efficient

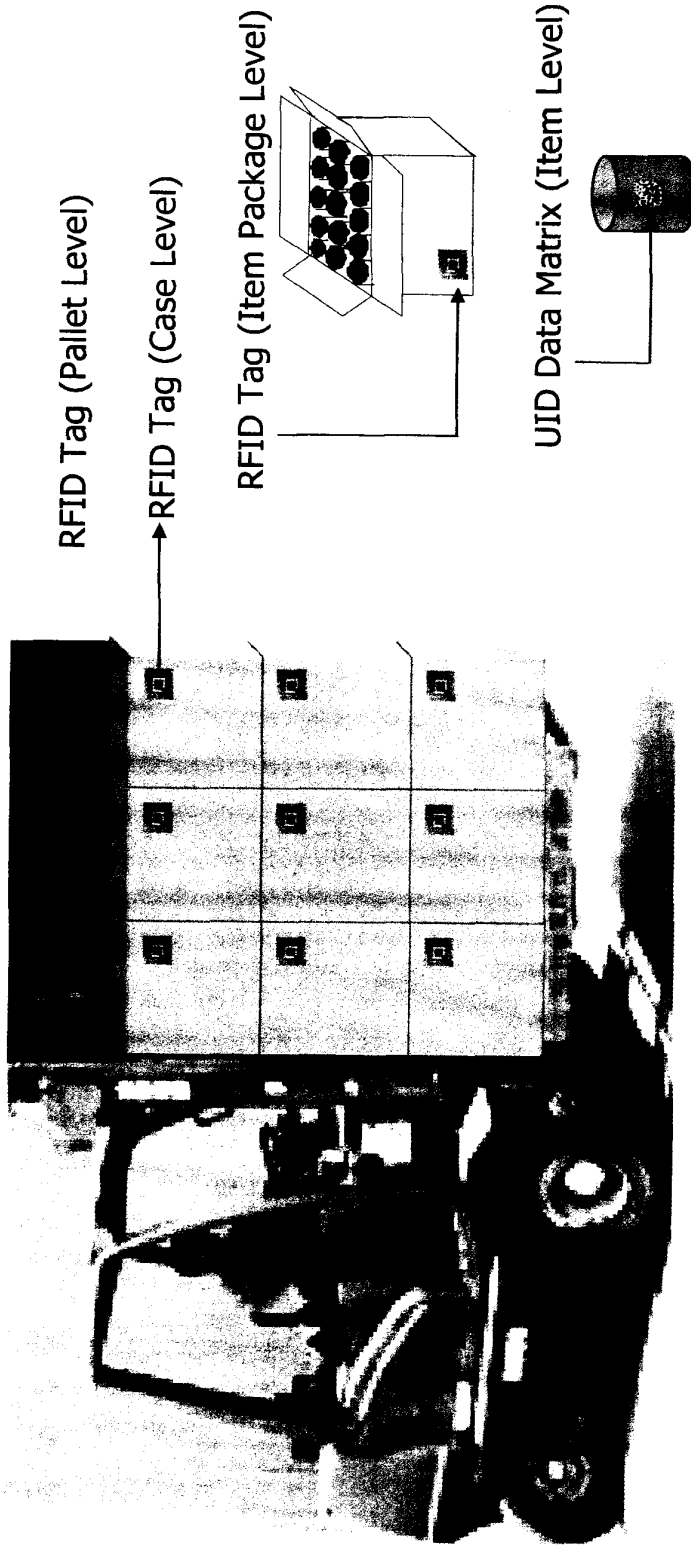

- ✓ Enterprise Integration
- ✓ Expand End-to-End Policies
- ✓ Reliable Delivery
- ✓ Weapon System Support
- ✓ Performance Based Logistics
- ✓ Available Weapon Systems
- ✓ Design OUT Logistics
- ✓ Reduce Footprint
- ✓ Reduce Costs

**Logistics:
Integrated and
Efficient**

UID-RFID Relationship

RFID Tags are attached to packages to increase in transit visibility. UID Data Matrices are attached to items to increase item traceability and valuation.

The case for RFID

DoD considers the implementation of RFID to be a strategic imperative, necessary to streamline the supply chain to the warfighter. RFID will:

- ✓ Enable hands-free processing of materiel
- ✓ Provide enhanced asset visibility to the Combatant Commanders
- ✓ Facilitate the implementation of UID

Set the foundation for future supply chain improvements... TODAY!
